The type and quality of each lot of farmers stock peanuts acquired by CCC as a result of a loan or purchase shall be determined at the time of delivery to CCC by a Federal-State inspector authorized or licensed by the Secretary, U.S. Department of Agriculture. The cost of such determination shall be assumed by the producer.

Effective date. August 20, 1973.

Signed at Washington, D.C., on August 13, 1973.

KENNETH E. FRICK,
Executive Vice President,
Commodity Credit Corporation.

[CCC Grain Price Support Regs., 1973-Crop Peanut Farm-Stored Loan and Purchase Supp.]

PART 1421—GRAIN AND SIMILARLY HANDLED COMMODITIES

Subpart—1973-Crop Farm-Stored Peanut Loan and Purchase Program

On page 4478 of the FEDERAL REGISTER of February 14, 1973, there was published a notice of proposed rulemaking relating to a loan and purchase program for 1973-crop peanuts.

Interested persons were given until March 9, 1973, to submit written comments, suggestions, or objections regarding the proposed program. None of the written comments, suggestions or objections received pertained to the aspects of the loan and purchase program covered by this subpart.

The General Regulations Governing Price Support for the 1970 and Subsequent Crops of Grain and Similarly Handled Commodities (35 FR 7363 and 7781) and any amendments thereto (hereinafter referred to as "the general regulations") and the 1970 and Subsequent Crops Peanut Farm-Stored Loan and Purchase Supplement (35 FR 12706) and any amendments thereto (hereinafter referred to as "the continuing supplement"), which contain regulations of a general nature with respect to loan and purchase operations, are further supplemented by revising §§ 1421.291–1421.294 to read as follows, effective as to the 1973 crop of peanuts. The material previously appearing in these sections remains in full force and effect as to the crops to which it was applicable.

Sec.
1421.291 Purpose.
1421.292 Availability.
1421.293 Maturity of loans.
1421.294 Loan and purchase rates.

AUTHORITY: The provisions of this subpart issued under 62 Stat. 1070, as amended, 15 U.S.C. 714 (b) and (c); 63 Stat. 1051, as amended, 7 U.S.C. 1441, 1421, 1423, 1425.

§ 1421.291 Purpose.

This supplement, together with the applicable provisions of the general regulations and the provisions of the continuing supplement, apply to farm-stored loans and purchases for the 1973 crop of peanuts.

§ 1421.292 Availability.

(a) *Farm-stored loans.* Producers must request a loan on 1973 crop eligible peanuts on or before March 31, 1974.

(b) *Purchases.* Producers desiring to offer eligible peanuts not under loan for purchase must execute and deliver to the appropriate county ASCS office, on or before April 30, 1974, a Purchase Agreement (Form CCC-614) indicating the approximate quantity of 1973-crop peanuts he may sell to CCC.

§ 1421.293 Maturity of loans.

Unless demand is made earlier, farm-stored loans on farmers' stock peanuts will mature on April 30, 1974.

§ 1421.294 Loan and purchase rates.

(a) *Loan rate.* Subject to the discounts specified in paragraph (b) of this section, the loan rates for farmers' stock peanuts placed under farm-stored loan shall be the following rates by types per ton:

Type:	*Dollars [1] per ton*
Virginia	317
Runner	314
Southeast Spanish	305
Southwest Spanish	301
Valencia (suitable for cleaning and roasting in southwest) [2]	317

[1] These rates may be increased. The increase, if any, will be made by an amendment to this section issued shortly after August 1, 1973.

[2] The price for all Valencia-type peanuts in the Southeast and Virginia-Carolina areas and for those Valencia-type peanuts in the Southwest area which are not suitable for cleaning and roasting will be the same as for Spanish-type peanuts in the same area.

(b) *Location adjustments to support prices.* The loan rates specified in paragraph (a) of this section shall be subject to the following discounts for farmers' stock peanuts placed under a farm-stored loan in the States specified where peanuts are not customarily shelled or crushed:

State:	*Dollars per ton*
Arizona	25
Arkansas	10
California	33
Louisiana	7
Mississippi	10
Missouri	10
Tennessee	25

(c) *Settlement values.* The support prices, premiums, and discounts for use in computing the settlement value, under § 1421.289(b)(2) of the continuing supplement, of peanuts acquired by CCC under loan or purchase shall be those specified in § 1446.11 of the 1973-crop peanut warehouse storage loan and sheller purchase supplement, including the location adjustments specified therein for peanuts delivered to CCC in States where peanuts are not customarily shelled or crushed.

Effective date. These regulations shall be effective on August 20, 1973.

KENNETH E. FRICK,
Executive Vice President,
Commodity Credit Corporation.

AUGUST 13, 1973.

Title 18—Conservation of Power and Water Resources

CHAPTER I—FEDERAL POWER COMMISSION

SUBCHAPTER A—GENERAL RULES

[Docket No. R-362; Order No. 383]

PART 2—GENERAL POLICY AND INTERPRETATIONS

Reliability and Adequacy of Electric Service—Reporting of Data—Participation of Regulatory Personnel in Regional Councils; Correction

APRIL 18, 1973.

Order No. 383-3 issued March 15, 1973, Docket No. R-362, published in the FEDERAL REGISTER March 22, 1973, 38 FR 7455: Paragraph denominated Item 1, 5th line, sentence thereof should be amended so as to read as follows:

The term energy was not defined, e.g., "gross energy," gross generator output, or "net energy," net generation, plus energy transfers received, minus energy transfers delivered. Thus, "net energy" corresponds to the "Net Energy for Load" definition as used in FPC Form 12 reports.

KENNETH F. PLUMB,
Secretary.

Title 41—Public Contracts and Property Management

CHAPTER 114—DEPARTMENT OF THE INTERIOR

PART 114–35—TELECOMMUNICATIONS

Subpart 114–35.12—Major Changes and New Installations

Pursuant to the authority of the Secretary of the Interior contained in 5 U.S.C. 301 and section 205(c), 63 Stat. 390; 40 U.S.C. 486(c), Subpart 114–35.2 of Chapter 114, Title 41 of the Code of Federal Regulations, is amended as set forth below.

As this amendment relates to matters of internal Department policy, the public rule-making process is waived and this amendment shall become effective August 20, 1973.

JAMES T. CLARKE,
Assistant Secretary of the Interior.

AUGUST 14, 1973.

Section 114–35.204(a)(1) is revised to read as follows:

(a) • • •

§ 114–35.204 Submission of changes.

(a) • • •

(1) (i) Automatic Call Distributing Systems or any communication device which automatically distributes incoming calls.

(ii) Automatic answering machines or any device designed to offer automatic answering and/or automatic telephone announcing, and/or recording.

(iii) Call Diverters or any device designed to automatically transfer incoming telephone calls to another, pre-determined, telephone number.

(iv) Telephone conference equipment, i.e., any device which provides the capability of simultaneous conversation on two or more lines.

• • • • • •

Title 31—Money and Finance: Treasury

CHAPTER II—FISCAL SERVICE, DEPARTMENT OF THE TREASURY

SUBCHAPTER A—BUREAU OF ACCOUNTS

PART 260—SHIPMENT OF VALUABLES PURSUANT TO THE GOVERNMENT LOSSES IN SHIPMENT ACT

Promulgation of Revocation; Correction

A revocation of 31 CFR Part 260 appeared on Tuesday, July 10, 1973, at 38 FR 18372. That item was dated July 2, 1973, and was signed by John K. Carlock, Fiscal Assistant Secretary.

Inadvertently the revocation of Part 260 was not countersigned by the United States Postal Service to show its concurrence, in accord with section 1 of the Government Losses in Shipment Act (40 U.S.C. 721) and with section 3(a) of Executive Order 10289 of September 17, 1951 (3 U.S.C. 301 note). Therefore, the countersignature of the Postal Service to this correction notice shall be deemed a countersignature and concurrence to the revocation of 31 CFR Part 260 as it appeared at 38 FR 18372.

[SEAL] JOHN K. CARLOCK,
Fiscal Assistant Secretary.

Dated August 3, 1973.

ROGER P. CRAIG,
Deputy General Counsel
United States Postal Service.

Dated August 13, 1973.

[FR Doc.73-17297 Filed 8-17-73;8:45 am]

Title 14—Aeronautics and Space

CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

SUBCHAPTER F—AIR TRAFFIC AND GENERAL OPERATING RULES

[Reg. Docket No. 13128; Amdt. 95-236]

PART 95—IFR ALTITUDES

Miscellaneous Amendments

The purpose of this amendment to Part 95 of the Federal Aviation Regulations is to make changes in the IFR altitudes at which all aircraft shall be flown over a specified route or portion thereof. These altitudes, when used in conjunction with the current changeover points for the routes or portions thereof, also assure navigational coverage that is adequate and free of frequency interference for that route or portion thereof.

As a situation exists which demands immediate action in the interest of safety, I find that compliance with the notice and procedure provisions of the Administrative Procedure Act is impracticable and that good cause exists for making this amendment effective within less than 30 days from publication.

In consideration of the foregoing and pursuant to the authority delegated to me by the Administrator (24 FR 5662), Part 95 of The Federal Aviation regulations is amended, effective September 13, 1973, as follows:

1. By amending Subpart C as follows:

(Secs. 307 1110, Federal Aviation Act of 1958; 49 U.S.C. 1348, 1510.)

Issued in Washington, D.C., on August 13, 1973.

JAMES O. ROBINSON,
Acting Chief,
Aircraft Programs Division.

[FR Doc.73-17130 Filed 8-17-73;8:45 am]

[Docket No. 12115; Amdt. No. 121-106]

PART 121—CERTIFICATION AND OPERATIONS: DOMESTIC, FLAG, AND SUPPLEMENTAL AIR CARRIERS AND COMMERCIAL OPERATORS OF LARGE AIRCRAFT

Inspection of Emergency Equipment

The purpose of these amendments to Part 121 of the Federal Aviation Regulations is to require inspection periods for certain emergency equipment carried aboard aircraft operated under that part.

Interested persons have been afforded an opportunity to participate in the making of this amendment by a Notice of Proposed Rule Making (Notice 72–20) issued on July 26, 1972, and published in the FEDERAL REGISTER on August 2, 1972 (37 FR 15436). Due consideration has been given to all comments presented in response to the Notice. Except for minor editorial changes, and except as specifically discussed hereinafter, these amendments and the reasons therefor are the same as those in Notice 72–20.

The FAA received seven public comments in response to Notice 72–20. All of the comments generally favored the adoption of the proposed amendments. However, some commentators recommended certain changes that are discussed hereinafter. Several commentators made suggestions that were not within the scope of the notice, and, accordingly, those comments are not discussed, but will be retained by the FAA for consideration with regard to future rule-making proceedings.

The Air Transport Association (ATA) in its comment objected to the phrase "must be inspected regularly" in proposed § 121.309(b)(2) in that it could be interpreted as meaning that "hard times" must be established for detailed inspection of items such as life vests and life rafts. However, the intent of the proposed rule is to provide for regular inspection of each item of safety equipment at specific time intervals as provided by the inspection periods set out in each certificate holder's operations specifications. As stated in Notice 72–20, the FAA deems it appropriate to extend the requirement for regular inspection of the additional emergency equipment to assure its condition for continued serviceability and immediate readiness to perform its intended use. Accordingly, the wording of the proposal objected to by the ATA is retained in this amendment.

In addition, the ATA pointed out that, although the proposed wording of § 121.309(b)(2) would require that all items of equipment specified in §§ 121.309, 121.310, 121.339, and 121.340 be readily accessible to both the crew and passengers, some of the required items may be located in the crew compartment which is not accessible to passengers. Upon further consideration in the light of this comment, § 121.309(b)(2), as adopted, has been changed to provide that only that emergency equipment located in the passenger compartment must be readily accessible to passengers. In addition, the rule, as adopted, specifically provides that each item of emergency equipment must be clearly identified to facilitate access to that equipment.

The ATA also objected to the requirement of proposed § 121.309(b)(4), which provided that when the items of equipment required by §§ 121.310, 121.339, and 121.340 are carried in a compartment or container, that compartment or container must be marked as to contents and date of last inspection. It noted that one compartment may contain more than one item of emergency equipment, and that life rafts may be frequently transferred from airplane to airplane making the labeling of containers as to date of last inspection impractical. The FAA believes that each compartment containing emergency equipment must be marked as to its contents to facilitate access to that equipment. However, the FAA considers the ATA comment with respect to the date of last inspection to have merit, and the rule, as adopted, has been changed to allow the placing of the date of last inspection on the item of emergency equipment itself instead of on the compartment or container.

Finally, §§ 121.25(b)(6), 121.45(b)(6), 121.135(b)(17), 121.363(a)(2), and 121.369(b) have been amended to make it clear that maintenance provisions contained therein apply to emergency equipment, and the word "emergency" has been added to the title of §§ 121.353 and 121.339 to clarify the nature of the equipment described in those sections.

(Secs. 313(a), 601, and 604, Federal Aviation Act of 1958; 49 U.S.C. 1354(a), 1421, and 1424. Sec. 6(c), Department of Transportation Act; 49 U.S.C. 1655(c).)

In consideration of the foregoing, and for the reasons stated in Notice 72–20, Part 121 of the Federal Aviation Regulations is amended, effective September 19, 1973, as follows:

1. By amending paragraph (b)(6) of § 121.25, paragraph (b)(6) of § 121.45, and paragraph (b)(17) of § 121.135 by striking out the word "and" after the word "propellers", and adding the words "and emergency equipment" after the word "appliances."

2. By amending paragraphs (a) and (b) of § 121.309 to read as follows:

§ 121.309 Emergency equipment.

(a) General: No person may operate an airplane unless it is equipped with the emergency equipment listed in this section and in § 121.310.

(b) Each item of emergency and flotation equipment listed in this section and in §§ 121.310, 121.339, and 121.340—

(1) Must be inspected regularly in accordance with inspection periods established in the operations specifications to ensure its condition for continued serviceability and immediate readiness to perform its intended emergency purposes;

(2) Must be readily accessible to the crew and, with regard to equipment located in the passenger compartment, to passengers;

(3) Must be clearly identified and clearly marked to indicate its method of operation;

(4) When carried in a compartment or container, must be carried in a compartment or container marked as to contents and the compartment or container, or

V 38 I 160 AUG 20 73 XUM

the item itself, must be marked as to date of last inspection.

• • • • •

3. By amending § 121.339 by changing the title to read as follows:

§ 121.339 Emergency equipment for extended over-water operations.

• • • • •

4. By amending § 121.353 by changing the title to read as follows:

§ 121.353 Emergency equipment for operations over uninhabited terrain areas: flag and supplemental air carriers and commercial operators.

• • • • •

5. By amending paragraph (a)(2) of § 121.363 to read as follows:

§ 121.363 Responsibility for airworthiness.

(a) • • •

(2) The performance of the maintenance, preventive maintenance, and alteration of its aircraft, including airframes, aircraft engines, propellers, appliances, emergency equipment, and parts thereof, in accordance with its manual and the regulations of this chapter.

6. By amending the lead-in portion of paragraph (b) of § 121.369 by inserting the words "emergency equipment," after the word "appliances."

Issued in Washington, D.C., on August 9, 1973.

ALEXANDER P. BUTTERFIELD,
Administrator.

Title 5—Administrative Personnel

CHAPTER I—CIVIL SERVICE COMMISSION

PART 213—EXCEPTED SERVICE

National Foundation on the Arts and the Humanities

Section 213.3182 is amended to show that the Foundation's current Schedule A authorities are extended until June 30, 1976. This section is further amended to show that until June 30, 1976, the following additional positions are excepted under Schedule A: In the National Endowment for the Arts—one Director, Interdisciplinary Programs, one Director of Special Projects, one Assistant Director of Expansion Arts Programs, one Assistant Director of Public Media Programs, one Assistant Director of Architecture and Environment Arts Programs, one Assistant Director of Dance, one Assistant Director of Visual Arts, one Assistant Director of Museum, and one Assistant Director of Special Projects; and in the National Endowment for the Humanities—one Special Assistant to the Deputy Chairman, one Program Analyst, Office of Planning and Analysis, one Program Officer, Division of Fellowships and Stipends, one Program Officer, Division of Research Grants, two Program Officers, State-based Programs, one Media Programs Officer, Division of Public Programs, one Bicentennial Coordinator, Division of Public Programs, one Program Officer, Museum Programs, and one Deputy Director of Public Programs.

Effective August 20, 1973, § 213.3182 is amended as set out below.

§ 213.3182 National Foundation on the Arts and the Humanities.

(a) *National Endowment for the Arts.*

(1) Until June 30, 1976, one Special Assistant to the Chairman.

(2) Until June 30, 1976, Director of State and Community Operations, when filled at GS–15 and below.

(3) Until June 30, 1976, eight Program Directors.

• • • • •

(11) Until June 30, 1976, four Project Evaluators.

(12) Until June 30, 1976, one Director of Museum Programs.

(13) Until June 30, 1976, two Assistant Directors for State and Community Operations.

(14) Until June 30, 1976, one Assistant Director of Music Programs.

(15) Until June 30, 1976, one Director of Developing Arts Programs.

(16) Until June 30, 1976, one Director for Public Media Programs.

(17) Until June 30, 1976, one Assistant to the Chairman.

(18) Until June 30, 1976, one Director of Planning and Management.

(19) Until June 30, 1976, one Director, Interdisciplinary Programs.

(20) Until June 30, 1976, one Director of Special Projects.

(21) Until June 30, 1976, one Assistant Director of Expansion Arts Programs.

(22) Until June 30, 1976, one Assistant Director of Public Media Programs.

(23) Until June 30, 1976, one Assistant Director of Architecture and Environment Arts Programs.

(24) Until June 30, 1976, one Assistant Director of Dance.

(25) Until June 30, 1976, one Assistant Director of Visual Arts.

(26) Until June 30, 1976, one Assistant Director of Museum.

(27) Until June 30, 1976, one Assistant Director of Special Projects.

(b) *National Endowment for the Humanities.*

• • • • •

(3) Until June 30, 1976, Director of Planning and Analysis, when filled at GS–15 and below.

(4) Until June 30, 1976, Director of Fellowships and Stipends.

(5) Until June 30, 1976, Director of Research and Grants.

(6) Until June 30, 1976, one Special Assistant to the Chairman.

(7) Until June 30, 1976, two Program Officers, Division of Education Programs.

(8) Until June 30, 1976, three Program Officers, Division of Fellowships and Stipends.

(9) Until June 30, 1976, two Program Officers, Division of Research and Grants.

(10) Until June 30, 1976, one Assistant to the Director of Planning and Analysis.

(11) Until June 30, 1976, Director of Education Programs.

(12) Until June 30, 1976, one Program Officer, Division of Public Programs.

(13) Until June 30, 1976, Director of Public Programs.

(14) Until June 30, 1976, five Program Officers, State-Based Programs, Division of Public Programs.

• • • • •

(17) Until June 30, 1976, one Program Officer, Special Projects, Division of Public Programs.

(18) Until June 30, 1976, two Program Officers, Museum Programs, Division of Public Programs.

(19) Until June 30, 1976, one Special Assistant to the Deputy Chairman.

(20) Until June 30, 1976, one Program Analyst, Office of Planning and Analysis.

(21) Until June 30, 1976, one Media Programs Officer, Division of Public Programs.

(22) Until June 30, 1976, one Bicentennial Coordinator, Division of Public Programs.

(23) Until June 30, 1976, one Deputy Director of Public Programs.

(5 U.S.C. secs. 3301, 3302; E.O. 10577, 3 CFR 1954–58 Comp. p. 218)

Title 9—Animal and Animal Products

CHAPTER II—PACKERS AND STOCKYARDS ADMINISTRATION, DEPARTMENT OF AGRICULTURE

PART 202—RULES OF PRACTICE GOVERNING PROCEEDINGS UNDER THE PACKERS AND STOCKYARDS ACT

Miscellaneous Amendments

Pursuant to the Packers and Stockyards Act, 1921, as amended (7 U.S.C. 181 et seq.), the rules of practice governing proceedings under that Act (9 CFR Part 202) are hereby amended and revised to change the title of "Hearing Examiner" to "Administrative Law Judge" in accordance with the Civil Service Commission's amendment to Subpart B, Part 930, Title 5, Code of Federal Regulations (37 FR 16787) and to provide for the issuance of initial decisions and the disposition of appeals therefrom in adjudication and rate proceedings that are subject to the provisions of sections 556 and 557 of Title 5, United States Code. The amendments and revisions are as follows:

1. Paragraphs (p) and (q) of § 202.2 are amended to read, respectively, as follows:

§ 202.2 Definitions.

• • • • •

(p)(1) In connection with disciplinary and rate proceedings, the term "judge" means any Administrative Law Judge appointed pursuant to the provisions of 5 U.S.C. 3105 and assigned to the proceeding involved.

(2) In connection with reparation proceedings, the terms "examiner" and "presiding officer" mean any attorney employed by the Office of the General Counsel of the Department.

(q)(1) In connection with disciplinary and rate proceedings, the term "decision" means the judge's initial decision made in accordance with the provisions of 5 U.S.C. 556 and 557, and includes the judge's (i) findings of fact and conclusions with respect to all material issues of fact, law or discretion, as well as the reasons or basis therefor, (ii) order, and (iii) rulings on proposed findings, conclusions and orders submitted by the parties.

(2) In connection with reparation proceedings, the term "examiner's report" (presiding officer's report) means the examiner's report to the Secretary, and includes the examiner's (i) findings of fact and conclusions with respect to all material issues of fact, law or discretion, as well as the reasons or basis therefor, (ii) order, and (iii) rulings on proposed findings, conclusions and orders submitted by the parties.

2. The last sentence of paragraph (b) of § 202.5 is amended to read as follows:

§ 202.5 Stipulation and consent orders.

• • • • •

(b) *Consent order.* • • • Upon a record composed of the complaint and the stipulation or agreement consenting to the order, the judge may enter the order consented to by the respondent, which shall have the same force and effect as an order made after oral hearing.

§§ 202.6, 202.8, 202.10, 202.11, 202.12, 202.13, 202.15, 202.17, 202.20, 202.22, 202.25, 202.26, 202.29, 202.33, 202.35 [Amended]

3. The terms "judge(s)," "decision(s)," and "appeal(s)" are substituted for the terms "examiner(s)," "report(s)," and "exception(s)," respectively, wherever the terms "examiner(s)," "report(s)," and "exception(s)" appear in the above sections.

4. Paragraph (c) of § 202.9 is amended to read as follows:

§ 202.9 The answer.

• • • • •

(c) *Procedure upon admission of facts.* The admission, in the answer or by failure to file an answer, of all the material allegations of fact contained in the moving paper shall constitute a waiver of hearing. Upon such admission of facts, complainant shall file in triplicate a proposed decision, along with a motion for the adoption thereof, which such motion and proposed decision shall be served upon the respondent by the hearing clerk. Within 20 days after service of such motion and proposed decision, the respondent may file with the hearing clerk objections thereto. In not less than 30 days after service of complainant's motion and proposed decision, the judge shall issue a decision without further procedure or hearing. Absent a waiver by the parties of service of the judge's decision, it shall be served upon them in the manner provided in § 202.22. The parties shall be given an opportunity to file appeals to the decision, to file briefs in support of such appeals, and to make oral argument thereon before the Secretary in accordance with § 202.18.

5. With respect to § 202.11, the last sentence of paragraph (a) thereof, the first sentence of paragraph (b) thereof, the last sentence of paragraph (c)(2) thereof, and the first sentence of paragraph (e)(2) thereof, are amended to read respectively, as follows:

§ 202.11 Oral hearing before judge.

(a) *Request for oral hearing.* • • • Such argument will be allowed in accordance with the provisions of § 202.18.

(b) *Time and place.* If and when the proceeding has reached the stage where an oral hearing is to be held, the judge, upon motion of any of the parties, jointly or individually, stating that the matter is at issue and is ready for hearing, shall set a time and place for hearing, giving careful consideration to the convenience of the parties, and shall file with the hearing clerk a notice stating the time and place of hearing. • • •

(c) *Appearances.* • • •

(2) *Failure to appear.* • • • Failure to appear at a hearing shall not be deemed to be a waiver of the right to be served with a copy of the judge's decision and to file appeals and make oral argument before the Secretary with respect thereto, in the manner provided in §§ 202.16 and 202.18.

• • • • •

(e) *Evidence.* • • •

(2) *Objections.*—If a party disagrees with the admission or rejection of any evidence or to the limitation of the scope of any examination or cross-examination, or any other ruling of the judge, he shall state briefly the grounds of such disagreement. An automatic objection will thereafter follow, which may be pursued in an appeal in accordance with § 202.18 by the party adversely affected by the judge's ruling. • • •

• • • • •

6. The first sentence of § 202.14 is amended to read as follows:

§ 202.14 Fees of witnesses.

Witnesses summoned before the judge or the Secretary shall be paid the same fees and mileage that are paid witnesses in the courts of the United States, and witnesses whose depositions are taken, and the persons taking the same, shall be entitled to the same fees as are paid for like services in the courts of the United States. • • •

7. The caption and paragraphs (c) and (d) of § 202.16 are revised to read, respectively, as follows:

§ 202.16 The judge's decision.

• • • • •

(c) *Judge's decision.*—The judge, within a reasonable time after the termination of the period allowed for the filing of proposed findings of fact, conclusions and orders, and briefs in support thereof, shall prepare upon the basis of the record and shall file with the hearing clerk his decision, a copy of which shall be served upon each of the parties. Such decision shall become final without further proceedings 35 days after service thereof, unless there is an appeal to the Secretary by a party to the proceeding: *Provided, however,* That no decision shall be final for purposes of judicial review except a final order issued by the Secretary pursuant to an appeal by a party to the proceeding.

(d) *Appeal.*—Within 30 days after service of the judge's decision, any party who disagrees with the decision, or any part thereof, may file an appeal of the decision to the Secretary in the manner specified in § 202.18.

8. Section 202.18 is revised to read as follows:

§ 202.18 Appeals to Secretary; transmittal of record.

(a) *Filing of appeal.* Any party who desires to appeal a decision of the judge shall transmit his appeal in writing to the hearing clerk within 30 days after service upon such party of said decision. Each issue set forth in the appeal, and the arguments thereon, shall be separately numbered; shall be plainly and concisely stated; and shall contain detailed citations of the record, statutes, regulations and authorities being relied upon in support thereof.

(b) *Argument before Secretary.*

(1) *Oral Argument.* A party bringing an appeal may request, within the prescribed time period for filing such appeal, an opportunity for oral argument before

V 38-160 AUG 20 73 XUM

the Secretary. Failure to make such request in writing, within the prescribed time period, shall be deemed a waiver of oral argument. The Secretary, in his discretion, may grant, refuse or limit any request for oral argument on appeal.

(2) *Scope of argument.* Argument to be heard on appeal, whether oral or on brief, shall be limited to the issues raised by the appeal, except that if the Secretary determines that additional issues should be argued, the parties shall be given reasonable notice of such determination, so as to permit preparation of adequate arguments on all issues to be argued.

(c) *Response.* Within 20 days after service of an appeal brought by a party to the proceeding, any other party may file a response in support of or in opposition to such appeal.

(d) *Orders denying appeal after review.* If the Secretary decides on appeal, after reviewing the entire record, that no change or modification of the judge's decision is warranted, he may adopt the judge's decision as the final order of the Secretary, preserving any right of the party bringing the appeal to seek judicial review of such decision in the proper forum.

(e) *Transmittal of record.* Whenever an appeal is filed by a party to the proceeding, the hearing clerk shall transmit to the Secretary the record of the proceeding. Such record shall include: the pleadings; any motions and requests filed and the rulings thereon; the transcript of the testimony taken at the hearing, as well as the exhibits filed in connection therewith; any statements filed under the shortened procedure; any documents or papers filed in connection with prehearing conferences; such proposed findings of fact, conclusions, and orders, and briefs in support thereof, as may have been filed in connection with the hearing; the judge's decision; and such statements of objections, and briefs in support thereof, as may have been filed in the proceeding.

§ 202.19 [Deleted]

9. Section 202.19 is deleted.

10. Paragraphs (a) and (b) of § 202.36 are amended to read, respectively, as follows:

§ 202.36 Transmittal of record and issuance of order.

(a) *Transmittal of record.* Whenever an appeal is filed by a party to the proceeding, the hearing clerk shall transmit to the Secretary the record of the proceeding. Such record shall include: the pleadings; any motions and requests filed, and the rulings thereon; the transcript of the testimony taken at the hearing, as well as the exhibits filed in connection therewith; any statements filed under the shortened procedure; any documents or papers filed in connection with prehearing conferences; such proposed findings of fact, conclusions, and orders, and briefs in support thereof, as may have been filed in connection with the hearing; the judge's decision; and such statements of objections and briefs in support thereof, as may have been filed in the proceeding.

(b) *Argument before Secretary.* The provisions of § 202.18 shall be applicable in rate proceedings.

* * * * *

10. Paragraph (d) of § 202.44 is amended to read as follows:

§ 202.44 Examiners.

* * * * *

(d) *Who may act in absence of examiner.* In case of the absence of the examiner or his inability to act, the powers and duties to be performed by him under this part in connection with a proceeding assigned to him may, without abatement of the proceeding unless otherwise directed by the Secretary, be assigned to any other examiner.

12. Paragraphs (b) and (e) of § 202.48 are amended to read, respectively, as follows:

§ 202.48 Oral hearing before the examiner.

* * * * *

(b) *Time and place.* If and when the proceeding has reached the stage where an oral hearing is to be held, the examiner, giving careful consideration to the convenience of the parties, shall set a time and place for hearing and shall file with the hearing clerk a notice stating the time and place of hearing. If any change in the time or place of the hearing is made, the examiner shall file with the hearing clerk a notice of such change, which notice shall be served upon the parties, unless it is made during the course of an oral hearing and made a part of the transcript.

* * * * *

(e) *Evidence.*—(1) *In general.* The testimony of witnesses at a hearing shall be upon oath or affirmation and subject to cross-examination. Any witness may, in the discretion of the examiner, be examined separately and apart from all other witnesses except those who may be parties to the proceeding. The examiner shall exclude evidence which is immaterial, irrelevant, or unduly repetitious, or which is not of the sort upon which responsible persons are accustomed to rely.

(2) *Objections.* If a party objects to the admission or rejection of any evidence or to the limitation of the scope of any examination or cross-examination, he shall state briefly the grounds of such objection, whereupon an automatic exception will follow if the objection is overruled by the examiner. The transcript shall not include argument or debates thereon except as ordered by the examiner. The ruling of the examiner on any objection shall be a part of the transcript. Only objections made before the examiner may subsequently be relied upon in the proceeding.

(3) *Depositions.* The deposition of any witness shall be admitted, in the manner provided in and subject to the provisions of § 202.49.

(4) *Affidavits.* Except as is otherwise provided in this part, affidavits may be admitted only if the evidence is otherwise admissible and the parties agree that affidavits may be used.

(5) *Proof of documents.* A true copy of every written entry in the record of the Department, made by an officer or employee thereof in the course of his official duty, and relevant to the issues involved in the hearing, shall be admissible as prima facie evidence of the facts stated therein, without the production of such officer or employee.

(6) *Exhibits.* Except where the examiner finds that the furnishing of copies is impracticable, a copy of each exhibit, in addition to the original, shall be filed with the examiner for the use of each other party to the proceeding. The examiner shall advise the parties as to the exact number of copies which will be required to be filed and shall make and have noted on the record the proper distribution of the copies.

(7) *Official notice.* Official notice will be taken of such matters as are judicially noticed by the courts of the United States and of any other matter of technical or scientific fact of established character: *Provided,* that the parties shall be given adequate notice, after the hearing or by reference in the examiner's report or tentative order or otherwise, of matters so noticed, and shall be given adequate opportunity to show that such facts are erroneously noticed.

(8) *Offer of proof.* Whenever evidence is excluded from the record, the party offering such evidence may make an offer of proof, which shall be included in the transcript. The offer of proof shall consist of a brief statement describing the evidence to be offered. If the evidence consists of a brief oral statement or of an exhibit, it shall be inserted into the transcript in toto. In such event, it shall be considered a part of the transcript if the Secretary decides that the examiner's ruling in excluding the evidence was erroneous. The examiner shall not allow the insertion of such evidence in toto if the taking of such evidence will consume a considerable length of time at the hearing. In the latter event, if the Secretary decides that the examiner's ruling in excluding the evidence was erroneous, the hearing shall be reopened to permit the taking of such evidence.

13. The first sentence of § 202.60 is amended to read as follows:

§ 202.60 Hearings before Secretary.

The Secretary may act in the place and stead of a judge, examiner or presiding officer in any proceeding hereunder. * * *

Effective date. The foregoing amendments and revisions shall become effective August 20, 1973.

(Sec. 407, 42 Stat. 169; 7 U.S.C. 228)

Done at Washington, D.C., this 9th day of August 1973.

CLAYTON YEUTTER,
Assistant Secretary for Marketing and Consumer Services.

Title 17—Commodity and Securities Exchanges

CHAPTER I—COMMODITY EXCHANGE AUTHORITY (INCLUDING COMMODITY EXCHANGE COMMISSION), DEPARTMENT OF AGRICULTURE

PART 0—RULES OF PRACTICE

Miscellaneous Amendments

Pursuant to the Commodity Exchange Act, as amended (7 U.S.C. 1 et seq.), the rules of practice governing proceedings under that Act (17 CFR Part 0) are hereby amended and revised to change the title of "Hearing Examiner" to "Administrative Law Judge" in accordance with the Civil Service Commission's amendment to Subpart B, Part 930, Title 5, Code of Federal Regulations (37 FR 16787) and to provide for the issuance of initial decisions and the disposition of appeals therefrom in adjudication proceedings that are subject to the provisions of sections 556 and 557 of Title 5, United States Code. The amendments and revisions are as follows:

1. With respect to § 0.2, paragraph (p) thereof is deleted and paragraphs (m) and (n) thereof are amended to read, respectively, as follows:

§ 0.2 Definitions.

* * * * *

(m) The term "judge" has reference to the term "referee" as it appears in 7 U.S.C. 9 and 15, and means any Administrative Law Judge appointed pursuant to the provisions of 5 U.S.C. 3105 and assigned to the proceeding involved.

(n) The term "decision" means the judge's initial decision made in accordance with the provisions of 5 U.S.C. 556 and 557, and includes the judge's (1) findings of fact and conclusions with respect to all material issues of fact, law or discretion, as well as the reasons or basis therefor, (2) order, and (3) rulings on proposed findings, conclusions and orders submitted by the parties.

* * * * *

2. The last sentence of paragraph (b) of § 0.4 is amended to read as follows:

§ 0.4 Stipulations and consent orders.

* * * * *

(b) *Consent order.* * * * Upon a record composed of the complaint and the stipulation or agreement consenting to the order, the judge may enter the order consented to by the respondent, which shall have the same force and effect as an order made after oral hearing.

§§ 0.5, 0.7, 0.8, 0.10, 0.11, 0.12, 0.13, 0.14, 0.15, 0.17, 0.20, 0.22 [Amended]

3. The terms "judge(s)," "decision(s)," and "appeal(s)" are substituted for the terms "referee(s)," "report(s)," and "exception(s)," respectively, wherever the terms "referee(s)," "report(s)," and "exception(s)" appear in the above sections.

4. Paragraph (c) of § 0.9 is amended to read as follows:

§ 0.9 The answer.

* * * * *

(c) *Procedure upon admission of facts.* The admission, in the answer or by failure to file an answer, of all the material allegations of fact contained in the moving paper shall constitute a waiver of hearing. Upon such admission of facts, complainant shall file in triplicate a proposed decision along with a motion for the adoption thereof, which such motion and proposed decision shall be served upon the respondent by the hearing clerk. Within 20 days after service of such motion and proposed decision, the respondent may file with the hearing clerk objections thereto. In not less than 30 days after service of complainant's motion and proposed decision, the judge shall issue a decision without further procedure or hearing. Absent a waiver by the parties of service of the judge's decision, it shall be served upon them in the manner provided in § 0.22. The parties shall be given an opportunity to file appeals to the decision, to file briefs in support of such appeals, and to make oral argument thereon before the Secretary in accordance with § 0.18.

5. With respect to § 0.11, the last sentence of paragraph (a) thereof, the first sentence of paragraph (b) thereof, the last sentence of paragraph (c)(2) thereof, and the first sentence of paragraph (e)(2) thereof, are amended to read, respectively, as follows:

§ 0.11 Oral hearing before judge.

(a) *Request for oral hearing.* * * * Such argument will be allowed in accordance with the provisions of § 0.18.

(b) *Time and place.* If and when the proceeding has reached the stage where an oral hearing is to be held, the judge, upon motion of any of the parties, jointly or individually, stating that the matter is at issue and is ready for hearing, shall set a time and place for hearing, giving careful consideration to the convenience of the parties, and shall file with the hearing clerk a notice stating the time and place of hearing. * * *

(c) *Appearances.* * * *

(2) *Failure to appear.* * * * Failure to appear at a hearing shall not be deemed to be a waiver of the right to be served with a copy of the judge's decision and to file appeals and make oral argument before the Secretary with respect thereto, in the manner provided in §§ 0.16 and 0.18.

* * * * *

(e) *Evidence.* * * *

(2) *Objections.* If a party disagrees with the admission or rejection of any evidence or to the limitation of the scope of any examination or cross-examination, or any other ruling of the judge, he shall state briefly the grounds of such disagreement. An automatic objection will thereafter follow, which may be pursued in an appeal in an accordance with § 0.18 by the party adversely affected by the judge's ruling. * * *

* * * * *

6. The caption and paragraphs (c) and (d) of § 0.16 are revised to read, respectively, as follows:

§ 0.16 The judge's decision.

* * * * *

(c) *Judge's decision.* The judge, within a reasonable time after the termination of the period allowed for the filing of proposed findings of fact, conclusions and orders, and briefs in support thereof, shall prepare upon the basis of the record and shall file with the hearing clerk his decision, a copy of which shall be served upon each of the parties. Such decision shall become final without further proceedings 35 days after service thereof, unless there is an appeal to the Secretary by a party to the proceeding: *Provided, however,* That no decision shall be final for purposes of judicial review except a final order issued by the Secretary pursuant to an appeal by a party to the proceeding.

(d) *Appeal.* Within 30 days after service of the judge's decision, any party who disagrees with the decision, or any part thereof, may file an appeal of the decision to the Secretary in the manner specified in § 0.18.

7. Section 0.18 is revised to read as follows:

§ 0.18 Appeals to Secretary; transmittal of record.

(a) *Filing of appeal.* Any party who desires to appeal a decision of the judge shall transmit his appeal in writing to the hearing clerk within 30 days after service upon such party of said decision. Each issue set forth in the appeal, and the arguments thereon, shall be separately numbered; shall be plainly and concisely stated; and shall contain detailed citations of the record, statutes, regulations and authorities being relied upon in support thereof.

(b) *Argument before Secretary.*

(1) *Oral argument.* A party bringing an appeal may request, within the prescribed time period for filing such appeal, an opportunity for oral argument before the Secretary. Failure to make such request in writing, within the prescribed time period, shall be deemed a waiver of oral argument. The Secretary, in his discretion, may grant, refuse or limit any request for oral argument on appeal.

(2) *Scope of argument.* Argument to be heard on appeal, whether oral or on brief, shall be limited to the issues raised by the appeal, except that if the Secretary determines that additional issues should be argued, the party shall be given reasonable notice of such determination, so as to permit preparation of adequate arguments on all issues to be argued.

(c) *Response.* Within 20 days after service of an appeal brought by a party to the proceeding, any other party may file a response in support of or in opposition to such appeal.

(d) *Orders denying appeal after review.* If the Secretary decides on appeal, after reviewing the entire record, that no

V38-160 AUG 20 73 XUM

change or modification of the judge's decision is warranted, he may adopt the judge's decision as the final order of the Secretary, preserving any right of the party bringing the appeal to seek judicial review of such decision in the proper forum.

(e) *Transmittal of record.* Whenever an appeal is filed by a party to the proceeding, the hearing clerk shall transmit to the Secretary the record of the proceeding. Such record shall include: the pleadings; any motions and requests filed, and the rulings thereon; the transcript of the testimony taken at the hearing, as well as the exhibits filed in connection therewith; any statements filed under the shortened procedure; any documents or papers filed in connection with prehearing conferences; such proposed findings of fact, conclusions, and orders, and briefs in support thereof, as may have been filed in connection with the hearing; the judge's decision; and such statements of objections, and briefs in support thereof, as may have been filed in the proceeding.

§ 0.19 [Deleted]

9. Section 0.19 is deleted.

10. The first sentence of § 0.28 is amended to read as follows:

§ 0.28 Hearings before the Secretary.

The Secretary may act in the place and stead of a judge or presiding officer in any proceeding hereunder. • • •

§§ 0.11, 0.27 [Amended]

11. The term "General Counsel" is substituted for the term "Solicitor" wherever the term "Solicitor" appears in the above sections.

Effective date. The foregoing amendments and revisions shall become effective August 20, 1973.

(Sec. 8a(5), 49 Stat. 1500; 7 U.S.C. 12a(5))

Done at Washington, D.C. this 9th day of August, 1973.

CLAYTON YEUTTER,
Assistant Secretary for Marketing, and Consumer Services.

[FR Doc.73-17311 Filed 8-17-73;8:45 am]

Title 19—Customs Duties

CHAPTER I—UNITED STATES CUSTOMS SERVICE

[T.D. 73-221]

PART 1—GENERAL PROVISIONS

Change in the Customs Field Organization

AUGUST 9, 1973.

In order to provide better Customs service to carriers, importers, and the public, it is considered desirable to extend the existing port limits of Charleston, West Virginia.

Accordingly, by virtue of the authority vested in the President by section 1 of the Act of August 1, 1914, 38 Stat. 623, as amended (19 U.S.C. 2), and delegated to the Secretary of the Treasury by Executive Order No. 10289, September 17, 1951 (3 CFR Ch. II), and pursuant to authority provided by Treasury Department Order No. 190, Rev. 9 (38 FR 17517), the port limits of Charleston, West Virginia, in the Norfolk, Virginia, Customs district (Region III), are hereby extended to include all of Cabell, Putnam and Kanawha Counties, West Virginia, the city of Huntington, West Virginia, and the Tri-State Airport located in Wayne County, West Virginia.

To reflect this change, the table in § 1.2(c) of the Customs Regulations is amended by substituting "Charleston, West Virginia (including the territory described in T.D. 73-221)" for "Charleston, West Virginia (including the territory described in T.D. 73-170)," in the column headed "Ports of Entry" in the Norfolk, Virginia, district (Region III).

(Sec. 1, 37 Stat. 434, sec. 1, 38 Stat. 623, as amended; 19 U.S.C. 1, 2)

The purpose of this extension of the existing port of entry limits is to provide better service to importers, carriers and the public. Therefore, notice and public procedure thereon is found to be unnecessary and good cause exists for dispensing with a delayed effective date under the provisions of 5 U.S.C. 553.

Effective date. August 20, 1973.

[SEAL] EDWARD L. MORGAN,
Assistant Secretary of the Treasury.

AUGUST 9, 1973.

[FR Doc.73-17282 Filed 8-17-73;8:45 am]

[T.D. 73-220]

PART 7—CUSTOMS RELATIONS WITH INSULAR POSSESSIONS AND GUANTANAMO BAY NAVAL STATION

Change in Administration of Wake Island

AUGUST 9, 1973.

Pursuant to General Headnote 3(a), Tariff Schedules of the United States (19 U.S.C. 1202), certain articles imported into the Customs territory of the United States from insular possessions of the United States, are exempt from duty. Section 7.8, Customs Regulations, sets forth procedures governing such importations other than from Puerto Rico. Paragraph (a) of § 7.8 relates to establishing the origin of such articles. Footnote 15 to paragraph (a) specifies the names of the insular possessions and identifies the governmental agencies responsible for their administration. The present footnote 15 indicates that the Customs administration of Wake Island is under the jurisdiction of the Department of Commerce (Civil Aeronautics Administration). However, responsibility for the civil administration of Wake Island was transferred to the Secretary of the Interior by Executive Order No. 11048 dated September 4, 1962 (3 CFR, 1959-1963 Comp. p. 632). In accordance with that Order, which also gave the Secretary of the Interior authority to enter into agreements with the Secretary of any other agency for the transfer of administrative responsibility over Wake Island, an agreement was signed on June 13, 1972, by the Secretary of the Interior and on June 19, 1972, by the Secretary of the Air Force (37 FR 13486), whereby the former yielded and the latter accepted civil administration of Wake Island. The Secretary of the Air Force simultaneously delegated authority for that administration to the General Counsel of the Air Force. It is, therefore, necessary to correct footnote 15 to paragraph (a) of § 7.8, Customs Regulations. In addition, the citation of authority for § 7.8 is amended to make it current and to conform it with present format.

Accordingly, to conform the Customs Regulations to the cited agreement, footnote 15 of § 7.8(a) is amended to read as follows:

§ 7.8 Insular possessions of the United States other than Puerto Rico.

[15] Guam, Wake Island, Midway Islands, Kingman Reef, Johnston Island, and American Samoa are American territory, but not within the Customs territory of the United States. Importations into those islands are not governed by the Tariff Act of 1930 or these Customs Regulations. The Customs administration of American Samoa is under the jurisdiction of the Department of the Interior (Office of Territories). The Customs administration of Wake Island is under the jurisdiction of the Department of the Air Force (General Counsel). The Customs administration of Midway Islands is under the jurisdiction of the Department of the Navy. The Customs administration of Guam is under the Government of Guam. A certificate signed by the Commander at the Johnston Island Air Force Base, or his assistant, shall be acceptable as proof of origin. Kingman Reef is understood to be uninhabited. The citation of authority for § 7.8 is amended to read:

(Secs. 309, 313, 482(f), 557, 46 Stat. 690, as amended, 693, as amended, 720, as amended, 744, as amended, 77A Stat. 11; 19 U.S.C. 1202 (Gen. Hdnte. 3(a)), 1309, 1313, 1482(f), 1557).

• • • • •

(R.S. 251, as amended, sec. 624, 46 Stat. 759; 5 U.S.C. 301, 19 U.S.C. 66, 1624)

These amendments merely conform the Customs Regulations with certain changes in governmental administration and in the manner of citing legal authorities, and in no way place or extend responsibility on the public. Therefore, good cause exists for dispensing with notice and public procedure thereon as unnecessary, and good cause is found for the amendment to become effective on the earliest date possible under 5 U.S.C. 553.

Effective date. August 20, 1973.

[SEAL] VERNON D. ACREE,
Commissioner of Customs.

Approved: August 9, 1973.

EDWARD L. MORGAN,
Assistant Secretary of the Treasury.

[FR Doc.73-17281 Filed 8-17-73;8:45 am]

Title 24—Housing and Urban Development

CHAPTER II—OFFICE OF ASSISTANT SECRETARY FOR HOUSING PRODUCTION AND MORTGAGE CREDIT-FEDERAL HOUSING COMMISSIONER (FEDERAL HOUSING ADMINISTRATION), DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. R-73-230]

PART 275—LOW RENT PUBLIC HOUSING

Prototype Cost Limits for Public Housing; Corrections and Revisions

In the FEDERAL REGISTER issued on Friday, June 8, 1973 (38 FR 15051), the annual updated prototype per unit cost schedules were published pursuant to section 209(a) of the Housing and Urban Development Act of 1970. Certain of these prototype per unit cost schedule figures and listings were incorrect and are being changed. The correct figures are set forth in List 1 below.

In addition, the overall prototype per unit cost schedules are currently being evaluated in light of public comments received pursuant to invitation in the June 8 order. Consideration of subsequent factual project cost data received from the Albuquerque, New Mexico Insuring Office indicates that certain prototype per unit cost schedules should be revised for the State of New Mexico. Inasmuch as the new prototype cost schedules cannot be utilized until the costs themselves become effective by publication in the FEDERAL REGISTER, continuity of contract approvals requires the immediate publication of this material. Accordingly, it is impracticable to provide notice and public procedure with respect to those cost limits in accordance with the Department's recently adopted Publications Policy (24 CFR Part 10), and good cause exists for making them effective on the date of publication in the FEDERAL REGISTER.

For the foregoing reasons, the revised figures set forth as List 2 are adopted in lieu of the previous figures for the indicated New Mexico areas.

List 1

1. Page 15053, Region I, New Hampshire, Nashua
   Detached and semidetached; Number of bedrooms 4; 23,200.
2. Page 15056, Region IV, Alabama, Huntsville
   Detached and semidetached; Number of bedrooms 0; 8,100.
3. Page 15056, Region IV, Alabama, Huntsville
   Walk-up; Number of bedrooms 3; 12,400.
4. Page 15058, Region IV, Kentucky, Ashland
   Row dwellings; Number of bedrooms 4; 18,150.
5. Page 15064, Region VI, Oklahoma, Muskogee
   Walk-up; Number of bedrooms 4; 14,550.
6. Page 15065, Region VI, Iowa, Cedar Rapids
   Detached and semidetached; Number of bedrooms 4; 18,700.
7. Page 15068, Arizona, should be listed under Region IX.
8. Page 15069, "Region VIII—Continued" should be listed as "Region IX—Continued."
9. Page 15069, Region IX, Arizona, Window Rock
   Walk-up; Number of bedrooms 6; 20,700.
10. Page 15071, Region IX, Alaska, Fairbanks
    Detached and semidetached; Number of bedrooms 1; 16,500.

List 2

1. On page 15063 delete the Dulce, Isleta, Jemez and Laguna, New Mexico schedules under Region VI and substitute in lieu thereof the revised prototype per unit costs shown on the table set forth hereinafter, entitled Prototype Per Unit Cost Schedules (Sec. 7(d) of Department of HUD Act; 42 U.S.C. 3535(d)).

2. On page 15064 delete the Mescalero, Penasco and Pojoaque, New Mexico schedules under Region VI and substitute in lieu thereof the revised prototype per unit costs shown on the table set forth hereinafter entitled Prototype Per Unit Cost Schedules (Sec. 7(d), Department of HUD Act; 42 U.S.C. 3535(d)).

Effective date. The amendments in List 2 are effective on August 20, 1973.

SHELDON B. LUBAR,
Assistant Secretary-Commissioner.

Title 39—Postal Service

CHAPTER I—U.S. POSTAL SERVICE

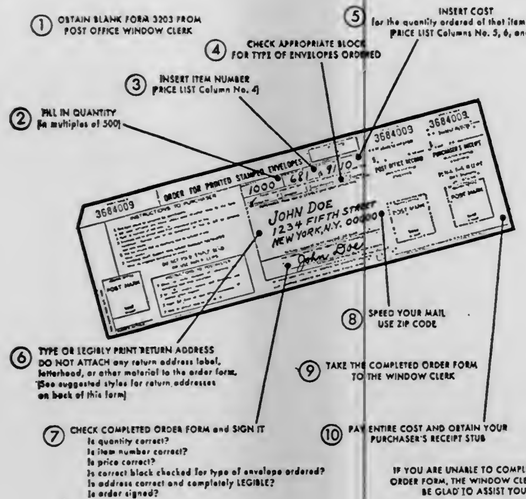
PRINTED STAMPED ENVELOPES

Return Address

Regulations in Part 141 dealing with printed stamped envelopes sold by the Postal Service have been amended to indicate the new style of printing return addresses on such envelopes and to indicate the type of information that may be included in the return address, as well as the number of characters, spaces, and lines that may be included.

Regulations in Part 142 have been amended to update information on the denominations of adhesive stamps available.

Regulations in Part 144 dealing with Postage Meters and Meter Stamps have been amended with respect to "drop shipments" of mail and with respect to the examination of postage meters which have not been set for a period of six months.



Regulations in Part 154 relative to conditions of delivery have been amended to indicate certain prerequisite procedures when mail is to be delivered to a commercial mail receiving agency.

Accordingly, publication of the following amendments in the FEDERAL REGISTER is effective immediately:

PART 141—ENVELOPES, POSTAL CARDS, AEROGRAMMES

1. Form 3203, Order for Printed Stamped Envelopes, and the instructions which are shown, as cited in paragraph (b) of § 141.2 are amended as set forth below.

V 38-160 AUG 20 73 XUM

CAUTION: ILLEGIBLE OR INCORRECT ORDERS DELAY RECEIPT OF ENVELOPES

2. Paragraphs (c)(1) and (c)(2) of § 141.2 are amended to read as follows:

(c) *Style of printing return address.* (1) All lines of the return address will be printed in capitals and lower case letters with flush left margin using 8-point Helvetica type.

(2) Sample style of printing:

Charles Jones
610 Seventh Avenue
New York, NY 00000

3. Paragraph (d)(1) of § 141.2 is amended to read as follows:

(d) *Required printing*—(1) *Local address.* The printed address must include the local address. The adequacy of the address, to insure return of undeliverable mail, will be determined by the postmaster. Any one of the following may be used:

(i) Street address.

(ii) Post office box number.

(iii) Rural route number and box number.

(iv) Name of building and room number, including street address.

(v) A street address and a post office box number may be shown in the return address. When both addresses are shown, mail will be returned to the address indicated in the line immediately preceding the city, State, and ZIP code. The ZIP code must be that of the delivery unit serving the address shown in the line immediately preceding the city and State.

4. Paragraph (e)(1) of § 141.2 is amended to read as follows:

(e) *Optional Printing*—(1) Name. (i) The name may be that of an individual, firm, corporation, institution, association, or society. It may include the name and title of an officer of the concern (as John Doe, Treasurer, Washington Educational Association) and such titles as M.D., D.D.S., Rev., and L.L.D.

(ii) Descriptive words, such as "Druggist", "Attorney at Law", "Esquire", or "C.P.A." are not considered titles, but represent business or professional names, which may also be printed. Such descriptive words are printed subject to the conditions set forth in paragraph (e)(2) of this section.

(iii) The name of a branch or department of a business may be printed only when necessary to insure return of undeliverable mail, i.e., when other branches or departments are located at the same post office address.

5. A new paragraph (e)(2) is added to § 141.2 to read as follows:

(2) *Advertising.* (i) A brief statement or descriptive phrase devoted to advertising may be printed either following the name or on a separate line. There may not be more than two such lines devoted to permissible advertising matter.

(ii) An individual or organization engaged in business, professional, educational, social, cultural, charitable, political, or other endeavors, may advertise. The advertisement may describe the nature of the business of the individual or organization or refer to the goods, services or works provided by the individual or organization.

(iii) Statements or descriptive phrases which describe the nature of a business and contain a reference to the quality of the goods or services produced such as "Best Tires in Town" or "Complete Insurance" will be permitted.

(iv) Nothing will be printed which would make the envelope nonmailable under 18 U.S.C. 1463, which prohibits the mailing of indecent matter on wrappers or envelopes.

6. Existing paragraph (e)(2) of § 141.2 is redesignated as paragraph (e)(4). The second sentence of paragraph (e)(4), as redesignated, is amended to read as follows: "The request to return endorsement in § 141.2(a)(4)(i) shall appear above the name and address." Subparagraphs (i) through (v) of § 141.2(e)(4), as redesignated, remain the same.

7. A new paragraph (e)(3) is added to § 141.2 to read as follows:

(3) *Phone numbers.* The phone number of any individual or group may be printed on the envelope.

8. A new paragraph (f) is added to § 141.2 to read as follows:

(f) *Other requirements.* (1) No line of either required or optional printing may exceed 47 characters and spaces.

(2) The total number of lines of required and optional printing may not exceed seven.

(3) The last two lines of printing shall be reserved for the street address or P.O. box number where mail is to be delivered, and the city, State, and ZIP code.

9. Existing paragraph (f) of § 141.2 is redesignated as paragraph (g) and is amended to read as follows:

(g) *Prohibited printing.* No matter may be printed other than that permitted by paragraph (d) and (e) of this section.

10. Existing paragraph (g) of § 141.2 is redesignated as paragraph (h).

PART 142—STAMPS (ADHESIVE)

11. Paragraph (a) of § 142.1 is amended to read as follows:

(a) *Types.*

Purpose	Form	Denomination and prices
Ordinary postage.	Single or sheet.	1, 2, 3, 4, 5, 6, 8, 10, 12, 13, 14, 15, 16, 20, 25, 30, 40, and 50 cents; $1 and $5.
	Books	32 6-cent & 8 1-cent ($2)* 25 8-cent ($2).
	Coil of 100	6,* 8, and 25* cents: (Dispenser to hold coils of 100 stamps may be purchased for 5 cents additional.)
	Coils of 500 and 3,000.	1, 2, 5, 6, and 8 cents.
	Coils of 3,000.	25 cents.
Commemorative stamps.	Single or sheet.	Various denominations as announced.
Airmail postage (for use on airmail only. See 141.12).	Single or sheet.	9, 11, 15, 17, and 21 cents. $1 airlift.
	Books	8 11-cent & 8 2-cent ($1).
	Coils of 100, 500, and 3,000.	11 cents.
Precanceled postage.	Single or sheet, coils of 500 and 3,000.	Available to permit holders only. (See part 143.)
Postage-due (for post office use only).	Single or sheet.	1, 2, 3, 4, 5, 6, 7, 8, 10, 30, and 50 cents; $1 and $5.
Special delivery. (See part 166.)	Single or sheet.	60 cents. Good only for special delivery fee.

*Will be discontinued when stock is exhausted.

PART 144—POSTAGE METERS AND METER STAMPS

12. The first sentence of paragraph (d)(4)(i) of § 144.1 is amended to read as follows:

(i) The postmaster must obtain confirmation from the sectional center facility where the post office of mailing is located, that the post office of mailing has adequate facilities for handling the mail.

13. Paragraph (b) of § 144.6 is redesignated as paragraph (c).

14. A new paragraph (b) is added to § 144.6 to read as follows:

(b) *Examination.* Review Forms 3610 quarterly. If no settings have been made during the previous 6 months advise local meter licensees to bring in meters which have not been set within this period for examination as required by paragraph (d)(1) of this section. When the meter is set at another office, request the office which sets the meter to have it called in for examination. The office where the meter is set will then advise the office where Form 3610 is maintained of the results of the examination, including register readings at the time of examination, so a suitable entry can be made on Form 3610.

PART 154—CONDITIONS OF DELIVERY

15. Paragraph (a)(2) of § 154.2 is amended to read as follows:

(2) When mail is to be delivered to a commercial mail receiving agency, Form 1583, *Application for Delivery of Mail through Agent,* must be signed by both the commercial agency and the addressee. The commercial agent must witness the signature of the addressee. The addressee shall be required to furnish two items of identification, the particulars of which shall be included on Form 1583. The original of the completed Form 1583 must be filed with the postmaster and a duplicate copy of the completed Form 1583 must be kept on file by the commercial agency. The original copy of Form 1583 will be filed without verifying the addressees shown thereon and without obtaining statements from the references given unless the postmaster is specifically requested to do so by the inspector in charge, or when there is reason to believe the mail will be, or is being, used for unlawful purposes. In consideration of delivery of the mail to the commercial agent, the addressee and the agent are considered to agree that:

(i) No change of address order will be filed with the post office when the agency relationship is terminated;

(ii) The forwarding of mail intended for the addressee is the responsibility of the agent; and

(iii) When remailed by the commercial agent, the mail is subject to payment of new postage since delivery is deemed to have been made when the mail was delivered to the commercial agent.

(39 U.S.C. 401)

ROGER P. CRAIG,
Acting General Counsel.

Title 47—Telecommunications

CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 19451]

RADIO SERVICES

Non-Government Fixed and Land Mobile Telemetering Operations; Correction

AUGUST 9, 1973.

Amendment of Parts 2, 89, 91 and 93 of the Commission's Rules to Permit non-Government Fixed and Land Mobile Telemetering in the Band 1427–1435 MHz on a secondary basis.

In the Report and Order in Docket 19451, FCC 73–757, released July 24, 1973, and published in the FEDERAL REGISTER on August 1, 1973 (38 FR 20435), § 91.504(b) was amended by adding limitation (35). This is corrected to specify limitation (36).

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] VINCENT J. MULLINS,
Acting Secretary.

[FR Doc.73-17287 Filed 8-17-73;8:45 am]

[Docket No. 19712; FCC 73-861]

PART 73—RADIO BROADCAST SERVICES

Frequency Monitors

In the matter of amendment of §§ 73.40, 73.49, 73.60, 73.63, 73.89, 73.113, 73.114, 73.252, 73.255, 73.283, 73.284, 73.295, 73.297, 73.317, 73.330, 73.331, 73.552, 73.555, 73.583, 73.584, 73.595, 73.596, 73.672, 73.687, 73.690, 73.692 and 73.693 of the rules, concerning frequency monitors and the maintenance of the operating frequency of stations.

1. In its continuing effort concerning the re-regulation of the broadcast services the Commission released a Notice of Proposed Rule Making in this proceeding on March 26, 1973 (FCC 73–322). The closing dates for comments and reply comments were May 3, 1973, and May 14, 1973, respectively. Publication was made in the FEDERAL REGISTER on March 30, 1973 (38 FR 8280).

2. Comments were filed by standard broadcasting station KTIX, Time and Frequency Technology, Inc., KITN–KITI Corporation, Westinghouse Broadcasting Company, Inc., American Broadcasting Companies, Inc., Summit Radio Corp., Group One Broadcasting Co., Inc. and Lake Huron Broadcasting Corporation. No reply comments were filed.

3. The Notice looked toward amending the Commission's rules as follows: (1) Deleting the requirement that AM and FM stations be equipped with type approved frequency monitors (this requirement was deleted from the TV rules in 1964); (2) deleting provisions for type approval of frequency monitors; (3) deleting requirements concerning three-hour and daily frequency checks; and (4) requiring that carrier and subcarrier frequencies be actually measured at least once a month. These amendments were proposed on the basis that automatic frequency control of transmitters, which is required by our rules, has provided an inherent frequency stability which substantially exceeds requirements; and this inherent capability, coupled with actual performance of modern-vintage transmitters, should be reflected in our rules.

4. The comments of KTIX, Westinghouse, ABC, Summit, Group One and Lake Huron urge adoption of the rules as proposed. Time and Frequency Technology, Inc., urges that the Commission retain the existing frequency monitor requirements; that they be expanded to include television; and that provisions for type approval of frequency monitors be revised to require tighter frequency accuracy than presently specified. KITN–KITI Corporation objects to the proposed requirement that frequencies be measured at least once a month and suggested that it would be sufficient to prescribe a maximum frequency tolerance and let the licensee bear responsibility for proper operation, with citations being issued for violations.

5. The position taken by Time and Frequency Technology, Inc., must be rejected on the ground it tends toward unnecessary over-regulation. The suggestion that the Commission should require continuous frequency monitoring and that provisions for type approval of frequency monitors should be revised to require tighter frequency accuracy would, if adopted, have no direct effect on actual transmitter performance, and it is on the basis of transmitter performance that the subject rule amendments are being considered. The record in this proceeding confirms that frequency instability is simply no longer a significant problem; certainly not one which warrants requiring that frequency be continuously monitored.

6. The suggestion of KITN–KITI must also be rejected. The Commission's regulatory responsibility goes beyond merely detecting and penalizing licensees who do not comply with its rules. It must establish any reasonable standards which tend to assure performance in the interest of preserving the integrity of existing service. While the performance record of some stations may support adoption of a standard prescribing annual or semi-annual frequency measurements, given some 8,300 licensed broadcasting stations, the Commission's rules must include such provisions as will reasonably assure adequate performance of all stations. In the Commission's view, such assurance requires adoption of the standard we have proposed, i.e., frequency measurements once each month. This conclusion is based upon the record established in this proceeding and the Commission's experience with a similar standard already included in its rules governing the television service.

7. In taking action in this proceeding, the Commission directs attention to two matters which should be emphasized. First, the rules being adopted do not preclude the use of frequency monitors. Licensees who wish to use such devises may do so. Secondly, many frequency monitors do not possess a capability for providing an accurate measurement of the actual transmitter frequency. Whatever procedure a licensee elects to

V38-160 AUG 20 73 XUM

employ, what is clearly required is an accurate measurement of the actual carrier and subcarrier frequencies.

8. We believe that the rule amendments adopted herein are in the public interest. They are, in all essential respects, as set forth in the Notice. Departures from the proposal are principally editorial, except for two provisions. First, the Notice proposed to amend § 73.638, "Auxiliary transmitters", to provide expressly that frequency measurements be made on such transmitters. It is unnecessary to adopt this proposal since it merely reiterates the requirements of § 73.690 which prescribes that frequency measurements be made on whatever transmitter is being used. Second, the language of the existing rules concerning the use of modulation monitors at auxiliary transmitters (§§ 73.89, 73.330) does not reflect the fact that remote control operation of such transmitters, as well as of main transmitters, is authorized pursuant to other provisions of the Commission's rules. Sections 73.89 and 73.330 will be amended to reflect that fact. These amendments, which are minor and noncontroversial, merely conform the sections with other existing rules and outside participation in their adoption is clearly not a prerequisite. Therefore, prior notice of rule making and public procedure on §§ 73.89 and 73.330 are unnecessary, pursuant to the Administrative Procedure and Judicial Review provisions of 5 U.S.C. 553(b)(3)(B).

9. Having considered all of the information before it, and in accordance with the foregoing discussion, *it is ordered*, That, effective November 21, 1973, the Commission's rules and regulations are amended as set forth in the attached Appendix.

10. Authority for the action taken herein is contained in sections 4(i), and 303 (j) and (r) of the Communications Act of 1934, as amended.

11. *It is further ordered*, That this proceeding is terminated.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303.)

Adopted: August 8, 1973.

Released: August 14, 1973.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] VINCENT J. MULLINS,
Acting Secretary.

1. Section 73.40(a)(10) is amended to read as follows:

§ 73.40 Transmitter: design, construction, and safety of life requirements.

(a) • • •

(10) Means are provided for connection and continuous operation of an approved modulation monitor.

§ 73.49 [Deleted]

• • • • • •

2. Section 73.49 is deleted.

3. Section 73.60 and headnote are amended to read as follows:

§ 73.60 Frequency measurements.

(a) The carrier frequency of the transmitter shall be measured as often as is necessary to ensure that it is maintained within the prescribed tolerance. However, in no event shall the interval between successive measurements exceed 31 days.

(b) The primary standard of frequency for radio frequency measurements shall be the national standard of frequency maintained by the National Bureau of Standards, Department of Commerce, Washington, D.C. The operating frequency of all radio stations will be determined by comparison with this standard or the standard signals of stations WWV, WWVB, WWVH and WWVL of the National Bureau of Standards.

4. Section 73.63 is amended by adding a new paragraph (g) and redesignating existing paragraphs (g) and (h) as (h) and (i) respectively to read as follows:

§ 73.63 Auxiliary transmitter.

• • • • • •

(g) The carrier frequency of the auxiliary transmitter shall be measured as often as is necessary to ensure that it is maintained within the prescribed tolerance. If the transmitter is used daily for a period of more than 31 days, the interval between successive measurements shall not exceed 31 days.

(h) The authorized antenna input power of an auxiliary transmitter may be less, but not more, than that of the regular transmitter. If it is less, the actual operating power is not limited to 105 percent of the authorized antenna input power of the auxiliary transmitter but shall in no event exceed the authorized antenna input power produced by the regular transmitter.

(i) All regulations as to safety requirements and spurious emissions applying to broadcast transmitting equipment shall apply also to an auxiliary transmitter.

5. Section 73.89 and headnote are amended to read as follows:

§ 73.89 Use of modulation monitors at auxiliary transmitters.

(a) The following shall govern the installation of approved modulation monitors at auxiliary transmitters:

(1) Installation of an approved modulation monitor at the location of the auxiliary transmitter, when different from that of the main transmitter, is optional with the licensee. However, when it is necessary to operate the auxiliary transmitter beyond two (2) calendar days, a modulation monitor shall be installed and operated at the auxiliary transmitter control point. The monitor, if taken from the main transmitter control point shall be reinstalled at that point immediately upon resumption of operation of the main transmitter.

(2) In all cases where the auxiliary transmitter and the main transmitter have the same location, the same modulation monitor may be used for monitoring both transmitters, provided the installation permits ready switching from one transmitter to the other.

6. Section 73.113 is amended by deleting paragraph (a)(1)(iv)(b) and redesignating paragraph (a)(1)(iv)(c) as (a)(1)(iv)(b) and amending it to read as follows:

§ 73.113 Operating log.

(a) • • •
(1) • • •
(iv) • • •
(b) Antenna current or remote antenna current (for non-directional operations); common point current or remote common point current (for directional operation).

• • • • • •

7. Sections 73.114 (a)(1)(iii) and (a)(2)(ii) are amended to read as follows:

§ 73.114 Maintenance log.

(a) • • •
(1) • • •
(iii) A notation of the results of all frequency measurements, including date performed and description of method used.

• • • • • •

(2) • • •
(i) Modulation monitor.
(ii) Final stage plate voltmeter.
(iii) Final stage plate ammeter
(iv) Base current ammeter(s)
(v) Common point ammeter
(vi) Antenna monitor

• • • • • •

8. Section 73.252 and headnote are amended to read as follows:

§ 73.252 Frequency measurements.

(a) The carrier frequency of the transmitter shall be measured as often as is necessary to ensure that it is maintained within the prescribed tolerance. However, in no event shall the interval between successive measurements exceed 31 days.

(b) The primary standard of frequency for radio frequency measurements shall be the national standard of frequency maintained by the National Bureau of Standards, Department of Commerce, Washington, D.C. The operating frequency of all radio stations will be determined by comparison with this standard or the standard signals of Station WWV, WWVB, WWVH and WWVL of the National Bureau of Standards.

9. Section 73.255 is amended by adding a new paragraph (f) and redesignating existing paragraph (f) as paragraph (g) to read as follows:

§ 73.255 Auxiliary transmitter.

• • • • • •

(f) The carrier frequency of the auxiliary transmitter shall be measured as often as is necessary to ensure that it is maintained within the prescribed tolerance. If the transmitter is used daily for a period of more than 31 days, the interval between successive measurements shall not exceed 31 days.

(g) The authorized operating power of an auxiliary transmitter may be less, but not more, than that of the regular transmitter. If it is less, the actual operating power is not limited to 105 percent of the authorized operating power of the auxiliary transmitter, but shall

in no event exceed the authorized operating power of the regular transmitter.

§ 73.283 [Amended]

10. Section 73.283 is amended by deleting paragraphs (a)(3)(iii) and (a)(6).

11. Sections 73.284(a)(2) and (a)(4) are amended to read as follows:

§ 73.284 Maintenance log.

(a) • • •

(2) A notation of the results of all frequency measurements, including date performed and description of method used.

• • • • • •

(4) • • •
(i) Modulation monitor
(ii) Final stage plate voltmeter
(iii) Final stage plate ammeter
(iv) Transmission line radio frequency voltage, current, or power meter.

• • • • • •

12. Section 73.295 is amended by deleting paragraph (f)(5) and (i), adding a new paragraph (g), redesignating existing paragraphs (g) and (h) as (h) and (i), to read as follows:

§ 73.295 Operation under Subsidiary Communications Authorizations.

• • • • • •

(g) The frequency of each SCA subcarrier shall be measured as often as necessary to ensure that it is kept at all times within 500 Hz of the authorized frequency. However, in no event shall the interval between successive measurements exceed 31 days.

(h) Program and operating logs for SCA operation may be kept on special columns provided on the station's regular program and operating log sheets.

(i) Technical standards governing SCA operation (§ 73.319) shall be observed by all FM broadcasting stations engaging in such operation.

13. Section 73.297(b) is revised to read as follows:

§ 73.297 Stereophonic broadcasting.

• • • • • •

(b) Each licensee or permittee engaging in stereophonic broadcasting shall measure the pilot subcarrier frequency as often as necessary to ensure that it is kept at all times within 2 Hz of the authorized frequency. However, in no event shall the interval between successive measurements exceed 31 days.

14. In § 73.317 subparagraphs (a)(10) and (c)(5) are amended to read as follows:

§ 73.317 Transmitters and associated equipment.

(a) • • •

(10) Means should be provided for connection and continuous operation of an approved modulation monitor.

• • • • • •

(c) • • •

(5) The modulation monitor and radio frequency lines to the transmitter shall be thoroughly shielded.

• • • • • •

15. Section 73.330 and headnote are amended to read as follows:

§ 73.330 Use of modulation monitors at auxiliary transmitters.

(a) The following shall govern the installation of approved modulation monitors at auxiliary transmitters:

(1) Installation of an approved modulation monitor at the location of the auxiliary transmitter, when different from that of the main transmitter, is optional with the licensee. However, when it is necessary to operate the auxiliary transmitter beyond two (2) calendar days, a modulation monitor shall be installed and operated at the auxiliary transmitter control point. The monitor, if taken from the main transmitter control point shall be reinstalled at that point immediately upon resumption of operation of the main transmitter.

(2) In all cases where the auxiliary transmitter and the main transmitter have the same location, the same modulation monitor may be used for monitoring both transmitters, provided the installation permits ready switching from one transmitter to the other.

§ 73.331 [Deleted]

16. Section 73.331 is deleted.

17. Section 73.552 and headnote are amended to read as follows:

§ 73.552 Frequency measurements.

(a) The carrier frequency of transmitters licensed for transmitter power output greater than 10 watts shall be measured as often as necessary to ensure that it is maintained within the prescribed tolerance. However, in no event shall the interval between successive measurements exceed 31 days.

(b) The primary standard of frequency for radio frequency measurements shall be the national standard of frequency maintained by the National Bureau of Standards, Department of Commerce, Washington, D.C. The operating frequency of all radio stations will be determined by comparison with this standard or the standard signals of Stations WWV, WWVB, WWVH and WWVL of the National Bureau of Standards.

(c) The licensee of each noncommercial educational FM broadcast station licensed for transmitter power output of 10 watts or less shall provide for the measurement of the station frequency by a means independent of the frequency control of the transmitter. The station frequency shall be measured (1) when the transmitter is initially installed, (2) at any time the frequency determining elements are changed, and (3) at any time the licensee may have reason to believe the frequency has shifted beyond the tolerance specified by the Commission's rules.

18. Section 73.555 is amended by adding a new paragraph (f) and redesignating existing paragraph (f) as paragraph (g) to read as follows:

§ 73.555 Auxiliary transmitter.

• • • • • •

(f) The carrier frequency of the auxiliary transmitter shall be measured as often as is necessary to ensure that it is maintained within the prescribed tolerance. If the transmitter is used daily for a period of more than 31 days, the interval between successive measurements shall not exceed 31 days.

(g) The authorized operating power of an auxiliary transmitter may be less, but not more, than that of the regular transmitter. If it is less, the actual operating power is not limited to 105 percent of the authorized operating power of the auxiliary transmitter, but shall in no event exceed the authorized operating power of the regular transmitter.

§ 73.583 [Amended]

19. Section 73.583 is amended by deleting paragraphs (a)(3)(iii) and (a)(6).

20. Sections 73.584(a)(2) and (a)(4) are amended to read as follows:

§ 73.584 Maintenance log.

(a) • • •

(2) A notation of the results of all frequency measurements, including date performed and description of method used.

• • • • • •

(4) • • •
(i) Modulation monitor
(ii) Final stage plate voltmeter
(iii) Final stage plate ammeter
(iv) Transmission line radio frequency voltage, current, or power meter.

• • • • • •

21. Section 73.595 is amended by deleting paragraph (f)(5) and (i), adding a new paragraph (g), redesignating existing paragraphs (g) and (h) as (h) and (i) to read as follows:

§ 73.595 Operating under Subsidiary Communications Authorizations.

• • • • • •

(g) The frequency of each SCA subcarrier shall be measured as often as necessary to ensure that it is kept at all times within 500 Hz of the authorized frequency. However, in no event shall the interval between successive measurements exceed 31 days.

(h) Program and operating logs for SCA operation may be kept on special columns provided on the station's regular program and operating log sheets.

(i) Technical standards governing SCA operation (§ 73.319) shall be observed by all FM broadcasting stations engaging in such operation.

22. Section 73.596 is amended by revising paragraph (b) to read as follows:

§ 73.596 Stereophonic broadcasting.

• • • • • •

(b) Each licensee or permittee engaging in stereophonic broadcasting shall measure the pilot subcarrier frequency as often as necessary to ensure that it is kept at all times within 2 Hz of the authorized frequency. However, in no event shall the interval between successive measurements exceed 31 days.

23. Section 73.672(a)(3) is amended and subparagraphs (i) and (ii) deleted to read as follows:

V 38-160 AUG 20 73 XUM

§ 73.672 Maintenance log.

(a) • • •

(3) An entry whenever frequency measurements are made including the date performed and description of method used.

• • • • •

24. In Section 73.687 subparagraph (e)(5) is amended to read as follows:

§ 73.687 Transmitters and associated equipment.

• • • • •

(e) • • •

(5) The modulation monitors and radio frequency lines to the transmitters shall be thoroughly shielded.

• • • • •

25. Section 73.690 is amended by deleting paragraphs (a) and (b), amending paragraph (c) and redesignating paragraphs (c) and (d) as (a) and (b) to read as follows:

§ 73.690 Frequency measurements.

(a) The visual carrier frequency and the difference between the visual carrier frequency and the center frequency of the aural transmitter shall be measured as often as necessary to ensure that they are maintained within the prescribed tolerance. However, in no event shall the interval between successive measurements exceed 31 days.

(b) The primary standard of frequency for radio frequency measurements shall be the national standard of frequency maintained by the National Bureau of Standards, Department of Commerce, Washington, D.C. The operating frequency of all radio stations will be determined by comparison with this standard or the standard signals of Stations WWV, WWVB, WWVH and WWVL of the National Bureau of Standards.

26. Section 73.692(a) and (b) and headnote are amended to read as follows:

§ 73.692 General requirements for type approval of modulation monitors.

(a) Any manufacturer desiring to submit a monitor for type approval shall supply the Commission with full specification details (two sworn copies) as well as the test data specified in § 73.694. If this information appears to meet the requirements of the rules shipping instructions will be issued to the manufacturer. The shipping charges to and from the Laboratory at Laurel, Maryland, shall be paid for by the manufacturer. Approval of a monitor will only be given on the basis of the data obtained from the sample monitor submitted to the Commission for test.

(b) In approving a monitor upon the basis of tests conducted by the Laboratory, the Commission merely recognized that the type of monitor has the inherent capability of functioning in compliance with the rules, if properly constructed, maintained, and operated.

• • • • •

§ 73.693 [Deleted]

27. Section 73.693 is deleted.

[FR Doc.73-17285 Filed 8-17-73;8:45 am]

Title 49—Transportation

Subtitle A—Office of the Secretary of Transportation

[OST Docket No. 32]

PART 85—CARGO SECURITY ADVISORY STANDARDS

High Value Commodity Storage

By notice published in the FEDERAL REGISTER of June 5, 1973 (38 FR 14760), the Department of Transportation proposed the issuance of its second Cargo Security Advisory Standard, on High Value Commodity Storage, and invited public comment on the advisory standard. Numerous comments were received and the advisory standard has been changed in light of some of the comments.

The Air Transport Association of America (ATA) suggests that during certain "off" hours the availability of either a custodian or supervisory personnel to monitor the security crib would impose an unnecessary restraint upon the operations of its members. ATA suggests that the advisory standard be relaxed with respect to crib accessibility to the extent that when the size or nature of a particular operation does not warrant the designation of a custodian, supervisory or other predesignated responsible personnel should be authorized access to the crib. This suggestion has merit so long as access to the security crib is properly documented, and § 85–2.31(b) and other pertinent sections have been amended accordingly.

The Association of American Railroads (AAR) suggests four substantive changes to the advisory standard, ranging from renaming the advisory standard itself to amendments of specific provisions relating to security crib access, lock control, and alternate storage in lieu of a security crib.

AAR suggests that the advisory standard be renamed "High Value Commodity Storage of LCL–LTL [Less than Car Load-Less than Truck Load] Merchandise". The advisory standard is intended to have applicability to the entire transportation industry. Were AAR's suggestion adopted, the advisory standard would be addressed to only a segment of the industry. This would not serve the overall purpose of the advisory standard, which is to promote uniformity of treatment of high value cargo among all parts of the transportation industry; hence, this suggestion has not been adopted.

Section 85–2.31 Custodian—AAR's comment with respect to this section is similar to that of ATA, discussed above.

Section 85–2.51 Lock—AAR has two suggestions with respect to this section. The first is the addition of the following language: "Locks should be of a type for which duplicate keys can only be obtained from the manufacturer." The Department feels that this restriction would place too great an expense upon the industry, it has not been adopted. AAR's second suggestion with respect to § 85–2.31 concerns subparagraph (b)(2) thereof. AAR feels that this provision would be strengthened by revising it to read: "(b) The lock should be changed . . . (2) immediately whenever a key to the lock is missing or otherwise unaccounted for." This suggestion has merit and has been adopted.

Section 85–2.59 Procedures in lieu of a security crib—AAR recommends that this section be amended to recognize that an acceptable procedure in lieu of a security crib is the backing up to a solid barrier, such as a wall, of a properly sealed or locked trailer, container, or truck, so as to restrict access to the cargo doors. Although it is believed that this is a common practice in the trucking industry, the Department feels that it is not germane to the concept of a security crib as described in the advisory standard and has not adopted the suggestion.

McDonnell Douglas Corporation suggests adding a new section entitled "Protective lighting". It is urged that protective lighting would enhance visual surveillance and deter the theft of items from security cribs. Adequate lighting should be provided both within and without the crib and should be sufficient to permit detection and later identification of intruders by electronic surveillance or by security guards. The Department agrees with this suggestion and has adopted it as a new § 85–2.61.

McDonnell Douglas further recommends that this advisory standard include provisions concerning document control of shipping papers. This topic will be treated in a subsequent advisory standard.

In consideration of the foregoing, effective (publication date), the Appendix to Part 85 of Title 49 of the Code of Federal Regulations is amended by adding a new Part 85–2, to read as follows:

APPENDIX—CARGO SECURITY ADVISORY STANDARDS

PART 85–2—HIGH VALUE COMMODITY STORAGE

SUBPART A—GENERAL

Sec.
85–2.1 Purpose.
85–2.3 Definitions.

SUBPART B—LOCATION OF SECURITY CRIB

85–2.11 Location.
85–2.13 Separation from over, short, and damaged crib.
85–2.15 Small facilities.

SUBPART C—CONSTRUCTION OF SECURITY CRIB

85–2.21 Materials.
85–2.23 Size.
85–2.25 Visual observation.
85–2.27 Portable security crib.

SUBPART D—ACCESS AND CONTROL

85–2.31 Custodian.
85–2.33 Entrance in absence of custodian.

SUBPART E—ACCOUNTABILITY

85–2.41 Control log.
85–2.43 Physical inventory.
85–2.45 Theft or pilferage.
85–2.47 Discrepancies.
85–2.49 Completed logs.

SUBPART F—SECURITY

85–2.51 Lock.
85–2.53 Keys.
85–2.55 Surrounding area.
85–2.57 Electronic surveillance.
85–2.59 Procedures in lieu of a security crib.
85–2.61 Protective lighting.

AUTHORITY: Section 9(e)(1), Department of Transportation Act (80 Stat. 944, 49 U.S.C. 1657(e)(1)); § 85.3 of the Regulations of the Office of the Secretary of Transportation (49 CFR 85.3).

APPENDIX—CARGO SECURITY ADVISORY STANDARDS

PART 85–2—HIGH VALUE COMMODITY STORAGE

Subpart A—General

Sec. 85–2.1 *Purpose.* (a) The purpose of this Part is to set forth minimum procedures and guidelines that should be observed in order to minimize the risk of loss of high-value cargo.

(b) The provisions herein are general and each may not apply to every transportation mode.

Sec. 85–2.3 *Definitions.* As used in this Part—

"Custodian" means a person having direct day-to-day control of a security crib, including custody of and responsibility for the contents thereof.

"High-value cargo" means cargo handled at a facility, which cargo, because of its monetary value, utility, desirability, or history of frequent theft, requires greater protection than other commodities normally handled at the facility.

"Security crib" means an enclosure for temporary storage of high-value cargo; also referred to as "cage", "corral", "vault", or "lockup".

Subpart B—Location of Security Crib

Sec. 85–2.11 *Location.* (a) A security crib should be located in the vicinity of and, ideally, within sight of, the terminal or dock office. It should not be located in a remote area of the facility.

(b) The location should be conducive to frequent, if not continuous, surveillance by supervisory personnel.

(c) Large facilities may require two security cribs, one at each end, provided there is opportunity for reasonable surveillance of both security cribs.

Sec. 85–2.13 *Separation from over, short, and damaged crib.* A security crib should be separate from an over, short, and damaged crib. Over and damaged freight should not be stored in a security crib unless it is of high value.

Sec. 85–2.15 *Small facilities.* (a) In a small facility space limitations may prevent the use of a security crib. In such an instance high-value cargo should be stored in an area specifically designated and reserved for this purpose.

(b) The area described in paragraph (a) of this section should be—

(1) clearly marked;

(2) made off-limits to unauthorized personnel;

(3) within sight of the dock office; and

(4) capable of constant supervisory observation.

Subpart C—Construction of Security Crib

Sec. 85–2.21 *Materials.* A security crib should be constructed of substantial materials which make the crib resistant to forced entry on all sides, underneath, and overhead.

Sec. 85–2.23 *Size.* (a) A security crib should be of a size adequate for storage of all high-value cargo present at the facility at any time. It should not be so large, however, as to encroach upon space necessary for normal operations, thereby resulting in the use of security crib space for other than high-value cargo.

(b) The walls of a security crib should extend to the ceiling of the room in which it is located or be at least 10 feet high with a substantial top or roof resistant to forced entry.

(c) When a shipment of high-value cargo is too large to be stored entirely within a security crib, it should be—

(1) segregated from other cargo;

(2) stored within sight of supervisory personnel; and

(3) physically inspected at least daily by a supervisor for indication of theft or pilferage.

Sec. 85–2.25 *Visual observation.* Construction should permit visual observation of the entire security crib from the outside to deter unauthorized entry and covert tampering with the high-value cargo therein.

Sec. 85–2.27 *Portable security crib.* In the event that use of a portable security crib is necessary, its sides should be securely fastened to the ground to prevent entry underneath by raising of the security crib with a forklift, jack, or other lift equipment.

Subpart D—Access and Control

Sec. 85–2.31 *Custodian.* (a) When size of an operation or volume of high-value cargo requires extensive use of a security crib, a custodian should be designated as the one person directly responsible for control of the security crib. At all times access to the security crib should be under the direct control of the custodian and should be limited to those persons having legitimate business in the security crib.

(b) If the size or nature of the particular operation does not warrant the designation of a custodian, supervisory or other predesignated responsible personnel should be authorized to conduct necessary business at the security crib so long as access is properly documented.

Sec. 85–2.33 *Entrance in absence of custodian.* (a) Where the volume of business conducted at a security crib is substantial and a custodian has been designated, any additional duties assigned to the custodian should be limited to minimize the necessity to enter a security crib in his absence.

(b) If entrance to a security crib in the absence of the custodian is unavoidable, the entrance should be—

(1) conducted in the presence of supervisory personnel;

(2) subsequently reported to the custodian; and

(3) entered on appropriate records.

Subpart E—Accountability

Sec. 85–2.41 *Control log.* (a) A control log should be maintained at a security crib, listing all cargo transferred into and out of the security crib.

(b) The log should contain information sufficient to identify positively—

(1) the cargo transferred;

(2) the time of the transfer; and

(3) the identity of the persons involved in the transfer.

(c) Every transfer should be observed by a supervisor or other predesignated responsible person, or the custodian if one has been designated, and entered in the log.

Sec. 85–2.43 *Physical inventory.* (a) Consistent with the size of the security crib and the amount of cargo stored therein, a physical inventory of all freight in the security crib should be made periodically. Comparison should then be made with the log described in section 85–2.41 of the Part or with a running inventory.

(b) The interval between inventories should not exceed 30 days. Cleared inventory records should remain on file.

Sec. 85–2.45 *Theft or pilferage.* Whenever there is evidence of theft or pilferage from the security crib an immediate and thorough investigation should be conducted. Proper records will indicate when a loss occurred and the persons involved.

Sec. 85–2.47 *Discrepancies.* A security crib should be inspected daily by the facility manager or his representative with discrepancies investigated immediately and errors in procedures brought to the attention of supervisors concerned as quickly as possible.

Sec. 85–2.49 *Completed logs.* Completed logs should be kept in a secure place for at least one year or such other period of time as the company feels they may be needed for investigation of claims.

Subpart F—Security

Sec. 85–2.51 *Lock.* (a) A security crib should be securely locked when unattended.

(b) The lock should be changed—

(1) periodically to minimize the effect of unauthorized duplication of the key; and

(2) immediately whenever a key to the lock is missing or otherwise unaccounted for.

(c) Serial numbers should be removed from the lock and all keys.

Sec. 85–2.53 *Keys.* (a) Keys to the lock on a security crib should be kept by authorized supervisory or other predesignated responsible personnel, or the custodian if one has been designated, and be placed in a locked key box or other secure place at the close of business.

(b) To preclude surreptitious duplication, keys should never leave the facility nor be given, even temporarily, to unauthorized persons.

(c) The number of duplicate keys should be kept to a minimum, and duplicate keys should be accorded the same protection as the original keys.

Sec. 85–2.55 *Surrounding area.* Floor space immediately adjacent to a security crib should be kept clear of stocked cargo which can reduce visibility.

Sec. 85–2.57 *Electronic surveillance.* Depending upon the value of cargo stored in a security crib, the number of transfers thereto and from, and other variables, continuous electronic surveillance of a security crib may be advisable. In such a case, a responsible person or persons should be assigned responsibility of monitoring the television receivers. The versatility of closed circuit television combined with a video tape recorder is ideal for electronic surveillance of a security crib when continuous monitoring of the television receivers is not possible. If tapes are used, they should be reviewed periodically to determine whether unauthorized entry occurs.

Sec. 85–2.59 *Procedures in lieu of a security crib.* The size of an operation, the geographic area in which a facility is located, and the prior loss record may indicate that a security crib is not needed at a particular facility. Special procedures for controlling high-value cargo should still be used and may include—

(a) storage in a special area;

(b) storage in the over, short, and damaged crib;

(c) daily inventories; and

(d) continuous surveillance.

Sec. 85–2.61 *Protective lighting.* To enhance visual surveillance of and to deter the theft of items from security cribs, adequate lighting should be provided within and without the crib. Such lighting should be sufficient

V 38-160 AUG 20 73 XUM

to permit detection and later identification of intruders by electronic surveillance or by security guards.

Issued in Washington, D.C., on August 14, 1973.

DANIEL A. WARD,
Acting Director
of Transportation Security.

[Docket No. 70-27; Notice 9]

PART 571—FEDERAL MOTOR VEHICLE SAFETY STANDARDS

Hydraulic Brake Systems; Date for Response to Petitions for Reconsideration

The purpose of this notice is to announce a date by which a response will be issued to the petitions for reconsideration of Motor Vehicle Safety Standard No. 105a, *Hydraulic Brake Systems*, 49 CFR 571.105a, published May 18, 1973 (38 FR 13107).

The NHTSA has found that it is not practicable to take action by August 16, 1973, the date by which action would ordinarily be taken under the agency's policy on petitions for reconsideration. Action on the above petitions and notice is planned for issuance not later than October 15, 1973.

(Secs. 103, 119, Public Law 89-563, 80 Stat. 718, 15 U.S.C. 1392, 1407; delegation of authority at 49 CFR 1.51 and 49 CFR 501.8).

Issued on August 14, 1973.

ROBERT L. CARTER,
Associate Administrator
Motor Vehicle Programs.

CHAPTER V—NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION DEPARTMENT OF TRANSPORTATION

[Docket No. 72-6; Notice 2]

PART 571—FEDERAL MOTOR VEHICLE SAFETY STANDARDS

Motorcycle Helmets

The purpose of this amendment to Part 571 of Title 49, Code of Federal Regulations, is to add a new Motor Vehicle Safety Standard No. 218, Motorcycle Helmets, 49 CFR § 571.218, that establishes minimum performance requirements for motorcycle helmets manufactured for use by motorcyclists and other motor vehicle users.

A notice of proposed rulemaking on this subject was published on May 19, 1972 (37 FR 10097). The comments received in response to the notice have been carefully considered in this issuance of a final rule.

In the previous notice, the NHTSA proposed that, effective September 1, 1974, the performance levels for the impact attenuation requirements be upgraded to that of the Head Injury Criterion (HIC) required by Motor Vehicle Safety Standard No. 208. A number of comments on this subject sought to defer a final determination until further research and additional tests could be conducted. The agency has carefully reviewed the issues raised by these comments and has determined that technical data presently being generated on this matter by several investigations should be considered in upgrading the impact attenuation requirements. Accordingly, a decision on the upgrading will be deferred until after this research has been completed and the results evaluated, and after any appropriate data have been reviewed.

Comments to the docket on the initial impact attenuation requirement ranged from abolishing the time duration criteria of 2.0 milliseconds and 4.0 milliseconds at the 200g and 150g levels, respectively, to increasing these criteria to 2.8 milliseconds at the 200g level and 5.6 milliseconds at the 150g level. One approach taken in regard to this requirement contends that the available test data are insufficient for quantifying time limits for the relatively short duration accelerations which are involved in helmet testing. Several comments questioned the validity of the proposed time duration limits, since these limits were based on the optional swing-away (as opposed to fixed anvil) test of the American National Standards Institute (ANSI) Standard Z90.1-1966, which was omitted from the most recent issues of the Z90.1 Standard (1971 and 1973) and was not contained in the proposed motorcycle helmet standard. An additional comment points out that helmets designed to meet higher energy impacts than the initial impact attenuation requirement occasionally have difficulty meeting a 2.0 millisecond requirement at the 200g level.

A review of available biomechanical data indicates that the head impact exposure allowed by the 2.0 and 4.0 millisecond limits at the 200g and 150g levels, respectively, is greater than that allowed by other measures of head injury potential. It is the agency's view, moreover, that the best evidence indicates that an increase in the time duration criteria would permit a substantial reduction in the protection provided to the helmet wearer. Since the comments to the docket did not provide any new data or sufficiently compelling arguments which would justify relaxing the proposed limits for tolerable head impact exposure, the 2.0 and 4.0 millisecond criteria are retained as part of the initial impact attenuation criteria.

In response to comments recommending that the allowable weight of the supporting assembly for the impact attenuation drop test be changed to 20 percent instead of the proposed 10 percent of the weight of the drop assembly, the NHTSA has determined that such a change would enable more durable testing equipment to be used without any significant effect on test results. Accordingly, this weight limitation has been raised to 20 percent.

Several comments expressed concern that the proposed 0.04-inch indentation limit included under the penetration test would create problems of measurement. The agency has determined that the intent of this 0.04-inch indentation limit is sufficiently accomplished by the requirement that the striker not contact the surface of the test headform, and the 0.04-inch indentation limit is therefore deleted from the final rule. Further, in consideration of the need to readily detect any contact by the striker, the agency has determined that the contactable surfaces of the penetration test headforms should be constructed of a metal or metallic alloy which will insure detection. Several minor changes in the test conditions for the penetration test have also been made, without altering the substance of those conditions.

A number of comments recommended that where the retention system consists of components which can be independently fastened without securing the complete assembly, such components should not have to individually meet the retention test requirements. Since helmets have a tendency to be thrown off by a crash and motorcyclists sometimes only partially fasten the retention system where such an option exists, the agency has concluded that retention components as well as the entire assembly should meet the test requirements in every fastening mode as specified in the notice of proposed rulemaking.

A number of comments requested that the 105° minimum peripheral vision clearance to each side of the midsagittal plane be increased to 120°. The 105° minimum requirement was proposed because it satisfies a demand by the public for the availability of some helmets which provide added protection to the temporal areas in exchange for a minimal reduction in peripheral vision capability without compromising the safe limits of peripheral vision clearance. A review of available field-of-vision studies and the lack of any evidence to the contrary indicate that 105° minimum clearance to each side of the midsagittal plane provides ample peripheral vision capability. Since the requests for increasing the minimum clearance to 120° were not accompanied by any supporting data or arguments, the agency has concluded that the standard should allow the additional protection which the 105° minimum clearance would permit and, accordingly, this requirement is retained.

With respect to providing important safety information in the form of labeling, one comment recommended that, due to possible label deterioration, both the manufacturer's identification and the helmet model designation should be permanently marked by etching, branding, stamping, embossing, or molding on the exterior of the helmet shell or on a permanently attached component so as to be visible when the helmet is in use. The NHTSA has determined that the practical effect of this recommendation is accomplished by requiring each helmet to be permanently and legibly labeled. The method to be used to permanently and legibly affix a label for each helmet is therefore left to the discretion of the manufacturer. However, in order that there may be some external, visual evidence of conformity to the standard, the labeling requirement has been further

modified to require manufacturer certification in the form of the DOT symbol to appear in permanent form on the exterior of the helmet shell.

One comment recommended that the preliminary test procedures include the application of a 10-pound static test load to the apex of a helmet after it is placed on the reference headform and before the "test line" is drawn to insure that the reference marking will be relatively uniform, thus reducing variances in test results of identical helmets. The agency concurs in this recommendation and it has been included in the standard.

A number of comments objected to the location of the test line. With respect to the proposed requirement that the test line on the anterior portion of a helmet coincide with the reference plane of its corresponding reference headform, it was pointed out that the helmet's brow area would have to be excessively thick in order to meet the impact attenuation criteria at any point less than approximately 1 inch from the brow opening. The data indicate that this objection is valid, and the location of the anterior testline has been modified by placing it 1 inch above and parallel to the reference plane.

A number of comments objected to the proposed requirement that the test line on the posterior portion of a helmet coincide with the basic plane of its corresponding reference headform. The principal objection expressed concern that, by extending the posterior test line to the basic plane, the resulting increase in the posterior surface of a helmet could cause the helmet to impact the wearer's neck where rearward rotation of the head occurs, thereby increasing the potential for injury in certain cases. After further consideration of this aspect of helmet safety, the agency has determined that the location of the test line on the posterior portion of a helmet should be modified by placing it 1 inch below and parallel to the reference plane.

Several comments questioned the sufficiency of the anatomical dimensions and diagrams provided for the reference headforms in the Appendix of the notice of proposed rulemaking. Of these comments, two proposed adopting the dimensional specifications of the existing ANSI Z90.1 headform, while a third recommended the inclusion of an additional reference headform to accomodate their smallest child helmet. The agency has concluded that, in order to promote greater uniformity in testing and more repeatable results, one of the reference headforms should have the dimensional specifications of the readily available Z90.1 headform, the others being scaled proportionally, and that a reference headform for smaller child helmets should be added. Accordingly, the Appendix has been revised to reflect these changes.

Effective date: March 1, 1974.

In consideration of the foregoing, a new Motor Vehicle Safety Standard No. 218, Motorcycle Helmets, is added as § 571.218 of Title 49, Code of Federal Regulations, as set forth below.

(Secs. 103, 112, 119, Public Law 89-563, 80 Stat. 718, 15 U.S.C. 1392, 1401, 1407; delegation of authority at 49 CFR 1.51.)

Issued on August 9, 1973.

JAMES B. GREGORY,
Administrator.

A new § 571.218 is added as follows:

§ 571.218 Standard No. 218; Motorcycle helmets.

S1. *Scope.* This standard establishes minimum performance requirements for helmets designed for use by motorcyclists and other motor vehicle users.

S2. *Purpose.* The purpose of this standard is to reduce deaths and injuries to motorcyclists and other motor vehicle users resulting from head impacts.

S3. *Application.* This standard applies to helmets designed for use by motorcyclists and other motor vehicle users.

S4. *Definitions.*

"Basic plane" means a plane through the centers of the right and left external ear openings and the lower edge of the eye sockets (Figure 1) of a reference headform (Figure 2) or test headform.

"Midsagittal plane" means a longitudinal plane through the apex of a reference headform or test headform that is perpendicular to the basic plane (Figure 3).

"Reference plane" means a plane above and parallel to the basic plane on a reference headform or test headform (Figure 2) at the distance indicated in the Appendix.

"Reference headform" means a measuring device contoured to the dimensions of one of the four headforms described in the Appendix, with surface markings indicating the locations of the basic, midsagittal, and reference planes, and the centers of the external ear openings.

"Test headform" means a test device contoured to the dimensions of one of the four reference headforms described in the Appendix for all surface areas that contact the helmet, with surface markings indicating the locations of the basic, midsagittal, and reference planes.

"Retention system" means the complete assembly by which the helmet is retained in position on the head during use.

"Helmet positioning index" means the distance in inches, as specified by the manufacturer, from the lowest point of the brow opening at the lateral midpoint of the helmet to the basic plane of a reference headform, when the helmet is firmly and properly positioned on the reference headform.

S5. *Requirements.* Each helmet shall meet the requirements of S5.1 through S5.3 when subjected to any conditioning procedure specified in S6.3, and tested in accordance with S7.

S5.1 *Impact attenuation.* When an impact attenuation test is conducted in accordance with S7.1, all of the following requirements shall be met:

(a) Peak accelerations shall not exceed 400g;

(b) Accelerations in excess of 200g shall not exceed a cumulative duration of 2.0 milliseconds; and

(c) Accelerations in excess of 150g shall not exceed a cumulative duration of 4.0 milliseconds.

S5.2 *Penetration.* When a penetration test is conducted in accordance with S7.2, the striker shall not contact the surface of the test headform.

S5.3 *Retention system.*

S5.3.1 When tested in accordance with S7.3:

(a) The retention system or its components shall attain the loads specified without separation; and

(b) The adjustable portion of the retention system test device shall not move more than 1 inch measured between preliminary and test load positions.

S5.3.2 Where the retention system consists of components which can be independently fastened without securing the complete assembly, each such component shall independently meet the requirements of S5.3.1.

S5.4 *Configuration.* Each helmet shall have a protective surface of continuous contour at all points on or above the test line described in S6.1.3. The helmet shall provide peripheral vision clearance of at least 105° to each side of the midsagittal plane, when the helmet is adjusted as specified in S6.2. The vertex of these angles, shown in Figure 3, shall be at the point on the anterior surface of the reference headform at the intersection of the midsagittal and basic planes. The brow opening of the helmet shall be at least 1 inch above all points in the basic plane that are within the angles of peripheral vision (see Figure 3).

S5.5 *Projections.* A helmet shall not have any rigid projections inside its shell. Rigid projections outside any helmet's shell shall be limited to those required for operation of essential accessories, and shall not protrude more than 0.19 inch.

S5.6 *Labeling.*

S5.6.1 Each helmet shall be permanently and legibly labeled, in a manner such that the label(s) can be easily read without removing padding or any other permanent part, with the following:

(1) Manufacturer's name or identification.

(2) Precise model designation.

(3) Size.

(4) Month and year of manufacture. This may be spelled out (e.g., June 1974), or expressed in numerals (e.g., 6/74).

(5) The symbol DOT, constituting the manufacturer's certification that the helmet conforms to the applicable Federal Motor Vehicle Safety Standards. This symbol shall appear on the outer surface, in a color that contrasts with the background, in letters at least $\frac{3}{8}$ inch high, centered laterally approximately $1\frac{1}{4}$ inches from the bottom edge of the posterior portion of the helmet.

V 38-160 AUG 20 73 XUM

(6) Instruction to the purchaser as follows:

"Shell and liner constructed of (identify type(s) of materials).

"Helmet can be seriously damaged by some common substances without damage being visible to the user. Apply only the following: (Recommended cleaning agents, paints, adhesives, etc., as appropriate).

"Make no modifications. Fasten helmet securely. If helmet experiences a severe blow, return it to the manufacturer for inspection, or destroy and replace it." (On an attached tag, brochure, or other suitable means, any additional, relevant safety information should be supplied at the time of purchase.)

S5.7 *Helmet positioning index.* Each manufacturer of helmets shall establish a positioning index for each helmet he manufactures. This index shall be furnished immediately to any person who requests the information, with respect to a helmet identified by manufacturer, model designation, and size.

S6. *Preliminary test procedures.* Before subjecting a helmet to the testing sequence specified in S7., prepare it according to the following procedures.

S6.1 *Reference marking.*

S6.1.1 Use a reference headform that is firmly seated with the basic and reference planes horizontal. Place the complete helmet to be tested on the reference headform of the largest size specified in the Appendix whose circumference is not greater than the internal circumference of the headband when adjusted to its largest setting, or if no headband is provided to the corresponding interior surface of the helmet.

S6.1.2 Apply a 10-pound static load normal to the helmet's apex. Center the helmet laterally and seat it firmly on the reference headform according to its helmet positioning index.

S6.1.3 Maintaining the load and position described in S6.1.2, draw a line (hereinafter referred to as "test line") on the outer surface of the helmet coinciding with portions of the intersection of that surface with the following planes, as shown in Figure 2:

(a) A plane 1 inch above and parallel to the reference plane in the anterior portion of the reference headform;

(b) A vertical transverse plane 2.5 inches behind the point on the anterior surface of the reference headform at the intersection of the midsagittal and reference planes;

(c) The reference plane of the reference headform;

(d) A vertical transverse plane 2.5 inches behind the center of the external ear opening in a side view; and

(e) A plane 1 inch below and parallel to the reference plane in the posterior portion of the reference headform.

S6.2 *Helmet positioning.* Prior to each test, fix the helmet on a test headform in the position that conforms to its helmet positioning index. Secure the helmet so that it does not shift position prior to impact or to application of force during testing.

S6.2.1 In testing as specified in S7.1 and S7.2, place the retention system in a position such that it does not interfere with free fall, impact, or penetration.

S6.3 *Conditioning.* Immediately prior to conducting the testing sequence specified in S7., condition each test helmet in accordance with any one of the following procedures:

(a) *Ambient conditions.* Expose to a temperature of 70°F. and a relative humidity of 50 percent for 24 hours.

(b) *Low temperature.* Expose to a temperature of −20°F. for 24 hours.

(c) *High temperature.* Expose to a temperature of 122°F. for 24 hours.

(d) *Water immersion.* Immerse in water at a temperature of 77°F. for 24 hours.

If during testing, the time out of the conditioning environment for a test helmet exceeds 5 minutes, return the helmet to the conditioning environment for a minimum of 3 minutes for each minute out of the conditioning environment or 24 hours, whichever is less, prior to resumption of testing.

S7. *Test conditions.*

S7.1 *Impact attenuation test.*

S7.1.1 Impact attenuation is measured by determining acceleration imparted to an instrumented test headform on which a complete helmet is mounted as specified in S6.2, when it is dropped in guided free fall upon fixed hemispherical and flat steel anvils.

S7.1.2 Each helmet is impacted at four sites with two successive, identical impacts at each site. Two of these sites are impacted upon a flat steel anvil and two upon a hemispherical steel anvil as specified in S7.1.7 and S7.1.8. The impact sites are at any point on the area above the test line described in S6.1.3, and separated by a distance not less than one-sixth of the maximum circumference of the helmet.

S7.1.3 The guided free fall drop heights for the helmet and test headform combination onto the hemispherical anvil and flat anvil are 54.5 inches and 72 inches, respectively.

S7.1.4 Test headforms for impact attenuation testing are constructed of magnesium alloy (K–1A), and exhibit no resonant frequencies below 3,000 Hz.

S7.1.5 Weight of the drop assembly, as specified in Table I, is the combined weight of the instrumented test headform and supporting assembly for the drop test. The weight of the supporting assembly does not exceed 20% of the weight of the drop assembly. The center of gravity of the combined test headform and supporting assembly lies within a cone with its axis vertical and forming a 10° included angle with the vertex at the point of impact.

S7.1.6 The acceleration transducer is mounted at the center of gravity of the combined test headform and supporting assembly with the sensitive axis aligned to within 5° of vertical when the test headform is in the impact position. The acceleration data channel complies with SAE Recommended Practice J211 requirements for channel class 1,000.

S7.1.7 The flat anvil is constructed of steel with a 5-inch minimum diameter impact face, and the hemispherical anvil is constructed of steel with a 1.9-inch radius impact face.

S7.1.8 The rigid mount for both of the anvils consists of a solid mass of at least 300 pounds, the outer surface of which consists of a steel plate with minimum thickness of 1 inch and minimum surface area of 1 ft².

S7.2 *Penetration test.*

S7.2.1 The penetration test is conducted by dropping the penetration test striker in guided free fall, with its axis aligned vertically, onto the outer surface of the complete helmet, when mounted as specified in S6.2, at any point above the test line, described in S6.1.3, except on a fastener or other rigid projection.

S7.2.2 Two penetration blows are applied at least 3 inches apart, and at least 3 inches from the centers of any impacts applied during the impact attenuation test.

S7.2.3 The height of the guided free fall is 118.1 inches, as measured from the striker point to the impact point on the outer surface of the test helmet.

7.2.4 The contractable surfaces of the penetration test headforms are constructed of a metal or metallic alloy having a Brinell hardness number no greater than 55, which will readily permit detection should contact by the striker occur. The surface is refinished if necessary prior to each penetration test blow to permit detection of contact by the striker.

S7.2.5 The weight of the penetration striker is 6 pounds, 10 ounces.

S7.2.6 The point of the striker has an included angle of 60°, a cone height of 1.5 inches, a tip radius of 0.019 inch (standard 0.5 millimeter radius) and a minimum hardness of 60 Rockwell, C-scale.

S7.2.7 The rigid mount for the penetration test headform is as described in S7.1.8

S7.3 *Retention system test.*

S7.3.1 The retention system test is conducted by applying a static tensile load to the retention assembly of a complete helmet, which is mounted, as described in S6.2, on a stationary test headform as shown in Figure 4, and by measuring the movement of the adjustable portion of the retention system test device under tension.

S7.3.2 The retention system test device consists of both an adjustable loading mechanism by which a static tensile load is applied to the helmet retention assembly and a means for holding the test headform and helmet stationary. The retention assembly is fastened around two freely moving rollers, both of which have a 0.5 inch diameter and a 3-inch center-to-center separation, and which are mounted on the adjustable portion of the tensile loading device (Figure 4). The helmet is fixed on the test headform as necessary to ensure that it does not move during the application of the test loads to the retention assembly.

S7.3.3 A 50-pound preliminary test load is applied to the retention assembly, normal to the basic plane of the test headform and symmetrical with respect to the center of the retention assembly for 30 seconds, and the maximum distance from the extremity of the adjustable portion of the retention system test device to the apex of the helmet is measured.

S7.3.4 An additional 250-pound test load is applied to the retention assembly, in the same manner and at the same location as described in S7.3.3, for 120 seconds, and the maximum distance from the extremity of the adjustable portion of the retention system test device to the apex of the helmet is measured.

[Docket No. 70-20; Notice 2]

PART 571—FEDERAL MOTOR VEHICLE SAFETY STANDARDS

Fuel System Integrity

This notice amends Motor Vehicle Safety Standard No. 301 on fuel system integrity to specify static rollover requirements applicable to passenger cars on September 1, 1975, and to extend applicability of the standard to multipurpose passenger vehicles, trucks, and buses with a GVWR of 10,000 pounds or less on September 1, 1976.

The NHTSA proposed amending 49 CFR 571.301, *Fuel Tanks, Fuel Tank Filler Pipes, and Fuel Tank Connections,* on August 29, 1970, (35 FR 13799). Under the proposal the standard would be extended to all vehicles with a GVWR of 10,000 pounds or less. No fuel spillage would be permitted during the standard's tests. As proposed, these would include a spike stop from 60 mph, and a 30 mph frontal barrier crash. Additional tests for vehicles with a GVWR of 6,000 pounds or less would include a rear-end collision with a fixed barrier at 30 mph, and a static rollover test following the frontal barrier crash. With respect to the proposal: the frontal impact and static rollover tests are adopted but with an allowance of fuel spillage of 1 ounce per minute; the spike stop test is not adopted; and the rear-end fixed barrier collision test is being reproposed in a separate rule making action published today (38 FR 22417) to substitute a moving barrier.

The proposal that there be zero fuel spillage was almost universally opposed for cost/benefit reasons. The NHTSA has concluded that the requirement adopted, limiting fuel spillage to 1 ounce per minute, will have much the same effect as a zero-loss requirement. The standard will effectively require motor vehicles to be designed for complete fuel containment, since any spillage allowed by design in the aftermath of testing could well exceed the limit of the standard. At the same time, the 1-ounce allowance would eliminate concern over a few drops of spillage that in a functioning system may be unavoidable.

Fuel loss will be measured for a 15-minute period for both impact and rollover tests.

The NHTSA proposed a panic-braking stop from 60 mph to demonstrate fuel system integrity. Many commented that this appeared superfluous, increasing testing costs with no performance improvements, since the proposed front and rear impact tests represented considerably higher deceleration loadings than could be achieved in braking. The NHTSA concurs, and has not adopted the panic stop test. The frontal barrier crash at 30 mph has been retained for passenger cars, and extended to multipurpose passenger vehicles, trucks, and buses with a GVWR of 10,000 pounds or less as of September 1, 1976.

The static rollover test was adopted as proposed. It applies to passenger cars as of September 1, 1975, and to multipurpose passenger vehicles, trucks, and buses with a GVWR of 6,000 pounds or less, as of September 1, 1976. The rollover test follows the front barrier crash, and consists of a vehicle being rotated on its longitudinal axis at successive increments of 90°. A condition of the test is that rotation between increments occurs in not less than 1 minute and not more than 3 minutes. After reaching a 90° increment, the vehicle is held in that position for 5 minutes.

The proposed rear-end crash test incorporated a fixed collision barrier. Manufacturers generally favored a moving barrier impact as a closer simulation of real world conditions. The NHTSA concurs and is not adopting a rear-end fixed barrier test. Instead, it is proposing a rear-end moving barrier collision test as part of the notice of proposed rulemaking published today.

Under the proposal the vehicle would be loaded to its GVWR with the fuel tank filled to any level between 90 and 100 percent of capacity. Many commenters objected on the grounds that full loading of a vehicle represents an unrealistic condition in terms of actual crash experience. The NHTSA does not agree. Although full loading of a vehicle is not the condition most frequently encountered, it certainly occurs frequently enough that the vehicle should be designed to give basic protection in that condition. The vehicle test weight condition has been adopted as proposed. It should be noted that, in the parallel notice of proposed rulemaking issued today, vehicles would be tested under the weight conditions specified in Standard No. 208, effective September 1, 1975.

In consideration of the foregoing, 49 CFR 571.301, Motor vehicle Safety Standard No. 301, is amended to read as set forth below.

Effective date: September 1, 1975. Because of the necessity to allow manufacturers sufficient production leadtime it is found for good cause shown that an effective date later than 1 year after issuance of this rule is in the public interest.

(Secs. 103, 119, Pub. L. 89-563, 80 Stat. 718, 15 U.S.C. 1392, 1407; delegation of authority at 49 CFR 1.51)

Issued on August 15, 1973.

JAMES B. GREGORY,
Administrator.

§ 571.301 Standard No. 301; fuel tanks, fuel tank filler pipes, and fuel tank connections.

S1. *Scope.* This standard specifies requirements for the integrity of motor vehicle fuel systems.

S2. *Purpose.* The purpose of this standard is to reduce deaths and injuries occurring from fires that result from fuel spillage during and after motor vehicle crashes.

S3. *Application.* This standard applies to passenger cars, and to multipurpose passenger vehicles, trucks, and buses with a GVWR of 10,000 pounds or less.

S4. *Definition.* "Fuel spillage" means the fall, flow, or run of fuel from the vehicle but does not include wetness resulting from capillary action.

S5. *General requirements*

S5.1 *Passenger cars.* Each passenger car manufactured on or after September 1, 1975, shall meet all the requirements of this standard.

S5.2 *Vehicles with GVWR of 6,000 pounds or less.* Each multipurpose passenger vehicle, truck, and bus with a GVWR of 6,000 pounds or less manufactured on or after September 1, 1976, shall meet all the requirements of this standard.

S5.3 *Vehicles with GVWR of more than 6,000 pounds but not more than 10,000 pounds.* Each multipurpose passenger vehicle, truck, and bus, with a GVWR more than 6,000 pounds and not more than 10,000 pounds manufactured on or after September 1, 1976, shall meet the requirements of S6.1.

S5.4 *Fuel spillage: barrier crash.* Fuel spillage in any barrier crash test shall not exceed 1 ounce from impact until motion of the vehicle has ceased, and shall not exceed 1 ounce per minute in the 15-minute period following cessation of motion.

S5.5 *Fuel spillage: rollover.* Fuel spillage in any rollover test shall not exceed 1 ounce per minute.

S6. *Test requirements.* Each vehicle shall meet the following requirements in sequence.

S6.1 *Frontal barrier crash.* When the vehicle traveling longitudinally forward at any speed up to and including 30 mph impacts a fixed collision barrier that is perpendicular to the line of travel of the vehicle, fuel spillage shall not exceed the limits specified in S5.4.

S6.2 *Rollover.* When the vehicle is rotated on its longitudinal axis at each successive increment of 90°, fuel spillage shall not exceed the limits specified in S5.5.

S7. *Conditions.* The requirements of S5. and S6. shall be met under the following conditions. Where a range of conditions is specified, the vehicle must be capable of meeting the requirements at all points within the range.

S7.1 *Vehicle weight.* The vehicle is loaded to its GVWR, and the fuel tank is filled to any level between 90 and 100 percent of capacity.

S7.2 *Vehicle weight distribution.* Weight in excess of unloaded vehicle weight is distributed to each axle in proportion to the vehicle's gross axle weight ratings, and is firmly fixed to the vehicle so that it absorbs no significant portion of the vehicle's kinetic energy.

S7.3 *Engine.* The engine is at ambient temperature.

S7.4 *Fuel system.* The fuel tank contains the fuel normally used to operate the vehicle or Stoddard solvent, having the physical and chemical properties of Type 1 solvent, Table 1 ASTM Standard D484-71, "Standard Specifications for Hydrocarbon Dry Cleaning Sol-

V 38-160 AUG 20 73 XUM

vents," and the remainder of the fuel system is filled to its normal operating levels with this fuel.

S7.5 *Parking brake and transmission.* The parking brake is disengaged and the transmission is in neutral.

S7.6 *Tires.* Tires are inflated to manufacturer's specifications.

S7.7 *Static rollover test condition.* The vehicle is rotated to each successive increment at a uniform rate, with 90° of rotation taking place in not less than 1 minute and not more than 3 minutes. After reaching a 90° increment the vehicle is held in that position for 5 minutes.

CHAPTER X—INTERSTATE COMMERCE COMMISSION

SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[S.O. No. 1120; 2nd Revision]

PART 1033—CAR SERVICE

Distribution of Covered Hopper Cars

AUGUST 15, 1973.

At a session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 14th day of August 1973.

It appearing, That an acute shortage of covered hopper cars for transporting shipments of grain, grain products, soybeans, or soybean meal exists in certain sections of the country; that some carriers have placed substantial numbers of large-capacity covered hopper cars in unit-train service for the movement of grain under tariff provisions which require that these cars remain in this service for five or more consecutive trips in the service of a single shipper; that such practices are depriving shippers, unable to ship to the destinations to which such services are available or unable to comply with tariff provisions applicable to such movements with respect to availability of tonnage in a single day or ability to receive grain in such quantities, of an equitable share of the supply of large covered hoppers; that entire areas of the country are unable to secure shipments of vitally needed feed grains because of these car distribution practices, thus creating great economic loss; that present regulations and practices with respect to the use, supply, control, movement, and distribution of covered hopper cars are ineffective. It is the opinion of the Commission that an emergency exists requiring immediate action to promote car service in the interest of the public and the commerce of the people. Accordingly, the Commission finds that notice and public procedure are impracticable and contrary to the public interest, and that good cause exists for making this order effective upon less than thirty days' notice.

It is ordered, That:

§ 1033.1120 Service Order No. 1120.

(a) *Distribution of covered hopper cars.* Each common carrier by railroad subject to the Interstate Commerce Act shall observe, enforce, and obey the following rules, regulations, and practices with respect to its car service:

(1) *Restrictions on Use of Covered Hopper Cars.* Effective September 1, 1973, no common carrier by railroad shall permit the use in unit-grain-train services of more than twenty percent (20 percent) of its ownership of jumbo covered hopper cars. (See exception.)

*(2) *Exception.* Newly acquired cars which represent net additions to a carrier's ownership of jumbo covered hopper cars when authorized by R. D. Pfahler, Chairman, Railroad Service Board, Interstate Commerce Commission, Washington, D.C. 20423.

*(3) *Increased Use in Unit Trains Prohibited.* No common carrier by railroad shall increase the proportion of its ownership of covered hopper cars operated in unit-grain-train services above the proportion operated in unit-grain-train services on February 1, 1973.

(4) *Substitution of Small Cars for Jumbo Cars Prohibited.* No common carrier shall substitute smaller covered hopper cars for jumbo covered hopper cars for use in unit-grain-train services.

(5) *Monthly Reports Required.* Each common carrier by railroad owning jumbo covered hopper cars shall report to Mr. R. D. Pfahler, Chairman, Railroad Service Board, Interstate Commerce Commission, Washington, D.C. 20423, on or before the tenth day of each month the number of jumbo covered hopper cars owned, as of the first of the month, the number in unit-grain-train services, the number in general grain services, the number in other services, the number of unit-grain-trains operated during the previous month, and the number of trips made by such trains.

(b) *Definitions.*—(1) *Unit-grain-trains.* Unit-grain-trains are hereby defined as trains of fifty (50) or more covered hoppers organized and operated as a unit from a single point of origin, in-transit loading point, or concentration point and consigned to one destination or distribution point in order to comply with published tariff requirements.

(2) *Jumbo covered hopper cars of railroad ownership.* Jumbo covered hopper cars of railroad ownership are hereby defined as cars listed in the Official Railway Equipment Register, I.C.C. R.E.R. No. 388, issued by W. J. Trezise, or successive issues thereof as bearing reporting marks issued to a railroad and having mechanical designation "LO" and having cubical capacities of 4,000 cu. ft. or larger and weight-carrying capacities of 180,000 lbs. or greater.

(c) *Rules and regulations suspended.* In the event that the operation of any unit-grain-train is discontinued prior to September 1, 1973, as a result of this order, the discontinuance of such a train shall be deemed to have completed the tariff responsibility as to the number of consecutive trips required to be made by such unit-grain-train. The operation of all other tariff provisions or of other rules and regulations, insofar as they conflict with the provisions of this order, is hereby suspended.

(d) *Application.* The provisions of this order shall apply to intrastate, interstate, and foreign commerce.

(e) *Effective date.* This order shall become effective at 11:59 p.m., August 26, 1973.

(f) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., December 15, 1973, unless otherwise modified, changed, or suspended by order of this Commission.

(Secs. 1, 12, 15, and 17(2), 24 Stat. 379, 383, 384, as amended; 49 U.S.C. 1, 12, 15, and 17(2). Interprets or applies Secs. 1(10-17), 15(4), and 17(2), 40 Stat. 101, as amended, 54 Stat. 911; 49 U.S.C. 1(10-17), 15(4), and 17(2).)

It is further ordered, That a copy of this order and direction shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that notice of this order be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board.

[SEAL] ROBERT L. OSWALD,
Secretary.

Title 50—Wildlife and Fisheries

CHAPTER I—BUREAU OF SPORT FISHERIES AND WILDLIFE, FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 32—HUNTING

Crescent Lake National Wildlife Refuge

The following special regulation is issued and is effective on date of publication in the FEDERAL REGISTER.

§ 32.32 Special regulations; big game; for individual wildlife refuge areas.

NEBRASKA

CRESCENT LAKE NATIONAL WILDLIFE REFUGE

Public hunting of antelope and deer on the Crescent Lake National Wildlife Refuge, Nebraska is permitted only on the area designated by signs as open to hunting. This open area, comprising 40,900 acres, is delineated on maps available at refuge headquarters, Ellsworth, Nebraska, and from the Regional Director, Bureau of Sport Fisheries and Wildlife, 10597 West Sixth Avenue, Denver, Colorado 80215. Hunting of antelope and deer shall be in accordance with all applicable State regulations covering the hunting of antelope and deer subject to the following conditions:

(1) Vehicle entrance and travel will be permitted only on designated well-defined trails. No vehicle travel is permitted beyond posted points, or off the designated trails in the hills or meadows.

(2) No overnight camping is permitted.

(3) No open fires are permitted.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas, generally, which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through December 31, 1973.

RONALD L. PERRY,
Refuge Manager, Crescent Lake Nat'l Wildlife Refuge, Ellsworth, Nebraska.

AUGUST 8, 1973.

[FR Doc.73-17248 Filed 8-17-73;8:45 am]

PART 32—HUNTING

Crescent Lake National Wildlife Refuge

The following special regulation is issued and is effective August 20, 1973.

§ 32.22 Special regulations; upland game; for individual wildlife refuge areas.

NEBRASKA

CRESCENT LAKE NATIONAL WILDLIFE REFUGE

Public hunting of sharp-tailed grouse and ring-necked pheasants on the Crescent Lake National Wildlife Refuge, Nebraska, is permitted only on the area designated by signs as open to hunting. This open area, comprising 40,900 acres, is delineated on maps available at refuge headquarters, Ellsworth, Nebraska 69340, and from the Regional Director, Bureau of Sport Fisheries and Wildlife, 10597 West Sixth Avenue, Denver, Colorado 80215. Hunting of sharp-tailed grouse and ring-necked pheasants is permitted during the established State seasons. Hunting shall be in accordance with all applicable State regulations covering the hunting of sharp-tailed grouse and ring-necked pheasants subject to the following special conditions:

(1) Vehicle entrance and travel will be permitted only on designated well-defined trails. No vehicle travel is permitted beyond posted points, or off the designated trails in the hills or meadows.

(2) No overnight camping is permitted.

(3) No open fires are permitted.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas, generally, which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through January 31, 1974.

RONALD L. PERRY,
Refuge Manager, Crescent Lake Nat'l Wildlife Refuge, Ellsworth, Nebraska.

AUGUST 8, 1973.

[FR Doc.73-17326 Filed 8-17-73;8:45 am]

CHAPTER II—NATIONAL MARINE FISHERIES SERVICE NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION

PART 240—REGULATED COMMERCIAL FISHERIES

On July 24, 1973, a notice of proposed rule making was published in the FEDERAL REGISTER (38 FR 19832) to revise existing regulations under Part 240 to include 1973 annual catch quotas for mackerel, pollock, redfish and other flounders in their respective subparts. In addition, Part 242—Herring Fisheries, was deleted and incorporated under this Part 240, as Subpart E—Pelagic Fisheries.

Interested persons were given 20 days in which to submit written comments, suggestions, or objectives regarding the proposed regulations.

No objections have been received and the proposed regulations are hereby adopted without change and are set forth below.

Effective date: These regulations shall be effective as of August 20, 1973.

ROBERT W. SCHONING,
Director, National Marine Fisheries Service.

At the midyear meeting held in Rome, Italy, January 16–26, 1973, the International Commission for the Northwest Atlantic Fisheries recommended that member governments adopt revised catch quotas for herring for 1973 in the areas presently regulated by the Commission and to implement annual catch quotas adopted for mackerel, pollock, redfish, and other flounders, except yellowtail flounders, in Subareas 4 and 5.

At the present time, annual catch quotas for herring are published in the FEDERAL REGISTER under Title 50 CFR, Part 242—Herring Fisheries, while other Northwest Atlantic commercial fish species are regulated under Title 50 CFR, Part 240—Groundfish Fisheries. Recognizing that this arrangement may be confusing to fishermen who catch more than one species or change during the year from one fishery to another, it is proposed to transfer the provisions of 50 CFR Part 242 to 50 CFR Part 240 and reserve Part 242 for future use.

Therefore, it is proposed to incorporate the new regulated species into the existing regulations, thereby providing a single document that will provide easier reference. The proposed changes and inclusions are as follows:

1. Change the title of present Part 240 from "Groundfish Fisheries" to "Regulated Commercial Fisheries."

2. Add to § 240.1(c)(5), the new regulated species; pollock, redfish, mackerel, other flounders.

3. In Subpart B—Groundfish Fisheries, it is proposed to include the 1973 catch quotas for pollock and redfish. The 1973 annual catch quota for redfish for vessels under the jurisdiction of the United States in Subarea 5 shall not exceed 24,550 metric tons and for pollock, 11,275 metric tons.

4. In Subpart C—Flatfish Fisheries, it is proposed to include the 1973 catch quota for other flounders. The 1973 annual aggregate catch quota for other flounders, excluding yellowtail flounder, for vessels under the jurisdiction of the United States shall not exceed 21,700 metric tons.

5. It is proposed to add a new Subpart E—Pelagic Fisheries, which would include the regulations for herring presently published under Part 242 and mackerel recently adopted as a regulated species. The 1973 catch quotas for herring for vessels under the jurisdiction of the United States shall be as follows:

Division 5Z of Subarea 5, 5,250 metric tons; Division 5Y of Subarea 5, 19,750 metric tons; and Division 4X and 4W of Subarea 4, 400 metric tons. The 1973 catch quota for mackerel in Subarea 5 is 26,200 metric tons.

6. It is proposed to make other minor editorial changes to provide consistent language within each subpart.

The proposed amendments are to be issued under the authority contained in subsection (a) of section 7 of the Northwest Atlantic Fisheries Act of 1950 (64 Stat. 1069; 16 U.S.C. 986) as modified by Reorganization Plan No. 4, effective October 3, 1970 (35 FR 15627).

Prior to final adoption of the proposed amendments, consideration will be given to any data, views, or arguments pertaining thereto which are submitted in writing to the Director, National Marine Fisheries Service, Washington, D.C. 20235, on or before August 13, 1973.

Issued at Washington, D.C., and dated July 17, 1973.

T. P. GLEITER,
Assistant Administrator for Administration.

V 38-160 AUG 20 73 XUM

Subpart A—General Provisions

§ 240.1 Definitions.

(a) *Convention area.* The term "Convention area" means and includes all waters, except territorial waters, bounded by a line beginning at a point on the coast of Rhode Island in 71°40′ west longitude; thence due south to 39°00′ north latitude; thence due east to 42°00′ west longitude; thence due north to 50°00′ north latitude; thence due west to 44°00′ west longitude; thence due north to the coast of Greenland; thence along the west coast of Greenland to 78°10′ north latitude; thence southward to a point in 75°00′ north latitude and 73°30′ west longitude, thence along a rhumb line to a point in 69°00′ north latitude and 50°00′ west longitude; thence due south to 61°00′ north latitude; thence due west to 64°30′ west longitude; thence due south to the coast of Labrador; thence in a southerly direction along the coast of Labrador to the southern terminus of its boundary with Quebec; thence in a westerly direction along the coast of Quebec, and in an easterly and southerly direction along the coasts of New Brunswick, Nova Scotia, and Cape Breton Island, to Cabot Strait; thence along the coasts of Cape Breton Island, Nova Scotia, New Brunswick, Maine, New Hampshire, Massachusetts and Rhode Island to the point of beginning.

(b) *Regulatory area.* The term "Regulatory area" means and includes the whole of those portions of the Convention area which are separately described as follows:

(1) *Subarea 1.* The term "Subarea 1" means that portion of the Convention area, including all waters except territorial waters, which lies to the north and east of a rhumb line from a point in 75°00′ north latitude and 73°30′ west longitude to a point in 69°00′ north latitude and 59°00′ west longitude; east of 59°00′ west longitude; and to the north and east of a rhumb line from a point in 61°00′ north latitude and 59°00′ west longitude to a point in 52°15′ north latitude and 42°00′ west longitude.

(2) *Subarea 2.* The term "Subarea 2" means that portion of the Convention area, including all waters except territorial waters, lying to the south and west of Subarea 1, as defined in subparagraph (1) of this paragraph, and to the north of the parallel of 52°15′ north latitude.

(3) *Subarea 3.* The term "Subarea 3" means that portion of the Convention area, including all waters except territorial waters, lying south of the parallel of 52°15′ north latitude; and to the east of a line extending due north from Cape Bauld on the north coast of Newfoundland to 52°15′ north latitude; to the north of the parallel of 39°00′ north latitude; and to the east and north of a rhumb line extending in a northwesterly direction which passes through a point in 42°30′ north latitude, 55°00′ west longitude in the direction of a point in 47°50′ north latitude, 60°00′ west longitude, until it intersects a straight line connecting Cape Ray, on the coast of Newfoundland, with Cape North on Cape Breton Island; thence in a northeasterly direction along said line to Cape Ray.

(4) *Subarea 4.* The term "Subarea 4" means that portion of the Convention area, including all waters except territorial waters, lying to the west of Subarea 3 as described in subparagraph (3) of this paragraph, and to the east of a line described as follows: Beginning at the terminus of the international boundary between the United States of America and Canada in Grand Manan Channel, at a point 44°46′35.34″ north latitude, 66°54′11.23″ west longitude; thence due south to the parallel of 43°50′ north latitude; thence due west to the meridian of 67°40′ west longitude; thence due south to the parallel of 42°40′ north latitude; thence due east to a point in 66°00′ west longitude; thence along a rhumb line in a southeasterly direction to a point in 42°00′ north latitude, 65°40′ west longitude; thence due south to the parallel of 39°00′ north latitude.

(5) *Subarea 5.* The term "Subarea 5" means that portion of the Convention area, including all waters except territorial waters, bounded by a line beginning at the terminus of the international boundary between the United States of America and Canada in Grand Manan Channel at a point in 44°46′35.34″ north latitude, 66°54′11.23″ west longitude; thence due south to the parallel of 43°50′ north latitude; thence due west to the meridian of 67°40′ west longitude; thence due south to the parallel of 42°20′ north latitude; thence due east to a point in 66°00′ west longitude; thence along a rhumb line in a southeasterly direction to a point in 42°00′ north latitude, 65°40′ west longitude; thence due south to the parallel of 39°00′ north latitude; thence due west to the meridian of 71°40′ west longitude; thence due north to a point 3 statute miles off the coast of the State of Rhode Island; thence along the coasts of Rhode Island, Massachusetts, New Hampshire, and Maine at a distance of 3 statute miles to the point of beginning.

(c) *Regulated species.* The regulations in this part shall apply to the following species by the subareas they are included in and wherever in the regulations in this part the term "regulated species" is used, it shall apply to those in this list.

(1) *In Subarea 1.* (i) Cod (*Gadus morhua* (L.)).
(ii) Haddock (*Melanogrammus aeglefinus* (L.)).
(iii) Ocean perch (redfish) (*Sebastes*).
(iv) Halibut (*Hippoglossus hippoglossus* (L.)).
(v) Grey sole (witch) (*Glyptocephalus cynoglossus* (L.)).
(vi) Dab (American plaice) (*Hippoglossoides platessoides* (Fab.)).
(vii) Greenland halibut (*Reinhardtius hippoglossoides* (Walb.)).

(2) *In Subarea 2.* (i) Cod (*Gadus morhua* (L.)).
(ii) Haddock (*Melanogrammus aeglefinus* (L.)).
(iii) Ocean perch (redfish) (*Sebastes*).
(iv) Halibut (*Hippoglossus hippoglossus* (L.)).
(v) Grey sole (witch) (*Glyptocephalus cynoglossus* (L.)).
(vi) Dab (american plaice) (*Hippoglossoides platessoides* (Fab.)).
(vii) Greenland halibut (*Reinhardtius hippoglossoides* (Walb.)).

(3) *In Subarea 3.* (i) Cod (*Gadus morhua* (L.)).
(ii) Haddock (*Melanogrammus aeglefinus* (L.)).
(iii) In aggregate: ocean perch (redfish) (*Sebastes*), except in the statistical division 3N, 30, and 3P, halibut (*Hippoglossus hippoglossus* (L.)), grey sole (witch) (*Glyptocephalus cynglossus* (L.)), yellowtail flounder (*Limanda ferruginea* (Storer), dab (American plaice) (*Hippoglossoides platessoides* (Fab.)), Greenland halibut (*Reinhardtius hippoglossoides* (Walb.)), pollock (saithe) (*Pollachius virens* (L.)), white hake (*Urophycis tenuis* (Mitch.)).

(4) *In Subarea 4.* (i) Cod (*Gadus morhua* (L.)).
(ii) Haddock (*Melanogrammus aeglefinus* (L.)).
(iii) In aggregate: Flounders: grey sole (witch) (*Glyptocephalus cynoglossus* (L.)), yellowtail flounder (*Limanda ferruginea* (Storer)), blackback or lemon sole (winter flounder) (*Pseudopleuronectes americanus* (Walb.)), dab, *American plaice*) (*Hippoglossoides platessoides* (Fab.)).

(5) *In Subarea 5,* (i) Cod (*Gadua morhua* (L.)).
(ii) Haddock (*Melanogrammus aeglefinus* (L.)).
(iii) Yellowtail flounder (*Limanda ferruginea* (Storer)).
(iv) Silver hake (*Merluccius bilinearis* (Mitch.)).
(v) Red hake (*Urophycis chuss* (Walb.)).
(vi) Herring (*Clupea harengus* (L.)).
(vii) Mackerel (*Scomber scombrus* (L.)).
(viii) Pollock (*Pollachius virens* (L.)).
(ix) Redfish (*Sebastes marinus* (L.)).
(x) In aggregate: Flounders: grey sole (witch) (*Glyptocephalus cynoglossus* (L), dab (American plaice) (*Hippoglossoides platessoides* (Fab) fluke (summer flounder) (*Paralichthys dentatus* (L), blackback or lemon sole (winter flounder) (*Pseudopleuronectes americanus* (Walb.).

(d) *Chafer.* A protective covering of canvas, netting, or other material attached to the underside of the cod end only of the net to reduce and prevent damage, and a rectangular piece or pieces of netting attached to the upper side of the cod end only of the net to reduce and prevent damage, so long as the netting attached to the upper side of the cod end conforms to the specifications of either the "ICNAF-type chafer," the "multiple flap-type chafer," or the "Polish-type chafer," described below. For the purposes of this paragraph, the required mesh size, when measured wet after use, shall be deemed to be the average of the measurements of 20 consecutive meshes in a series across the nettings.

(1) *ICNAW chafer.* A chafer having the following characteristics:

(i) The width of the netting shall be at least 1½ times the width of the area of the cod end which is covered, such width to be measured at right angles to the long axis of the cod end.

(ii) Such netting may be fastened to the cod end of the trawl net only along the forward and lateral edges of the netting and at no other place in the netting.

(iii) On cod ends having a splitting strap, the netting shall be fastened in such a manner that it extends forward of the splitting strap no more than four meshes and ends not less than four meshes in front of the cod line mesh.

(iv) On cod ends not having a splitting strap, the netting shall not extend to more than one-third the length of the cod end measured from not less than four meshes in front of the cod line mesh.

(v) The netting shall not have a mesh size less than that specified for the cod end to which it is attached.

(2) *Multiple flap-type chafer.* A chafer having the following characteristics:

(i) Each piece of netting shall not exceed 10 meshes in length; each shall be at least the width of the cod end, such width being measured at right angles to the long axis of the cod end at the point of attachment; each shall be fastened by its forward edge only across the cod end at right angles to its long axis.

(ii) The aggregate length of all pieces of neeting shall not exceed two-thirds the length of the cod end.

(iii) The netting shall not have a mesh size less than that specified for the cod end to which it is attached.

(3) *Polish-type chafer.* A chafer having the following characteristics:

(i) The rectangular piece of netting attached to the upper side of the cod end shall have a mesh size at least twice as large as that specified for the cod end to which it is attached and shall have a width the same as that for the cod end.

(ii) It shall be fastened to the cod end only along the forward, lateral, and rear edges of the netting so that the meshes exactly overlay the meshes of the cod end.

(iii) The netting shall be the same twine size and material as that of the cod end.

(e) *Closed season.* The time during which regulated species in specified areas may not be taken in quantities exceeding the amounts specified as incidental fisheries.

(f) *Cod end.* The bag-like extension attached to the after end of the belly of the trawl net and used to retain the catch.

(g) *Commission.* The International Commission for the Northwest Atlantic Fisheries established pursuant to the Convention.

(h) *Convention.* The International Convention for the Northwest Atlantic Fisheries signed at Washington, D.C., February 8, 1949, and amendments.

(i) *Contracting governments.* Governments party to the Convention.

(j) *Demersal species.* Fishes living at the bottom of the sea.

(k) *Executive Secretary.* The Executive Secretary of the International Commission for the Northwest Atlantic Fisheries.

(l) *Fishing.* The catching, taking or fishing for, or the attempted catching, taking, or fishing for any regulated species.

(m) *Incidental fisheries.* The inadvertent taking of regulated species while conducting fishing operations primarily for other species.

(n) *Mesh size.* Any part of the net, the average of the measurements of any 20 consecutive meshes in any row located at least 10 meshes from the side lacings measured when wet after use.

(o) *License.* A license issued by the National Marine Fisheries Service to enable the holder thereof to fish for, possess, transport, or deliver, by means of any fishing vessel, any regulated species.

(p) *Official or authorized official.* Any representative of the National Marine Fisheries Service (NMFS), U.S. Coast Guard, or U.S. Bureau of Customs, authorized to enforce this part.

(q) *Open season.* The time during which regulated species may lawfully be captured and taken on board a fishing vessel without limitation of the quantity permitted to be retained during each fishing voyage, except as otherwise provided in this part.

(r) *Person.* Any owner, master, or operator of a vessel.

(s) *Regional Director.* The Regional Director, Northeast Region, National Marine Fisheries Service, Federal Building, 14 Elm Street, Gloucester, Massachusetts 01930. Telephone number: Area code (617) 281–0640.

(t) *Service.* The National Marine Fisheries Service, National Oceanic and Atmospheric Administration, U.S. Department of Commerce.

(u) *Service Director.* The Director of the National Marine Fisheries Service.

(v) *Trawl net.* Any large bag net dragged in the sea by a vessel or vessels for the purpose of fishing.

(w) *Vessel.* Every kind, type or description of watercraft subject to the jurisdiction of the United States, used, or capable of being used, as a means of transportation on water.

(x) *Trip.* As used in connection with the trip exemption provided in § 240.3(b) means a departure from port, transit to the Convention area, participation in the fisheries, including incidental fisheries, and discharges any part of the catch on board.

§ 240.2 Licensing provisions.

(a) Any person or vessel desiring to fish for any regulated species within the Convention area, or possess, transport, or deliver for sale, any regulated species taken within the Convention area, must first obtain a license for that purpose.

(b) The owner or operator of a vessel may obtain the appropriate license by furnishing, on a form supplied by the National Marine Fisheries Service, information specifying the names and addresses of the owner and operator of the vessel and the name, official number, and home port of the vessel. The form shall be submitted, in duplicate, to the Regional Director, National Marine Fisheries Service, Gloucester, Massachusetts, who shall grant the requested license, without fee, for the calendar year in which the license is issued. New licenses shall be issued to replace expired, lost, or mutilated licenses. An application for replacement of an expiring license shall be made in like manner as the original application, not later than 10 days prior to the expiration date of the expiring license.

(c) The owner or operator of any licensed vessel which is proposed to be used in fishing outside the Convention area may obtain a temporary suspension of the license until such time that the vessel returns to fish within the Convention area.

(d) The temporary suspension or modification of the license shall be granted upon either an oral or a written request, specifying the period of suspension or modification desired by an authorized State official or by an authorized official of the National Marine Fisheries Service, or Coast Guard. Such official shall make appropriate endorsement on the license evidencing the duration of its suspension or modification.

(e) The license issued by the National Marine Fisheries Service must be carried, at all times, on board the vessel for which it is issued and such license, the vessel, its gear and equipment shall be subject to inspection, at reasonable times, by authorized officials.

(f) Licenses issued under this part may be revoked by the Regional Director for violations of this part.

§ 240.3 Persons and vessels exempted.

(a) *Scientific investigations.* Any person operating a vessel authorized by the Secretary of Commerce to engage in fishing for scientific purposes is exempt from all the requirements of this part.

(b) *Trip exemption.* (1) Any person operating a vessel in the course of fishing for nonregulated species in Subareas 3, 4, and 5, is exempt from the requirements of this part, and may take and possess, on any one trip, an incidental catch of regulated species not to exceed, for each species, 5,000 pounds or 10 percent (10%) by weight of all the fish on board, whichever is greater, taken from the same subarea.

(2) Any person or vessel fishing for regulated species, using gear required for that fishery, may take and possess, on any one trip, other regulated species, not to exceed 5,000 pounds or 10 percent (10%) by weight of all fish on board, whichever is greater: *Provided,* That a valid license issued under the provisions of § 240.2 is in force.

(c) *Annual exemption.* Any person operating a vessel engaged in fishing for nonregulated species within Subarea 3, 4, or 5, who does not take in any period of 12 months more than 10 percent (10%) by weight of regulated species de-

V 38-160 AUG 20 73 XUM

scribed in the immediately preceding paragraph may avail himself of the exemption provided in this paragraph by obtaining a license for exemption under the provision of § 240.2(a).

§ 240.4 Reports and records.

(a) *Dealers.* (1) All persons, individuals, firms or corporations, at any port or place within the United States, that buy from other U.S. flag vessels or from a carrier licensed as a common carrier engaged in either interstate or intrastate commerce, any regulated species taken within the Convention area by any fishing vessel, shall make and shall furnish to an authorized officer of the National Marine Fisheries Service, within 72 hours of sale or within 72 hours after buying or receiving, or upon the vessel's return to any port of the United States, a complete record of each purchase, on forms supplied by the National Marine Fisheries Service.

(2) All persons purchasing or receiving any regulated species in the Convention area for transport to any port of the United States must maintain records identical to those required under paragraph (a)(1) of this section.

(3) The possession by any person, firm or corporation of regulated species which such person, firm, or corporation knows to have been taken by a vessel of the United States without a valid license, is prohibited.

(b) *Owner or master.* (1) In the case of a vessel licensed under § 240.2, and fishing for any of the regulated species, the owner or master of vessels of 50 gross tons or more must maintain an accurate log of fishing operations showing date, type and size of gear used, locality fished, duration of fishing time or tow, and the estimated weight in pounds of each species taken at 12-hour intervals. Such logbooks shall be available for inspection by an authorized official in accordance with the ICNAF International Inspection Scheme adopted at the Twenty-first Annual Meeting, May 27–June 4, 1971. At the conclusion of each fishing trip, such logbook shall be delivered to an authorized official of the United States or, if no official is available, such logbook must be mailed in the envelope provided for that purpose. These forms will be furnished without cost by the National Marine Fisheries Service. Such logbooks shall be used for statistical and biological purposes only.

(2) In the case of vessels of less than 50 gross tons licensed under § 240.2, and fishing for any of the regulated species, the owner or master may be required to maintain the logbook for sampling purposes at the option of an appropriate official of the United States.

(3) In the case of vessels desiring to fish for nonregulated species on a trip basis, no reports are required of the owner or master.

Subpart B—Groundfish Fisheries

§ 240.10 Definitions.

(a) Unless otherwise defined herein, the terms used in this subpart will have the meanings ascribed to them in § 240.1.

(b) Regulations in this subpart will apply to haddock (*Melanogrammus aeglefinus* (L.)), cod (*Gadus morhua* (L.)), pollock (*Pollachius virens* (L.)), and redfish (ocean perch) (*Sebastes marinus* (L.)).

§ 240.11 Catch quota.

(a) An annual catch limitation is placed upon the quantity of haddock permitted to be taken in Division 4W and 4X of Subarea 4 and Subarea 5. The aggregate catch of haddock during 1973, by persons or fishing vessels under the jurisdiction of the United States, in each area, is as follows:

(1) The annual catch of haddock by persons or fishing vessels fishing in Division 4W of Subarea 4, in the year 1973, shall not exceed 4,000 metric tons.

(2) The annual catch of haddock by persons or fishing vessels fishing in Division 4X of Subarea 4, in the year 1973, shall not exceed 9,00 metric tons.

(3) The annual catch of haddock by persons or fishing vessels fishing in Subarea 5, shall not exceed 6,000 metric tons.

(b) An annual catch limitation is placed upon the quantity of cod permitted to be taken in Subdivision 4Vs and Division 4W of Subarea 4, Division 5Y of Subarea 5, and Subdivisions 5Ze and 5Zw of Subarea 5. The aggregate catch of cod during 1973, by persons or fishing vessels under the jurisdiction of the United States, in each area, is as follows:

(1) The annual catch of cod in Subdivision 4Vs and Division 4W of Subarea 4 shall not exceed 1,050 metric tons.

(2) The annual catch of cod in Division 5Y or Subarea 5 shall not exceed 9,400 metric tons.

(3) The annual catch of cod in Subdivision 5Ze and 5Zw of Subarea 5 shall not exceed 10,600 metric tons.

(c) An annual catch limitation is placed upon the quantity of pollock permitted to be taken in Division 4X of Subarea 4 and Subarea 5. The catch of pollock in the above area during 1973 by persons or fishing vessels under the jurisdiction of the United States, shall not exceed 11,275 metric tons.

(d) An annual catch limitation is placed upon the quantity of redfish (ocean perch) permitted to be taken in Subarea 5. The catch of redfish (ocean perch) in the above area during 1973 by persons or fishing vessels under the jurisdiction of the United States shall not exceed 24,550 metric tons.

§ 240.12 Open season.

(a) The open season for regulated groundfish species in Subdivision 4Vs, Division 4X and Division 4W of Subarea 4, and Subarea 5, shall begin at 0001 hours of the 1st day of January 1973, and terminate at a time and a date to be determine and announced in the FEDERAL REGISTER: *Provided*, That the areas described in § 240.13 shall be closed to any vessel using gear capable of catching demersal species.

§ 240.13 Closed seasons and areas.

(a) The Director shall announce the closure of the season by publication of a notice in the FEDERAL REGISTER, specifying the time and date for the termination of specialized fishing for regulated groundfish species in Subarea 4 or 5, or any division thereof. The closure is determined in the following manner:

(1) The National Marine Fisheries Service maintains records of the catches of regulated groundfish species, except haddock, made in Subdivision 4Vs, Division 4X and Division 4W of Subarea 4 and Subarea 5, during the open season, by vessels under the jurisdiction of the United States participating in the fishery.

(2) When the accumulative and estimated prospective catch of regulated groundfish species, except haddock in each subarea, making allowance for the incidental catch for the remainder of the year, equals 100 percent of the allowable catch permitted under § 240.11, the Director shall promptly publish the notice, in the FEDERAL REGISTER, required in paragraph (a) of this section, and shall notify the Executive Secretary of the date on which vessels subject to the jurisdiction of the United States have ceased a specialized fishery.

(b) The Executive Secretary of the International Commission for the Northwest Atlantic Fisheries maintains records of the catches of haddock made in Division 4X and Division 4W of Subarea 4 and Subarea 5 during the open season by the vessels of all Contracting Governments participating in the fishery.

(1) When the accumulative and estimated prospective catch of haddock, in each subarea, making allowance for the incidental catch for the remainder of the year, equal 100 percent of the allowable catch permitted under § 240.10, the Executive Secretary shall notify each Contracting Government of that fact.

(2) If, after having given the notification provided in paragraph (b)(1) of this section, the Executive Secretary determines, on the basis of new or further information, that the total catch will be less than 100 percent of the allowable catch, he may so inform each Contracting Government, stating the number of additional days haddock fishing may be permitted in each subarea.

(3) Within 10 days of the receipt of the notification specified in paragraph (b) (1) or (2) of this section, the Director shall announce by publication in the FEDERAL REGISTER, the time and date for the termination of fishing, or the number of days that a previously announced closure shall be extended, as appropriate.

(c) It shall be unlawful for any person to use, during the period from 0001 hours, March 1, to 2400 hours May 31, 1973, fishing gear capable of catching demersal species, including any trawl gear or similar devices, gillnet, or hook and line, in:

(1) Division 4X of Subarea 4, bounded by straight lines connecting the following coordinates in the order listed: 65°44′W.—42°04′N., 64°30′W.—42°40′N., 64°30′W.—43°00′N., 66°32′W.—43°00′N., 66°32′W.—42°20′N., 66°00′W.—42°20′N.

(2) Subarea 5, two areas bounded by lines connecting the following coordinates:

(i) 69°55′W.—42°10′N., 69°10′W.—41°10′N., 68°30′W.—41°35′N., 68°45′W.—41°50′N., 69°00′W.—41°50′N.

(ii) 67°00′W.—42°20′N., 67°00′W.—41°15′N., 65°40′W.—41°15′N., 65°40′W.—42°00′N., 66°00′W.—42°20′N.

(iii) except that vessels using hooks having a gap of not less than 3 cm (1⅛″) may fish in Subarea 5, without restriction.

§ 240.14 Gear restrictions.

(a) In Subareas 1, 2, and 3, no person shall fish for regulated species with a trawl net or nets, parts of nets, or netting of manila or of the trade named twines, under the chemical category of polypropylene, having a mesh size of less than 5⅛ inches (130 mm.), or a trawl net or nets or parts of nets, or netting of material other than manila or polypropylene twine, unless it shall have a selectivity equivalent to that of a 5⅛ inch (130 mm.) manila trawl net.

(b) In Subareas 4 and 5, except as provided in § 240.23(a), no person shall fish for haddock or cod with a trawl net or nets, parts or nets, or netting of manila or of the trade named twines, under the chemical category of polypropylene, having a mesh size of less than 4½ inches (114 mm.) or a trawl net or nets, or netting of material other than manila or polypropylene twine, unless it shall have a selectivity equivalent to that of a 4½ inch (114 mm.) manila trawl net.

(c) The use in fishing for haddock or cod within the Regulatory area of any device or method which would, or otherwise, have the effect of diminishing the size of said meshes of the trawl net is prohibited: *Provided*, That an approved chafer described in § 240.1(d) may be used.

§ 240.15 General restrictions.

(a) Except as provided in paragraphs (b), (c), and (d), of this section, after the dates announced in the manner provided in § 240.13(a), for the closing of the unrestrictive fishing for certain species in Division 4X or Division 4W of Subarea 4 and Subarea 5, it shall be unlawful for any master or other person in charge of a fishing vessel to possess such regulated ground fish species on board such vessel in those areas or to land such regulated ground fish species in those areas in any port or place until the next succeeding fishing season reopens on January 1 next.

(b)(1) Any fishing vessel which had departed port to engage in fishing for regulated groundfish species under the provisions of § 240.2, prior to the date of the closure for such regulated species in either Division 4X or 4W in Subarea 4, or Subarea 5, may continue to take and retain such species in the Division or Subarea for which the closure has been announced, for a period of time not to exceed 10 days, at which time fishing for such species in the closed Division or Subarea shall be prohibited. Within 48 hours after the expiration of the 10-day period, each such vessel must return to a port or place in the United States, and the master or person in charge must immediately, on his return, notify any officer of the National Marine Fisheries Service, U.S. Bureau of Customs or Coast Guard, of his arrival.

(2) Any master or person in charge of a fishing vessel, licensed pursuant to § 240.2, may continue to fish after the date of closure, in any subarea or division, the provisions of the next preceding paragraph notwithstanding, but should he elect to do so, the quantity of such regulated species in his possession on each trip must not exceed 5,000 pounds or 10 percent (10%) by weight of all other fish on board.

(c) Any master or person in charge of a fishing vessel, which has departed port after the date of closure of unrestrictive fishing for certain regulated groundfish species in Division 4X or 4W in Subarea 4, or Subarea 5, may take, possess on board, and land in any port or place, such regulated species as may be taken incidentally to a fishery for nonregulated species: *Provided*, That the master of the said vessel has on board the appropriate license as required under § 240.2(a) and complies with the limitations specified in § 240.3, and the reporting requirements, where required, in § 240.4(b): *Provided further*, That nothing contained herein shall be construed to amend, modify, or repeal those portions of the regulations relating to areas closed to all demersal fishing, which may be found in § 240.13(d).

(d) The provisions of this subpart shall apply to all fishing trips begun during the current calendar year, whether completed before January 1, or not.

Subpart C—Flatfish Fisheries

§ 240.20 Definitions.

(a) Unless otherwise defined herein, the terms used in this subpart will have the meanings ascribed to them in § 240.1.

(b) Regulations in this subpart will apply to American plaice (*Hippoglossoides platessoides* (Fab.)), Yellowtail flounder (*Limanda ferruginea* (Storer)), and other flounders in aggregate grey sole or witch (*Glyptocephalus gynoglosdab* or American plaice (*Hippoglossoides sus* (L)), dab or American plaice (*Hippoglossoides platessoides* (Fab.)), fluke or summer flounder (*Paralichthys dentatus* (L), blackback, lemon sole or winter flounder (*Pseudopleuronectes americanus* (Walb.))

§ 240.21 Catch quota.

(a) An annual catch limitation is placed upon the quantity of American plaice permitted to be taken in Divisions 3L, 3N, and 3O, of Subarea 3. The aggregate catch of American plaice in the above Divisions during 1973, by persons or fishing vessels, under the jurisdiction of the United States, shall not exceed 100 metric tons.

(b) An annual catch limitation is placed on the quantity of yellowtail flounder permitted to be taken in Divisions 3L, 3N, and 3O, in subarea 3, and in the areas east and west of 69° West longitude in Subarea 5, as follows:

(1) The annual catch of yellowtail flounder in Divisions 3L, 3N, and 3O, of Subarea 3, shall not exceed 100 metric tons.

(2) The annual catch of yellowtail flounder in Subarea 5, in the area east of 69° West longitude shall not exceed 15,000 metric tons and shall be taken in quarterly increments as follows:

Quarter	Catch quota	Expected accumulative catch
Jan. 1—Mar. 31	2,950	2,950
Apr. 1—June 30	3,850	6,800
July 1—Sept. 30	4,900	11,700
Oct. 1—Dec. 31	3,300	15,000

(3) The annual catch of yellowtail flounder in Subarea 5, in the area west of 69° longitude shall not exceed 9,000 metric tons and shall be taken in quarterly increments as follows:

Quarter	Catch quota	Expected accumulative catch
Jan. 1-Mar. 31	2,750	2,750
Apr. 1-June 30	1,500	4,250
July 1-Sept. 30	2,000	6,250
Oct. 1-Dec. 31	2,750	9,000

(c) The Director may adjust the quarterly increments in either area by publication of a notice in the FEDERAL REGISTER

(d) An annual catch limitation is placed upon the aggregate quantity of flounders other than yellowtail flounder, permitted to be taken in Subarea 5. The aggregate catch of flounders, other than yellowtail flounder, in the above Subarea during 1973, by persons or fishing vessels under the jurisdiction of the United States, shall not exceed 21,700 metric tons.

§ 240.22 Open season.

(a) The open season for regulated flatfish species in areas under quota in § 240.21, shall begin at 0001 hours local time on the 1st day of January 1973, and terminate at a time and date to be announced by the Director, by publication of a notice in the FEDERAL REGISTER. In the event of a closure during any quarter, open season fishing for yellowtail flounder shall resume on the first day of the next quarter.

§ 240.23 Closed season and areas.

(a) The Director shall announce the closure of the season by publication of a notice in the FEDERAL REGISTER, specifying the time and date for the termination of specialized fishery for certain regulated flatfish species in Subarea 3, and Subarea 5.

(b) The National Marine Fisheries Service maintains records of the catches of regulated flatfish species made during the open seasons in those areas under quota limitations specified in § 240.21 by vessels under the jurisdiction of the United States, participating in the fishery.

(c) When the accumulative and estimated catch of certain regulated flat-

V 38-160 AUG 20 73 XUM

fish species, making allowance for the incidental catch for the remainder of the year, equals 100 percent of the allowable catch permitted under § 240.21, the Director shall promptly notify the Executive Secretary of the date on which vessels subject to the jurisdiction of the United States have ceased a specialized fishery.

(d) Announcement shall also be made by publication of a notice in the FEDERAL REGISTER of the closing time and date of the first, second, and third quarters when the Director has determined, on the basis of catch data and catch rates, that the accumulative catch (landings plus discards) of yellowtail flounder in Subarea 5, in either area (east or west of 69°00W.), will equal the quarterly quota established in § 240.21(b).

§ 240.24 Gear restrictions.

(a) In Subarea 5, no person shall fish for yellowtail flounder with a net of manila or of the trade named twines, under the chemical category of polypropylene, having a mesh size of less than 5⅛ inches (130 mm.), or a trawl net or nets, parts of nets, or netting of material other than manila or polypropylene twine, unless it shall have a selectivity equivalent to that of a 5⅛ inch (130 mm.) manila net.

(b) The use in fishing for regulated species within the Regulatory area of any device or method which would have the effect of diminishing the size of said meshes or obstruct the meshes of the trawl net, is prohibited: *Provided*, That an approved chafer, described in § 240.1(d), may be used.

§ 240.25 General restrictions.

(a) Except as provided in paragraphs (a)(1) or (2) and (b) of this section, after the dates announced in the manner provided in § 240.23 for the closing of the fishing season or seasons, it shall be unlawful for any master or other person in charge of a fishing vessel to possess such regulated flatfish species in the closed Regulatory areas or to land such species taken in those areas in any port or place until the next succeeding open season.

(1) In the event of a closure of any of the first three quarters, as provided under § 240.23(d), any fishing vessel which had departed port to engage in yellowtail flounder fishing in Subarea 5 prior to the date of the closure, may continue to take and retain yellowtail flounder in the area subject to the closure for a period of time not to exceed 5 days, at which time fishing for yellowtail flounder in the closed area shall be prohibited.

(2) In the event of an annual closure as provided under § 240.23, any fishing vessel which had departed port to engage in fishing for regulated flatfish species in Subarea 5, prior to date of the closure, may continue to take and retain such species in the area subject to the closure, for a period of time not to exceed 10 days, at which time fishing in the closed area shall be prohibited. Within 24 hours after the expiration of either the 10-day or 5-day period, provided under the preceding paragraph, each such vessel much return to a port or place in the United States and the master or person in charge must immediately, on the return, notify any appropriate official of the National Marine Fisheries Service, U.S. Bureau of Customs or Coast Guard, of his arrival.

(b) Any master or person in charge of a fishing vessel which has departed port after the date of closure in Subarea 5, may take, possess on board, and land in any port or place, such regulated flatfish species as may be taken incidentally in such closed area to a fishery for nonregulated species: *Provided*, That the owner or operator of the said vessel has on board the appropriate license as required under § 240.2(a) and complies with the limitations specified in § 240.3 and the reporting requirements, where required, in § 240.4(b): *Provided further*, That nothing contained herein shall be construed to amend, modify, or repeal those portions of the regulations relating to areas closed to all demersal fishing which may be found in § 240.13(d).

(1) The provisions of this subpart shall apply to all fishing trips begun during the calendar year 1973, whether completed before January 1, 1974, or not.

Subpart D—Hake Fisheries

§ 240.30 Definitions.

(a) Unless otherwise defined herein, the terms used in this subpart will have the meanings ascribed to them in § 240.1.

(b) Regulations in this subpart will apply to silver hake, (*Merluccius bilinearis* (Mitch.)), and red hake, (*Urophycis chuss* (Walb.)).

§ 240.31 Catch quota.

(a) An annual catch limitation is placed the quantity of silver hake permitted to be taken in Division 5Y and Subdivision 5Ze and 5Zw of Subarea 5. The aggregate catch of silver hake during 1973, by persons or fishing vessels, under the jurisdiction of the United States, in each area, is as follows:

(1) The annual catch of silver hake in Division 5Y of Subarea 5, shall not exceed 9,500 metric tons.

(2) The annual catch of silver hake in Subdivision 5Ze of Subarea 5, shall not exceed 17,000 metric tons.

(3) The annual catch of silver hake in Subdivision 5Zw, shall not exceed 25,000 metric tons.

(b) An annual catch limitation is placed upon the quantity of red hake permitted to be taken in Subdivision 5Zw of Subarea 5. The aggregate catch of red hake during 1973, by persons or fishing vessels, under the jurisdiction of the United States, in each area is as follows:

(1) The annual catch of red hake in Subdivision 5Zw of Subarea 5, shall not exceed 15,000 metric tons.

§ 240.32 Open season.

(a) The open season for silver hake fishing in Division 5Y and 5Z of Subarea 5, and red hake fishing in Division 5Z of Subarea 5, shall begin at 0001 hours of the 1st day of January 1973 and terminate at a time and a date to be determined pursuant to § 240.33.

§ 240.33 Closed season and areas.

(a) The Director shall announce the closure of the season by publication of a notice in the FEDERAL REGISTER, specifying the time and date for the termination of specialized fishery for silver hake or red hake in Subarea 5.

(b) The National Marine Fisheries Service maintains records of the catches of silver hake or red hake made in each Division of Subarea 5 during the open season by vessels, under the jurisdiction of the United States, participating in the fishery.

(c) When the accumulative and estimated prospective catch of silver hake and red hake in each Division of Subarea 5, making allowance for the incidental catch for the remainder of the year, equals 100 percent of the allowable catch permitted under § 240.31, the Director shall promptly notify the Executive Secretary of the date on which its vessels have ceased a specialized fishery.

(d) It shall be unlawful for any person to conduct a specialized fishery for silver hake or red hake from 0001 hours, April 1 to 2400 hours, April 30, 1973, in the area bounded by 69°00'W., 39°50'N., 71°40'W., and 40°20'N., however, groundfish vessels may be permitted to take on each trip, during this period, in the said area, red and silver hake in amounts not to exceed 10 percent each of the total catch taken in the said area, on that trip.

§ 240.34 Gear restrictions.

There are no gear restrictions regarding fishing for silver or red hake in 1973.

§ 240.35 General restrictions.

(a) Except as provided in paragraphs (b), (c), and (d), of this section, after the dates announced in the manner provided in § 240.33(a), for the closure of silver or red hake fishing seasons in Division 5Y or 5Z of Subarea 5, it shall be unlawful for any master or other person in charge of a fishing vessel to possess silver or red hake on board such vessel in those areas or to land silver or red hake taken in those areas in any port or place until the silver or red hake fishing season reopens on January 1 next, following the close of the season.

(b)(1) Any fishing vessel which had departed port to engage in silver or red hake fishing under the provisions of § 240.2(a), prior to the date of closure of silver or red hake fishing in either Division 5Y or 5Z of Subarea 5, may continue to take and retain silver or red hake in the Divisions for which the closure has been announced for a period of time not to exceed 5 days, at which time fishing for silver or red hake in the closed Division shall be prohibited. Within 48 hours after the expiration of the 5-day period, each such vessel must return to a port or place in the United States and the master or person in charge must immediately, on his return, notify any appropriate officer of the National Marine Fisheries Service, U.S. Bureau of Customs, or Coast Guard, of his arrival.

(2) Any master or person in charge of a fishing vessel licensed to take silver or red hake from waters of the Convention area may continue to fish after the date of closure in any Subarea or Division, the provisions of the next preceding paragraph notwithstanding, but should he elect to do so, the quantity of silver or red hake in his possession must not exceed 5,000 pounds or 10 percent (10%) by weight of all other fish on board.

(c) Any master or person in charge of a fishing vessel which has departed port after the date of closure of silver or red hake fishing in Division 5Y or 5Z of Subarea 5, may take and possess on board, and land in any port or place, such silver or red hake as may be taken incidentally to a fishery for nonregulated species: *Provided*, That the master of the said vessel has on board the appropriate license as required under § 240.2(a) and complies with the limitations specified in § 240.3 and the reporting requirements, where required, in § 240.4(b): *Provided further*, That nothing contained herein shall be construed to amend, modify, or repeal those portions of the regulations relating to areas closed to all demersal fishing, which may be found in § 240.13(d).

(d) The provisions of this subpart shall apply to all fishing trips begun during the current calendar year, whether completed before January 1, or not.

Subpart E—Pelagic Fisheries

§ 240.40 Definitions.

(a) Unless otherwise defined herein, the terms used in this Subpart will have the meanings ascribed to them in Subpart A, § 240.1.

(b) Regulations in this Subpart will apply to herring (*Clupea harengus* (L)), and mackerel (*Scomber scombrus* (L)). (L)).

§ 240.41 Catch quota.

(a) An annual catch limitation is placed upon the quantity of herring permitted to be taken in Division 5Z of Subarea 5 and in the adjacent waters to the west and south from Division 5Y of Subarea 5 and from that portion of Division 4W south of 44°52' N. latitude and in Division 4X of Subarea 4. The catch of herring during 1973, by persons or fishing vessels under the jurisdiction of the United States, in each area, is as follows:

(1) The annual catch of herring in Division 5Z of Subarea 5 and in the adjacent waters to the west and south shall not exceed 5,250 metric tons.

(2) The annual catch of herring in Division 5Y of Subarea 5 shall not exceed 19,750 metric tons.

(3) The combined annual catch of herring by member countries in that portion of Division 4W south of 44°52' N. latitude and in Division 4X of Subarea 4, for which specific allocations have not been assigned, shall not exceed 600 metric tons.

(b) An annual catch limitation is placed upon the quantity of mackerel permitted to be taken in Subarea 5 and in the adjacent waters to the west and south. The catch of mackerel in the above area during 1973 by persons or fishing vessels under the jurisdiction of the United States, shall not exceed 26,200 metric tons.

§ 240.42 Open season.

The open season for herring or mackerel shall begin at 0001 hours of the first day of January each year and terminate in each subarea at a time and date to be determined and announced as provided in § 240.43.

§ 240.43 Closed season and areas.

(a) The Service Director shall maintain records of the catches of herring or mackerel by fishing vessels subject to quota allocations in Subareas 4 and 5, and Statistical Area 6 during the open season. The Service Director shall announce the closure dates for herring or mackerel fishing in Divisions 5Y and 5Z of Subarea 5, when the accumulated catch and estimated catch of herring or mackerel, the quantity estimated to be taken before closure could be introduced, and the likely incidental catch for the remainder of the year, equal 100 percent of the allowable catch permitted under § 240.41. Such announcement of the season closure dates shall be made by publication of a notice in the FEDERAL REGISTER.

(b) The Executive Secretary shall maintain records of the catches by fishing vessels, of all contracting governments participating in fishing for herring, subject to quota regulations in Subarea 4, during open seasons for which specific allocations have not been assigned. The Executive Secretary shall notify the United States when the accumulated catch and estimated catch of herring in Divisions 4W and 4X of Subarea 4, the quantity estimated to be taken before closure could be introduced, and the likely incidental catch for the remainder of the year, equal 100 percent of the allowable catch permitted under § 240.41. The Service Director shall announce the closure dates for the Divisions 4W and 4X of Subarea 4, herring fishing season, within 10 days of the receipt of such notification from the Executive Secretary. Such announcement of the season closure dates shall be made by publication of a notice in the FEDERAL REGISTER.

§ 240.44 Gear restrictions.

There are no gear restrictions regarding fishing for herring or mackerel in 1973.

§ 240.45 General restrictions.

(a) Except as provided in § 240.3, and as provided below, after the date announced in manner provided in § 240.43, for the closing of the herring or mackerel fishing season, it shall be unlawful for any master or other person in charge of a fishing vessel to possess herring or mackerel taken in the closed subareas or to land herring taken in those subareas in any port or place until the next succeeding open season for herring or mackerel.

(b) In the event of an annual closure in Division 5Y or 5Z in Subarea 5, as provided in § 240.43(a), any fishing vessel, which had departed port to engage in herring or mackerel fishing in Subarea 5 prior to the date of closure, may continue to take and retain herring or mackerel in that subarea after the closure, for a period of time not to exceed 2 days, at which time fishing for herring or mackerel in the closed subarea shall be prohibited. Within 24 hours after the expiration of the 2-day period, each fishing vessel must return to a port or place in the United States, and the master or person in charge of the fishing vessel must then immediately notify an authorized official of the vessel's arrival in port.

(c) In the event of an annual closure in Division 4W or 4X in Subarea 4 as provided in § 240.43(b), any fishing vessel, which had departed port to engage in herring fishing in Subarea 4 prior to the date of closure, may continue to take and retain herring in that subarea after the closure, for a period of time not to exceed 4 days, at which time fishing for herring in the closed subarea shall be prohibited. Within 24 hours after the expiration of the 4-day period, each fishing vessel must return to a port or place in the United States, and the master or person in charge of the fishing vessel must then immediately notify an authorized official of the vessel's arrival in port.

(d) For the purposes of inspection, NMFS officials shall have reasonable access to any area on board a fishing vessel, transport, or shore facility where fish are landed, handled, stored, or processed, and to areas where fishing gear or parts of fishing gear are used, assembled, or stored.

§ 240.46 Size limits.

A size limit is placed on the length of herring permitted to be taken by persons or fishing vessels, under the jurisdiction of the United States, in those portions of Division 4W south of 44°52'N. latitude and Division 4X south of 43°50'N. latitude of Subarea 4 and in Subarea 5.

(a) The taking or possession of herring less than 9 inches (22.7 cm), measured from the tip of the snout to the end of the tail, is prohibited except as provided in paragraph (b) of this section.

(b) A person may take herring in any year, less than 9 inches (22.7 cm), measured as specified in paragraph (a) of this section: *Provided*, That the total amount taken does not exceed 10 percent by weight of all herring caught in the areas above, specified by that fishing vessel during such year.

[FR Doc.73-17306 Filed 8-17-73;8:45 am]

V 38-160 AUG 20 73 XUM

Proposed Rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rulemaking prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 52]

STANDARDS FOR GRADES OF FROZEN CONCENTRATED APPLE JUICE

Notice of Proposed Rule Making

Notice is hereby given that the United States Department of Agriculture is considering the issuance of United States Standards for Grades of Frozen Concentrated Apple Juice. This new grade standard would be issued under authority of the Agricultural Marketing Act of 1946 (Sec. 205, 60 Stat. 1090 as amended, 7 U.S.C. 1624), which provides for the issuance of official U.S. grades to designate different levels of quality for the voluntary use of producers, buyers, and consumers. Official grading services are also provided under this Act upon request and upon payment of a fee to cover the cost of such service.

All persons who desire to submit written data, views, or arguments in connection with the proposal should file the same in duplicate not later than October 1, 1973 with the Hearing Clerk, U.S. Department of Agriculture, Room 112, Administration Building, Washington, D.C. 20250. All written submittals made pursuant to this notice will be available for public review at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

NOTE: Compliance with the provisions of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act or with applicable State laws and regulations.

Statement of consideration leading to the proposed standards. There is, at present, no United States Standards for Grades of Frozen Concentrated Apple Juice.

The American Frozen Foods Institute, representing a large portion of the frozen concentrated apple juice industry, requested that the Department establish U.S. Standards for Grades of Frozen Concentrated Apple Juice.

During 1972, a team established by the Department of Agriculture investigated problems associated with the marketing of apples. The report of the study group indicated that there is a potential for new product development, such as apple concentrate, and a need to improve the quality standards for apple juice.

In recognition of the report of the apple marketing team, the Department is proposing to establish United States Standards for Grades of Frozen Concentrated Apple Juice, to facilitate the marketing of this product.

The standard as herein proposed would cover two quality grades above Substandard: U.S. Grade A (or U.S. Fancy) and U.S. Grade B (or U.S. Choice).

The following quality factors would be rated on a scoring system: Color and Clarity; Defects; and Flavor and Aroma.

In the judgment of the Department the quality factor of flavor and aroma has by far the most impact on the consumer, and therefore this quality factor was assigned a maximum of 60 score points as opposed to 20 each for the other quality factors. In addition to the subjective organoleptic evaluation of the degree of excellence of this factor, objective requirements for the brix and acid balance are also specified.

The proposed standard is as follows:

Subpart—United States Standards for Grades of Frozen Concentrated Apple Juice

PRODUCT DESCRIPTION AND GRADES

Sec.
52.6321 Product description.
52.6322 Brix requirement.
52.6323 Grades.

FILL OF CONTAINER

52.6324 Recommended fill of container.

FACTORS OF QUALITY

52.6325 Ascertaining the grade.
52.6326 Ascertaining the rating for the factors which are scored.
52.6327 Color and Clarity.
52.6328 Defects.
52.6329 Flavor and Aroma.

EXPLANATIONS

52.6330 Explanation of terms.

LOT COMPLIANCE

52.6331 Ascertaining the grade of a lot.

SCORE SHEET

52.6332 Score sheet.

PRODUCT DESCRIPTION AND GRADES

§ 52.6321 Product description.

Frozen concentrated apple juice is prepared from the unfermented, unsweetened, unacidified liquid obtained from the first pressing of properly prepared, sound, clean, mature, fresh apples. The juice is clarified and concentrated to at least 23.8 degrees Brix. The apple juice concentrate so prepared is packed and frozen in accordance with good commercial practice and maintained at temperatures necessary for the preservation of the product.

§ 52.6322 Brix requirements.

Brix value of the finished concentrate shall be not less than the following for the respective dilution factor of frozen concentrated apple juice:

Dilution Factor	Minimum Brix value of concentrate (Degrees)
1 plus 1	23.8
2 plus 1	34.2
3 plus 1	43.8
4 plus 1	52.6
5 plus 1	60.8
6 plus 1	68.5

§ 52.6323 Grades.

(a) "U.S. Grade A" or "U.S. Fancy" is the quality of frozen concentrated apple juice which, when reconstituted according to § 52.6325(b), has the following attributes:

(1) Good color and clarity;
(2) Is practically free from defects;
(3) Very good flavor and aroma; and
(4) Scores not less than 90 points when scored in accordance with the scoring system outlined in this subpart.

(b) "U.S. Grade B" or "U.S. Choice" is the quality of frozen concentrated apple juice which, when reconstituted according to § 52.6325(b), has at least the following attributes:

(1) Reasonably good color and clarity;
(2) Is reasonably free from defects;
(3) Good flavor and aroma; and
(4) Scores not less than 80 points when scored in accordance with the scoring system outlined in this subpart.

(c) "Substandard" is the quality of frozen concentrated apple juice that fails to meet the requirements of U.S. Grade B.

FILL OF CONTAINER

§ 52.6324 Recommended fill of container.

Recommended fill of container is not incorporated in the grades of the finished product since the fill of the container, as such, is not a factor of quality for the purposes of these grades. It is recommended that the container be filled with frozen concentrated apple juice to not less than 90 percent of the capacity of the container.

FACTORS OF QUALITY

§ 52.6325 Ascertaining the grade.

(a) The grade of frozen concentrated apple juice is ascertained by considering, in conjunction with the requirements of the respective grade, the respective ratings for the factors which are scored. The relative importance of each factor which is scored is expressed numerically on the scale of 100. The maximum number of points which may be given such factors are:

Factors	Points
Color and clarity	20
Defects	20
Flavor and aroma	60
Total score	100

(b) The scores for the factors of color and clarity, defects, and flavor and aroma are determined immediately after reconstituting according to label directions or other appropriate directions.

§ 52.6326 Ascertaining the rating for the factors which are scored.

The essential variations, within each scoreable factor, are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor which is scored is inclusive (for example: "18 to 20 points" means 18, 19, or 20 points).

§ 52.6327 Color and clarity.

(a) (*A*) *classification.* Frozen concentrated apple juice which has a good color and clarity may be given a score of 18 to 20 points. "Good color and clarity" means that the color is bright and transparent and of a light golden appearance, but not darker than USDA Honey Color Standards "White" designation.

(b) (*B*) *classification.* Frozen concentrated apple juice which has a reasonably good color and clarity may be given a score of 16 or 17 points. "Reasonably good color and clarity" means the color is slightly dull or slightly turbid; may be light golden to light amber in appearance but not darker than USDA Honey Color Standards "Light Amber" designation. Frozen concentrated apple juice that falls into this classification shall not be graded above U.S. Grade B, regardless of the total score for the product (this is a limiting rule).

(c) (*SStd.*) *classification.* Frozen concentrated apple juice that is dull, turbid or otherwise fails the requirements of U.S. Grade B may be given a score of 0 to 15 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.6328 Defects.

(a) *General.* The factor of defects refers to the degree of freedom from sediment or other residues, dark specks, or any other defects which affect the appearance or palatability of the product.

(b) (*A*) *classification.* Frozen concentrated apple juice which is practically free from defects may be given a score of 18 to 20 points. "Practically free from defects" means that the frozen concentrated apple juice after reconstitution may have a slight amount of sediment or residue of an amorphous nature; may have not more than a trace of dark specks or of sediment or residue of a nonamorphous nature, or of any other defects; *Provided*, That all defects present do not more than slightly affect the appearance or palatability of the product.

(c) (*B*) *classification.* Frozen concentrated apple juice which is reasonably free from defects may be given a score of 16 or 17 points. "Reasonably free from defects" means that the frozen concentrated apple juice after reconstitution may have a slight amount of sediment or residue of an amorphous or nonamorphous nature, of dark specks, or of any other defects; *Provided*, That all defects present do not materially affect the appearance or palatability of the product. Frozen concentrated apple juice that falls into this classification shall not be graded above U.S. Grade B, regardless of the total score for the product (this is a limiting rule).

(d) (*SStd.*) *classification.* Frozen concentrated apple juice which fails to meet the requirements for U.S. Grade B may be given a score of 0 to 15 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.6329 Flavor and Aroma.

(a) General. The factor of flavor and aroma refers to the degree of excellence and palatability of a distinct apple juice flavor and aroma typical of apple juice that has been properly processed.

(b) (*A*) *classification.* Frozen concentrated apple juice which has a very good flavor and aroma may be given a score of 54 to 60 points. "Very good flavor and aroma" means that the apple juice has a fine, distinct fruity flavor and bouquet, that is free from astringent flavors, flavors due to overripe apples, oxidation, caramelization, ground or musty flavors or any other undesirable flavors and aromas; and, in addition, shall meet the following requirement:

Brix-Acid Ratio—
Minimum—21:1
Maximum—46:1

(c) (*B*) *classification.* Frozen concentrated apple juice which has a good flavor and aroma may be given a score of 48 to 53 points. "Good flavor and aroma" means that the frozen concentrated apple juice has a normal flavor and bouquet, may be slightly astringent; or may be slightly affected by overripe apples, caramelization, or ground or musty flavors, but is free from objectionable flavors or objectionable aromas of any kind; and, in addition, meets the following requirement:

Brix-Acid Ratio—
Minimum—19:1
Maximum—52.5:1

Frozen concentrated apple juice that falls into this classification shall not be graded above U.S. Grade B, regardless of the total score for the product (this is a limiting rule).

(d) (*SStd.*) *classification.* Frozen concentrated apple juice that fails to meet the requirements of U.S. Grade B may be given a score of 0 to 47 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

EXPLANATIONS

§ 52.6330 Explanation of terms.

(a) "Brix" means soluble solids of the concentrated apple juice as measured on the Refractometer, expressed as percent by weight sucrose (degrees Brix) with correction for temperature to the equivalent at 20° C (68° F.), but without correction for invert sugar or other substances. The Brix of frozen concentrated apple juice may be determined by any other method which gives equivalent results.

(b) "Acid" means grams of acid (calculated as malic acid) per 100 grams of concentrated juice determined by titration with a standard sodium hydroxide solution, using phenolphthalein as an indicator or any other satisfactory indicator and using an acid factor of .067.

(c) "Brix-Acid ratio" means the ratio of the Brix of the concentrated juice in degrees Brix to the grams of acid (calculated as malic acid) per 100 grams of concentrated juice.

(d) The USDA Honey Color Comparator, referenced in § 52.6327, and information concerning procurement and use is available from:

Chief, Processed Products Standardization and Inspection Branch
Fruit & Vegetable Division, AMS
U.S. Department of Agriculture
Washington, D.C. 20250

LOT COMPLIANCE

§ 52.6331 Ascertaining the grade of a lot.

The grade of a lot of frozen concentrated apple juice covered by these standards is determined by the procedures set forth in the "Regulations Governing Inspection and Certification of Processed Fruits and Vegetables, Processed Products Thereof, and Certain Other Processed Food Products" (§§ 52.1 to 52.87).

EXEMPTION OF CERTAIN SERVICE CONTRACTS FROM WALSH-HEALEY ACT

Notice of Termination of Proposed Rulemaking

No action having been taken to adopt the rule proposed in the FEDERAL REGISTER of July 22, 1966 (31 FR 9998), with respect to exemption of certain service contracts from the Walsh-Healey Act, it is hereby determined that no such rule should be adopted at this late date on the basis of the notice published in 1966. If further consideration is to be given to the adoption of such a rule, a new notice of proposed rulemaking will be published in order to obtain currently pertinent comment on any proposal that may be formulated for the purpose. Accordingly, no further action will be taken on the proposal published at 31 FR 9998 and the rulemaking there proposed is terminated.

Signed at Washington, D.C., this 15th day of Aug. 1973.

BERNARD E. DELURY,
Assistant Secretary for Employment Standards.

Food and Drug Administration

[21 CFR Part 19]

PASTEURIZED PROCESS CHEESE, PASTEURIZED PROCESS CHEESE FOOD, AND PASTEURIZED PROCESS CHEESE SPREAD

Proposed Use of Lecithin as an Optional Anti-Sticking Agent

Notice is given that a petition has been filed by the National Cheese Institute, Inc., 110 North Franklin St., Chicago, IL 60606, proposing an amendment to the standards of identity for pasteurized process cheese (21 CFR 19.750), pasteurized process cheese food (21 CFR 19.765), and pasteurized process cheese spread (21 CFR 19.775) to allow optional addition of lecithin for the functional purpose of aiding in the separation of slices of the product in the same package and in the removal of the wrapper from such products.

Grounds set forth by the petitioner in support of the proposal are as follows:

1. Lecithin, besides being a normal constituent in milk and milk products, has been generally recognized as safe by the Food and Drug Administration under 21 CFR 121.101(d)(8), "Miscellaneous and/or General Purpose Food Additives," without tolerance or limitation.

2. Consumers frequently find it difficult to separate slices of the various processed cheese products; in addition, consumers experience the problem of such products sticking to wrapping material.

3. The addition of 0.03 percent of lecithin to the various pasteurized process cheese products reduces the tendency of the slices to stick together and to the wrapping material.

4. Consumers who prefer nonindividually wrapped slices will benefit by the availability of stacked slices of processed cheese products with improved separation characteristics. Also, a reduction in the use of wrapping material for individual slices may have an ecological benefit.

5. Based on a temporary marketing permit authorized by the Food and Drug Administration, notice of which was published in the FEDERAL REGISTER of October 14, 1971 (36 FR 19995), it was determined by the petitioner that the addition of lecithin to process cheese products was effective and desirable when utilized in the amount considered in this proposed amendment.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (secs. 401, 701, 52 Stat. 1046, 1055, as amended by 70 Stat. 919 and 72 Stat. 948; 21 U.S.C. 341, 371) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 2.120), it is proposed that Part 19 be amended:

1. In § 19.750(d) by adding a new subparagraph (8) as follows:

§ 19.750 Pasteurized process cheese; identity; label statement of optional ingredients.

* * * * * *

(d) * * *

(8) Pasteurized process cheese in the form of slices or cuts in consumer-sized packages may contain lecithin as an optional anti-sticking agent in an amount not to exceed 0.03 percent by weight of the finished product.

* * * * * *

2. In § 19.765(e) by adding a new subparagraph (8) as follows:

§ 19.765 Pasteurized process cheese food; identity; label statement of optional ingredients.

* * * * * *

(e) * * *

(8) Pasteurized process cheese food in the form of slices or cuts in consumer-sized packages may contain lecithin as an optional anti-sticking agent in an amount not to exceed 0.03 percent by weight of the finished product.

* * * * * *

3. In § 19.775(f) by adding a new subparagraph (9) as follows:

§ 19.775 Pasteurized process cheese spread; identity; label statement of optional ingredients.

* * * * * *

(f) * * *

(9) Pasteurized process cheese spread in consumer-sized packages may contain lecithin as an optional anti-sticking agent in an amount not exceed 0.03 percent by weight of the finished product.

* * * * * *

This proposal makes no reference to the label declaration required when lecithin is used; it is not necessary because recent amendments published in the FEDERAL REGISTER of July 7, 1972 (37 FR 13339), and April 23, 1973 (38 FR 9996), require that the common name of each ingredient used shall be declared on the labels of the cheese products covered by this proposed amendment.

Interested persons may, on or before October 19, 1973, file with the Hearing Clerk, Food and Drug Administration, Rm. 6–88, 5600 Fishers Lane, Rockville, MD 20852, written comments (preferably in quintuplicate) regarding this proposal. Comments may be accompanied by a memorandum or brief in support thereof. Received comments may be seen in the above office during working hours, Monday through Friday.

Dated: August 10, 1973.

VIRGIL O. WODICKA,
Director, Bureau of Foods.

[FR Doc.73–17278 Filed 8–17–73;8:45 am]

[21 CFR Part 27]

CANNED GRAPEFRUIT

Proposed Amendment to Standards of Identity, Quality, and Fill of Container

The Food and Agriculture Organization/World Health Organization Codex Alimentarius Commission has submitted to the United States for consideration for acceptance a "Recommended International Standard for Canned Grapefruit." The United States, as a member of the Food and Agriculture Organization of the United Nations and of the World Health Organization, is under obligation to consider all Codex Standards. The rules of procedure of the Codex Alimentarius Commission state that a Codex Standard may be accepted by a participating country in one of three ways: Full acceptance; target acceptance; and acceptance with minor deviations. A participating country which concludes that it cannot accept the standard in any of these ways is requested to indicate the reasons for the ways in which its requirements differ from the Codex Standard. Members of the Commission are requested to notify the Secretariat of the Codex Alimentarius Commission—Joint FAO/WHO Food Standards Programme, FAO, Rome, Italy, of their decision. For several years the United States has had definitions and standards of identity (21 CFR 27.90), quality (21 CFR 27.91), and fill of container (21 CFR 27.92) for canned grapefruit, as promulgated by the Commissioner of Food and Drugs differing in several respects from the Recommended International Standard. The basis of this proposal to amend the Food and Drug Administration canned grapefruit standards is the fact that, in the opinion of the Commissioner of Food and Drugs, it will promote honesty and fair dealing in the interest of consumers and facilitate international trade to adopt as far as practicable the recommended worldwide standard for canned grapefruit hereinafter referred to as the Codex Standard.

The Codex standard references the Codex "Sampling Plans for Pre-packaged Foods, 1969," that were developed by the Codex Committee on Processed Fruits and Vegetables that are being considered by the Codex Committee on Sampling and Analysis. The Codex sampling plans, although they are included in the Codex standard, have not reached the final step of development and therefore may be subject to further modification. The Commissioner, however, believes that this is an opportune time to elicit comments on sampling plans. The Commissioner proposes to limit the sampling plans to Codex Inspection Level II, which is appropriate where settlement of disputes, enforcement or need for better lot estimate is necessary. Definitions for "lot" and "sample unit" have been expanded to make them more applicable to a wider range of size of primary containers.

In its provisions for packing media, the FDA proposal corresponds closely but is not identical to those of the Codex standards. The principal difference is the provision in the FDA proposal for the continued use of sirups prepared from grapefruit juice and nutritive sweeteners. The Codex standard provides for grapefruit juice or grapefruit juice and a lesser quantity of water as a packing medium, but does not provide for the addition of sweeteners to these liquids. In this connection it is to be noted that in developing standards for certain other canned fruits the Codex Commission has recently approved the principle that juices other than that of the fruit being canned, or combination of juices, or such juice or juices with added water and/or nutritive sweeteners should be authorized with suitable indications on the label of the composition of the packing medium used. It is not unlikely that at some future time the Codex standard for canned grapefruit and those already adopted for other fruits may be amended to apply this principle more fully to them also. However, at the present time this has not been done and it appears preferable to have the proposed revisions in the FDA standard for canned grapefruit correspond as closely as possible to those of the present Codex standard. This is the case except for permitting the sweetened grapefruit juices as packing media. Since this was provided for in the present FDA standard for canned grapefruit and is in line with other Codex standards now being developed, there appears to be no sound reason for eliminating it.

The units of measurements in the FDA standard of quality are stated in the United States customary system (e.g. ounces, inches, pounds), whereas the Codex standard uses only the metric system. The Commissioner recognizes that the international (metric) system is used throughout the world and in the United States for technical purposes and may eventually be adopted by this country as common usage for measurements. The Commissioner, therefore, proposes that the metric system be used in the FDA standards of quality and fill of container with the equivalent units of the U.S. customary system shown parenthetically.

The Codex standard also includes hygiene requirements and certain basic labeling requirements that are not considered a part of food standards under section 401 of the Federal Food, Drug, and Cosmetic Act which is the legal basis for the promulgation of food standards. Hygiene and the other factors are, however, a concern of FDA under other sections of the Federal Food, Drug, and Cosmetic Act and, therefore, are not discussed further in this proposal.

Amendment of the FDA standards of identity, quality, and fill of container for canned grapefruit will be based upon consideration of the following Codex standard, comments and supporting data received, and other available information.

CAC/RS 15–1969

RECOMMENDED INTERNATIONAL STANDARD FOR CANNED GRAPEFRUIT

1. *DESCRIPTION*

1.1 *Product Definition*

Canned grapefruit is the product (a) prepared from sound, ripe grapefruit, conforming to the characteristics of the nutritive of *Citrus paradisi Macfadyen*, (b) packed with a suitable liquid packing medium, nutritive sweeteners, and suitable seasoning or flavouring ingredients appropriate to the product, and (c) processed by heat, in an appropriate manner, before or after being sealed in a container, so as to prevent spoilage. Before processing, the fruit shall have been properly washed and peeled and the membrane, seeds and core shall have been substantially removed from the sections.

1.2 *Colour Types*

1.2.1 White—produced from white-fleshed grapefruit.

1.2.2 Pink—produced from pink or red-fleshed grapefruit.

1.3 *Styles*

Canned grapefruit may be packed as either:

1.3.1 Sections or Segments; or

1.3.2 Broken Sections or Broken Segments.

2. *ESSENTIAL COMPOSITION AND QUALITY FACTORS*

2.1 *Packing Media*

2.1.1 Canned grapefruit may be packed in any one of the following:

2.1.1.1 Water—in which water or a mixture of water and juice (less than 50% juice) is the liquid packing medium.

2.1.1.2 Juice—in which grapefruit juice is the sole liquid packing medium and to which no water has been added directly or indirectly.

2.1.1.3 Juice and Water—in which grapefruit juice and water are combined as a liquid packing medium with not less than 50% juice.

2.1.1.4 Syrup—in which water and sucrose, invert sugar, dextrose, glucose syrup, or dried glucose syrup are combined as a liquid packing medium and are classified on the basis of cut-out strength as specified below:

Liquid Media	*"Cut-out" Brix Measurement*
Slightly sweetened syrup	not less than 12° Brix
Light syrup	not less than 16° Brix
Heavy syrup	not less than 18° Brix

2.1.2 The "cut-out" strength shall be determined on average, but no container may have a Brix value lower than that of the next category below.

2.2 *Other Ingredients*

Lemon juice, spices.

2.3 *Quality Criteria*

2.3.1 Definitions

2.3.1.1 Whole segment: a section or portion of section in which its length is at least 75% of the apparent length of the original segment. A segment which is split in one place only and is not prone to disintegrate shall be considered whole, but parts of a segment joined by a "thread", or by membrane only shall not be considered "whole".

2.3.1.2 Developed seed: a seed that measures more than 9 millimetres in any dimension.

2.3.2 Colour

The colour shall be typical of grapefruit of the colour-type concerned which has been properly prepared and properly processed.

2.3.3 Flavour

Canned grapefruit shall have a normal flavour and odour free from flavours or odours foreign to the product and canned grapefruit with special ingredients shall have a flavour characteristic of that imparted by the grapefruit and the other substances used.

2.3.4 Texture

The texture shall be firm and characteristic of the product and shall be reasonably free from dry cells or fibrous cells affecting the appearance or the edibility of the product. Segments shall be practically free from signs of disintegration.

2.3.5 Wholeness

In the style of Sections or Segments not less than 65% by weight of drained fruit shall be in whole segments.

2.3.6 Defects

The finished product shall be prepared from such materials and under such practices that it shall be reasonably free from extraneous fruit matter such as peel or core or albedo and shall not contain excessive defects whether specifically mentioned in this standard or not. Certain common defects shall not be present in amounts greater than the following limitations:

2.3.6.1 The total surface covered by membrane shall not exceed 20 square centimetres per 500 grammes of total contents;

2.3.6.2 developed seeds shall not exceed 4 per each 500 grammes of total contents.

2.3.7 Classification of "Defectives"

A container that fails to meet one or more of the applicable quality requirements, as set out in subsections 2.3.2 through 2.3.6 shall be considered a "defective".

2.3.8 Acceptance

A lot will be considered as meeting the applicable quality requirements referred to in sub-section 2.3.7, when the number of "defectives", as defined in subsection 2.3.7 does not exceed the acceptance number (c) of the appropriate sampling plan (AQL–6.5) in the Sampling Plans for Prepackaged Foods (1969).

3. *FOOD ADDITIVES*

3.1 *Firming Agents*		*Maximum level of use*
Calcium chloride Calcium lactate	used singly or in combination	0.035% calcium, derived from added calcium salts, in the final product
3. *Flavours*		
Natural flavours and their identical synthetic equivalents except those which are known to represent a toxic hazard [1]		Not limited
3.3 *Acidifying Agent*		
Citric Acid		Not limited

[1] Temporarily endorsed.

V 38-160 AUG 20 73 XUM

4. *HYGIENE*

4.1 It is recommended that the product covered by the provisions of this standard be prepared in accordance with the International Code of Hygienic Practice for Canned Fruit and Vegetable Products recommended by the Codex Alimentarius Commission (Ref. CAC RCP 2–1969).

4.2 To the extent possible in good manufacturing practice the product shall be free from objectionable matter.

4.3 The product shall not contain any pathogenic microorganisms or any toxic substance originating from microorganisms.

5. *WEIGHTS AND MEASURES*

5.1 *Fill of Container*

5.1.1 Minimum Fill

The container shall be well filled with grapefruit and the product (including packing medium) shall occupy not less than 90% of the water capacity of the container. The water capacity of the container is the volume of distilled water at 20°C which the sealed container will hold when completely filled.

5.1.2 Classification of "Defectives"

A container that fails to meet the requirement for minimum fill (90% container capacity) of sub-section 5.1.1 shall be considered a "defective".

5.1.3 Acceptance

A lot will be considered as meeting the requirement of sub-section 5.1.1 when the number of "defectives", as defined in subsection 5.1.2, does not exceed the acceptance number (c) of the appropriate sampling plan (AQL–6.5) in the Sampling Plans for Prepackaged Foods (1969).

5.1.4 Minimum Drained Weight

5.1.4.1 The drained weight of the product shall be not less than 50% of the weight of distilled water at 20°C which the sealed contained will hold when completely filled.

5.1.4.2 The requirements for minimum drained weight shall be deemed to be complied with when the average drained weight of all containers examined is not less than the minimum required, provided that there is no unreasonable shortage in individual containers.

6. *LABELLING*

In addition to Sections 1, 2, 4 and 6 of the General Standard for the Labelling of Prepackaged Foods (Ref. CAC/RS 1–1969), the following specific provisions apply:

6.1 *The Name of the Food*

6.1.1 The name of the product shall include:

(a) the designation "grapefruit", and

(b) if the grapefruit is "pink", the colour type "pink".

6.1.2 The following shall be included as part of the name or in close proximity to the name of the product:

(a) the style: "sections", "segments", "broken sections", or "broken segments", as appropriate;

(b) the packing medium: "water", "juice", "juice and water", "slightly sweetened syrup", "light syrup", or "heavy syrup", as appropriate.

6.2 *List of Ingredients*

A complete list of ingredients shall be declared on the label in descending order of proportion in accordance with sub-sections 3.2(b) and (c) of the General Standard for the Labelling of Prepackaged Foods, except that water need not be declared.

6.3 *Net Contents*

The net contents shall be declared by weight in either the metric ("Système International" units) or avoirdupois or both systems of measurement as required by the country in which the product is sold.

6.4 *Name and Address*

The name and address of the manufacturer, packer, distributor, importer, exporter or vendor of the product shall be declared.

6.5 *Country of Origin*

6.5.1 The country of origin of the product shall be declared if its omission would mislead or deceive the consumer.

6.5.2. When the product undergoes processing in a second country which changes its nature, the country in which the processing is performed shall be considered to be the country of origin for the purposes of labelling.

7. *METHODS OF ANALYSIS AND SAMPLING*

The methods of analysis and sampling referred to hereunder are international referee methods.

7.1 *Method of Sampling*

Sampling shall be in accordance with the Sampling Plans for Prepackaged Foods (1969).

7.2 *Determination of Drained Weight*

According to the FAO/WHO Codex Alimentarius method (FAO/WHO Codex Alimentarius Methods of Analysis for Processed Fruits and Vegetables, CAC/RM 36–1970, *Determination of Drained Weight*—Method I). Results are expressed as % m/m calculated on the basis of the mass of distilled water at 20°C which the sealed container will hold when completely filled.

7.3 *Syrup Measurements (Refractometric Method)*

According to the A.O.A.C. (1965) method (Official Methods of Analysis of the A.O.A.C., 1965, *29.011:* (Solids) by Means of Refractometer (4) Official, Final action (and 43.009 and 43.008).

Results are expressed as % m/m sucrose ("degrees Brix") with correction for temperature to the equivalent at 20°C.

In many respects the provisions of the present FDA standards and the Codex standard are identical, but in certain instances there are significant variations. The following is a comparison of what, in the opinion of the Commissioner, are the primary differences between the FDA standards and the Codex standard on which the Commissioner particularly requests comments with available supporting data. Following each item of comparison is the action the Commissioner proposes to take if no comments are received.

COMPARISON OF IDENTITY ASPECTS AND PROPOSED COURSE OF ACTIONS

1. *Artificial flavoring.*—21 CFR 27.90(a)(2) provides for the use of flavoring, other than artificial flavoring. Codex (3.2) provides for natural flavors and their identical synthetic equivalents except those which are known to represent a toxic hazard. The Commissioner proposes that 21 CFR 27.90(a)(2) be amended to provide for safe and suitable artificial flavoring as well as natural flavoring.

2. *Botanical name.*—21 CFR 27.90(b) contains the botanical or scientific name of grapefruit *Citrus paradisi*. The Commissioner proposes that the botanical or scientific name be the current internationally accepted nomenclature, *Citrus paradisi Macfadyen* as provided for by Codex (1.1(a)).

3. *Varietal group.*—21 CFR 27.90(b) provides for grapefruit of the white-, pink-, or red-fleshed varietal group (color type) whereas Codex (1.2) provides for white defined as produced from white-fleshed grapefruit and pink as produced from pink or red-fleshed grapefruit. The Commissioner proposes that the Codex definitions be adopted.

4. *Styles of pack.*—(a) *"Sections" or "segments."*—21 CFR 27.90(b)(1)(i) presently requires that for the optional grapefruit ingredient "sections" or "segments" 50 percent or more of the drained weight of the food consist of whole sections whereas Codex (2.3.5) requires that not less than 65 percent of the drained weight be in whole segments. The Florida Canners Association (FCA), which represents all Florida citrus processors, including all six packers of canned grapefruit, commented regarding this aspect of the Codex standard that to increase the minimum percentage of whole sections from 50 percent to 65 percent would be detrimental to the Florida grapefruit grower and processor. The FCA stated that several years ago when it had endorsed the Codex proposal, practically all of the product at that time was hand sectionized and packing 65 percent wholeness was not a problem. Today, according to the FCA, the situation is different. More than 50 percent of the pack is mechanically sectionized and this percentage is expected to continue upward. Mechanization results in more broken sections than with the hand operation. For this reason, the present 50 percent tolerance must be maintained, FCA stated, if the Florida canners are to continue producing this product. The trend to mechanization, the FCA continued, came about primarily because of insufficient and undependable sectionizers. A lesser factor was that of economics. In view of this comment the Commissioner proposes no change in the minimum percentage requirement.

(b) *"Broken sections"* or *"broken segments."*—21 CFR 27.90(b)(1)(ii) presently provides that the name of the optional grapefruit ingredient is "broken sections" or "broken segments" if less than 50 percent of the drained weight of the food consists of whole sections. Codex (1.3.2 and 2.3.5) provides for such style of pack where less than 65 percent of the product is whole sections. In view of the FCA comment on the minimum 65 percent requirement for whole sections in "sections" or "segments" (item 4(a)), the Commissioner proposes no change in the requirement for whole sections in "broken sections" or "broken segments."

5. *Optional packing media.*—(a) *Water.*—21 CFR 27.90(c)(1) defines water as water or any mixture of water and grapefruit juice. Codex (2.1:1.1) defines water as water or a mixture of water and juice (less than 50 percent juice) as the liquid packing medium. The Commissioner proposes that the definition for water in 21 CFR 27.90(c)(1) be redefined on the basis of the Codex definition.

(b) *Grapefruit juice.*—21 CFR 27.90(c)(1) defines grapefruit juice as the fresh or canned expressed juice of mature grapefruit to which no water is added directly or indirectly. Codex (2.1.1.2) provides that grapefruit juice be the sole liquid packing medium to which no water has been added directly or indirectly. The Commissioner proposes no change as the present definition is more explicit than the Codex.

(c) *Juice and water.*—There is no provision for such in the FDA standard. Codex (2.1:1.3) defines juice and water as grapefruit juice and water combined as a liquid packing medium with not less than 50 percent juice. The Commissioner proposes that "grapefruit juice and water" be an additional optional packing medium defined on the basis of the Codex definition. The Commissioner, therefore, also proposes that "slightly sweetened grapefruit juice and water," "lightly sweetened grapefruit juice and water," and "heavily sweetened grapefruit juice and water" be optional packing media when one or more nutritive sweeteners are added to grapefruit juice and water, or when grapefruit juice alone is sweetened with a liquid nutritive sweetener.

6. *Corn sirup or dried corn sirup.*—21 CFR 27.90(c)(2) includes corn sirup or dried corn sirup as optional sweetening ingredients. Codex does not provide for corn sirup or dried corn sirup in that it considers glucose sirup or dried glucose sirup as including corn sirup or dried corn sirup. The Commissioner proposes no change in that corn sirup and dried corn sirup are the common or usual names of such sweeteners in the United States.

7. *Sirup density.*—(a) *Analytical procedure.*—21 CFR 27.90(c)(3) states that the determination of the densities of sirup packing media be made by Brix hydrometer 15 days or more after the grapefruit are canned. Codex (7.3) states that the determination be according to the "Official Methods of Analysis of the Association of Official Agricultural Chemists" (AOAC), 1965 Ed., 29.011, (Solids) "By Means of Refractometer (4) Official, Final Action" (and 43.009 and 43.008). Further, Codex states that the results are to be expressed as percent m/m sucrose (degrees Brix) with correction for temperature to the equivalent at 20° C. The symbol m/m in Codex means mass/mass or by weight. The Commissioner proposes that the procedure be updated in accordance with Codex except the reference (now the "Official Methods of Analysis of the Association of Official Analytical Chemists") be that in the 1970 Ed. and that there be no correction for invert sugar or other substances. In addition, the Commissioner proposes that the density of the sirup packing medium be based on the blended homogenized slurry of the comminuted entire contents of the container if canned for less than 15 days.

(b) *Classifications (cut - out strength).*—21 CFR 27.90(c)(3)(i) requires that "slightly sweetened water" and "slightly sweetened grapefruit juice" have a Brix measurement of 12° or more, but less than 16°. Codex (2.1.1.4) provides for "slightly sweetened sirup" having not less than 12° Brix. The Commissioner proposes that "slightly sweetened sirup" be an optional name to "slightly sweetened water". The Commissioner also proposes that "slightly sweetened grapefruit juice and water" be an additional optional packing medium and that the cut-out strength be 12 percent or more, but less than 16 percent expressed as sucrose.

21 CFR 27.90(c)(3)(ii) presently provides for "sirup" and "grapefruit juice sirup" having a Brix measurement of 16° or more. Codex (2.1.1.4) provides for "light sirup" having not less than 16° Brix and "heavy sirup" with not less than 18° Brix. The Commissioner proposes that the names "sirup" and "grapefruit juice sirup" be changed to "light sirup" and "lightly sweetened grapefruit juice", "lightly sweetened grapefruit juice and water" be an additional optional packing medium and the cut-out strength be 16 percent or more but less than 18 percent expressed as sucrose. The Commissioner also proposes that "heavy sirup", "heavily sweetened grapefruit juice", and "heavily sweetened grapefruit juice and water" be additional optional packing media having a cut-out strength of 18 percent or more.

(c) *Compliance for cut-out strength.*—The FDA standard does not include a procedure for determining compliance for cut-out strength. Codex (2.1.2) provides that compliance be based on the average value of all samples analyzed but no container may have a Brix value lower than the cut-out strength of the next lower category. The Commissioner proposes the FDA procedure be based on Codex except that where no lower category for cut-out strength exists, the cut-out strength for any one container in the sample be not more than 2 percentage points lower than its lowest designated density.

8. *Labeling*—(a) *Grapefruit ingredient.*—21 CFR 27.90(d) requires that the name of the food be preceded or followed by the name of the optional form of the grapefruit ingredient whereas Codex (6.1.2) states that it be included as part of the name or in close proximity to the name of the product. The Commissioner proposes adoption of Codex.

(b) *Packing medium.*—21 CFR 27.90(d) requires that whenever the optional packing media are sweetened, the sweetening ingredients from which they are prepared shall be declared on the label in order of predominance by weight by their common or usual names. Codex (6.2) requires a complete listing of ingredients on the label in descending order of proportion except that water need not be declared. The Commissioner proposes that the declaration of sweetening ingredients as required by 21 CFR 27.90(d) be deleted in view of the proposed complete listing of optional ingredients used in the product (item 8(h)). 21 CFR 27.90(d) also requires that the name of the optional packing medium used, preceded by "in" or "packed in", be on the principal display panel. Codex (6.1.2) states that it be as part of the name or in close proximity to the name of the product. The Commissioner proposes adoption of Codex.

(c) *Spices and flavorings.*—21 CFR 27.90(d)(1) presently requires that when spices are used, the label shall bear the words "spiced" or "spice added" or "with added spice", or in lieu of the word "spice", the common name of the spice. 21 CFR 27.90(d)(2) presently requires that when flavoring, other than artificial flavoring which is presently not permitted, is used, the label shall bear the words "flavoring added" or "with added flavoring", or in lieu of the word "flavoring", the common name of the flavoring. Codex (6.2) requires a complete listing of ingredients with the exception of water on the label in descending order of proportion. Subsection 3.2(c) of the "Recommended International General Standard for the Labeling of Prepackaged Foods" referenced in Codex (6.2) provides that in the ingredient statement added spice may be declared as "spices" and added flavoring as "flavors" in lieu of the common or usual names. Codex (2.2.3) provides that canned grapefruit with special ingredients shall have a flavor characteristic of that imparted by the grapefruit and other substances used. The Commissioner proposes that 21 CFR 27.90(d)(1) and (d)(2) be deleted in view of the proposed (item 8(h)) complete listing of optional ingredients. In addition, the Commissioner proposes that the name of the product include a declaration of any flavoring that characterizes the product as specified in 21 CFR 1.12 (published in the FEDERAL REGISTER of January 19, 1973 (38 FR 2139)) and a declaration of any spice that characterizes the product. If a spice or flavoring has been added in such a quantity that it does not characterize the product, then the fact that a spice or flavoring has been added would only be stated in the ingredient statement (item 8(h)).

(d) *Lemon Juice.*—21 CFR 27.90(d)(3) presently requires that when lemon juice is used, the label bear the words "seasoned with lemon juice". Codex (6.2) includes declaration of lemon juice as part of the ingredient statement. Lemon juice is used in canned grapefruit as an acidulant. When lemon juice is added as an acidulant to low acid grapefruit, it decreases the sweetener-acid ratio. In the opinion of the Commissioner, the amount of lemon juice that may be added as an acidulant may be sufficient to characterize the flavor of the product. The Commissioner proposes that 21 CFR 27.90(d)(3) be deleted in view of the proposed (item 8(h)) complete listing of optional ingredients. The Commissioner, further, proposes that if lemon juice has been added in such quantity as to characterize the food, the name of the product be accompanied by a statement disclosing that fact.

(e) *Citric acid.*—21 CFR 27.90(d)(4) presently requires that when used, the label bear the words "citric acid added" or "with added citric acid" whereas Codex (6.2) includes declaration as "citric acid" as part of the ingredient statement. An acidulant such as citric acid may be added to low acid grapefruit to decrease the sweetener-acid ratio; however, sufficient citric acid is not added to impart a characterizing effect to the product. The Commissioner, therefore, proposes that 21 CFR 27.90(d)(4) be deleted. Citric acid will continue to be re-

V 38-160 AUG 20 73 XUM

quired to be included in the optional ingredient statement (item 8(h)) when used.

(f) *Calcium chloride, calcium lactate.*—21 CFR 27.90(d)(5) presently requires that when used, the label shall bear the words "calcium ---------- added to improve firmness", the blank being filled in with the word "salt" or "salts", or in lieu thereof, the word "chloride" or "lactate" or the words "chloride and lactate", as the case may be. Codex (6.2) includes declaration as "calcium chloride" and "calcium lactate" as part of the ingredient statement. The Commissioner proposes that the declaration presently provided for in 21 CFR 27.90(d)(5) be deleted in view of item 8(h).

(g) *Combining optional ingredients.*—21 CFR 27.90(d) presently provides that when two or more of the optional ingredients, items 8(c) through 8(e), are used such words may be combined; for example, "with added cloves, cinnamon oil, and citric acid and seasoned with lemon juice" whereas Codex contains no such provision. The Commissioner proposes that the provision of 21 CFR 27.90(d) for the combining of optional ingredients only apply to items 8(c) and (d), as appropriate.

(h) *Listing of ingredients.*—21 CFR 27.90(e) presently requires that the words and statements specified in 21 CFR 27.90(d) showing the optional ingredients present shall be listed on the principal display panel or panels or any appropriate information panel without obscuring design, vignettes or crowding. The declaration shall appear in conspicuous and easily legible letters of boldface print or type the size of which shall be not less than one-half of that required by 21 CFR Part 1 for the statement of net quantity of contents appearing on the label, but in no case less than one-sixteenth of an inch in height. In addition, 21 CFR 27.90(e) requires that the entire ingredient statement appear on at least one panel of the label and in lines, generally parallel to the base on which the container rests as it is designed to be displayed. Codex (6.2) requires a complete listing of ingredients with the exception of water on the label in descending order of proportion. The Commissioner proposes that 21 CFR 27.90(e) be amended to reference the applicable sections of 21 CFR Part 1 for the label declaration of optional ingredients including the requirement that, with the exception of spices and flavorings which may be so declared, the common name of each of the optional ingredients used shall be declared on the label in the order of decreasing predominance.

COMPARISON OF QUALITY ASPECTS AND PROPOSED COURSE OF ACTIONS

1. *Color.*—The FDA standard has no specific provision for color criteria. Codex (2.3.2) states that the color be typical of the grapefruit of the color type concerned which has been properly prepared and properly processed. The Commissioner proposes no change as Codex is not specific enough for use as a legal requirement.

2. *Flavor.*—The FDA standard has no provision for flavor criteria. Codex (2.3.3) states that the food shall have a normal flavor and be free of odors foreign to the product. The Commissioner proposes no change because abnormal odor or flavor would make the food adulterated under section 402 of the Federal Food, Drug, and Cosmetic Act.

3. *Texture.*—The FDA standard has no general statement on texture as in Codex (2.3.4) which states that the texture shall be firm and characteristic of the product and shall be reasonably free from dry cells or fibrous cells affecting the appearance or the edibility of the product. Segments shall be practically free from signs of disintegration. The Commissioner proposes no change as Codex is not specific enough for use as a legal requirement.

4. *Extraneous material.*—21 CFR 27.91(a)(1) requires that the food be free from extraneous material such as leaves, portions of leaves, and pieces of peel. Codex (2.3.5) states that the finished product shall be prepared from such materials and under such practices that it shall be reasonably free from extraneous fruit matter such as peel or core or albedo and shall not contain excessive defects whether specifically mentioned in this standard or not. The Commissioner proposes no change as the FDA quality requirement is more specific than Codex.

5. *Membrane.*—21 CFR 27.91(a)(2) requires that each 20 ounces (567 grams) of the food not contain more than 3 square inches (19.4 square centimeters) of tough membrane or albedo on the units. Codex (2.3.6.1) states that the total surface covered by membrane shall not exceed 20 square centimeters per 500 grams of total contents. The Commissioner proposes adoption of the Codex requirement.

6. *Seeds.*—21 CFR 27.91(a)(2) provides that each 20 ounces (567 grams) of the food contain not more than 12 seeds including not more than three large seeds. A seed is considered a seed when any portion thereof measures more than three-sixteenths inch (4.76 millimeters) in any dimension. A seed is considered a large seed when it measures more than three-eighths inch (9.53 millimeters) in any dimension. Codex (2.3.6.2) states that developed seeds shall not exceed 4 per each 500 grams of total content. A developed seed is defined as measuring more than 9 millimeters in any dimension. The Commissioner proposes adoption of the Codex requirement.

7. *Blemished units.*—21 CFR 27.91(a)(3) permits not more than 15 percent by weight of the drained grapefruit to be blemished units. A unit is considered blemished when a grapefruit section or any portion thereof is damaged by lye peeling, discoloration, or by other visible injury. Codex (2.3.2) states that the color of the product shall be typical of grapefruit of the colortype concerned which has been properly prepared and properly processed. The Commissioner proposes no change as the FDA requirement is more specific.

8. *Compliance.*—Not covered in the FDA standard. Codex (2.3.7 and 2.3.8) states that a container that fails to meet one or more of the applicable quality requirements, as set out in subsections 2.3.2 through 2.3.6 shall be considered a "defective" and that a lot will be considered as meeting the applicable quality requirements, when the number of "defectives" does not exceed the acceptance number (c) of the appropriate sampling plan (AQL 6.5) in the "Sampling Plans for Prepackaged Foods (1969)". The Commissioner proposes that the procedure for determining the acceptability of a lot for quality factors (namely membrane, seeds and blemished units) be based on Codex.

9. *Substandard in quality labeling provision.*—21 CFR 27.91(b) contains specific labeling provision for canned grapefruit that fails to meet the standard of quality. Codex is silent on what disposition is to be made of canned grapefruit that does not meet the quality standard. This is left entirely to the individual country accepting the standard. The Commissioner proposes no change as the provision provides a means of disposing of canned grapefruit that does not meet the quality standard.

COMPARISON OF FILL OF CONTAINER ASPECTS AND PROPOSED COURSE OF ACTIONS

1. *Drained weight.*—21 CFR 27.92(a)(2) requires that drained weight of the grapefruit ingredient be not less than 53 percent of the water capacity of the container whereas Codex (5.1.4.1) states that it be not less than 50 percent of the water capacity of the container. The Commissioner proposes adoption of the Codex requirement.

2. *Determination of drained weight.*—21 CFR 27.92(b), the method for determining drained weight, references a 1940 publication for the specifications of the No. 8 sieve. Codex (7.2) provides for the procedure in the "Official Methods of Analysis of the Association of Official Agricultural Chemists" (AOAC), 1965 Ed. which is the same as the FDA procedure except for the reference for the specifications of the No. 8 sieve. The AOAC is now the "Official Methods of Analysis of the Association of Official Analytical Chemists." The Commissioner proposes to update the specifications for the No. 8 sieve by referencing the specifications for such sieve set forth in the "Definitions of Terms and Explanatory Notes", page xviii, of the "Official Methods of Analysis of the Association of Official Analytical Chemists", 11th Ed., 1970, except that the nominal sieve size opening be 2.36 millimeters instead of 2.38 millimeters.

3. *Sampling and acceptance procedure for minimum fill.*—Not provided for in the FDA standard. Codex (5.12 and 5.13) states that a container that fails to meet the requirement for minimum fill (90 percent of container capacity) shall be considered a "defective". A lot will be considered acceptable when the number of "defectives" does not exceed the acceptance number (c) of the appropriate sampling plan (AQL–6.5) in the "Sampling Plans for Prepackaged Foods (1969)". The Commissioner proposes that compliance for minimum fill be based on the Codex procedure.

4. *Sampling and acceptance procedure for minimum drained weight.*—Not provided for in the FDA standard. Codex (5.1.4.2) states that the requirements for minimum drained weight shall be deemed to be complied with when the average drained weight of all containers examined is not less than the minimum required, provided there is no unreasonable shortage in individual containers. The Commissioner proposes that compliance for minimum drained weight be based on the average drained weight of the sample drawn according to the proposed sampling plans. The Commissioner recognizes that basing the minimum drained weight on sample average will allow for considerable variability in the amount of grapefruit among the individual cans within a given lot. However, there is no evidence of excessive slack filling and in the absence of actual data on industry fill practices for individual containers within a lot the proposed approach is deemed to be the most practical.

5. *Substandard in fill labeling provision.*—21 CFR 27.92(c) provides specific labeling requirements for substandard in minimum fill. Codex is silent on disposition of canned grapefruit that does not meet the standard.

The Commissioner proposes no change as the provision provides a means of dealing with canned grapefruit that does not meet the fill of container standard.

Accordingly, the Commissioner proposes, on his own initiative, to amend the existing canned grapefruit standards of identity (21 CFR 27.90), quality (21 CFR 27.91), and fill of container (21 CFR 27.92), as set forth below, to provide for certain features, based on consideration of the Codex Standard that would, in his opinion promote honesty and fair dealing in the interest of consumers.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (secs. 401, 701(e), 52 Stat. 1046, 1055, as amended; 21 U.S.C. 341, 371(e)), and under authority delegated to the Commissioner (21 CFR 2.120), it is proposed to amend Part 27 by revising §§ 27.90, 27.91, and 27.92 to read as follows:

§ 27.90 Canned grapefruit; identity; label statement of optional ingredients.

(a) Canned grapefruit is the food prepared from one of the optional grapefruit ingredients specified in paragraph (b) of this section and one of the optional packing media specified in paragraph (c) of this section. Such food may also contain one or more of the following safe and suitable optional ingredients:

(1) Spices.

(2) Natural and artificial flavoring.

(3) Lemon juice.

(4) Citric acid.

(5) Calcium chloride or calcium lactate or a mixture of the two calcium salts in a quantity reasonably necessary to firm the grapefruit sections, but in no case in a quantity such that the calcium contained in such calcium salt or mixture is more than 0.035 percent by weight of the finished food. Such food is sealed in a container and, either before or after sealing, is so processed by heat as to prevent spoilage.

(b) The optional grapefruit ingredients referred to in paragraph (a) of this section are prepared from sound, mature grapefruit (Citrus paradisi Macfadyen) of the color types white—, produced from white-fleshed grapefruit, and pink—produced from pink or red-fleshed grapefruit and are in the following forms of units: Whole sections or broken sections. Each such form of units or a mixture of such forms of units prepared from a single varietal group (color type) is an optional grapefruit ingredient. The core, seeds, and major portions of membrane of such ingredient are removed. For the purpose of this section, a grapefruit section is considered whole when the unit is intact or an intact portion of such unit is not less than 75 percent of its apparent original size and is not excessively trimmed.

(1) For the purpose of paragraph (d) of this section, the name of the optional grapefruit ingredient is:

(i) "Section" or "segments", if 50 percent or more of the drained weight of the food consists of whole sections.

(ii) "Broken sections" or "broken segments", if less than 50 percent of the drained weight of the food consists of whole sections.

(2) The drained weight is determined by the method prescribed in the standard of fill of container for canned grapefruit set forth in § 27.92(b).

(c)(1) The optional packing media referred to in paragraph (a) of this section are:

(i) Water.

(ii) Grapefruit juice and water.

(iii) Grapefruit juice.

(iv) Slightly sweetened sirup or slightly sweetened water.

(v) Light sirup.

(vi) Heavy sirup.

(vii) Slightly sweetened grapefruit juice and water.

(viii) Lightly sweetened grapefruit juice and water.

(ix) Heavily sweetened grapefruit juice and water.

(x) Slightly sweetened grapefruit juice.

(xi) Lightly sweetened grapefruit juice.

(xii) Heavily sweetened grapefruit juice.

As used in this subparagraph the optional packing medium "water" means, in addition to water, any mixture of water and grapefruit juice in which there is less than 50 percent grapefruit juice; the optional packing medium "grapefruit juice and water" means the liquid packing medium in which juice of mature grapefruit and water are combined as a liquid packing medium with not less than 50 percent grapefruit juice and "grapefruit juice" means the fresh or canned expressed juice of mature grapefruit to which no water is added directly or indirectly.

(2) Each of the packing media in subdivisions (iv) to (xii) of subparagraph (1) of this paragraph is prepared with a liquid ingredient and a nutritive sweetening ingredient. Water is the liquid ingredient from which packing media in subdivisions (iv) to (vi) of subparagraph (1) of this paragraph are prepared. "Grapefruit juice and water are the liquid ingredients from which the packing media in subidivisions (vii) to (ix) of subparagraph (1) of this paragraph are prepared." Grapefruit juice is the liquid ingredient from which the packing media in subidivisions (x) to (xii) of subparagraph (1) of this paragraph are prepared. The nutritive sweetening ingredients from which the packing media in subdivisions (iv) to (xii) of subparagraph (1) of this paragraph are prepared is one or more of the following: Sugar, invert sugar sirup, dextrose, corn sirup, dried corn sirup, glucose sirup or dried glucose sirup. However, if one or more of the liquid nutritive sweetening ingredients and grapefruit juice are combined as a liquid packing medium with not less than 50 percent grapefruit juice, the packing medium is as set forth in subdivisions (vii) to (ix) of subparagraph (1) of this paragraph.

(3) The respective densities of packing media in subparagraph (1) (iv) to (ix) inclusive, of this paragraph as measured on the refractometer, expressed as percent by weight sucrose (degrees Brix) with correction for temperature to the equivalent at 20° C. (68° F.), 15 days or more after the grapefruit are canned or the blended homogenized slurry of the comminuted entire contents of the container if canned for less than 15 days, according to the "Official Methods of Analysis of the Association of Official Analytical Chemists",[1] 11th Ed., 1970, page 526, section 31.011 (Solids) "By Means of Refractometer—Official Final Action" (and 47.012 and 47.015) without correction for invert sugar or other substances, are as follows:

(i) Packing media in subdivisions (iv), (vii), and (x) of subparagraph (1) of this paragraph: Twelve percent or more but less than 16 percent.

(ii) Packing media in subdivisions (v), (viii), and (xi) of subparagraph (1) of this paragraph: Sixteen percent or more but less than 18 percent.

(iii) Packing media in subdivisions (vi), (ix), and (xii) of subparagraph (1) of this paragraph: Eighteen percent or more. A lot shall be deemed to be in compliance for packing medium density based on the average value for all the

[1] Copies may be obtained from: Association of official Analytical Chemists, P.O. Box 540, Benjamin Franklin Station, Washington, DC. 20044.

V 38-160 AUG 20 73 XUM

samples analyzed according to § 27.91(b) but no container may have a value lower than that of the next lower category or 2 percentage points lower if no lower category exists.

(d) The name of the food is "grapefruit" or "pink grapefruit", as appropriate for the color type of the grapefruit used. The optional form or style of the grapefruit ingredient as set forth in paragraph (b)(1) of this section and the optional packing medium used as designated in paragraph (c) of this section shall be included as part of the name or in close proximity to the name of the food. The name of the food shall also include a declaration of any flavoring that characterizes the product as specified in § 1.13 of this chapter and a declaration of any spice or seasoning that characterizes the product; for example, "with added spice". Whenever the word "sirup" is used, it may be alternatively spelled "syrup". When two or more of the optional ingredients specified in subparagraphs (1), (2) and (3) of paragraph (a) of this section are used, such words may be combined; for example, "with added cloves and cinnamon oil".

(e) Except for spices and flavorings which may be declared as such, the common name of each of the optional ingredients used shall be declared on the label as required by the applicable sections of 21 CFR Part 1.

§ 27.91 Canned grapefruit; quality; label statement of substandard quality.

(a) The standard of quality for canned grapefruit is as follows:

(1) The food is free from extraneous material such as leaves, portions of leaves, and pieces of peel.

(2) The finished food contains per 500 grams (17.6 ounces) not more than:

(i) An aggregate area of 20 square centimeters (3.1 square inches) of tough membrane or albedo on the units.

(ii) Four developed seeds. A seed is considered a developed seed when it measures more than 9.0 millimeters (0.35 inches) in any dimension.

(3) Not more than 15 percent by weight of the drained grapefruit may be blemished units. A blemished unit is a grapefruit section or any portion thereof which is damaged by lye peeling, by discoloration, or by other visible injury. The drained weight is determined by the method prescribed in the standard of fill of container for canned grapefruit set forth in § 27.92(b).

(b) *Sampling and acceptance procedure.* A lot is to be considered acceptable when the number of "defectives" does not exceed the acceptance number in the sampling plans given in subparagraph (2) of this paragraph.

(1) Definitions of terms to be used in the sampling plans in subparagraph (2) of this paragraph are as follows:

(i) *Lot.* A collection of primary containers or units of the same size, type, and style manufactured or packed under similar conditions and handled as a single unit of trade.

(ii) *Lot size.* The number of primary containers or units in the lot.

(iii) *Sample size (n).* The total number of sample units drawn for examination from a lot.

(iv) *Sample unit.* A container, the entire contents of a container, a portion of the contents of a container, or a composite mixture of product from small containers that is sufficient for the examination or testing as a single unit.

(v) *Defective.* Any sample unit shall be regarded as defective when any of the defects or conditions specified in the quality standard (paragraph (a) of this section) and § 27.92(c)(1) for minimum fill of container are present in excess of the stated tolerances.

(vi) *Accepted number (c).* The maximum number of defective sample units permitted in the sample in order to consider the lot as meeting the specified requirements.

(vii) *Acceptable quality level (AQL).* The maximum percent of defective sample units permitted in a lot that will be accepted approximately 95 percent of the time.

(2) Sampling plans and acceptance procedure:

Lot size (primary containers)	Size of container: Net weight equal to or less than 1 kilogram (2.2 pounds)	
	n	c
4,800 or less	13	2
4,801–21,000	21	3
21,001–48,000	29	4
48,001–84,000	48	6
84,001–144,000	84	9
144,001–240,000	126	13
over 240,000	200	19

	Net weight greater than 1 kilogram (2.2 pounds) but not more than 4.5 kilograms (10 pounds)	
	n	c
2,400 or less	13	2
2,401–15,000	21	3
15,001–24,000	29	4
24,001–42,000	48	6
42,001–72,000	84	9
72,001–120,000	126	13
over 120,000	200	19

	Net weight greater than 4.5 kilograms (10 pounds)	
	n	c
600 or less	13	2
601–2,000	21	3
2,001–7,200	29	4
7,201–15,000	48	6
15,001–24,000	84	9
24,001–42,000	126	13
over 42,000	200	19

n = number of primary containers in sample
c = acceptance number

(c) If the quality of canned grapefruit falls below the standard prescribed in paragraph (a) of this section, the label shall bear the general statement of substandard quality specified in § 10.7(a) of this chapter, in the manner and form therein specified; however, if the quality of the canned grapefruit falls below standard with respect to only one of the factors of quality specified by subparagraphs (1), (2), or (3) of paragraph (a) of this section, there may be substituted for the second line of such general statement of substandard quality, "Good Food—Not High Grade", a new line as specified after the corresponding designation of paragraph (a) of this section which the canned grapefruit fail to meet:

(1) "Contains extraneous material".
(2)(i) "Excessive tough membrane".
(2)(ii) "Excessive seeds".
(3) "Excessive blemished units".

§ 27.92 Canned grapefruit; fill of container; label statement of substandard fill.

(a) The standard of fill of container for canned grapefruit is:

(1) The fill of grapefruit and packing medium, as determined by the general method for fill of container prescribed in § 10.6(b) of this chapter, is not less than 90 percent of the total capacity of the container.

(2) The drained weight of grapefruit ingredient is not less than 50 percent of the water capacity of the container, as determined by the method prescribed in paragraph (b) of this section and the general method for water capacity of containers prescribed in § 10.6(a) of this chapter.

(b) Drained weight is determined by the following method: Tilt the opened container so as to distribute the contents evenly over the meshes of a circular sieve which has previously been weighed. The diameter of the sieve is 20.3 centimeters (8 inches) if the quantity of contents of the container is less than 1.4 kilograms (3 pounds) and 30.5 centimeters (12 inches) if such quantity is 1.4 kilograms (3 pounds) or more. The bottom of the sieve is woven-wire cloth which complies with the specifications for such sieve set forth in the "Definitions of Terms and Explanatory Notes," page xviii, of the "Official Methods of Analysis of the Association of Official Analytical Chemists",[2] 11th Ed., 1970, except that the nominal sieve size opening for the No. 8 sieve shall be 2.36 millimeters instead of 2.38 millimeters. Without shifting the material on the sieve, incline the sieve at an angle of 17° to 20° to facilitate drainage. Two minutes after the drainage begins, weigh the sieve and drained grapefruit. The weight so found, less the weight of the sieve, shall be considered to be the weight of the drained grapefruit.

(c)(1) A container that falls below the requirement for minimum fill prescribed in paragraph (a)(1) of this section shall be considered a "defective". The food will be deemed to fall below the standard of fill when the number of defectives exceeds the acceptance number (c) in the sampling plans prescribed in § 27.91(b).

(2) Canned grapefruit will be deemed to fall below the standard of fill when the average drained weight of all containers analyzed when sampled according to the sampling plans prescribed in § 27.91(b) is less than that prescribed in paragraph (a)(2) of this section.

(d) If canned grapefruit falls below the standard of fill of container prescribed in paragraph (a) of this section, the label shall bear the statement of substandard fill specified in § 10.7(b) of this chapter, in the manner and form therein specified.

Interested persons may on or before (October 19, 1973), file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 6–88, 5600 Fishers Lane, Rockville, MD 20852, written comments (preferably in quintuplicate) regarding this proposal. Comments may be accompanied by a memorandum or brief in support thereof. Received comments may be seen in the above office during working hours, Monday through Friday.

Dated: August 3, 1973.

VIRGIL O. WODICKA,
Director, Bureau of Foods.

Social and Rehabilitation Service

[45 CFR Part 250]

MEDICAID; SUSPENSION OF PAYMENTS TO PROVIDERS

Notice of Proposed Rule Making

Notice is hereby given that the regulations set forth in tentative form below are proposed by the Administrator, Social and Rehabilitation Service, with the approval of the Secretary of Health, Education, and Welfare. The proposed regulations implement section 290 of P.L. 92–603, Social Security Amendments of 1972, which provides authority for suspension of Medicaid payments to providers who previously participated in the Medicare programs and who have not refunded overpayments or submitted cost reports under that program. The proposed regulations specify the circumstances under which Medicaid payments will be suspended, the procedure for notifying State agencies, and the conditions for resuming payments.

Prior to the adoption of the proposed regulations, consideration will be given to any comments, suggestions, or objections thereto which are submitted in writing to the Administrator, Social and Rehabilitation Service, Department of Health, Education, and Welfare, 330 Independence Avenue, SW, Washington, D.C. 20201, on or before September 9, 1973. Comments received will be available for public inspection in Room 5121 of the Department's offices at 301 C Street, SW, Washington, D.C. on Monday through Friday of each week from 8:30 a.m. to 5 p.m. (area code 202–963–7361).

(Sec. 1102, 49 Stat. 647 (42 U.S.C. 1302))

Dated: June 8, 1973.

FRANCIS D. DEGEORGE,
Acting Administrator, Social and Rehabilitation Service.

Approved: August 13, 1973.
CASPAR W. WEINBERGER,
Secretary.

A new Subpart C and § 250.220 thereunder are added to Part 250 to read as follows:

Subpart C—Fiscal Administration

§ 250.220 Withholding of Federal payments under Medicaid with respect to certain health care facilities.

(a) *Conditions for withholding Federal payments.*

(1) Effective October 30, 1972, no payment shall be made to a State (except as provided under this section) with respect to expenditures incurred by it for services provided by any institution during any period that an order for suspension of payment (as authorized by this section) is effective with respect to such institution.

(2) The Administrator may issue a suspension of payment order with respect to any institution if such institution:

(i) Does not, at the time such order is issued, have in effect an agreement with the Secretary of Health, Education, and Welfare, which is entered into pursuant to section 1866 of the Social Security Act; and

(ii) Did, prior to the time such order is issued, have in effect such an agreement; and

(iii)(A) Has not made repayment or made satisfactory arrangements with the Social Security Administration for the repayment of amounts due on account of overpayments made to it under title XVIII of the Act; or

(B) Has not submitted appropriate data and information to the Social Security Administration for determination of the amount (if any) of the overpayments made to it under title XVIII.

(b) *Application.*

(1) Whenever the Administrator issues any order for suspension of payment to any institution, after having received a notice for suspension of payment from the Commissioner, Social Security Administration, he shall submit a notice of such order to the single State agency of each State which he has reason to believe does or may utilize the services of such institution under an approved title XIX plan.

(2) Any order for suspension of payment shall become effective on the 60th day after the date the State agency receives notice of such order.

(3) Any such order shall cease to be effective at such time as the Administrator receives written notice from the Commissioner, Social Security Administration, that:

(i) The institution is participating in substantial negotiations which seeks to remedy the conditions which gave rise to the order for suspension of payments; or

(ii) The amounts referred to in paragraph (a)(2) of this section are no longer due from such institution; or

(iii) A satisfactory arrangement has been made for the payment by such institution of any such amounts.

(4) Upon receipt of such notice the Administrator shall notify each State agency to which he has theretofore submitted a notice of order of suspension of payments to such institution.

(c) *Resumption of Federal financial participation.* Whenever any order which has been issued by the Administrator under the preceding provisions of this section with respect to an institution ceases to be effective, any Federal financial participation to which any State would have been entitled on account of services provided by such institution shall be made to such State for the month in which such order ceases to be effective.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Assistant Secretary for Housing Production and Mortgage Credit Federal Housing Commissioner—(Federal Housing Administration)

[24 CFR Part 200]

[Docket No. R–73–233]

MULTIFAMILY PREVIOUS PARTICIPATION REVIEW AND CLEARANCE

Enforcement Remedies

The Department of Housing and Urban Development is considering amending Part 200 of Title 24 of the Code of Federal Regulations, Subpart H—Enforcement Remedies, to set forth the procedure for multifamily Previous Participation Review and Clearance. This procedure is applicable to all project proposals to be financed with a mortgage insured under the National Housing Act. The purpose of the procedure is to review the previous HUD experience of all principals involved in a proposed project in order to determine the acceptability for mortgage insurance of the proposal with respect to the participation of such principals.

The regulations are to be issued under the authority of section 7(d) of the Department of Housing and Urban Development Act of 1965, 42 U.S.C. 3535(d).

Interested persons are invited to participate in the making of the proposed rule by submitting written data, views or statements with regard to the proposed regulations. Communications should be filed in triplicate, using the above docket number and title, with the Rules Docket Clerk, Office of General Counsel, Room 10256, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, D.C., 20410. All relevant material received on or before September 21, 1973, will be considered by the Secretary before adoption of a final rule. Copies of comments submitted will be available during business hours, both before and after the specified closing date, at the above address, for examination by interested persons.

The proposed amendment is as follows:

PREVIOUS PARTICIPATION REVIEW AND CLEARANCE

§ 200.210 Applicability of Procedure.

The Previous Participation Review and Clearance procedure set forth in §§ 200.211 through 200.218 is applicable to every project to be financed with a mortgage insured under the National

V 38-160 AUG 20 73 XUM

Housing Act and with respect to every purchase of a project subject to a mortgage insured under the National Housing Act. The procedure does not apply to any other Department programs in which a previous participation certificate may be required.

§ 200.211 Previous participation certificate.

(a) A previous participation certificate, on a form prescribed by the Commissioner, shall be filed with respect to every project to be financed with a mortgage insured under the National Housing Act and with respect to every purchase of a project subject to a mortgage insured under the National Housing Act. The certificate must be filed by the applicant with the Request for Feasibility Analysis or Application for Project Mortgage Insurance, Application for Transfer of Physical Assets or Bid to Purchase a Secretary-Owned Project. The certificate shall be executed by each of the principals involved in the project.

(b) Each person who executes the certificate shall, by such execution, certify:

(1) That the persons executing the certificate are the only principals involved in the project or that any principal who has not executed the certificate has filed a separate certificate for the project;

(2) That he has listed every HUD project in which he has participated or had any interest; and

(3) That no project in which he has participated or has had any interest was ever in default or received mortgage relief, except as shown in the certificate.

§ 200.212 Definition of principal.

For the purpose of filing a previous participation certificate under § 200.211, of this title, the term "principal" includes individuals, corporations, joint ventures and partnerships having any interest in a project or participating as a sponsor, owner, general contractor, project manager or management agent, and packager or consultant. The term "principal" also includes architects and attorneys who have any interest in the project other than an arms-length fee arrangement for professional services. If the principal is a partnership or a corporation, the term also includes all general partners and all limited partners having a 10 percent or more interest in the organization or all corporate officers and directors and all stockholders having a 10 percent or more interest in the organization.

§ 200.213 Determination by Director, Participation Control Staff.

(a) *Approval.* The Director, Participation Control Staff, shall, consistent with the authority delegated to him by § 200.59a of this part, approve projects upon a determination that there is no information concerning past HUD program experience involving the previous participation of the principals that is not clearly consistent with the acceptability of new proposals involving their participation.

(b) *Withholding of action.* The Director, Participation Control Staff shall withhold action pending resolution of any problems indicated under the following circumstances:

(1) When an authorized HUD official has requested an audit of a principal or of a project in which a principal has participated and the audit has not yet been completed.

(2) When an audit contains adverse findings that have not been satisfactorily resolved.

In addition, the Director, Participation Control Staff, may withhold action for such other causes as may be authorized by the Multifamily Participation Review Committee.

(c) *Disapproval.* The Director, Participation Control Staff, shall disapprove a project with respect to the participation of a principal under the following circumstances:

(1) When the principal has been refused the benefits of participation under section 512 of the National Housing Act and §§ 200.190 through 200.194 of this part or is the subject of an Unsatisfactory Risk Determination under §§ 200.200 through 200.202 of this part, or debarment or suspension under Part 24 of this Title.

(2) When a principal who has previously been disapproved for participation submits a new proposal and there has been no change in the causes for disapproval and no request for reconsideration.

(d) *Referral to Multifamily Participation Review Committee.* Whenever the Director, Participation Control Staff, cannot make a determination of a case under paragraphs (a) through (c) of this section, he shall refer the case to the Multifamily Participation Review Committee, together with all available information and his recommendation of the action to be taken.

§ 200.214 Determination by Multifamily Participation Review Committee.

The Multifamily Participation Review Committee shall, consistent with its functions as described in 200.93 of this part, make one of the following determinations:

(a) *Approval.* The Multifamily Participation Review Committee shall approve projects upon a determination that there is no information concerning past HUD program experience involving the previous participation of the principals that is not consistent with the acceptability of new proposals involving their participation.

(b) *Withholding of action.* The Multifamily Participation Review Committee shall withhold action when a principal is the subject of an HUD or other governmental investigation and the available information indicates that the investigation, upon completion, may disclose adverse information of the nature described in paragraph (c) of this section or may result in the application of any of the administrative actions described in § 200.213(c)(1) of this part. In addition, the Multifamily Participation Review Committee may, when adverse information of the nature described in paragraph (c) of this section exists, withhold action pending correction of the deficiencies.

(c) *Disapproval* (1) The Multifamily Participation Review Committee may disapprove a project when the following adverse information exists in connection with any HUD project in which a principal has previously participated, provided that the Committee may consider mitigating circumstances in making a determination:

(i) Improper distribution of project funds, diversion of project income, unfunded security deposits or any other use of project assets contrary to HUD requirements that has not been corrected to the satisfaction of the Committee at the time of its consideration;

(ii) Violation of regulatory agreement or noncompliance with any other obligation to HUD that has not been corrected to the satisfaction of the Committee at the time of is consideration;

(iii) One or more foreclosures or defaults on an insured mortgage or mortgages, except when caused by circumstances beyond the principal's control.

(iv) Any serious violation of HUD regulations;

(v) Other noncompliance with program requirements in any HUD program.

(2) The Multifamily Participation Review Committee may also disapprove a project when the following adverse information exists in connection with a principal:

(i) A United States Attorney has advised the Department that prosecution of the principal for a felony is imminent or probable;

(ii) Failure to respond to HUD inquiries or instructions;

(iii) Failure to disclose previous participation.

§ 200.215 Notice of Disapproval.

(a) Whenever a proposed project is disapproved, the Previous Participation Review Officer shall give written notice of the disapproval to the area or insuring office. The notice shall set forth the reasons for disapproval.

(b) The area or insuring office shall give written notice of the disapproval to the applicant and to each principal whose participation was disapproved. The notice to the principal whose participation was disapproved shall set forth the reasons for disapproval.

§ 200.216 Reconsideration.

A principal whose participation in a proposed project has been disapproved may request reconsideration by the Multifamily Participation Review Committee. Such request shall be made in writing and shall contain a statement fully setting forth the action taken by the principal to correct the causes that led to his disapproval.

§ 200.217 Appeal.

A principal whose participation in a proposed project has been disapproved and whose request for reconsideration has resulted in confirmation of the disapproval may appeal under § 24.10 of this title.

§ 200.218 Effect of Procedure.

Approval or disapproval of principals, under §§ 200.210 through 200.217 of this part, shall not be considered as determinative of the feasibility of a project or its acceptability for mortgage insurance purposes except as to the participation of such principals in the project.

Issued at Washington, D.C., August 15, 1973.

SHELDON B. LUBAR,
Assistant Secretary-Commissioner.

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[49 CFR Part 221]

[Docket No. PC-1; Notice 2]

PASSENGER TRAIN VISIBILITY

Extension of Time for Filing Comments; New Date for Public Hearing

On July 16, 1973, the Federal Railroad Administration (FRA) published in the FEDERAL REGISTER a notice of proposed rulemaking to add a new Part 221 to Title 49 of the Code of Federal Regulations to require markings on the rear end of passenger trains to enhance their visibility and protect against rear end collisions (38 FR 18906). The closing date for comments and for public hearing provided in that notice was August 30, 1973.

The Association of American Railroads (AAR) has filed a request for additional time to submit the views and arguments of its member railroads and to make an oral presentation. This request was made due to the complexity of problem areas which have appeared as a result of the preparatory work of several member railroads. The AAR believes that much additional work needs to be done in order for it to make the type of presentation which will be most helpful to the FRA in developing the final rule.

For good cause shown in the AAR request, the FRA has decided to extend the closing date for filing written comments and to set a new time for the public hearing. The new deadline for filing written comments is September 28, 1973. The new time and place for the public hearing are 10:00 a.m., September 28, 1973, in Room 5332, Nassif Building, 400 Seventh St., SW, Washington, D.C. 20590. Persons wishing to make an oral presentation should notify the Docket Clerk, Office of the Chief Counsel, Federal Railroad Administration, 400 Seventh Street, SW, Washington, D.C. 20590 before September 28. Participants should refer to the original notice (38 FR 18906) for a brief statement of the procedures to be followed at the hearing:

(Sec. 202, 84 Stat. 971, 45 U.S.C. 431, § 1.49(n), 49 CFR 1.49(n)).

Issued in Washington, D.C. on August 14, 1973.

HENRI F. RUSH, JR.
Deputy Administrator.

[FR Doc.73-17036 Filed 8-17-73;8:45 am]

National Highway Traffic Safety Administration

[49 CFR Part 571]

[Docket No. 73-20; Notice 1]

MOTOR VEHICLE SAFETY STANDARDS

Fuel System Integrity Proposal

This notice proposes rear moving barrier, lateral crash, and dynamic rollover requirements to test fuel system integrity.

Motor vehicle collisions accompanied by fire account for between 2,000 and 3,500 fatalities annually. Regulations of the Environmental Protection Agency for fuel evaporative emission control will increase the number of components related to fuel systems in all new vehicles with a GVWR of 6,000 pounds or less, and a corresponding increase in points of potential system failure that could result in the loss of fuel in crashes. Future changes for reduced engine emissions may include the use of afterburners and catalytic converters which will increase engine compartment temperatures and result in exhaust system components operating at temperatures up to 1400°F, well above the ignition temperature of the fuel used to propel the vehicle. Improved fuel containment is therefore essential to traffic safety.

Motor Vehicle Safety Standard No. 301 (9–1–75) published today (38 FR 22397) applies to passenger cars manufactured on or after September 1, 1975, and to multipurpose passenger vehicles, trucks, and buses with a GVWR of 10,000 pounds or less manufactured on or after September 1, 1976. This notice proposes additional requirements that would apply to different vehicle categories as of September 1, 1976, and September 1, 1977. Because fire prevention is an essential part of occupant protection during and after crashes, the NHTSA, in its movement towards a systems approach to motor vehicle safety, proposes to incorporate the lateral barrier and dynamic rollover test conditions of Standard No. 208, *Occupant Crash Protection*, into Standard No. 301. As a result, vehicles would be tested under both standards with anthropomorphic dummies installed conforming to 49 CFR Part 572. These effective dates and requirements are discussed in detail below.

Fuel spillage. The basic requirement of the standard is that fuel spillage shall not exceed 1 ounce per minute when a vehicle is tested under specified impact and rollover conditions. The reasons in support of this value are discussed in the preamble to the amendment of Standard No. 301 issued today (38 FR 22397). This notice does not propose a change in the value, but would add more tests under which this limitation must be met.

Frontal barrier crash. The frontal impact test of the amended Standard No. 301 (9–1–75) specifies a perpendicular impact only. The NHTSA believes that the impact range should also include any angle up to 30° in either direction from the perpendicular, since serious frontal crashes occur throughout this range. Under the proposal, passenger cars would meet the angular-crash requirement as of September 1, 1976, and all other vehicles up to 10,000 pounds GVWR a year later.

Rear moving barrier crash. The probability of occurrence of fuel spillage is high in rear-end collisions due to the usual location of the fuel tank and filler pipe. A recent study of rural collisions indicated that fuel spillage occurred in 26 percent of all rear-end car-to-car collisions, as compared with 3.5 percent of front-end impacts. Therefore, the NHTSA considers a rear crash test of primary importance. The rear moving barrier test conditions would be those specified for the lateral moving barrier crash of Standard No. 208 except for the positioning of the barrier and the vehicle. The barrier would impact the vehicle at 30 mph from the rear. Passenger cars and vehicles with a GVWR of 6,000 pounds or less would meet this requirement on September 1, 1976, and heavier vehicles a year later.

Lateral moving barrier crash. The test would be identical to that specified in Standard No. 208—a side impact at 20 mph. Passenger cars would meet this requirement as of September 1, 1976, and all other vehicles a year later, the same date that these vehicles must meet the requirements of Standard No. 208.

Dynamic rollover. The test would be identical to that specified in Standard No. 208—a rollover test at 30 mph. The requirements would become applicable to all vehicles manufactured on or after September 1, 1977. Because occupant entrapment from collapsed vehicle structure minimizes the capability for escape, the NHTSA considers fuel containment in rollovers to be highly important.

Static rollover. This test, an existing requirement of Standard No. 301 (9–1–75), would be extended to vehicles with a GVWR of more than 6,000 pounds but not more than 10,000 pounds, on September 1, 1977. In addition the test, which requires rotation of a vehicle on its longitudinal axis in successive increments of 90°, would be repeated following each impact test. This means that any given vehicle must meet the requirements of a barrier crash from either the front, side, or rear, followed by a static rollover test. Fuel spillage would not exceed 1 ounce per minute at any point in the sequence.

Test conditions. Several new general test conditions are proposed. The vehicle weight condition would be that specified in Standard No. 208. The amendment issued today allows the use of either operating fuel or Stoddard solvent, in accordance with the proposal of August 29, 1970 (35 FR 13799). Alterna-

V 3 8 1 6 0 A UG 20 73 XUM

tive procedures are generally undesirable from an enforcement standpoint, however, because of the possibility of at least arguable differences in test results between different testing agencies. Under the present proposal, the engine would be idling during all tests. Only its normal operating fuel would be allowed for purposes of realistic testing, although it is recognized that this may increase the cost of testing due to necessary safety precautions. This agency is interested in receiving comments on the extent to which testing costs would be increased by this change.

In consideration of the foregoing, it is proposed that 49 CFR § 571.301, Motor Vehicle Safety Standard No. 301, as effective September 1, 1975, be amended as set forth below.

Interested persons are invited to submit comments on the proposed amendment. Comments should refer to the docket number and be submitted to: Docket Section, National Highway Traffic Safety Administration, Room 5221, 400 Seventh Street, SW., Washington, D.C. 20590. It is requested but not required that 10 copies be submitted.

All comments received before the close of business on the comment closing date indicated below will be considered, and will be available for examination in the docket at the address above, both before and after the closing date. To the extent possible, comments filed after the closing date will also be considered. However, the rulemaking action may proceed at any time after that date, and comments received after the closing date and too late for consideration in regard to the action will be treated as suggestions for future rulemaking. The NHTSA will continue to file relevant material, as it becomes available, in the docket after the closing date, and it is recommended that interested persons continue to examine the docket for new materials.

Comment closing date: October 15, 1973.

Proposed effective date: September 1, 1975, with additional requirements effective September 1, 1976 and September 1, 1977 as indicated.

(Sec. 103, 119, Public Law 89-563, 80 Stat. 718, 15 U.S.C. 1392, 1407; delegation of authority at 49 CFR 1.51)

Issued on August 15, 1973.

JAMES B. GREGORY,
Administrator.

PART 571—FEDERAL MOTOR VEHICLE SAFETY STANDARDS

• • • • •

§ 571.301 Standard no. 301; fuel system integrity. (effective Sept. 1, 1975).

S1. *Scope.* This standard specifies requirements for the integrity of motor vehicle fuel systems.

S2. *Purpose.* The purpose of this standard is to reduce deaths and injuries occurring from fires that result from fuel spillage during and after motor vehicle crashes.

S3. *Application.* This standard applies to passenger cars, and to multipurpose passenger vehicles, trucks, and buses with a GVWR of 10,000 pounds or less.

S4. *Definition.* "Fuel spillage" means the fall, flow, or run of fuel from the vehicle but does not include wetness resulting from capillary action.

S5. *General requirements.*

S5.1 *Passenger cars.* Each passenger car manufactured from September 1, 1975, to August 31, 1976, shall meet the requirements of S6.1 in a perpendicular impact only, and S6.5. Each passenger car manufactured on or after September 1, 1976, shall meet all the requirements of S6.1, S6.2, S6.3, and S6.5. Each passenger car manufactured on or after September 1, 1977, shall meet all the requirements of S6.

S5.2 *Vehicles with GVWR of 6,000 pounds or less.* Each multipurpose passenger vehicle truck, and bus with a GVWR of 6,000 pounds or less manufactured from September 1, 1976, to August 31, 1977, shall meet the requirements of S6.1 in a perpendicular impact only, S6.2, and S6.5. Each of these types of vehicles manufactured on or after September 1, 1977, shall meet all the requirements of S6.

S5.3 *Vehicles with GVWR of more than 6,000 pounds but not more than 10,000 pounds.* Each multipurpose passenger vehicle, truck, and bus with a GVWR of more than 6,000 pounds but not more than 10,000 pounds manufactured from September 1, 1976, to August 31, 1977, shall meet the requirements of S6.1 in a perpendicular impact only. Each vehicle manufactured on or after September 1, 1977, shall meet all the requirements of S6.

S5.4 *Fuel spillage: barrier crashes.* Fuel spillage in any barrier crash shall not exceed 1 ounce from impact until motion of the vehicle has ceased, or 1 ounce per minute in the 15-minute period following cessation of motion.

S5.5 *Fuel spillage: rollover.* Fuel spillage on any rollover test shall not exceed 1 ounce per minute.

S6. *Test requirements.*

S6.1 *Frontal barrier crash.* When the vehicle traveling longitudinally forward at any speed up to and including 30 mph impacts a fixed collision barrier that is perpendicular to the line of travel of the vehicle, or at any angle up to 30° in either direction from the perpendicular to the line of travel of the vehicle, under the applicable conditions of S7, with test dummies as specified in Part 572 of this chapter at each front outboard designated seating position, fuel spillage shall not exceed the limits of S5.4.

S6.2 *Rear moving barrier crash.* When the vehicle is impacted from the rear by a barrier moving at 30 mph, with test dummies as specified in Part 572 of this chapter at each front outboard designated seating position, under the applicable conditions of S7, fuel spillage shall not exceed the limits of S5.4.

S6.3 *Lateral moving barrier crash.* When the vehicle is impacted laterally on either side by a barrier moving at 20 mph with test dummies as specified in Part 572 of this chapter at the outboard designated seating positions adjacent to the impacted side, under the applicable conditions of S7, fuel spillage shall not exceed the limits of S5.4.

S6.4 *Dynamic rollover.* When the vehicle is subjected to a rollover test in either lateral direction at 30 mph with test dummies as specified in Part 572 of this chapter in the outboard designated seating positions on its lower side as mounted on the test platform, under the applicable conditions of S7, fuel spillage shall not exceed the limits of S5.5.

S6.5 *Static rollover.* When the vehicle is rotated on its longitudinal axis to each successive increment of 90°, following each impact crash of S6.1, S6.2, and S6.3, fuel spillage shall not exceed the limits of S5.5.

S7. *Test conditions.* The requirements of S5 and S6 shall be met under the following conditions. Where a range of conditions is specified, the vehicle must be capable of meeting the requirements at all points within the range.

S7.1 *General test conditions.* The following conditions apply to all tests.

S7.1.1 The engine is idling at normal operating temperature.

S7.1.2 The fuel tank is filled to any level between 90 and 100 percent of capacity with the fuel recommended by the manufacturer for operation of the vehicle.

S7.1.3 The fuel system other than the fuel tank is filled with fuel to its normal operating level.

S7.1.4 If the vehicle has an electrically driven fuel pump, it is operating at the time of a barrier crash.

S7.1.5 The parking brake is disengaged and the transmission is in neutral, except during S6.2 when the parking brake is set.

S7.1.7 The vehicle, including test devices and instrumentation, is loaded as follows:

(a) A passenger car is loaded to its unloaded vehicle weight plus its rated cargo and luggage capacity weight, secured in the luggage area, plus the weight of the necessary test dummies.

(b) A multipurpose passenger vehicle, truck, or bus is loaded to its unloaded vehicle weight plus 300 pounds or its rated cargo and luggage capacity weight, whichever is less, secured in the load carrying area and distributed as nearly as possible in proportion to its gross axle weight ratings, plus the weight of the necessary test dummies.

S7.1.8 Tires are inflated to manufacturer's specifications.

S7.2 *Lateral moving barrier crash test conditions.* The lateral moving barrier crash test conditions are those specified in S8.2 of Standard No. 208, 49 CFR 571.208.

S7.3 *Rear moving barrier test conditions.* The rear moving barrier test conditions are those specified in S8.2 of Standard No. 208, 49 CFR 571.208, except for the positioning of the barrier and the vehicle. The barrier and test vehicle are positioned so that at impact—

(a) The vehicle is at rest in its normal attitude;

(b) The barrier is traveling at 30 mph with its face perpendicular to the longitudinal centerline of the vehicle; and

(c) A vertical plane through the geometric center of the barrier impact surface and perpendicular to that surface coincides with the longitudinal centerline of the vehicle.

S7.4 *Static rollover test conditions.* The vehicle is rotated to each successive increment at a uniform rate with 90° of rotation taking place in not less than 1 minute and not more than 3 minutes. After reaching a 90° increment the vehicle is held in that position for 5 minutes.

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 52]

PREVENTION OF SIGNIFICANT AIR QUALITY DETERIORATION

Public Hearing

On Monday, July 16, 1973 the Administrator of the Environmental Protection Agency published proposed regulations for preventing significant deterioration of air quality in areas where air pollution levels currently are below the national ambient air quality standards (38 FR 18986). The proposal included notice of public hearings in a number of cities, including one to be held in Washington, D.C. on August 27 and 28, 1973.

Notice is hereby given that the hearing scheduled for Washington, D.C. will be convened at 9:30 am (e.d.t.) in Room 3906 at Waterside Mall, 401 M Street, SW., Washington, D.C. The hearing is intended to provide an opportunity for interested persons to state their views or arguments or to provide information on the July 16, 1973 proposals. As stated in said proposal, relevant comments on all aspects of the impact of restrictions on deterioration are invited. Particular attention is directed to what might appropriately be considered "deterioration" and what degree of deterioration might be appropriately considered "significant".

Mr. Robert L. Baum is hereby designated the Presiding Officer for the Hearing. He will have responsibility for maintaining order, excluding irrelevant or repetitious material, scheduling presentations and, to the extent possible, notifying participants of the time at which they may appear. The hearings will be conducted informally. Technical rules of evidence will not apply.

Persons wishing to make a statement at such hearing are requested to file a notice of such intention not later than 12 days prior to the hearing and, not later than 5 days prior to the hearing, if practicable, to submit three copies of the proposed statement to Mr. Robert L. Baum, Associate General Counsel, Office of Air Quality and Radiation Division, Waterside Mall, Room 509 West Tower, 401 M Street, SW., Washington, D.C. 20460, 202/755-0744.

Date August 3, 1973.

ALAN G. KIRK II,
Acting General Counsel.

Notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

ASSISTANT COMMISSIONER (STABILIZATION), ET AL.

Delegation of Authority Implementing Initial Phase IV Functions

AUGUST 13, 1973.

1. The authority granted the Commissioner of Internal Revenue by Cost of Living Council Order No. 37 and Treasury Department Order No. 150–82 is hereby redelegated to the Assistant Commissioner (Stabilization), Regional Commissioners, Assistant Regional Commissioners (Stabilization), and District Directors and also to Key District Directors to exercise in and for the related Associate Districts. Key District Directors will exercise functional supervision over Stabilization activities in related Associate Districts.

Key districts	*Associate districts*
Boston	Augusta
	Burlington
	Portsmouth
Brooklyn	None
Buffalo	Albany
Hartford	Providence
Manhattan	None
Baltimore	None
Richmond	None
Newark	None
Philadelphia	Wilmington
Pittsburgh	None
Atlanta	Birmingham
Jacksonville	None
Greensboro	Columbia
Nashville	Jackson
Cincinnati	Louisville
Indianapolis	None
Cleveland	Parkersburg
Detroit	None
Chicago	None
St. Louis	Springfield
Des Moines	Omaha

DEPARTMENT OF AGRICULTURE

Commodity Credit Corporation

GRAINS AND SIMILARLY HANDLED COMMODITIES

Notice of Deferred Repayment Option for Warehouse Stored Loans on Barley, Corn, Grain Sorghum, Oats, Rye, Soybeans, and Wheat

Notwithstanding the notice of final date for redemption of warehouse storage loans made under 1970, 1971, and 1972 Commodity Loan Programs as published in the FEDERAL REGISTER (38 FR 10649–10650) and (38 FR 14114 and 14417), notice is hereby given that in Colorado, Kansas, Idaho, Illinois, Indiana, Iowa, Michigan, Minnesota, Missouri, Montana, Nebraska, New Mexico, North Dakota, Oklahoma, Oregon, Ohio, South Dakota, Texas, Washington, Wisconsin, and Wyoming, in accordance with the announcement previously made by the Department of Agriculture, producers of barley, corn, grain sorghum, oats, rye, soybeans, and wheat mortgaged to the Commodity Credit Corporation (CCC), under its regular warehouse storage loan program and extended warehouse storage loan program, may arrange to defer the final date for repayment of such loans for an initial period of 30 days beyond their regular maturity date and for such additional 30 day periods as may be authorized by CCC. Additional requirements are more fully set forth below.

Notwithstanding the terms and conditions for liquidation of warehouse storage loans as contained in the program regulations and the Warehouse Storage Note and Security Agreement, the county ASC committee may designate areas and authorize deferment of the final date for repayment of current and extended loans for an initial period of 30 days beyond the maturity date.

The deferment option is available only to producers who intend to repay their loans. The county ASC committee may authorize additional extensions of the deferred payment period beyond such initial 30 day period when deemed necessary.

Producers who elect the deferred repayment option will be required to sign an agreement with CCC wherein the producer is responsible for the storage on both current year and extended warehouse loans from the maturity date until the loan has been liquidated. All other terms and conditions of the program regulations and Warehouse Storage Note and Security Agreement shall continue to apply. Except that no interest will be charged for the deferment period for warehouse stored oat loans that are repaid by producers selecting the deferment option.

Effective date: August 13, 1973.

Signed at Washington, D.C. on August 13, 1973.

KENNETH E. FRICK,
Executive Vice President,
Commodity Credit Corporation.

Forest Service

1973 VEGETATION MANAGEMENT PROGRAM ON THE MT. HOOD, ROGUE RIVER & WILLAMETTE NAT'L FORESTS, OREGON

Notice of Availability of Final Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture has prepared a final environmental statement for the 1973 Vegetation Management Program on the Mt. Hood, Rogue River and Willamette National Forests, Oregon. USDA–FS–FES (Adm) 73–43.

The environmental statement concerns a proposed use of the herbicides 2, 4–D; 5–T; Amitrole, Dicamba, Silvex and Picloram on three National Forests located in the Cascade Mtns. of Oregon. These herbicides would be used for reforestation, site preparation, utility and road right-of-way maintenance, range revegetation and noxious weed control.

This final environmental statement was filed with CEQ on August 13, 1973.

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service
So. Agriculture Bldg., Room 3230
12th St. & Independence Ave., SW.
Washington, D.C. 20250

USDA, Forest Service
Pacific Northwest Region
319 SW Pine Street
Portland, Oregon 97204

Mt. Hood Nat'l Forest
340 NE 122nd Avenue
Portland, Oregon 97216
Willamette National Forest
210 E. 11th Avenue
Eugene, Oregon 97401
Rogue Rivers Nat'l Forest
Federal Building
Medford, Oregon 97501

A limited number of single copies are available upon request to Regional Forester T. A. Schlapfer, Pacific Northwest Region, P.O. Box 3623, Portland, Oregon 97208.

Copies are also available from the National Technical Information Service, U.S. Department of Commerce, Springfield, VA. 22151.

Please refer to the name and number of the environmental statement above when ordering.

Copies of the environmental statement have been sent to various Federal, state, and local agencies as outlined in the CEQ guidelines.

PHILIP L. THORNTON,
Deputy Chief, Forest Service.

AUGUST 15, 1973.

MULTIPLE USE PLAN—UPPER WEST FORK PLANNING UNIT

Notice of Availability of Draft Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a draft environmental statement for the Multiple Use Plan—Upper West Fork Planning Unit, Forest Service Report Number USDA–FS–DES (Adm) 73–95.

The environmental statement concerns the proposed implementation of a revised Multiple Use Plan for the Upper West Fork Planning Unit, West Fork Ranger District, Bitterroot National Forest, Ravalli County, Montana. About 157,000 acres of National Forest land are affected. The planning unit is divided into eight subunits (management units) of similar resource potential and limitations to management. Significant values, management direction, and specific statements to guide land management have been developed for each subunit.

The draft environmental statement was filed with C.E.Q. on August 13, 1973.

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service
South Agriculture Bldg., Room 3230
12th St. & Independence Ave., SW.
Washington, D.C. 20250

USDA, Forest Service
Northern Region
Federal Building, Room 3077
Missoula, Montana 59801

USDA, Forest Service
Bitterroot National Forest
316 North Third Street
Hamilton, Montana 59840

USDA, Forest Service
West Fork Ranger Station
Darby, Montana 59829

A limited number of single copies are available upon request to:

Orville L. Daniels, Forest Supervisor
Bitterroot National Forest
316 North Third Street
Hamilton, Montana 59840

Dean Byrne, District Ranger
West Fork Ranger District
Darby, Montana 59829

Copies are also available from the National Technical Information Service, U.S. Department of Commerce, Springfield, Virginia 22151. Please refer to the name and number of the environmental statement when ordering.

Copies of the environmental statement have been sent to various Federal, State, and local agencies as outlined in the Council on Environmental Quality guidelines.

Comments are invited from the public and from State and local agencies which are authorized to develop and enforce environmental standards, and from Federal agencies having jurisdiction by law or special expertise with respect to any environmental impact involved for which comments have not been specifically requested.

Comments concerning the proposed action and requests for additional information should be addressed to Forest Supervisor Orville L. Daniels, Bitterroot National Forest, 316 North Third Street, Hamilton, Montana 59840. Comments must be received by October 15, 1973 in order to be considered in the preparation of the final environmental statement.

PHILIP L. THORNTON,
Deputy Chief, Forest Service.

PROPOSAL FOR VEGETATION CONTROL WITH HERBICIDES IN THE STATE OF ARIZONA

Notice of Availability of Final Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a final environmental statement of a Proposal for Vegetation Control with Herbicides in the State of Arizona, Apache and Coconino National Forests, USDA–FS–FES (Adm) 73–61.

The purpose of the statement is for the control of invading snakeweed and iris. There should be no significant environmental impact, and careful site selection should minimize adverse environmental effects on water organisms and the air.

The final environmental statement was filed with CEQ on August 13, 1973.

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service
South Agriculture Bldg., Rm. 3230
14th St. & Independence Ave., SW.
Washington, D.C. 20250

USDA, Forest Service

Packers and Stockyards Administration

SAND MOUNTAIN LIVESTOCK MARKET KILPATRICK, ALABAMA, ET AL.

Proposed Posting of Stockyards

The Chief, Registrations, Bonds, and Reports Branch, Packers and Stockyards Administration, United States Department of Agriculture, has information that the livestock markets named below are stockyards as defined in section 302 of the Packers and Stockyards Act, 1921, as amended (7 U.S.C. 202), and should be made subject to the provisions of the Act.

AL–155	Sand Moutain Livestock Market Kilpatrick, Alabama
AZ–106	Snowflake Livestock Auction Snowflake, Arizona
NM–115	Socorro Livestock Commission Socorro, New Mexico
NC–145	Breeders Livestock Sales Asheboro, North Carolina
NC–146	R. H. Lanier Horse Auction Chinquapin, North Carolina
OK–191	Beeline Auction Yards, Inc. Glenpool, Oklahoma

Notice is hereby given, therefore, that the said Chief, pursuant to authority delegated under the Packers and Stockyards Act, 1921, as amended (7 U.S.C. 181 et seq.), proposes to issue a rule designating the stockyards named above as posted stockyards subject to the provisions of the Act as provided in section 302 thereof.

Any person who wishes to submit written data, views, or arguments concerning the proposed rule, may do so by filing them with the Chief, Registrations, Bonds, and Reports Branch, Packers and Stockyards Administration, United States Department of Agriculture, Wash-

V 38-160 AUG 20 73 XUM

ington, D.C. 20250, by September 4, 1973.

All written submissions made pursuant to this notice shall be made available for public inspection at such times and places in a manner convenient to the public business (7 U.S.C. 1.27(b)).

Done at Washington, D.C., this 13th day of August, 1973.

EDWARD L. THOMPSON,
Chief, Registrations, Bonds, and Reports Branch, Livestock Marketing Division.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of Education

NATIONAL ADVISORY COUNCIL ON INDIAN EDUCATION; NATIONAL COUNCIL SEARCH COMMITTEE

Notice of Public Meeting

Notice is hereby given, pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Public Law 92-463) that the National Council Search Committee will hold one meeting in August, 1973. The National Council Search Committee will meet at the Cosmopolitan Hotel, 18th & Broadway, Denver, Colorado, August 21, 22, and 23 from 8:00 a.m. to 5:00 p.m. daily local time. The purpose of the meeting will be to review and screen applications submitted for the position of Deputy Commissioner for Indian Education in the U.S. Office of Education.

Because of limited space for the meeting, all persons wishing to attend should request reservations from the National Advisory Council on Indian Education, 490 L' Enfant Plaza, East, SW, Washington, D.C. 20202, phone 554-2350.

Records shall be kept of all Council proceedings and shall be available for public inspection at the office of the National Advisory Council address above.

Signed at Washington, D.C. on August 10, 1973.

FRANK B. MCGETTRICK,
Acting Deputy Commissioner on Indian Education.

NATIONAL ADVISORY COUNCIL ON VOCATIONAL EDUCATION

Notice of Meeting

Notice is hereby given, pursuant to PL-92-463, that the next meeting of the National Advisory Council on Vocational Education will be held on September 6, 1973, from 8:00 p.m. to 10:00 p.m., local time, and on September 7, 1973, from 9:00 a.m. to 5:00 p.m., local time, at the L'enfant Plaza Hotel, Washington, D.C.

The National Advisory Council on Vocational Education is established under section 104 of the Vocational Education Amendments of 1968 (20 U.S.C. 1244). The Council is directed to advise the Commissioner of Education concerning the administration of, preparation of general regulations for, and operation of, vocational education programs supported with assistance under the act; review the administration and operation of vocational education programs under the act; including the effectiveness of such programs in meeting the purposes for which they are established and operated, make recommendations with respect thereto, and make annual reports of its findings and recommendations to the Secretary of HEW for transmittal to the Congress; and conduct independent evaluation of programs carried out under the act and publish and distribute the results thereof.

The meetings of the Council shall be open to the public. The proposed agenda includes:

Report from the White House by James Cavanaugh, Associate Director, Domestic Council

Discussion of Future legislation related to vocational education with Congressmen William Steiger (R, Wisconsin) and Orval Hansen (R, Idaho)

Report from the Office of Education Committee Reports

Records shall be kept of all Council proceedings and shall be available for public inspection at the Office of the Council's Executive Director, located in Suite 412, 425-13th Street, N.W., Washington, D.C. 20004

Signed at Washington, D.C., on August 7, 1973.

CALVIN DELLEFIELD,
Executive Director.

National Institutes of Health

ADVISORY COMMITTEES

Notice of Establishment and Renewals

Pursuant to the Federal Advisory Committee Act of October 6, 1972 (Public Law 92-463, 86 Stat. 770-776), the National Institutes of Health announces the following actions by the Secretary, DHEW:

1. The establishment on June 30, 1973, of the Maternal and Child Health Research Committee. The function of the committee is to advise the Director, National Institute of Child Health and Human Development on research in perinatal biology, infant mortality, growth and development. It also reviews applications for program project grants in the fields of perinatal biology, infant mortality, growth and development and forwards recommendations to the National Advisory Child Health and Human Development Council.

Authority for this committee will expire January 4, 1975, unless the Secretary, DHEW, formally determines that continuance is in the public interest.

2. Extending the life of the following advisory committees on June 30, 1973: Board of Scientific Counselors, National Eye Institute. The function of this committee is to advise the Director, NIH, the Institute Director, and the Director of Intramural Research, on the intramural research programs through periodic visits to the laboratories for assessment of the research in progress and evaluation of productivity and performance of staff scientists. Authority for this committee will expire June 30, 1975, unless the Secretary, DHEW, formally determines that continuance is in the public interest.

Board of Scientific Counselors, National Heart and Lung Institute. The function of the committee is to advise the Director, NIH, the Institute Director, and the Director of Intramural Research, on the intramural research programs through periodic visits to the laboratories for assessment of the research in progress and evaluation of productivity and performance of staff scientists.

Authority for this committee will expire June 30, 1975, unless the Secretary, DHEW, formally determines that continuance is in the public interest.

Board of Scientific Counselors, National Institute of Allergy and Infectious Diseases. The function of the committee is to advise the Director, NIH, the Director, NIAID, and the Scientific Director, NIAID, on the intramural research programs through periodic visits to the laboratories for assessment of the research in progress and evaluation of productivity and performance of staff scientists.

Authority for this committee will expire June 30, 1975, unless the Secretary, DHEW, formally determines that continuance is in the public interest.

Cardiovascular and Pulmonary Study Section, Division of Research Grants. The function of the committee is to advise the Director, NIH, regarding applications for grants-in-aid relating to the basic and clinical aspects of function in normal and disease states. The functional areas include all aspects of the Cardiovascular system and most aspects of the respiratory system. It will assume full responsibility for those proposals involving the respiratory system formerly shared with the Cardiovascular Pulmonary Research B Study Section. Surveys, as scientific leaders, the status of research in their field.

Authority for this committee will expire June 30, 1975, unless the Secretary, DHEW, formally determines that continuance is in the public interest.

Communicative Sciences Study Section, Division of Research Grants. The function of the committee is to advise the Director, NIH, regarding applications for grants-in-aid involving research in hearing, speech, language development, linguistics, tactile perception, gustation, olfaction, and all modes of sensory communication and perception, other than visual. Surveys as scientific leaders the status of research in their field.

Authority for this committee will expire June 30, 1975, unless the Secretary, DHEW, formally determines that continuance is in the public interest.

Experimental Psychology Study Section, Division of Research Grants. The function of the committee is to advise the Director, NIH, regarding applications for grants-in-aid relating to the study of behavior ranging from purely behavioral studies (response rate as a function of reinforcement schedule) to those in which neurophysiological substrates of behavior play an important role. Surveys as scientific leaders the status of research in their field.

Authority for this committee will expire June 30, 1975, unless the Secretary, DHEW, formally determines that continuance is in the public interest.

Immunobiology Study Section, Division of Research Grants. The function of the committee is to advise the Director, NIH, regarding applications for grants-in-aid relating to multidisciplinary problems of tissue and organ transplantation involving tissue-specific antagonisms, tolerance, and immunosuppression as well as studies directed toward tumor immunity, autoimmunity, allergy and all processes involving immediate and cell-mediated hypersensitivities. Surveys as scientific leaders, the status of research in their field.

Authority for this committee will expire June 30, 1975, unless the Secretary, DHEW, formally determines that continuance is in the public interest.

Neurology A Study Section, Division of Research Grants. The function of the committee is to advise the Director, NIH, regarding applications for grants-in-aid relating to the following multidisciplinary areas of neurological science: biomedical physics, clinical neurology, neuroanatomy, neurochemistry, neuroendocrinology, neuropathology, neurophysiology, neuroradiology, neurosurgery, and physiological psychology. Surveys as scientific leaders, the status of research in their field.

Authority for the committee will expire June 30, 1975, unless the Secretary, DHEW, formally determines that continuance is in the public interest.

Physiological Chemistry Study Section, Division of Research Grants. The function of the committee is to advise the Director, NIH, regarding applications for grants-in-aid relating to studies of the chemical reactions, in vivo and in vitro which take place in biological systems and which deal with biochemical mechanisms of function, assimilation, transport, metabolism, and excretion of exogenous and endogenous substances, in single and multiple cell systems. Surveys as scientific leaders, the status of research in their field.

Authority for this committee will expire June 30, 1975, unless the Secretary, DHEW, formally determines that continuance is in the public interest.

Radiation Study Section, Division of Research Grants. The function of the committee is to advise the Director, NIH, regarding applications for grants-in-aid relating to the diagnostic and therapeutic aspects of ionizing radiation applied clinically or to basic research problems. Surveys as scientific leaders, the status of research in their field.

Authority for this committee will expire June 30, 1975, unless the Secretary, DHEW, formally determines that continuance is in the public interest.

Sickle Cell Disease Advisory Committee, Office of the Secretary, DHEW. The function of the committee is to advise the Secretary, HEW, or his designee, on the sickle cell disease program and its implementation. Also makes recommendations concerning the planning, execution and evaluation of the program.

Authority for this committee will expire June 30, 1975, unless the Secretary, DHEW, formally determines that continuance is in the public interest.

Surgery A Study Section, Division of Research Grants. The function of the committee is to advise the Director, NIH, regarding applications for grant-in-aid relating to the investigation of the physiological biochemical, pathological, anatomical, immunological, bacteriological, pharmacological, and medical bases of surgical problems. Surveys as scientific leaders, the status of research in their field.

Authority for this committee will expire June 30, 1975, unless the Secretary, DHEW, formally determines that continuance is in the public interest.

Toxicology Study Section, Division of Research Grants. The function of the committee is to advise the Director, NIH, regarding applications for grants-in-aid relating to the toxicological effects and epidemiology of chemical substances alone or in food, water, or air, and toxicological problems of a forensic nature. Surveys as scientific leaders, the status of research in their field.

Authority for this committee will expire June 30, 1975, unless the Secretary, DHEW, formally determines that continuance is in the public interest.

JOHN F. SHERMAN,
Deputy Director, NIH.

AUGUST 10, 1973.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Secretary

[Docket No. D-73-249]

CERTAIN HUD EMPLOYEES IN REGION III (PHILADELPHIA)

Redelegation of Authority To Administer Oaths Under Title VIII (Fair Housing) of Civil Rights Act of 1968

Each of the following named employees in the Department of Housing and Urban Development, Region III (Philadelphia) is hereby authorized to administer oaths under section 811(a)

V 38-160 AUG 20 73 XUM

of the Civil Rights Act of 1968, Public Law 90-284, 42 U.S.C. 3611(a):

Theodore M. Daly Jr.	Robert W. Zowney
Leonard D. Schramm	Kathleen V. Manning
Robert H. Myers	Joseph P. Saunders
Walter L. Purnell	Margaret J. Boyle
Benton C. Epps	Maurice A. Coates
Carol A. Sprague	Eate L. Evans

Revocation of prior redelegation. The prior delegation of authority to administer oaths under Title VIII (Fair Housing) of Civil Rights Act of 1968, published in 35 FR 4417, March 12, 1970, is hereby revoked as of the date of publication in the FEDERAL REGISTER.

(Redelegation of authority by Regional Administrator, effective June 17, 1970, 35 FR 9943, June 17, 1970).

Effective Date: August 20, 1973.

WAGNER D. JACKSON,
Assistant Regional Administrator for Equal Opportunity, Region III.

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

UNIFORM TRAFFIC CONTROL DEVICES ON NATIONAL PARK SERVICE ROADS

Notice of Memorandum of Understanding

The Memorandum of Understanding between the National Park Service and the Federal Highway Administration set forth below is published as a matter of public record and shall be effective August 20, 1973.

In accordance with this Agreement, the appropriate symbol sizes and usage categories (sec. 4a) will be republished in the FEDERAL REGISTER by the National Park Service and are not included herein.

MEMORANDUM OF UNDERSTANDING BETWEEN THE NATIONAL PARK SERVICE AND THE FEDERAL HIGHWAY ADMINISTRATION

This Memorandum of Understanding between the National Park Service (hereinafter called NPS) and the Federal Highway Administration (hereinafter called FHWA) will serve to conform all discrepancies between the "Manual on Uniform Traffic Control Devices" (hereinafter called MUTCD) and the NPS Sign System Specifications (hereinafter called NPS SSS) until such time as the NPS SSS is revised to reflect necessary changes, and official rulings on requests for interpretation, changes, and experimentations have been published for the MUTCD.

Specific agreements between the NPS and the FHWA are:

1. We agree that brown as presently specified in the NPS SSS shall be the official background color and white the legend color for all NPS informational, directional, guide, and service signs except as noted below:

a. On State-owned and operated highways, such as Interstate 40 traversing Petrified Forest National Park, all signs, pavement markings, and other traffic control devices required for display of regulations, information, warning and guidance shall be in conformance with standards contained in the MUTCD. Where four-lane parkways, operated by the NPS, interchange with Interstate System highways, one advance guide sign and one exit direction sign in each direction, having a white legend on a green background and otherwise conforming to requirements of the MUTCD, Section 2-F, shall be displayed. Such signs are considered to be an integral part of signing for the Interstate System and, therefore, eligible for Federal-Aid Interstate (FAI) fund participation through the respective State Highway Department.

b. On highways owned, constructed and operated by the NPS, such as the East Side Highway in Grand Teton National Park and most other such roads, necessary informational, directional, guide and service signs shall meet the requirements of the NPS SSS.

c. All information and guide signs on the Baltimore-Washington Parkway and on the Suitland Parkway shall have a white legend on a green background in conformance with the MUTCD.

d. All new signs installed subsequent to December 31, 1973, shall be in accordance with this agreement. The conversion of all existing signs on NPS roads, in accordance with this agreement, shall be completed by December 31, 1978.

2. We agree that all warning and regulatory signs installed on all NPS roads open to public vehicular travel shall be as specified in the latest edition of the MUTCD.

3. We agree that NPS modified Clarendon shall be the official alphabet for all NPS informational, directional, guide and service sign legends.

4. We agree that NPS SSS symbols shall be used as below:

a. The symbol sizes and usage category prescribed for use on NPS roads shall be as shown on the attached chart, which will be integrated into Chapter 9 and Appendix B of the NPS SSS. These recreation symbols shall be used with care to avoid confusion with prescribed symbol use on warning and regulatory signs. The symbols and other legend shall be white on brown background and shall be used on all NPS informational, directional, guide and service signs as a legend component, or used singly or in groups of two or three on an individual post.

b. We agree that the FHWA will carefully study the entire group of recreation symbols for additions to, or corrections of, graphics of symbols presently used in the warning and regulatory series of the MUTCD.

c. We agree that elements of the NPS SSS in conflict with current standards, such as the Federal recreation symbols, will be considered, as appropriate, by the FHWA and their National Advisory Committee as a possible supplement to, or the basis for, an official ruling on the MUTCD for appropriate use by other recreational agencies on a National basis.

d. We agree that NPS should republish the symbols in the Federal Register, thereby making these legal for their use on NPS lands.

5. We agree that, when used, and on the recommendation of the NPS Regional Director, roadways will be marked, that markings shall comply with the MUTCD as stated in Mr. Lawrence C. Hadley's December 22, 1972, memorandum to all Field Directors. Under no circumstances shall there be more than two centerline stripes as provided in the latest edition of the MUTCD. Specific policies and regulations governing specific use of pavement markings, in conformance with the principles contained in the MUTCD, will be developed by the NPS. Conformance date shall be December 31, 1974.

6. We agree that, when used, traffic control signals shall conform with the MUTCD. Specific policies or regulations may be developed by the NPS covering traffic signal use. Traffic signals shall be used only on the recommendation of the NPS Regional Director and conformance, where used, shall be by December 31, 1976.

7. We agree that PART VI of the MUTCD, "Traffic Controls for Street and Highway Construction and Maintenance Operations," shall govern the design, application, installation, and maintenance of traffic control devices required for road construction and maintenance operations.

Dated: August 3, 1973.

Recommending:

JOINT CHAIRMEN, INTERAGENCY TASK FORCE,

J. E. N. JENSEN,
Assistant Director, Service Center Operations, National Park Service.

LESTER P. LAMM,
Executive Director, Federal Highway Administration.

RONALD H. WALKER,
Director, National Park Service.

NORBERT T. TIEMANN,
Administrator, Federal Highway Administration.

National Highway Traffic Safety Administration

NATIONAL HIGHWAY SAFETY ADVISORY COMMITTEE; EXECUTIVE SUBCOMMITTEE

Notice of Public Meeting

On September 7, 1973, the National Highway Safety Advisory Committee's Executive Subcommittee will hold an open meeting at the Department of Transportation headquarters building, 400 Seventh Street, SW., Washington, D.C.

The National Highway Safety Advisory Committee is composed of 35 members appointed by the President in accordance with the Highway Safety Act of 1966 (23 U.S.C. 401 et seq.). The Committee consists of representatives of State and local governments, State legislatures, public and private interests contributing to, affected by, or concerned with highway safety, other public and private agencies, organizations, and groups demonstrating an active interest in highway safety, and research scientists and other experts in highway safety.

The Advisory Committee advises, consults with, and makes recommendations to the Secretary of Transportation on matters relating to the activities of the Department in the field of highway safety. The Committee is specifically authorized (1) to review research projects or programs, and (2) to review, prior to issuance, standards proposed to be issued by the Secretary under the national highway safety program.

The Executive Subcommittee will meet from 9 a.m. to 12 noon in room 4238 with the following agenda, subject to approval by the Secretary:

Review of Department responses to Committee recommendations of May 1973

Discussion and formulation of plans for future Committee actions

Subcommittee on Research and Program Development

Subcommittee on Standards Implementation

Ad Hoc Task Force on Adjudication

Full Committee Meeting

New Business

This notice is given pursuant to section 10(a)(2) of Public Law 92-463, Federal Advisory Committee Act (FACA), effective January 5, 1973.

Further information may be obtained from the Executive Secretariat, National Highway Traffic Safety Administration, Department of Transportation, 400 Seventh Street, SW., Washington, D.C. 20590, telephone 202-426-2872.

Issued on: August 14, 1973.

CALVIN BURKHART,
Executive Secretary.

ATOMIC ENERGY COMMISSION

[Docket Nos. 50-329A, 50-330A]

CONSUMERS POWER CO.

Notice and Order for Prehearing Conference

AUGUST 14, 1973.

In the matter of Consumers Power Company (Midland Plant, Units 1 and 2)

TAKE NOTICE that a prehearing conference in the subject proceeding will be held on September 7, 1973, at 10 a.m., local time, in Hearing Room C (first floor), Interstate Commerce Commission, 12th and Constitution Avenue, NW, Washington, D.C. 20423.

The primary purpose of this prehearing conference is to determine the status of compliance by the intervenors and the non-party municipal utilities to the discovery requests of the Applicant. In addition, the Board will discuss other matters that will facilitate the evidentiary hearing.

Issued at Washington, D.C. this 14th day of August 1973.

It is so ordered.

ATOMIC SAFETY AND LICENSING BOARD,
J. V. LEEDS, Jr.

HUGH K. CLARK

JEROME GARFINKEL,
Chairman.

[Docket No. 50-442]

INSTITUTE FOR RESOURCE MANAGEMENT, INC.

Notice of Application for and Consideration of Insurance of Facility Export License

Please take notice that the Institute for Resource Management, Inc., Bethesda, Maryland, has submitted to the Atomic Energy Commission an application for a license to authorize the export of a research reactor with a power level of 10 watts to the University of the West Indies, Kingston, Jamaica, West Indies, and that the issuance of such license is under consideration by the Atomic Energy Commission.

No license authorizing the proposed reactor export will be issued until the Atomic Energy Commission determines that such export is within the scope of and consistent with the terms of an applicable agreement for cooperation arranged pursuant to section 123 of the Atomic Energy Act of 1954, as amended (Act), nor until the Atomic Energy Commission has found that:

(a) The application complies with the requirements of the Act, and the Atomic Energy Commission's regulations set forth in Title 10, Chapter 1, Code of Federal Regulations, and

(b) The reactor proposed to be exported is a utilization facility as defined in said Act and regulations.

In its review of applications solely to authorize the export of production or utilization facilities, the Atomic Energy Commission does not evaluate the health and safety characteristics of the facility to be exported.

Unless on or before September 4, 1973, a request for hearing is filed with the Atomic Energy Commission by the applicant, or a petition for leave to intervene is filed by any person whose interest may be affected by the proceeding, the Director of Regulation may, upon the determinations and findings noted above, cause to be issued to the Institute for Resource Management, Inc., a facility export license and may cause to be published in the FEDERAL REGISTER a notice of issuance of the license. If the request for a hearing or a petition for leave to intervene is filed within the time prescribed in the notice, the Atomic Energy Commission will issue a notice of hearing or an appropriate order.

A copy of the application is on file in the Atomic Energy Commission's Public Document Room located at 1717 H Street, NW, Washington, D.C.

Dated at Bethesda, Maryland this 13th day of August, 1973.

For the Atomic Energy Commission.

S. H. SMILEY,
Deputy Director for Fuels and Materials Directorate of Licensing.

[FR Doc.73-17201 Filed 8-17-73;8:45 am]

[Docket No. 50-332]

ALLIED-GULF NUCLEAR SERVICES, ET AL.

Order Extending Completion Date

Allied-Gulf Nuclear Services, Allied Chemical Nuclear Products, Inc., and Gulf Oil Corporation are holders of Construction Permit No. CPCSF-4 issued by the Commission on December 18, 1970, for the construction of the Barnwell Nuclear Fuel Plant, an irradiated fuel processing plant, presently under construction at the applicants' site in Barnwell County, South Carolina, about seven and one-half miles east of the Town of Barnwell, South Carolina.

On May 31, 1973, the applicants filed a request for an extension of the completion date because start of construction had been delayed one year and because construction also has been delayed due to several mutually dependent variables which include (i) too short a completion schedule considering the complexity of the project, (ii) lower than predicted labor productivity, and (iii) inclement weather. The Director of Regulation having determined that this action involves no significant hazards considerations, and good cause having been shown, the bases for which are set forth in a memorandum from D. A. Nussbaumer to S. H. Smiley dated July 31, 1973:

It Is Hereby Ordered That, The latest completion date for CPCSF-4 is extended from January 1, 1974 to December 31, 1976.

Date of Issuance: August 13, 1973.

ATOMIC ENERGY COMMISSION.

S. H. SMILEY,
Deputy Director for Fuels and Materials, Director of Licensing.

CIVIL AERONAUTICS BOARD

[Docket No. 23333; Order 73-8-61]

INTERNATIONAL AIR TRANSPORT ASSOCIATION

Order Regarding Cargo Matters

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 10th day of August 1973.

An agreement has been filed with the Board pursuant to section 412(a) of the Federal Aviation Act of 1958 (the Act) and Part 261 of the Board's Economic Regulations, embodied in the resolutions of the Traffic Conferences of the International Air Transport Association (IATA), and adopted at a local meeting held in St. Thomas, Virgin Islands on May 9, 1973 between American Airlines, Inc., Eastern Air Lines, Inc., and Pan American World Airways, Inc. The agreement, which relates to storage charges for valuable cargo (i.e. cargo whose value exceeds $8.16 per pound) and which applies only to the Virgin Islands, has been assigned the above C.A.B. agreement number.

The agreement would impose a daily storage charge limited to the Virgin Islands to be assessed three days after notification to the consignee or his agent, for valuable cargo[1] in the amount of $0.50 per $100.00 of value subject to a minimum charge of $5.00.

The currently effective agreement on file with the Board stipulates that the carriers will charge $0.50 per 100 pounds or fraction thereof per day subject to a minimum charge of $4.00 per shipment for storage in excess of three days. It is apparently contemplated that upon effectiveness of the new resolution the application of the current charges would be limited to situations where the declared value of the cargo was not in excess of $8.16 per pound, and that the proposed storage charges for valuable cargo would be in lieu of, but not in addition thereto; however, the carriers' filing is not clear in this regard. Tariffs are currently on file to implement the presently effective resolution with respect to international transportation of cargo. Under the present tariff conditions, for example, a shipment of 2,000 pounds would be assessed storage charges of $10.00 daily regardless of the declared value of the goods. Under the proposed agreement the $10.00 daily charge would continue to apply only if the declared value of the goods was $8.16 per pound or less. If, in fact, the declared value of the 2,000-pound shipment was $16,400 ($8.20 per pound) the total charge assessed would amount to $82.00 per day compared with the present $10.00 assessment.

We shall disapprove this agreement as no justification has been provided to support its approval. Our concern herein is similar to that expressed by the Board on a number of previous occasions regarding excess value charges imposed in international air transportation.[2] No showing has been made justifying the application of higher charges to the Virgin Islands for storage, or that the sum of $0.50 per $100 in declared value is reasonably related to the costs or risks incurred during this holding period under honest, economical and efficient management. Neither have the carriers shown why any charge should be assessed, based on the total value of the shipment, since a declared value of $8.16 coverage is automatically provided under the carriers' tariffs. Moreover, a serious question is further presented as to whether the imposition of this holding charge, based upon declarations of excess-valuation in excess of $8.16 per pound, does not result in a duplication of excess valuation charges, at least with respect to cargo subject to the provision of the Warsaw Convention (49 Stat. 3000). In this regard, Article 18(1) of the Convention imposes liability for loss or damage to goods if the occurrence took place during transportation by air, and under Article 18(2) transportation by air encompasses occurrences during the period which the goods are in charge of the carrier, whether in an airport or on board an aircraft. Accordingly, it would appear that the liability imposed upon the carrier under Warsaw, including liability in excess of 250 francs per kilogram ($8.16 per pound) pursuant to special declaration[3] continues during the time that the goods are in charge of the carrier, and that the shipper having paid an excess valuation charge in connection with the transportation would be subject to a double charge for excess valuation under the instant proposal.

We therefore find that the agreement herein presented for approval is adverse to the public interest and that it should be disapproved.

Accordingly, it is ordered, That:

Pursuant to the provisions of the Federal Aviation Act of 1958, and particularly sections 404, 412, and 414 thereof, Agreement C.A.B. 23775 is hereby disapproved.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board:

[SEAL] PHYLLIS T. KAYLOR,
Acting Secretary.

[FR Doc.73-17309 Filed 8-17-73;8:45 am]

[Docket 25334]

TRANS-PROVINCIAL AIRLINES, LTD. FOREIGN AIR CARRIER PERMIT APPLICATION PRINCE RUPERT, BRITISH COLUMBIA-KETCHIKAN, ALASKA, SERVICE

Notice of Postponement of Prehearing Conference and Hearing

Notice is hereby given that the prehearing conference and hearing in the above-entitled matter now assigned to be held on August 21, 1973, (38 FR 20361, July 31, 1973) is hereby postponed to September 6, 1973, at 10:00 a.m. (local time) in Room 726, Universal Building, 1825 Connecticut Avenue, NW., Washington, D.C. The postponement is at the request of the applicant which has represented by letter that it has recently retained new counsel and cannot have its evidence prepared in time to comply with the present procedural dates.

Notice is also given that the hearing may be held immediately following conclusion of the prehearing conference unless a person objects or shows reason for postponement on or before August 30, 1973.

Dated at Washington, D.C., August 14, 1973.

GENERAL SERVICES ADMINISTRATION

[Federal Property Management Regs. Temporary Reg. F-190]

SECRETARY OF DEFENSE

Delegation of Authority

1. *Purpose.* This regulation delegates authority to the Secretary of Defense to represent the consumer interests of the executive agencies of the Federal Government in a gas, electric, and steam rate increase proceeding.

2. *Effective date.* This regulation is effective immediately.

3. *Delegation.* a. Pursuant to the authority vested in me by the Federal Property and Administrative Services Act of 1949, 63 Stat. 377, as amended, particularly sections 201(a)(4) and 205(d) (40 U.S.C. 481(a)(4) and 486(d)), authority is delegated to the Secretary of Defense to represent the consumer interests of the executive agencies of the Federal Government before the California Public Utilities Commission in a proceeding involving the application of the San Diego Gas and Electric Company for an increase in its gas, electric, and steam rates.

b. The Secretary of Defense may redelegate this authority to any officer, official, or employee of the Department of Defense.

c. This authority shall be exercised in accordance with the policies, procedures, and controls prescribed by the General Services Administration, and, further, shall be exercised in cooperation with the responsible officers, officials, and employees thereof.

ARTHUR F. SAMPSON,
Administrator of General Services.

AUGUST 13, 1973.

[FR Doc.73-17304 Filed 8-17-73;8:45 am]

[1] Value exceeding $8.16 per pound as declared for carriage in the air waybill.

[2] See Order 72-6-137, dated June 29, 1972, where the Board has stated that the carriers have failed to submit justification for a new charge of 50 cents per $100 in excess of the basic liability allowance and while this represents a net improvement over the previous charge of 60 cents per $100 for the total valuation, approval is contingent upon the receipt of appropriate data and justification from U.S. carriers and a finding that the new level of valuation charges is consistent with corresponding expenses.

[3] Article 22(2) of the Convention limits the carriers' liability to 250 francs per kilogram unless the consignor has made, at the time when the package was handed over to the carrier, a special declaration of value at delivery and has paid a supplementary sum if the case so requires. In that case the carrier will be liable to pay a sum, not exceeding the declared sum unless he proves that that sum is greater than the actual value to the consignor at delivery.

CIVIL SERVICE COMMISSION

LICENSED PRACTICAL NURSE, BROCKTON, MASSACHUSETTS

Notice of Adjustment of Minimum Rates and Rate Ranges

Under authority of 5 U.S.C. 5303 and Executive Order 11721, the Civil Service Commission has increased special minimum salary rates and rate ranges as follows:

GS-621 LICENSED PRACTICAL NURSE

Geographic coverage: Boston, Massachusetts SMSA
Effective date: First day of the first pay period beginning on or after August 19, 1973

Grade	Per annum rates									
	1	2	3	4	5	6	7	8	9	10
GS-3	$6,944	$7,148	$7,352	$7,556	$7,760	$7,964	$8,168	$8,372	$8,576	$8,780
GS-4	7,569	7,798	8,027	8,256	8,485	8,714	8,943	9,172	9,401	9,630
GS-5	7,951	8,208	8,465	8,722	8,979	9,236	9,493	9,750	10,007	10,264

All new employees in the specified occupational levels will be hired at the minimum rates.

As of the effective date, all agencies will process a pay adjustment to increase the pay of employees on the roles in the affected occupational levels. An employee who immediately prior to the effective date was receiving basic compensation at one of the prior special or statutory rates shall receive basic compensation at the corresponding numbered rates authorized by this notice on or after such date. The pay adjustment will not be considered an equivalent increase within the meaning of 5 U.S.C. 5335.

Under the provisions of section 3-2b, Chapter 571, FPM, agencies may pay the travel and transportation expenses to first post of duty under 5 U.S.C. 5723, of new appointees to positions cited.

[SEAL] UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc.73-17199 Filed 8-17-73;8:45 am]

COMMISSION ON REVISION OF THE FEDERAL COURT APPELLATE SYSTEM

REALIGNMENT OF FEDERAL JUDICIAL CIRCUITS

Notice of Scheduled Hearings

AUGUST 13, 1973.

The Commission on Revision of the Federal Court Appellate System will hold an additional series of hearings in the following cities on the dates indicated:

Aug. 28 Seattle, Washington U.S. Courthouse
Aug. 29 Portland, Oregon Pioneer Courthouse
Aug. 30 San Francisco, Calif. U.S. Court of Appeals.
Aug. 31 Los Angeles, Calif. U.S. Courthouse
Sept. 5 Jacksonville, Florida

The Commission is charged with making recommendations concerning redistricting the judicial circuits. In addition, the Commission is to study the internal procedures and structure of the Federal courts of appeal system, making such recommendations as are appropriate. Because the Commission's first report has a congressionally-mandated deadline of mid-December, priority will be given to testimony relevant to redistricting.

The hearings are open to the public and interested persons are invited to attend. Those wishing to present oral testimony should contact A. Leo Levin, Executive Director of the Commission, at 209 Court of Claims Building, 717 Madison Pl., NW., Washington, D.C. 20005. Phone: (202) 382-2943. Written statements, in lieu of oral testimony, may also be filed with the Commission.

Additional hearings in other parts of the country are being planned. For further information, please contact the office of the Commission.

A. LEO LEVIN,
Executive Director.

[FR Doc.73-17237 Filed 8-17-73;8:45 am]

CONSUMER PRODUCT SAFETY COMMISSION

DEVELOPMENT OF PROPOSED CONSUMER PRODUCT SAFETY STANDARDS

Notice of Public Meeting

Section 7 of the Consumer Product Safety Act (Public Law 92-573, 86 Stat. 1212-15; 15 U.S.C. 2056) provides for the promulgation of consumer product safety standards by the Consumer Product Safety Commission. An initial step in such proceeding shall be publication of a notice which, among other things, will include an invitation for any person to offer to develop the proposed consumer product safety standard (section 7(b)(4)(B)). "Any person" includes government agencies, consumer organizations, members of industry, industry associations, research organizations, and standards-writing organizations.

Pursuant to section 7(d) of the act, the Commission may accept one or more offers to develop a proposed consumer product safety standard and may agree to contribute to an offeror's cost in developing a proposed standard under certain conditions.

Section 7(d)(3), however, requires the Commission to prescribe regulations governing the development of proposed consumer product safety standards by persons whose offers are accepted. Prior to proposing such regulations in the FEDERAL REGISTER, with the usual provision for submission of written comments, the Commission wishes to afford all interested parties an opportunity to discuss possible requirements of the regulations.

Accordingly, notice is given that a public meeting will be held at 10 a.m., Tuesday, August 28, 1973, in Room 6802, Department of Commerce, 14th and E Streets NW., Washington, D.C., regarding the contemplated regulations.

Interested persons wishing to participate should contact the Consumer Product Safety Commission, Attention: Mr. Don Early, Office of Standards Coordination and Appraisal, Technical Liaison Division, 5401 Westbard Avenue, Washington, D.C. 20207, Phone 301-496-7197.

A limited number of copies of a discussion paper in the form of a draft regulation can be made available to interested persons on request. Additional copies will be available at the meeting.

The Commission will welcome discussion on any issues pertinent to the regulations to be issued pursuant to section 7(d)(2) and (3) of the act. Some areas that are pertinent to the regulations are:

1. Requirements for acceptable offers.
2. Technical competence of offerors.
3. Requirements of physical and personnel resources of offerors.
4. The ability of offerors to adequately analyze and present statements on the economic and environmental impact of the proposed standard.
5. Methods of providing adequate notice and opportunity for interested persons to participate in the developmental process.
6. The means whereby offerors will acquire necessary technical expertise.
7. The ability of offerors to accurately predict the time frame for the developmental process.
8. The inclusion of test methods measuring compliance with the standard, testing programs, and sampling plans in the proposed standards.
9. The inclusion of statements of technological practicability of proposed standards.
10. The monitoring of the developmental process by Commission personnel.
11. Methods whereby offerors will reconcile differences among participants and submit the most effective, reasonable, and suitable standards possible.
12. Recordkeeping by offerors.

V 38-160 AUG 20 73 XUM

13. Periodic progress reports on the developmental process to be submitted to the Commission by the offeror.
14. Procedures for terminating an offeror's role in the developmental process where the offeror is not able to make satisfactory progress.
15. Financial contributions by the Commission to an offeror to aid in the developmental process.
16. Resources to be committed by the offeror.
17. Resources to be volunteered by other participants.
18. The desirability of simultaneous development by two or more offerors.

Dated August 15, 1973.

SAMUEL M. HART,
Acting Secretary, Consumer Product Safety Commission.

ENVIRONMENTAL PROTECTION AGENCY

4-AMINOPYRIDINE

Notice of Extension of Temporary Tolerance

Avitrol Corp., 7644 East 46th Street, Tulsa, OK 74145, was granted a temporary tolerance for residues of the bird repellent 4-aminopyridine in or on the raw agricultural commodity sunflower seed at 0.1 part per million (the treated sunflower seed is to be of the variety which is not used for human consumption) on August 14, 1972, in connection with Pesticide Petition No. 3G1297 (notice was published in the FEDERAL REGISTER of August 15, 1972 (37 FR 16518)).

The firm has requested a 1-year extension to obtain additional experimental data. It is concluded that such extension will protect the public health. A condition under which this temporary tolerance is extended is that the bird repellent will be used in accordance with the temporary permit which is being issued concurrently and which provides for distribution under the Avitrol Corp., name.

As extended, this temporary tolerance expires August 14, 1974.

This action is taken pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 408(j), 68 Stat. 516; 21 U.S.C. 346a(j)), the authority transferred to the Administrator of the Environmental Protection Agency (35 FR 15623), and the authority delegated by the Administrator to the Deputy Assistant Administrator for Pesticide Programs (36 FR 9038).

Dated: August 15, 1973.

EDWIN L. JOHNSON,
Deputy Assistant Administrator for Pesticide Programs.

[FR Doc.73–17412 Filed 8–17–73;8:45 am]

CARBOFURAN

Notice of Establishment of Temporary Tolerance

FMC Corp., 100 Niagara Street, Middleport, NY 14105, submitted a petition (PP 1F1150) requesting establishment of a tolerance for combined residues of the insecticide carbofuran (2,3-dihydro-2,2-dimethyl - 7 - benzofuranyl-*N*-methylcarbamate) and its metabolite 2,3-dihydro-2,2-dimethyl - 3 - hydroxy-7-benzofuranyl-*N*-methylcarbamate in or on the raw agricultural commodity potatoes at 0.1 part per million.

Subsequently, the petitioner amended the petition to propose a temporary tolerance for combined residues of carbofuran; its carbamate metabolite 3-hydroxy carbofuran (2,3-dihydro-2,2-dimethyl-3-hydroxy-7-benzofuranyl-*N* - methylcarbamate); and the phenolic metabolites 2,3-dihydro-2,2 - dimethyl-7-benzofuranol; 2,3-dihydro-2,2-dimethyl-3-oxo-7-benzofuranol; and 2,3-dihydro-2,2- dimethyl-3,7-benzofurandiol in or on potatoes at 1 part per million of which no more than 0.1 part per million consists of residues of carbofuran and 3-hydroxy carbofuran.

It has been determined that the temporary tolerance will protect the public health. It is therefore established as requested on condition that the insecticide be used in accordance with the temporary permit being issued concurrently and which provides for distribution under the FMC Corp., name.

This temporary tolerance expires August 15, 1974.

This action is taken pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 408(j), 68 Stat. 516; 21 U.S.C. 346a(j)), the authority transferred to the Administrator of the Environmental Protection Agency (35 FR 15623), and the authority delegated by the Administrator to the Deputy Assistant Administrator for Pesticide Programs (36 FR 9038).

Dated: August 15, 1973.

EDWIN L. JOHNSON,
Acting Deputy Assistant Administrator for Pesticide Programs.

E. I. DU PONT DE NEMOURS & CO.

Notice of Extension of Temporary Tolerances

In connection with Pesticide Petition No. 2G1241, E. I. du Pont de Nemours & Co., Inc., Wilmington, DE 19898, was granted temporary tolerances for residues of the insecticide methomyl (*S*-methyl *N*-[(methylcarbamoyl)oxy]thioacetimidate) in or on pineapple forage at 1 part per million and pineapples at 0.2 part per million on July 11, 1972 (notice was published in the FEDERAL REGISTER of July 18, 1972 (37 FR 14252)). These temporary tolerances expire July 11, 1973.

The firm has requested a 1-year extension of the temporary tolerances for residues of methomyl in or on pineapple forage at 1 part per million and pineapples at 0.2 part per million to obtain additional experimental data. It is concluded that this extension of the temporary tolerances for residues of the insecticide in or on pineapple forage and pineapples will protect the public health. They are therefore extended as requested on condition that the insecticide be used in accordance with the temporary permit being issued concurrently and which provides for distribution under the E. I. du Pont de Nemours & Co. name

These temporary tolerances as extended expire July 11, 1974.

This action is taken pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 408(j), 68 Stat. 516; 21 U.S.C. 346a(j)), the authority transferred to the Administrator of the Environmental Protection Agency (35 FR 15623), and the authority delegated by the Administrator to the Deputy Assistant Administrator for Pesticide Programs (36 FR 9038).

Dated: August 15, 1973.

EDWIN L. JOHNSON,
Acting Deputy Assistant Administrator for Pesticide Programs.

CIBA-GEIGY CORP.

Notice of Filing of Petition Regarding Pesticide Chemical

Pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 408(d)(1), 68 Stat. 512; 21 U.S.C. 346a(d)(1)), notice is given that a petition (PP 3F1415) has been filed by CIBA-GEIGY Corp., Ardsley, NY 10502, proposing establishment of a tolerance (40 CFR Part 180) for negligible residues of the insecticide O,O-diethyl O-(2-isopropyl-6-methyl-4-pyrimidinyl) phosphorothioate in or on the raw agricultural commodities guar forage and beans at 0.1 part per million.

The analytical method proposed in the petition for determining residues of the insecticide is a gas chromatographic procedure using a flame photometric detector with a phosphorus-specific filter.

Dated: August 2, 1973.

HENRY J. KORP,
Deputy Assistant Administrator for Pesticide Programs.

POLLUTANTS IN PUBLICLY OWNED TREATMENT WORKS

Pretreatment Guidelines

Pursuant to section 304(f) of the Federal Water Pollution Control Act Amendments of 1972 (Public Law 92–500), notice is hereby given that the Environmental Protection Agency (EPA) proposes to issue guidelines for pretreatment of wastewaters introduced into publicly owned treatment works. In accordance with section 304(f), these guidelines are designed to assist States in establishing, through the issuance of discharge permits, pretreatment requirements to control and prevent the discharge into the navigable waters, the contiguous zone, or the ocean of any pollutant which interferes with, passes through, or otherwise is incompatible with publicly owned treatment works.

The pretreatment guidelines do not establish regulatory requirements. Nationally applicable regulations dealing with pretreatment would be established by the pretreatment standards to be issued by EPA under section 307(b) of the Act. Proposed standards were published July 19, 1973 (38 FR 19236). In many cases, it will be necessary for States and municipalities to impose additional requirements to take account of local conditions. The guidelines contain technical information to assist the States and municipalities in determining the need for, and establishing, such requirements.

Copies of the proposed guidelines will be available for review upon written request to EPA Regional Offices, as indicated below:

Regional Administrator	*Area Served*
Regional Administrator U.S. Environmental Protection Agency John F. Kennedy Federal Building Boston, Massachusetts 02203	Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont
Regional Administrator U.S. Environmental Protection Agency 26 Federal Plaza New York, New York 10007	New York, New Jersey, Puerto Rico, Virgin Islands
Regional Administrator U.S. Environmental Protection Agency 6th and Walnut Streets Philadelphia, Pennsylvania 19108	Pennsylvania, Delaware, District of Columbia, Maryland, Virginia, West Virginia
Regional Administrator U.S. Environmental Protection Agency 1421 Peachtree Street, N.E. Atlanta, Georgia 30309	Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Tennessee
Regional Administrator U.S. Environmental Protection Agency 1 North Wacker Drive Chicago, Illinois 60606	Illinois, Indiana, Michigan, Minnesota, Ohio, Wisconsin
Regional Administrator U.S. Environmental Protection Agency 1600 Patterson Street Dallas, Texas 75201	Arkansas, Louisiana, New Mexico, Oklahoma, Texas
Regional Administrator U.S. Environmental Protection Agency 1735 Baltimore Avenue Kansas City, Missouri 64108	Iowa, Kansas, Missouri, Nebraska
Regional Administrator U.S. Environmental Protection Agency 1860 Lincoln Street Denver, Colorado 80203	Colorado, Montana, North Dakota, South Dakota, Utah, Wyoming
Regional Administrator U.S. Environmental Protection Agency 100 California Street San Francisco, California 94111	Arizona, California, Nevada, Guam, Hawaii
Regional Administrator U.S. Environmental Protection Agency 1200 Sixth Avenue Seattle, Washington 98101	Alaska, Idaho, Oregon, Washington

Interested parties are encouraged to obtain and review a copy of the proposed guidelines and submit written comments, views, or data concerning the proposed guidelines to the Director, Municipal Waste Water Systems Division, Environmental Protection Agency, Washington, D.C. 20460. All such submissions received on or before October 4, 1973, will be considered prior to publication of final guidelines.

Date: August 3, 1973.

ROBERT L. SANSOM,
Assistant Administrator for Air and Water Programs.

FEDERAL COMMUNICATIONS COMMISSION

[Report 661]

COMMON CARRIER SERVICES INFORMATION [1]

Domestic Public Radio Services Applications Accepted for Filing [2]

AUGUST 13, 1973.

Pursuant to §§ 1.227(b)(3) and 21.30 (b) of the Commission's rules, an application, in order to be considered with any domestic public radio services application appearing on the attached list, must be substantially complete and tendered for filing by whichever date is earlier: (a) The close of business one business day preceding the day on which the Commission takes action on the previously filed application; or (b) within 60 days after the date of the public notice listing the first prior filed application (with which subsequent applications are in conflict) as having been accepted for filing. An application which is subsequently amended by a major change will be considered to be a newly filed application. It is to be noted that the cut-off dates are set forth in the alternative—applications will be entitled to consideration with those listed in the appendix if filed by the end of the 60 day period, only if the Commission has not acted upon the application by that time pursuant to the first alternative earlier

[1] All applications listed in the appendix are subject to further consideration and review and may be returned and/or dismissed if not found to be in accordance with the Commission's rules, regulations and other requirements.

[2] The above alternative cut-off rules apply to those applications listed in the appendix as having been accepted in Domestic Public Land Mobile Radio, Rural Radio, Point-to-Point Microwave Radio and Local Television Transmission Services (Part 21 of the rules).

V 38-160 AUG 20 73 XUM

date. The mutual exclusivity rights of a new application are governed by the earliest action with respect to any one of the earlier filed conflicting applications.

The attention of any party in interest desiring to file pleadings pursuant to section 309 of the Communications Act of 1934, as amended, concerning any domestic public radio services application accepted for filing, is directed to § 21.27 of the Commission's rules for provisions governing the time for filing and other requirements relating to such pleadings.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] VINCENT J. MULLINS,
Acting Secretary.

APPENDIX

APPLICATIONS ACCEPTED FOR FILING:

DOMESTIC PUBLIC LAND MOBILE RADIO SERVICE:

10010–C2–TC–73 Trinity Valley Telephone Company (KLB788) Consent to Transfer of Control from Trinity Valley Telephone Company, Transferor to Great Southwest Telephone Corporation, Transferee. Station: KLB788, Winnie, Texas.

20131–C2–P–74 Airsignal International, Inc. (KAH661) C. P. to relocate facilities to a new Loc. #1 at IDS Building, Minneapolis, Minnesota, to operate on 35.22 MHz.

20132–C2–P–74 West Texas Rural Telephone Cooperative, Inc. (KSV906) C. P. for additional facilities to operate on 152.66 MHz to be located at 5.5 miles S.E. of Friona, Texas, Parmer, Texas.

20133–C2–P–(2)–74 West Texas Rural Telephone Cooperative, Inc. (NEW) C. P. for a new station to operate on 454.400 and 454.525 MHz to be located at 9½ miles north of Hereford, Texas on Highway 385, Deaf Smith, Texas.

20134–C2–ML–74 Mankato Citizens Telephone Company (KAF247) C. P. to relocate facilities to operate on 152.51 MHz to be located at North end of Collette Dr., North Mankato, Minnesota.

20135–C2–P–74 Southern Bell Telephone and Telegraph Company (KIG288) C. P. to add test facilities to operate on 459.475, 459.525, 459.575, 459.625, 459.650, 157.80, 157.95 and 158.07 MHz located at 115 N.E. 3rd Avenue, Ft. Lauderdale, Florida.

201–36–C2–P–74 Buckeye Communications Company (KUO558) C. P. for additional facilities to operate on 158.70 MHz located at 1 Levis Square, Ribre Glas Tower, Toledo, Ohio.

20137–C2–P–74 Radio Telephone of Mississippi, Inc. (NEW) C. P. for a new station to operate on 152.030 MHz to be located at 0.4 mile West of Batesville, Batesville, Mississippi.

20138–C2–P–74 Mobile Radio System of San Jose, Inc. (KMA741) C. P. for additional facilities to operate on 454.250 MHz to be located at a new site described as Loc. #3: Allison Peak, 5.5 miles NE of Milpitas, San Jose, California and for additional facilities to operate on 454.300 MHz to be located at a new site described as Loc. #4: Loma Prieta Mountain, San Jose, California.

20139–C2–P–74 Mobilfone Service, Inc. (KLB779) C. P. to change antenna system and replace transmitter to operate on 459.10 MHz, Repeater located at 5 miles SSW of Bartlesville, Oklahoma, and to change antenna system, antenna location and replace transmitter to operate on 454.10 MHz, Control located at 901 North Elgin Street, Tulsa, Oklahoma.

20140–C2–P–74 Hardin County Telephone Company (NEW) C. P. for a new station to operate on 152.54 MHz to be located at 2.13 miles at 265.2° from Heron, Herod, Illinois.

20141–C2–P–74 Mobile Communications Service, Inc. (NEW) C. P. for a new station to operate on 152.03 MHz to be located at 0.7 mile west of Route 18 on Coal Hill Road, Near Greenville, Pennsylvania.

20142–C2–P–74 John A. Bearden (NEW) C. P. for a new station to operate on 152.21 MHz to be located at 1.8 miles ENE of Nacogdoches, Texas.

20143–C2–P–74 Phenix Communications Company, Inc. (KRS661) C. P. to change antenna system and location to operate on 152.24 MHz to be located at 809 S. Seventh Street, Opelika, Alabama.

20144–C2–P–74 Beep Communication Systems, Inc. (KEC739) C. P. to replace transmitter to operate on 152.12 MHz located at Tower Hill Rd. West of Berkshire Road, Patchogue, New York.

20145–C2–P–74 New England Telephone and Telegraph Company (KCC487) C. P. to remove existing facilities at (10) locations described as: Loc. #1—185 Franklin Street, Boston, Mass., Loc. #2—954 Main Street, Winchester, Mass., Loc. #3—Bear Hill Road, Bear Hill, Waltham, Mass., Loc. #4—387 Washington Street, Dedham, Mass., Loc. #6—61 Exeter Street, Hotel Lenox, Boston, Mass., Loc. #7—35 Binney Street, Jimmy Fund Bldg., Boston, Mass., Loc. #10—67 Pleasant Street, Arlington, Mass., Loc. #12—66 Pickering Street, Needham, Mass., Loc. #13—On Main Avenue, Near SE Corner of Intersection of Main Ave., and Worcester Street, Natick, Mass., and Loc. #14—141 Union Avenue, Framingham, Mass.; for (3) new locations to be described as new locations: (#1) Prudential Tower Building, Boston, Mass., (#2) 140 Cabot Street, Needham, Mass., (#3) Murray Street, Medford, Mass.; and to change antenna system, change frequency, replace transmitter at: old Loc. #11—1070 Hancock Street, Quincy, Mass., to new Loc. #4—1070 Hancock Street, Quincy, Mass., old Loc. #5—115 Middle Street, Weymouth, Mass. to new Loc. #5—115 Middle Street, Weymouth, Mass., old Loc. #8—24 Norman Street, Salem, Mass. to new Loc. #6—24 Norman Street, Salem, Mass., and old Loc. #9—21 City Hall Square, Lynn, Mass. to new Loc. #7—21 City Hall Square, Lynn, Mass.

20146–C2–P–74 Tribune Publishing Company d/b as Radio Page of Tacoma (KOP299) C.P. to change antenna system and add stand-by facilities to operate on 152.06 MHz to be located at 1701 South 11 Street, Tacoma, Washington.

The following renewal applications were timely filed:

Renewal of Licenses expiring July 1, 1973.
TERM: July 1, 1973 to July 1, 1978.

License and Call Sign

Mid-South Telephone Company, Inc., KRM973.

[Docket No. 19684]

ITT WORLD COMMUNICATIONS INC.

Order Extending Time

In the matter of ITT World Communications Inc. petition under Section 201(a)

V38-160 AUG 20 73 XUM

of the Communications Act of 1934 for connection with RCA Global Communications, Inc. to enable ITT World Communications Inc. to provide telex and message telegraph services to Guam.

1. By letter dated August 6, 1973 ITT World Communications Inc. (ITTWC) requests an extension of time to September 15, 1973 within which written briefs may be filed with the Commission as required by the Memorandum Opinion and Order released in this proceeding on July 31, 1973 (FCC–811).

2. ITTWC represents that the requested extension is necessary because of the press of other regulatory matters including the hearing in this proceeding. ITTWC also represents that the attorneys for RCA Global Communications, Inc. and Western Union International, Inc. have authorized it to make the same request on their behalf.

3. We find that good cause has been shown for the requested extension of time.

4. Accordingly, It Is Ordered, Pursuant to section 0.303(c) of the Commission's rules pertaining to delegations of authority that the request of ITT World Communications Inc. Is Granted; And

(A) The time in which to file written briefs pursuant to the Commission's Memorandum Opinion and Order released July 31, 1973 is extended until September 15, 1973; and

(B) The time in which to file reply briefs is extended until five days thereafter.

Adopted: August 10, 1973.

FEDERAL COMMUNICATIONS COMMISSION.

FEDERAL POWER COMMISSION

[Docket No. CI74–80]

CITIES SERVICE OIL CO.

Notice of Application

AUGUST 10, 1973.

Take notice that on August 6, 1973, Cities Service Oil Co. (Applicant), P.O. Box 300, Tulsa, Oklahoma 74102 filed in Docket No. CI74–80 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce to Panhandle Eastern Pipe Line Co. from acreage in Cimarron County, Oklahoma, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that it commenced the sale of gas on July 20, 1973, within the contemplation of § 157.29 of the regulations under the Natural Gas Act (18 CFR 157.29) and proposes to continue said sale for twelve months from the date of initial delivery within the contemplation of § 2.70 of the Commission's general policy and interpretations (18 CFR 2.70). Applicant proposes to sell up to 5,000 Mcf of gas per day at 45.0 cents per Mcf at 14.65 psia, subject to upward and downward Btu adjustment. Deliveries are estimated to be 15,000 Mcf of gas per month.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 15 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said application should on or before August 24, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by section 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Docket No. CI74–86]

EXXON CORP.

Notice of Application

AUGUST 10, 1973.

Take notice that on August 6, 1973, Exxon Corp., P.O. Box 2180, Houston, Texas 77001, filed in Docket No. CI–74–86 an application pursuant to section 7 (c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce to Columbia Gas Transmission Corp. from the Pecan Island Field, Vermilion Parish, Louisiana, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to sell for two years up to a daily average of 60,000 Mcf of gas per day at 45.0 cents per Mcf at 15,025 psia, within the contemplation of § 2.70 of the Commission's general policy and interpretations (18 CFR 2.70). Deliveries are estimated to be 1,200,000 Mcf of gas per month.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 15 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said application should on or before August 24, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by section 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Docket No. CI74–78]

FREEPORT OIL CO.

Notice of Application

AUGUST 10, 1973.

Take notice that on August 6, 1973, Freeport Oil Co. (Applicant), 210 Chancellor Building, Midland, Texas 79701, filed in Docket No. CI74–78 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce to Mississippi River Transmission Corp. from the Mills Ranch Field, Wheeler County, Texas, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to sell for three years approximately 376,000 Mcf of gas per month at 55.0 cents per Mcf with a 1.0 cent annual escalation at 14.65 psia, subject to upward and downward Btu adjustment from 950 Btu per cubic foot, within the contemplation of § 2.70 of the Commission's general policy and interpretations (18 CFR 2.70).

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 15 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said application should on or before August 24, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or to be represented at the hearing.

[Docket No. CI74–79]

PETROLEUM CORP.

Notice of Application

AUGUST 13, 1973.

Take notice that on August 3, 1973, The Petroleum Corp. (Applicant), 3303 Lee Parkway, Dallas, Texas 75219, filed in Docket No. CI74–79 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce to Northern Natural Gas Co. from acreage in Schleicher County, Texas, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to sell for three years approximately 21,000 Mcf of gas per month at an initial rate of 45.0 cents per Mcf at 14.56 psia with 1.0-cent annual escalations, subject to upward and downward Btu adjustment, within the contemplation of § 2.70 of the Commission's general policy and interpretations (18 CFR 2.70).

It appeaars reasonable and consistent with the public interest in this case to prescribe a period shorter than 15 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said application should on or before August 24, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by section 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

NATIONAL POWER SURVEY TECHNICAL ADVISORY COMMITTEE ON RESEARCH AND DEVELOPMENT, TASK FORCE ON ENERGY SOURCES RESEARCH

Notice of Meeting and Agenda

Agenda for the third meeting of the Technical Advisory Committee on Research and Development Task Force on Energy Sources Research to be held at the Department of the Interior, 1800 C Street, NW. Washington, D.C., 9:30 a.m., August 24, 1973.

1. Meeting called to order by FPC Coordinating Representative.
2. Objectives and purposes of meeting.
a. Review and finalization of the preliminary report of the Task Force for the Technical Advisory Committee on R&D.
b. Suggestions on the oral presentation before the TAC on R&D.
c. Other Business.
d. Schedule of future meetings.
3. Adjournment

This meeting is open to the public. Any interested person may attend, appear before, or file statements with the committee—which statements, if in written form, may be filed before or after the meeting, or, if oral, at the time and in the manner permitted by the committee.

KENNETH F. PLUMB,
Secretary.

[Docket No. RP74–5]

TEXAS EASTERN TRANSMISSION CORP.

Notice of Proposed Changes in FPC Gas Tariff

AUGUST 13, 1973.

Take notice that Texas Eastern Transmission Corp., on July 31, 1973, tendered for filing proposed changes in its FPC Gas Tariff, Third Revised Volume No. 1 and Original Volume No. 2. The proposed changes would increase revenues from jurisdictional sales and service by $97,100,000 based on the 12 month period ending March 31, 1973, as adjusted.

Texas Eastern states that the principal reasons for the proposed rate increase are: (1) Increased cost of labor, supplies, expenses, plant facilities, and working capital requirements; (2) the need for an increased rate of return of 9.25 percent; (3) the need for an overall rate of depreciation of 5.5 percent; and (4) increased taxes, including income taxes associated with the increased return.

In addition, Texas Eastern states that it is filing revised tariff sheets containing certain revisions to its Purchased Gas Cost Adjustment Provision which were incorporated in Exhibit E to the Second Revised Stipulation and Agreement, dated July 25, 1973, in Docket No. RP72–98. The Company maintains that certain other tariff sheets in this filing are being revised as set forth in Article VII of the above-mentioned Second Revised Stipulation and Agreement. Also, in accordance with Order No. 483 issued April 30, 1973, by the Federal Power Commission in Docket No. R–462 Texas Eastern is filing new tariff sheets containing procedures to track research and development expenditures, according to the Company's statement.

Copies of the filing were served upon the company's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with § 1.8, 1.10 of the Commission's rules of practice and procedure

V 38-160 AUG 20 73 XUM

(18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 24, 1973. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

CONSOLIDATED GAS SUPPLY CORP.

Order Regarding Tendered Tariff Sheets

AUGUST 8, 1973.

On June 14, 1973, Consolidated Gas Supply Corporation (Consolidated) tendered for filing revised tariff sheets to its FPC Gas Tariff, First Revised Volume No. 1.[1] Consolidated requests that the tendered sheets be made effective 60 days from the date of filing. Additionally, in its tender, Consolidated requests permission to withdraw its prior filed tariff sheets relating to curtailment upon our accepting for filing its above-designated tariff sheets.

In support of its tender, Consolidated states that the revised sheets are filed pursuant to Commission order issued March 15, 1973, in Docket No. RP72-47. However, Consolidated notes that, while its tender provides for end-use curtailment, there are modifications to the curtailment procedures enunciated by us in our Statement of Policy issued in Docket No. R-469, Order No. 467-B. Accordingly, Consolidated's tender will be accepted for filing, but suspended.[2]

Consolidated also requests permission to withdraw Original Sheet Nos. 53-B, 53-C, and 53-D, which relate to its previously filed curtailment plan, upon our acceptance for filing of the tendered revised tariff sheets. The request to withdraw those tariff sheets should be granted, since retention of those sheets will conflict with Consolidated's proposed plan.

Consolidated's tendered First Revised Sheet No. 51-C[3] contains a fixed cost recovery adjustment therein, which violates § 154.38(d)(3) of our regulations under the Natural Gas Act. Accordingly, First Revised Sheet No. 51-C should be rejected without prejudice to resubmittal of that sheet without the fixed cost recovery provision therein.

The Commission finds. (1) Third Revised Sheet No. 51, First Revised Sheet Nos. 51-A and 51-B, and Original Sheet No. 51-D to Consolidated's FPC Gas Tariff, First Revised Volume No. 1 have not been shown to be just and reasonable and may be unjust, unreasonable, unduly discriminatory or preferential, or otherwise unlawful under the Natural Gas Act.

(2) Good cause exists to accept for filing the tendered tariff sheets referred to in finding paragraph (1) above, that those sheets be suspended and the use thereof deferred, and that a public hearing be initiated in accordance with the procedures set forth below, all as hereinafter ordered.

(3) Good cause exists to permit Consolidated to withdraw Original Sheet Nos. 53-B, 53-C, and 53-D to its FPC Gas Tariff, First Revised Volume No. 1.

(4) Good cause exists to reject the tendered First Revised Sheet No. 51-C to Consolidated's FPC Gas Tariff, First Revised Volume No. 1 as hereinafter ordered.

The Commission orders:

(1) Third Revised Sheet No. 51, First Revised Sheet Nos. 51-A and 51-B, and Original Sheet No. 51-D to Consolidated's FPC Gas Tariff, First Revised Volume No. 1 are hereby accepted for filing.

(2) Consolidated is hereby permitted to withdraw Original Sheet Nos. 53-B, 53-C, and 53-D to its FPC Gas Tariff, First Revised Volume No. 1.

(3) First Revised Sheet No. 51-C to Consolidated's FPC Gas Tariff, First Revised Volume No. 1 is hereby rejected without prejudice to its refiling by Consolidated without the fixed cost recovery provision therein.

(4) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by the Natural Gas Act, particularly sections 4, 5, and 16 thereof, and pursuant to the Commission's rules of practice and procedure and the regulations under the Natural Gas Act, a public hearing shall be convened at the offices of the Federal Power Commission, 825 North Capitol Street, NE, Washington, D.C. 20426 at 10 a.m. (e.d.t.) on November 6, 1973, concerning the lawfulness of the tendered tariff sheets designated in ordering paragraph (1) above.

(5) Pending such hearing and decision thereon, the tendered tariff sheets designated in ordering paragraph (A) above are hereby suspended and the use thereof deferred until August 15, 1973, and until such further time as they are made effective pursuant to the Natural Gas Act.

(6) Pursuant to the provisions of § 1.18 of our rules of practice and procedure, an informal prehearing conference shall be convened at the offices of the Federal Power Commission, 825 North Capitol Street, NE, Washington, D.C. 20426 at 10 a.m. (e.d.t.) on August 21, 1973, between all parties to this proceeding and Commission staff to discuss means to obtain data for evidentiary presentations and for expediting the decision in this proceeding.

(7) On or before September 18, 1973, Consolidated shall serve its case-in-chief on all parties to this proceeding, including Commission staff. Answering evidence shall be served by all parties on or before October 17, 1973.

(8) An Administrative Law Judge to be designated by the Chief Administrative Law Judge—see Delegation of Authority, 18 CFR 3.5(d)—shall preside at, and control this proceeding in accordance with the policies expressed in the Commission's rules of practice and procedure and the purposes expressed in this order.

(9) Notices of intervention and petitions to intervene in this proceeding may be filed with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426 on or before August 30, 1973, in accordance with the Commission's rules of practice and procedure (18 CFR 1.8 or 1.37).

By the Commission.

[SEAL] MARY B. KIDD,
Acting Secretary.

[Docket No. CP71-290]

CONSOLIDATED SYSTEM LNG CO.

Notice of Amendment to Application

AUGUST 13, 1973.

Take notice that on August 1, 1973, Consolidated System LNG Company (Applicant), 445 West Main Street, Clarksburg, West Virginia 26301, filed in Docket No. CP71-290 an amendment to its application filed in said docket pursuant to section 7(c) of the Natural Gas Act by requesting authorization to construct and operate a proposed pipeline from Loudoun County, Virginia, to the vicinity of the Leidy Storage Field in Clinton County, Pennsylvania, along a revised route, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

In Commission Opinion No. 622 (47 FPC ——) the Commission authorized Applicant to import into the United States the vaporous equivalent of approximately 350,000 Mcf of liquefied natural gas (LNG) and to construct and operate jointly with Columbia LNG Corporation an LNG terminal at Cove Point, Maryland, and a pipeline from Cove Point to Loudoun County, Virginia. In the same opinion, Applicant was authorized to construct 190.2 miles of 30-inch pipeline from Columbia LNG Corporation's Loudoun Compressor Station near Evergreen Mills in Loudoun County to Consolidated Gas Supply Corporation's Leidy Compressor Station in the vicinity of the Leidy Storage Field in Clinton County, Pennsylvania. In Opinion No. 622-A on October 5, 1972 (48 FPC ——), the Commission stated that the record in Docket No. CI71-290 was inadequate to make findings regarding the actual route of the line between Loudoun and Leidy and alternatives to this proposal and decided to reopen the record in this proceeding for purpose of studying alternatives to the pipeline.

Applicant now seeks authorization to construct the Loudoun-Leidy line along a modified route, which will result in a total of 191.1 miles of 30-inch line. The modified line will follow the route originally proposed to a point west of Purcellville, Virginia, then will head northward along a new route, and will rejoin the originally proposed route at U.S. Highway 30, west of Chambersburg, Pennsylvania. The modified route will cross the Potomac River and the Chesapeake and Ohio Canal between Brunswick and Knoxville, Frederick County, Maryland, in contrast to the originally proposed crossing downstream from Dam No. 4 into Washington County, Maryland. This new proposal also eliminates the necessity for crossing the Shenandoah River, which the original proposal contemplated.

Applicant estimates that the cost of the modified line and its proposed Doylesburg Compressor Station (to be located approximately two miles southwest of Doylesburg, Pennsylvania) at $61,851,175. Applicant states that the estimated costs of this line have increased from its original estimate of $50,371,800 primarily due to inflation. Applicant asserts that the increased construction costs will only add 0.11 cent per Mcf to the unit cost of the gas to be purchased by its affiliate, Consolidated Gas Supply Corporation.

Applicant avers that this proposed Loudoun-Leidy line is necessary to transport regasified LNG to the Leidy Storage Field for use in Consolidated Natural Gas System's market area.

Any person desiring to be heard or to make any protest with reference to said amendment should on or before September 4, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules. Persons who have heretofore filed petitions to intervene need not file again.

KENNETH F. PLUMB,
Secretary.

[Docket No. E-7769]

DELMARVA POWER & LIGHT CO.

Notice of Further Extension of Time

AUGUST 10, 1973.

On August 2, 1973, Delmarva Power & Light Company, *et al.* filed a motion for a further extension of the procedural dates as fixed by order issued March 2, 1973, in the above matter. The motion states that the proposed dates are acceptable to the Staff and various intervenors. A notice was issued on July 26, 1973, extending the time to and including August 20, 1973, within which intervenors should submit their evidence.

Upon consideration, notice is hereby given that the procedural dates are further modified as follows:

Service of rate design evidence by all parties	Deferred pending further order of the Commission
Service of Staff's Conjunctive Billing evidence	August 10, 1973
Service of Rebuttal evidence by El Paso and interveners	September 7, 1973
Hearing and Cross-examination	To commence immediately upon conclusion of the hearing in Docket Nos. G-10426, *et al.*, now scheduled for October 23, 1973
Service of rebuttal evidence by Delmarva	September 4, 1973
Prehearing Conference	September 7, 1973 (10 a.m., e.d.t.)
Hearing Date	September 25, 1973 (10 a.m., e.d.t.)

KENNETH F. PLUMB,
Secretary.

[FR Doc.73-17218 Filed 8-17-73;8:45 am]

EL PASO NATURAL GAS CO.

[Docket Nos. RP71-137 and RP72-151]

Notice of Further Extension and Postponement of Hearing

AUGUST 10, 1973.

On July 31, 1973, Staff Counsel filed a motion for an extension of the dates for the service of evidence and for continuance of the hearing with respect to rate design and conjunctive billing issues. The motion states that none of the active parties to these proceedings had any objection to the motion.

On August 3, 1973, El Paso Natural Gas Company also filed a motion for an extension of the hearing date respecting rate design and conjunctive billing issues. The motion states all parties, Staff Counsel and Judge Southworth have agreed that it would be appropriate to try this proceeding after completion of hearing in Docket Nos. G-10426, et al. On August 6, 1973, Administrative Law Judge Southworth issued a notice in Docket Nos. G-10426, et al. setting the hearing for October 23, 1973.

Upon consideration, notice is hereby given that the procedural dates in the above matter are further modified as follows:

Service of rate design evidence by all parties	Deferred pending further order of the Commission
Service of Staff's Conjunctive Billing evidence	August 10, 1973
Service of Rebuttal evidence by El Paso and interveners	September 7, 1973
Hearing and Cross-examination	To commence immediately upon conclusion of the hearing in Docket Nos. G-10426, *et al.*, now scheduled for October 23, 1973

KENNETH F. PLUMB,
Secretary.

[Docket No. CP74-28]

FLORIDA GAS TRANSMISSION CO. AND SOUTHERN NATURAL GAS CO.

Notice of Application

AUGUST 13, 1973.

Take notice that on August 2, 1973, Florida Gas Transmission Company (Florida), P.O. Box 44, Winter Park, Florida 32789, and Southern Natural Gas Company (Southern), P.O. Box 2563, Birmingham, Alabama 35202, filed in Docket No. CP74-28 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the exchange of natural gas between them and the construction and operation of facilities to faciliate the proposed exchange, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicants propose that, for 20 years, Southern deliver all the available gas from its producers in the Big Escambia Creek Field, Alabama, estimated initially to be 45,000 Mcf per day, to Florida at a proposed point of interconnection on Florida's mainline in Escambia County, Alabama, and that Florida simultane-

[1] The revised tariff sheets are designated as follows: Third Revised Sheet No. 51, First Revised Sheet Nos. 51-A, 51-B, and 51-C and Original Sheet No. 51-D.

[2] Our acceptance for filing does not include First Revised Sheet No. 51-C which will be dealt with later in this order.

[3] In that sheet, Consolidated alludes to Sheet No. 8-A. However, in reviewing our files, we note that there is no sheet designated as Sheet No. 8-A.

V 38-160 AUG 20 73 XUM

ously redeliver equivalent volumes of gas to Southern at the existing Franklinton delivery point in Washington Parish, Louisiana. Applicants state that Southern presently owns and operates a metering station at a point of intersection between the pipeline systems of Southern and Florida in Washington Parish and is presently authorized to sell and deliver to Florida up to 50,000 Mcf of gas per day at this point. Florida will redeliver, as part of the instant exchange, on a daily basis the amount of gas at the Franklinton delivery point which is equivalent to the amount which it will receive from Southern at the proposed point of intersection in Escambia County by reducing its takes from Southern at the Franklinton delivery point.

It is stated that although no payment is involved in the proposed exchange, Florida's redeliveries will be adjusted for Btu content and that any imbalances in monthly deliveries will be balanced during the following month insofar as practicable.

To facilitate the proposed exchange of gas, Southern proposes to construct and operate approximately 3 miles of 10-¾ inch pipeline connecting the Big Escambia Creek Field and Florida's system and to construct and operate a new delivery point with a receiving station and a measuring station. Florida proposes to construct and operate a line tap at the new Escambia delivery point.

The estimated cost of Southern's proposed facilities is $299,270 and the estimated cost of Florida's proposed facilities is $5,600, both of which will be financed from funds from current operations.

The purpose of the proposed exchange of gas and construction and operation of facilities is to assist Southern in alleviating and existing supply deficiency on its system and in meeting its customer's requirements. Reserves available to Southern from the Big Escambia Creek Field are estimated to be 229,097,000,000 Mcf.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 4, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Docket No. E-8121]

GULF STATES UTILITIES CO.

Order Denying Applications for Rehearing and Reserving Decision on an Issue Raised by a Rehearing Application

AUGUST 7, 1973.

By order of June 14, 1973, in this docket the Commission, inter alia, allowed rates proposed by Gulf States Utilities Company (Gulf States) to become effective subject to refund, after a one day suspension, on June 16, 1973, as those proposed rates affected Gulf States' contracts with the City of Caldwell, Texas (Caldwell) and the Sam Rayburn Dam Electric Cooperative and its Members (Sam Dam). The rate application as it would apply to the contract with Welsh, Louisiana, was accepted to be made effective, subject to refund, upon a contractually specified date (November 21, 1973) and proper notice of such being filed with this Commission, or upon such contract being terminated on this date and proper notice thereof being given to this Commission. As to the fixed-rate contracts with the Southwest Louisiana Electric Membership Corporation (Southwest) and the Houston County Electric Cooperative (Houston), the Commission instituted an investigation under section 206 of the Federal Power Act to determine if the rates contained in these contracts are in the public interest, and treated the proposed rates as they relate to amounts exceeding the contract demand amounts as initial rates, to become effective June 15, 1973, and set this matter for investigation under section 206.

On July 13, 1973, timely petitions for rehearing were filed by Southwest, Houston, Sam Dam, Caldwell and Welsh. We shall discuss the various allegations set forth in the petitions seriatim.

Southwest's petition requests that the Commission amend and modify its June 14 order to: 1) Suspend Gulf States' proposed rate increase in its entirety as it applies to Southwest under Gulf States' Rate Schedule FPC No. 72, 2) hold that the practices and deliveries by Gulf States to Southwest of all amounts of power under the rate schedule, whether or not in excess of a maximum contractual commitment, are at a fixed rate not subject to unilateral change by Gulf States, 3) revise the June 14 order so as not to treat as an initial filing deliveries to Southwest in excess of Gulf States' maximum contractual commitment to Southwest, and 4) suspend any increase which might be applicable to Southwest for the full five months statutory period.

In support of its petition, Southwest alleges that during the years 1962 through 1972 Gulf States was delivering to Southwest a total kilowatt demand considerably in excess of the maximum contractual commitment under Rate Schedule FPC No. 72. Southwest contends that such past practice requires that, as to these amounts, the proposed rates should not be treated as initial rates but rather as rate changes. Southwest complains that the "initial rate" treatment affords the company a "windfall" in that the rates so treated cannot be suspended but must await final determination under a section 206 proceeding before they can be altered prospectively. Southwest recites language from the Gulf States' rate increase application which allegedly shows that the Company itself views the proposed rates as a "change in rates" rather than an "initial rate", and further cites several Supreme Court cases, most notably Sunray Mid-Continent Oil Co. v. Federal Power Commission,[1] in support of its contention regarding the treatment of proposed rates as they apply to amounts of energy above contract demand. Finally, Southwest's petition states that on May 4, 1973, Gulf States filed in Docket No. E-8179 a letter agreement with Southwest, dated August 10, 1970, wherein Gulf States proposed a change in its Rate Schedule FPC No. 72 which would, among other things, extend the term of the contract and provide additional load growth at the rates and charges contained in the rate schedule. It is Southwest's view that this "superseding filing" must govern the relationship between it and Gulf States and requires denial in full of any increase in rates and charges as sought by Gulf States in this proceeding.

We do not agree with certain of the contentions presented in Southwest's petition. Whether or not Gulf States has in fact been supplying amounts of electric energy in excess of the maximum contract demand in the Company's FPC Rate Schedule No. 72 does not in any way alter the fact that only the Company's contract as filed with this Commission, along with any properly filed and accepted amendments, can be regarded as embodying the presently effective contractual rates, terms and conditions. Pennsylvania Water & Power Co. v. Federal Power Commission,[2] cited by Southwest, merely holds that the Commission has the power to order a long-existing operational practice (contractually specified, in this instance) to continue. We do not believe that decision supports the proposition that the Commission must

[1] 364 U.S. 137, (1960).
[2] 343 U.S. 414 (1952).

be bound by practices carried on by the parties outside the contractual terms as presently filed with the Commission, where such practices are entirely without Commission knowledge or approval. Since the Company's Rate Schedule FPC No. 72 is a presently effective fixed rate contract, any unilateral rate change proposal affecting this contract must be rejected as violative of the Mobile-Sierra cases.[3] However, where amounts of energy are proposed to be sold outside the contract demand parameters, the rates proposed for such sales may be viewed as an initial rate.

Whether the filing Company views its application as one for a change in rates or an initial rate is, of course, not binding on this Commission. We are, furthermore, not pursuaded that the Sunray case, cited by Southwest, is controlling in this instance. Sunray concerns the Commission's authority under section 7 of the Natural Gas Act to grant a certificate unlimited as to time despite the existence of a contractual provision providing for service for a twenty year period. Here, we are concerned with an existing effective fixed-rate contract and a rate proposal applicable to amounts of energy exceeding that specified in the contract. Our primary concern is therefore the possible application of the Mobile-Sierra rule vis a vis the amounts exceeding the maximum contract demand. This concern was not present in Sunray—as the Court itself stated, "Mobile is * * * simply beside the point."[4]

Finally, as to Southwest's argument concerning the filing of a letter agreement in Docket No. E-8179, we note that this letter agreement has no specifically proposed effective date and the filing is presently the subject of a deficiency notice issued June 1, 1973. Since the letter agreement has not yet been accepted for filing, we shall defer final decision as to Southwest's application until such time as the letter agreement is officially acted upon by the Commission.

The application for rehearing of Houston is directed solely to, and takes issue with, the "initial rate" treatment of Gulf States' proposed rates as to amounts above the contract demand level. As we previously stated, any unilateral change effecting such contracts must be rejected as violative of the Mobile-Sierra cases. However, where amounts of energy are proposed to be sold outside the contract demand parameters, the rates proposed for such sales may be viewed as an initial rate. We shall therefore deny Houston's application.

The application for rehearing of Sam Dam requests that this Commission abrogate or modify its June 14 order, without further hearing, and hold that Gulf States has no unilateral power to raise its rates for the sale of electricity, or, in the alternative, the application requests that the Commission grant a hearing on the matter. Sam Dam states that its application is based on the recent judicial reaffirmation of the Mobile-Sierra doctrine in Richmond Power & Light of the City of Richmond Indiana v. F.P.C.,[5] and on an alleged ambiguity in the Commission's order of June 14. Sam Dam reiterates the argument made in its petition to intervene of May 4, 1973, and which was discussed in our June 14 order, concerning the proper construction of its contract with Gulf States. Attached to the application are affidavits of certain participants in the negotiations which resulted in the contract under question. These affidavits are offered in support of Sam Dam's contention that its contract with Gulf States does not provide for unilateral rate changes pursuant to regulatory order but, rather, fixes a method of change of rates as was the case in the recent Richmond[6] decision. It is Sam Dam's contention that what appears to be a Memphis[7] clause in articles III and IV, section 4, §§ (c) of the contract,[8] is, in fact, merely "boilerplate" language regarding the implementation before the proper regulatory body of whatever agreement might be arrived at through the mechanism of §§ (b), wherein various procedures and time parameters for the renegotiation of rates are specified. Sam Dam contends that our reading of the contract provisions as setting out alternate procedures by which the contract rate may be adjusted by Gulf States (either by negotiations between the parties or through direct application to the proper regulatory body), raises an ambiguity in the meaning of the various provisions because such reading makes the negotiation provisions a nullity. This might be the case if application to a regulatory body did not often involve considerable time and litigation expense. It is apparent that voluntary agreement reached through negotiations might be preferable to litigation before the proper regulatory body. Although the draftsmanship evidenced by this contract leaves much to be desired, we are not convinced that Sam Dam's interpretation of these provisions is either a necessary or proper interpretation. Our experience in reading such contracts inclines us to the view we held in our June 14 order, that these provisions set out alternate procedures by which the contract rates may be adjusted. We shall therefore deny Sam Dam's application.

The Application of Caldwell and Welsh states that, since the Commission's order of June 14 directs Gulf States to file within 60 days of the issuance of the order a revised fuel clause consistent with Opinion No. 633, the fuel clause as filed has been rejected by the Commission and as such, cannot be a part of the rate schedule applicable to wholesale customers. Caldwell and Welsh further suggest that if Gulf States complies with this directive, the filing will be subject to the notice requirements of section 35.8 of the Commission's regulations. Our June 14 order did not deny Gulf States the use of a fuel clause but rather made acceptance of the filing subject to the filing of a clause consistent with Opinion No. 633. Upon proper filing of, and acceptance of, a conforming fuel clause, such clause would become effective as of the permitted effective date of the original filing. Full statutory notice has been given in the original filing.

The Commission finds.

(1) The applications for rehearing of Houston (Sam Dam, Caldwell and Welsh raised no new facts or points of law which were not considered in our order of June 14, 1973, or provide an appropriate basis for modification of that order,

(2) The application of Southwest should be granted pending further consideration and action upon Gulf States' letter agreement with Southwest filed May 4, 1973, in Docket No. E-8179.

The Commission orders.

(A) The applications for rehearing of Houston, Sam Dam, Caldwell and Welsh are denied.

(B) The application for rehearing of Southwest is granted pending further consideration and action upon Gulf States' letter agreement with Southwest filed May 4, 1973, in Docket No. E-8179.

(C) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

[SEAL] MARY B. KIDD,
Acting Secretary.

APPENDIX A

Rate Schedule No. FPC No. 98: *System and Relevant Provisions*—Sam Rayburn Dam Electric Cooperative, Inc.; Contract dated February 13, 1964.

ARTICLE III

"Section 4. *Compensation by the Sam Dam Coop to Gulf States.*

(a) Subject to the provisions of Subsection (b) below, the Sam Dam Coop shall compensate Gulf States monthly for power and energy delivered to Member Municipals pursuant to this Article III, at the schedule of rates set forth in the said Rate Schedule 'SR-1.'

(b) The schedule of rates paid by the Sam Dam Coop to Gulf States for power and energy delivered to Member Municipals under this Article III as set forth in Subsection (a), above, shall be reviewed and redetermined by the parties hereto at the time of any modification, amendment, or supersession, under Section 4, Article II, of the 'SPA-Sam Dam Coop Contract,'' of the then existing schedule of rates and compensation to be paid by the Sam Dam Coop in connection

with the purchase by the Sam Dam Coop from SPA of "Hydro Power and Energy" upon written request of:

(i) the Sam Dam Coop, if such modification, amendment or supersession puts into effect a decrease in the cost to the Sam Dam Coop for Hydro Power & Energy; and if, within five months after the receipt of such notice from SPA, the Sam Dam Coop and Gulf States are unable to agree upon a new schedule of compensation to be paid by the Sam Dam Coop to Gulf States for service rendered by Gulf States under this Article III, the Sam Dam Coop may, at its option terminate this contract in its entirety upon written notice to Gulf States at any time within one year after the end of such five-month period, such termination to be effective on the date specified by the Sam Dam Coop, but not later than thirty-six months from the date of such notice; or

(ii) Gulf States, if such modification, amendment, or supersession puts into effect an increase in the cost to the Sam Dam Coop for Hydro Power & Energy; and if, within five months after the receipt of such notice from SPA, the Sam Dam Coop and Gulf States are unable to agree upon a new schedule of compensation to be paid by the Sam Dam Coop to Gulf States for service rendered by Gulf States under this Article III, Gulf States, may, at its option, terminate this Contract in its entirety upon written notice to the Sam Dam Coop at any time within one year after the end of such five month period, such termination to be effective on the date specified by Gulf States, but not later than thirty-six months from the date of such notice.

During the period until the effective date of termination by Gulf States or the Sam Dam Coop pursuant to parts (1) and (ii), above, the amount of compensation owed by the Sam Dam Coop to Gulf States for service to Member Municipals shall be at the rates and subject to the terms and conditions of Rate Schedule 'SR–1'.

(c) If a rate increase or decrease should be made applicable to the service rendered by Gulf States to the Sam Dam Coop hereunder by final order or by acceptance for filing by Gulf States of any regulatory body having jurisdiction thereof, such increased or decreased rates shall be applicable to such service rendered hereunder from and after the effective date of such rate change."

ARTICLE IV

"Section 4. *Compensation by the Sam Dam Coop to Gulf States.*

(a) Subject to the provisions of Subsection (b), below, the Sam Dam Coop shall compensate Gulf States monthly for power and energy delivered to Member Cooperatives pursuant to this Article IV, at the schedule of rates set forth in the said Rate Schedule 'SR–2'.

(b) The schedule of rates paid by the Sam Dam Coop to Gulf States for power and energy delivered to Member Cooperatives under this Article IV as set forth in Subsection (a), above, shall be reviewed and redetermined by the parties hereto at any time after January 1, 1970, or from time to time thereafter, but not more often than once every five years, upon written request of Gulf States to the Sam Dam Coop. If within ninety days from the date of such request from Gulf States, the Sam Dam Coop and Gulf States are unable to agree upon a schedule of rates to be paid by the Sam Dam Coop for power and energy delivered to Member Cooperatives under this Article IV, Gulf States may by written notice to the Sam Dam Coop at any time within ten days after the end of such ninety-day period, at its sole option, terminate this Contract in its entirety, such termination to be effective on the first day of the month following thirty-six months from the date of receipt of such notice of termination by the Sam Dam Coop. During the period until the effective date of such termination by Gulf States, power and energy sold by Gulf States and purchased by the Sam Dam Coop under this Article IV shall be at the rates and subject to the terms and conditions of Rate Schedule 'SR–2'.

(c) If a rate decrease or increase should be made applicable to the service rendered by Gulf States to the Sam Dam Coop hereunder by final order or by acceptance for filing by Gulf States of any regulatory body having jurisdiction thereof, such increased or decreased rates shall be applicable to such service rendered hereunder from and after the effective date of such rate change."

[Docket No. ID–1460]

JOHN T. NEWTON

Notice of Application

AUGUST 13, 1973.

Take notice that on July 25, 1973, John T. Newton (Applicant), filed a supplemental application pursuant to section 305(b) of the Federal Power Act, seeking authority to become Vice President of Kentucky Utilities Company and Old Dominion Power Company.

Applicant presently serves as Secretary of Kentucky Utilities Company, which supplies electric service in 78 counties located in central, southeastern and western Kentucky and one adjoining county in northeastern Tennessee. Applicant also serves as Secretary of Old Dominion Power Company, a wholly owned subsidiary of Kentucky Utilities, which supplies electric service in five counties located in southwestern Virginia.

Any person desiring to be heard or to make any protest with reference to said application should on or before August 31, 1973, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to the proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules. The application is on file with the Commission and available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. RP73–97]

KENTUCKY WEST VIRGINIA GAS CO.

Notice of Extension of Time and Postponement of Hearing

AUGUST 10, 1973.

On August 3, 1973, Kentucky West Virginia Gas Company filed a motion for an extension of the date for rebuttal testimony and evidence and postponement of hearing as fixed by order issued May 31, 1973, in the above designated matter. The motion states that Staff and Columbia Gas Transmission Corporation are agreeable to these dates.

Upon consideration, notice is hereby given that the procedural dates are modified as follows:

Service of rebuttal September 4, 1973 testimony by Applicant.	
Hearing ----------	September 25, 1973 (10 a.m., e.d.t.)

KENNETH F. PLUMB,
Secretary.

[FR Doc.73–17222 Filed 8–17–73;8:45 am]

[Docket No. CP74–29]

MISSISSIPPI RIVER TRANSMISSION CORP.

Notice of Application

AUGUST 10, 1973.

Take notice that on August 3, 1973, Mississippi River Transmission Corporation (Applicant), 9900 Clayton Road, St. Louis, Missouri 63124, filed in Docket No. CP74–29 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of natural gas pipeline facilities and the sale for resale and delivery to and exchange of natural gas with Natural Gas Pipeline Company of America (Natural) in interstate commerce, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to construct and operate approximately 23,500 feet of 12-inch trunkline and appurtenant facilities extending from its gas producing wells in the Mills Ranch Field, Wheeler County, Texas, to a point of interconnection on Natural's 26-inch pipeline.

The total estimated cost of the proposed facilities is $513,500 which will be financed from internally generated funds and short-term borrowings.

Applicant further proposes to deliver up to 90,000 Mcf of gas per day for two years to Natural from the wells in the Mills Ranch Field through the proposed facilities and to sell for two years up to 1/3 of the delivered volumes of gas to Natural at 45.0 cents per Mcf at 14.65 psia the first year and 46.0 cents per Mcf at 14.65 psia the second year, subject to upward and downward Btu adjustment, within the contemplation of § 2.70 of the Commission's General Policy and Interpretations (18 CFR 2.70). Equivalent volumes of the 2/3 quantity of gas delivered but not sold to Natural will be redelivered to Applicant at an existing sales point in Clinton County, Illinois. It is stated that the redelivered gas volumes will be adjusted for Btu content and that any imbalances will be balanced after each twelve-month period. Deliveries of the sale gas are to be made primarily during the months of December through March and of the exchange gas during the months from April through November.

The stated purpose of these proposals is to make the gas from the Mills Ranch Field available to the interstate market without the construction of new extensive pipeline facilities and with a minimum delay and to provide Natural with short-term emergency gas to assure adequate service on its system. Applicant states that it intends to use the additional supply of gas for injection into its storage field in the summer for redelivery to its customers on colder spring and fall days when flow gas is sufficient to satisfy firm requirements.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 4, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Docket No. CP74–30]

NORTHERN NATURAL GAS CO.

Notice of Application

AUGUST 10, 1973.

Take notice that on August 3, 1973, Northern Natural Gas Company (Applicant), 2223 Dodge Street, Omaha, Nebraska 68102, filed in Docket No. CP74–30 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain pipeline facilities for an additional delivery point in Sarpy County, Nebraska, and to realign by community, certain firm gas entitlements for its Peoples Natural Gas Division (Peoples), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to construct and operate approximately 0.5 mile of 6-inch pipeline and a sales measuring station to provide an additional delivery point to Peoples for additional service to Millard, Nebraska, and its environs.

The total estimated cost of the proposed facilities is $144,500 which will be financed from funds on hand.

Applicant also proposes to realign by community certain of its firm gas entitlements so as to provide an additional 2,335 Mcf of gas per day to Peoples for delivery in and around Millard. The stated purpose of these proposals is to assure reliable and adequate service to Peoples' for high priority sales in Millard during the 1974–74 heating season through maximum utilization of available gas supplies. The realignments will not result in any increase or decrease in the presently authorized total firm services to Peoples.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 4, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Project No. 175]

PACIFIC GAS AND ELECTRIC CO.

Notice of Issuance of Annual License

AUGUST 13, 1973.

On June 29, 1970, Pacific Gas and Electric Company, Licensee for Balch Project No. 175 located in Fresno County, near the City of Fresno in Sequoia and Sierra National Forests filed an application for a new license under section 15 of the Federal Power Act and Commission regulations thereunder (sections 16.1–16.6).

The license for Project No. 175 was issued effective July 28, 1922, for a period ending July 27, 1972. In order to authorize the continued operation of the project pursuant to section 15 of the Act pending completion of Licensee's application and Commission action thereon it is appropriate and in the public interest to issue an annual license to Pacific Gas and Electric Company for continued op-

V 38-160 AUG 20 73 XUM

eration and maintenance of Project No. 175.

Take notice that an annual license is issued to Pacific Gas and Electric Company (Licensee) under section 15 of the Federal Power Act for the period July 28, 1973, to July 27, 1974, or until Federal takeover, or the issuance of a new license for the project, whichever comes first, for the continued operation and maintenance of the Balch Project No. 175 subject to the terms and conditions of its license.

KENNETH F. PLUMB,
Secretary.

[Docket No. CP74-31]

NORTHERN NATURAL GAS CO.

Notice of Application

AUGUST 13, 1973.

Take notice that on August 6, 1973, Northern Natural Gas Company (Applicant), 2223 Dodge Street, Omaha, Nebraska 68102, filed in Docket No. CP74-31 an application pursuant to section 7 (c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction, during the calandar year 1974, and operation of facilities to take into its certificated pipeline system additional natural gas supplies to be purchased from fields in the general area of its existing system, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that the purpose of this "budget-type" application is to augment Applicant's ability to act with reasonable dispatch in contracting for and connecting to its pipeline system supplies of natural gas in the various producing areas coextensive with said system.

The total cost of the facilities proposed herein shall not exceed $7,000,000, with no single project costing in excess of $1,000,000 which will be financed from cash on hand and from funds generated through operations.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 4, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENETH F. PLUMB,
Secretary.

[FR Doc.73-17226 Filed 8-17-73;8:45 am]

[Docket No. CP74-26]

TENNESSEE NATURAL GAS LINES, INC.

Notice of Application

AUGUST 10, 1973.

Take notice that on August 1, 1973, Tennessee Natural Gas Lines, Inc. (Applicant), 2008 Parkway Towers, Nashville, Tennessee 37219, filed in Docket No. CP74-26 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the acquisition and operation of a liquefied natural gas (LNG) plant with an above ground storage tank and a long term supplemental winter service to be rendered to its wholesale customer by means of the LNG plant, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to acquire from its affiliate and wholesale customer, Nashville Gas Company (Nashville), and operate an LNG plant located adjacent to its 12-inch transmission line in Davidson County, Tennessee. The LNG plant is designed to liquefy up to 5,000 Mcf of gas per day for storage in a cryogenic above-ground tank with a capacity of 290,000 barrels of LNG, equivalent to approximately 1 million Mcf of vaporous gas, and has a regasification capability of 100,000 Mcf per day.

The estimated cost of these facilities is $7,200,000 which will be initially financed by revolving credit arrangements.

Applicant also proposes to render supplemental winter service to Nashville from November 1 through May 1 according to its proposed SWS-1 Rate Schedule. Applicant proposes to sell up to 100,000 Mcf of gas per day and up to 1 million Mcf per season at a demand rate of $1.50 per Mcf of gas and an adjusted commodity rate of 28.91 cents per Mcf. Applicant states that it intends to provide the gas for such service by utilization of the LNG facility to liquefy and store summer valley gas for regasification during the winter season.

The purpose of these proposals is to augment Applicant's ability to meet Nashville's requirements for Nashville's residential and small commercial customers in the upcoming years.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 4, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.73-17229 Filed 8-17-73;8:45 am]

[Docket No. CI74-82]

TEXACO, INC.

Notice of Application Pursuant to Commission's General Policy and Interpretations

AUGUST 13, 1973.

Take notice that on August 6, 1973, Texaco Inc. (Applicant), P.O. Box 52332, Houston, Texas 77052, filed in Docket No. CI74-82 an application pursuant to section 7(c) of the Natural Gas Act and § 2.75 of the Commission's General Policy and Interpretations (18 CFR 2.75) for a certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce to Tennessee Gas Pipeline Company (Tennessee), a Division of Tenneco, Inc., from the Eugene Island Block 338 Field, offshore Louisiana, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes under the optional gas pricing procedure to sell approximately 258,000 Mcf of gas per month from Eugene Island Block 338 Field, to Tennessee at an initial rate of 47.0 cents per Mcf at 15.025 psia, subject to upward and downward Btu adjustment, pursuant to a contract dated July 5, 1973. Said contract provides for a 2.0-cent per Mcf price escalation every year, for tax reimbusement to the seller for all of any new or additional taxes and for a term of 20 years from the date deliveries commence.

Applicant states that the gas offered for certification pursuant to the contract with Tennessee has not been previously sold in interstate market nor have any applications been previously filed with the Commission for certification of the sales of such gas.

Applicant asserts that the instant sales at the proposed initial rate with escalations will make additional supplies of gas available to the interstate marker where there is currently a shortage and will assist Tennessee alleviate the deficiencies on its system. Applicant further asserts that the proposed rate with escalations is lower than rates for imported liquefied natural gas, synthetic gas from petroleum or coal, gas from Alaska and the price alternative fuels.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 4, 1973 file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or to be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.73-17231 Filed 8-17-73;8:45 am]

[Docket No. E-6407]

DEPARTMENT OF THE INTERIOR, SOUTHWESTERN POWER ADMINISTRATION

Notice of Request for Approval of Rates and Charges

AUGUST 13, 1973.

Notice is hereby given that the Secretary of the Interior (Secretary), acting on behalf of Southwestern Power Administration (SWPA) and pursuant to section 5 of the Flood Control Act of 1944 (58 Stat. 887, 890), filed with the Federal Power Commission on June 20, 1973, a request in Docket No. E-6407 for confirmation and approval of proposed increased rates and charges for the sale of electric power and energy to Arkansas Power & Light Company (Arkansas Power).

The Agreement dated January 29, 1952 among the United States of America, Arkansas Power, and Reynolds Metals Company (Reynolds), as supplemented and amended, known as the Aluminum Contract (Contract), provides for (1) SWPA to sell 150,000 KW and 30,000,000 KWH of firm hydroelectric power and energy per month to Arkansas Power and (2) Arkansas Power, in turn, to sell 110,000 KW of high-load factor electric power to Reynolds for its aluminum reduction plant at Arkadelphia, Arkansas. In addition, provision is made in the Contract for SWPA to sell up to 25,000,000 KWH of secondary energy per month to Arkansas Power at rates specified therein, including 1.75 mills per KWH for five-year period beginning January 1, 1969 and 2.00 mills per KWH for the ten-year period beginning January 1, 1974. All such contractual rates for secondary energy were approved by the Commission's orders issued April 23 and 28, 1952 in this docket (11 FPC 953, 959) and the above-mentioned request of the Secretary does not seek any further Commission action concerning those rates. The term of the Contract is 30 years, beginning January 1, 1954.

The Commission, by order issued December 30, 1968 in this docket (40 FPC 1519), approved for the five-year period ending December 31, 1973, which is the fourth five-year period of electric service under the Contract, the following "base rate" for SWPA's sales of firm electric energy to Arkansas Power: 7.05 mills per KWH for the first 22,000,000 KWH per month and 3.525 mills per KWH for the remaining 8,000,000 KWH per month, or an average rate of 6.11 mills per KWH. Such "base rate" was 117.5 percent of the initial "base rate" specified in the Contract for the first five-year period of electric service.

In his above-mentioned request, the Secretary states that, in accordance with the provisions of the Contract, he has reviewed SWPA's "base rate" to Arkansas Power for firm electric energy and has redetermined it to be 120 percent of the initial "base rate", the maximum rate increase allowed by the Contract for the 21st through the 25th year of electric service beginning January 1, 1974, which is the fifth five-year period under the Contract. The Secretary seeks Commission approval of such redetermined "base rate" for SWPA's sales of firm energy to Arkansas Power as follows: 7.2 mills per KWH for the first 22,000,000 KWH per month and 3.6 mills per KWH for the remaining 8,000,000 KWH per month, or an average rate of 6.24 mills per KWH, effective as of January 1, 1974. The Secretary represents that in conformity with the Contract's provisions, the "base rate" as so redetermined will not be higher than would be required to meet the standards of Section 5 of the Flood Control Act of 1944 if equally applied to all customers of SWPA that are similarly situated.

The proposed rates and charges, together with repayment studies in support thereof, are on file with the Commission and available for public inspection. Any person desiring to make comments or suggestions for the Commission's consideration with respect to said rates and charges should submit the same in writing on or before September 10, 1973, to the Federal Power Commission, Washington, D.C. 20426.

KENNETH F. PLUMB,
Secretary.

[FR Doc.73-17232 Filed 8-17-73;8:45 am]

[Project Nos. 2058, 2075]

WASHINGTON WATER POWER CO.

Notice of Application for Change in Land Rights

AUGUST 10, 1973.

Public notice is hereby given that application was filed December 14, 1972, under the Federal Power Act (16 U.S.C. 791a-825r) by The Washington Water Power Company (Correspondence to: Mr. Robert L. Strenge, Assistant Secretary, The Washington Water Power Company, P.O. Box 1445, Spokane, Washington 99210) for change in land rights for constructed Project No. 2058, known as the Cabinet Gorge Project, located on the Clark Fork River in Bonner County, Idaho and Sanders County, Montana and for constructed Project No. 2075, known as the Noxon Rapids Project, located on the Clark Fork River in Sanders County, Montana. Project No. 2058 is downstream of Project No. 2075. The location of the lands involved is Sanders County, Montana.

Applicant, The Washington Water Power Company, requests Commission approval to transfer title of 12 parcels of project land totaling 69.54 acres (0.10 acres of P-2058 land and 69.44 acres of P-2075 land) to Burlington Northern, Inc. The conveyance would be pursuant to an agreement with the railroad to secure ownership of lands needed for relocation of the previous right-of-way which was flooded by the construction of Noxon Reservoir. The land, which is totally within relocated railroad right-of-way, was recently ac-

V 38 160 AUG 20 73 XUM

quired from the U.S. Forest Service. The railroad right-of-way is adjacent to and follows the right bank of the project reservoirs until it crosses the Clark Fork River about 9 miles upstream of the Noxon Rapids Dam.

Relocation of the railroad was shown on Exhibit J Sheet 2 approved by the Commission in the order issuing license dated May 12, 1955, and on Revised Exhibit J Sheet 2 approved September 26, 1962.

Any person desiring to be heard or to make protest with reference to said application should, on or before September 25, 1973, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's rules and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to a proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petition to intervene in accordance with the Commission's rules. The application is on file with the Commission and available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.73-17233 Filed 8-17-73;8:45 am]

[Docket No. CP74-32]

NORTHERN NATURAL GAS CO.

Notice of Application

AUGUST 13, 1973.

Take notice that on August 6, 1973, Northern Natural Gas Company (Applicant), 2223 Dodge Street, Omaha, Nebraska 68102, filed in Docket No. CP74-32 a budget-type application pursuant to section 7(c) and 7(b) of the Natural Gas Act, as implemented by §§ 157.7(c) and 157.7(e) of the Commission's regulations thereunder, for a certificate of public convenience and necessity authorizing the construction, during the calendar year 1974, and operation of certain natural gas sales and transportation facilities, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

The stated purpose of this budget-type application is to augment Applicant's ability to supply the natural gas requirements of its distributors and small direct customers and to abandon certain natural gas service and facilities with the least possible delay.

The total cost of the facilities proposed herein is not to exceed $300,000 which Applicant plans to finance from cash on hand and funds generated from operations.

Applicant requests a waiver of § 157.7 (c)(1)(ii) of the regulations which prohibits the filing of a budget-type application when a distributor is required to make a contribution to Applicant for cost of construction of facilities. Applicant states that it has been its practice to require distributors to make a contribution to the cost of constructing measuring and regulating facilities and appurtenances where no additional contract demand is being purchased by such distributors and that such policy is contained in its FPC Gas Tariff, Third Revised Volume No. 1, on file with the Commission.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 4, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

FEDERAL RESERVE SYSTEM

AFFILIATED BANKSHARES OF COLORADO, INC.

Order Approving Merger of Bank Holding Companies

Affiliated Bankshares of Colorado, Inc. ("Affiliated"), Boulder, Colorado, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under section 3(a)(5) of the Act (12 U.S.C. 1842(a)(5)) to merge with First Colorado Bankshares, Inc. ("First Colorado"), Littleton, Colorado, under the certificate of incorporation and name of Affiliated Bankshares of Colorado.

Notice of receipt of the application, affording an opportunity for interested persons to submit comments and views, has been given in accordance with section 3(b) of the Act. The time for filing comments and views has expired. The Board has considered the application and all comments received in the light of the factors set forth in section 3(c) of the Act (12 U.S.C. 1842(c)) and finds that:

Affiliated, having 14 subsidiary banks with total deposits of $378 million, is the fourth largest banking organization in Colorado and controls 6.4 per cent of the total commercial bank deposits in the State. (Unless otherwise indicated, banking data are as of June 30, 1972, adjusted to reflect acquisitions approved by the Board through May 31, 1973.) First Colorado controls four banks (in and around the City of Denver) with total deposits of $234 million and ranks as the State's seventh largest banking organization controlling about 4 percent of the total deposits in the State. As a result of consummation of the proposal, Affiliated would control 10.3 per cent of the total deposits in commercial banks in Colorado and would become the State's third largest banking organization. The first, second, and third largest banking organizations in the State now control, respectively, about 16, 15, and 9 percent of the total commercial bank deposits.

Affiliated's present subsidiary banks are all located along the populous Eastern Slope of the Rocky Mountains, and operate variously in each of four major banking markets in the State. Affiliated is the only large banking organization in Colorado not now represented in the Denver area. In the Colorado Springs market, where there are 20 banks with $476 million in total deposits, Applicant is the largest banking organization with three subsidiary banks holding 31 per cent of the deposits. Applicant is also the largest banking organization in the Boulder market where Applicant's four subsidiary banks hold 35 per cent of the total of $280 million in deposits held by the 14 banks operating there. In the Greeley market, Applicant's four subsidiary banks hold 39 per cent of the total of $220 million in deposits held by the 16 banks there, making Applicant the largest banking organization in that market. Applicant is the third largest banking organization in the Fort Collins market with its three subsidiary banks holding about 21 per cent of the $219 million in deposits held by the 11 banks there.

In contrast to Affiliated, First Colorado operates solely in the Denver area, with its four subsidiary banks accounting for 6.4 per cent of the over $3 billion in deposits of the 64 commercial banks operating there. Except for one of Affiliated's subsidiaries in Boulder, which derives a little more than $1 million in deposits from the Denver area, there is no existing competition between the subsidiary banks of Affiliated and of First Colorado. The closest banking offices of any subsidiary of either are more than 25 miles apart. It appears, therefore, that no significant existing banking competition would be eliminated as a result of consummation of the proposal.

Affiliated has a mortgage banking subsidiary making 1-4 family mortgage loans and construction loans in the Denver market, as does First Colorado. However, the amount of competition between the two mortgage companies is not regarded as being substantial. The combined share of the two institutions in the 1-4 family mortgage market represents less than 5 per cent of such mortgages in the Denver market. Furthermore, there are some 20 mortgage companies, 17 savings and loan associations, and 63 commercial banks engaged in mortgage lending in the Denver market. In view of the small market share of the two institutions and the large number of competitors in the market, the Board does not consider the amount of existing competition that would be eliminated on 1-4 family residential mortgages to be significant. In addition, since combined they made less than $50 million in the construction loans during 1972 and since the market for construction loans is considered to be regional in scope, the amount of existing competition in this product area that would be eliminated as a result of the proposal is minimal.

In commenting on the subject proposal, the Department of Justice indicated that some existing banking competition and some competition in mortgage lending in the Denver area would be eliminated. It further expressed the view that consummation of the proposal would eliminate significant potential competition since Affiliated and First Colorado may be regarded as significant potential entrants into markets which they both do not presently serve. In particular, the Department indicated that First Colorado was a significant potential entrant into the Boulder, Colorado Springs, Greeley, and Fort Collins banking markets, and that consummation of the proposal would thus eliminate substantial potential competition between Affiliated and First Colorado in those markets. The Department noted also that the number of significant banking organizations in Colorado would be reduced from eight to seven as the result of the removal of First Colorado as an independent banking organization. As discussed more fully above, the Board does not consider the effects of the proposal on existing competition to be significant. Moreover, as discussed below, in the Board's judgment consummation of the proposal would not have adverse effects on potential competition.

First Colorado was originally formed in 1962 with three subsidiary banks. It established its fourth subsidiary bank de novo in 1963, and has not made any acquisitions since that time. Furthermore, taking into account the financial and managerial resources of First Colorado and its subsidiaries, which are discussed below, it is doubtful that it possesses the necessary financial resources or inclination to alter its present status as a Denver area holding company. In view of these considerations, it is unlikely that the Board would approve a plan by First Colorado to expand its operations, even if one were to be submitted, unless extensive measures were adopted to strengthen and improve the financial condition and management of First Colorado.

With respect to the prospect of Affiliated expanding into the Denver area, Affiliated does possess both the financial and managerial resources for such expansion, either de novo or through a foothold acquisition, and to that extent some potential competition between the bank holding companies in the Denver area would be eliminated as a result of this proposal. However, the Board does not regard this elimination of such potential competition to be significant, inasmuch as First Colorado does not appear to be an aggressive competitor in the Denver market, holding only 6.4 per cent of the total deposits in the Denver area.

As a result of the consummation of the proposal, competition in the Denver area should be enhanced since First Colorado's subsidiary banks in Denver, which are not presently significant competitors due to their size and their impaired financial condition, should become more effective competitors as a result of increased financial resources which would be available from Affiliated. This will create a stronger alternative to the four largest Denver banking organizations which control over 60 per cent of market deposits. The proposal should also promote overall banking competition in the State since entrance into Denver, the financial and commercial center of the State, through the subject acquisition should enhance Affiliated's competitive position and make it comparable in size to the State's two larger bank holding companies already headquartered in Denver.

On the basis of the foregoing and the facts of record, it appears that consummation of the proposal would not substantially lessen competition in any relevant area nor have a significantly adverse effect on existing competition, nor foreclose the development of significant competition in any relevant area. The Board concludes, therefore, that competitive considerations are consistent with approval of the application.

The financial conditions of Affiliated and each of its subsidiaries are regarded as generally satisfactory and the prospects of the group appear favorable. As noted previously in connection with the Board's assessment of the prospects of First Colorado expanding into other markets, the financial condition of First Colorado and its subsidiaries is not regarded as strong and is less than the Board regards as desirable for a bank holding company. At the present time three of First Colorado's subsidiary banks

V 38 160 AUG 20 73 XUM

are in need of additional capital to service present operations, as well as to support future expansion, which capital First Colorado is unable to provide without borrowing and increasing its already high level of debt. In addition, First Colorado lacks the managerial resources to adequately staff its present banking subsidiaries. Absent approval of the present proposal, the Board considers First Colorado's future prospects to be only fair. As a result of the consummation of this proposal, Affiliated will be able to provide management personnel for First Colorado's banking subsidiaries. Moreover, Affiliated plans to raise $6 million for recapitalization of the banks being acquired and for the future expansion of the banking premises of those banks. Implementation of these plans should strengthen and improve the financial condition of First Colorado's subsidiaries and enhance the prospects of the banks for the future. Therefore, the Board finds that considerations relating to financial and managerial resources lend some weight for approval of the application.

There is no evidence indicating that the major banking needs of the areas served by the subsidiary banks of Affiliated or of First Colorado are not being met by the existing institutions. However, as a result of this proposal, the present subsidiaries of First Colorado should become more effective competitors in the Denver market because of their improved financial conditions. Affiliated would also be in a position to develop an effective correspondent banking division in Security National Bank (First Colorado's subsidiary bank in downtown Denver), and thus provide an additional source for such services to Colorado banks. Furthermore, as a result of the acquisition of First Colorado, Affiliated should be able to broaden and generally improve its banking services throughout Colorado, as well as providing larger overall lending limits to meet the needs of larger borrowers. These considerations relating to convenience and needs are regarded as being consistent with, and lending some weight toward, approval of the application.

On the basis of the record,[1] the application is approved for the reasons summarized above. The transaction shall not be consummated (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Kansas City pursuant to delegated authority.

By order of the Board of Governors,[2] effective August 9, 1973.

[SEAL] CHESTER B. FELDBERG,
Secretary of the Board.

[FR Doc.73-17249 Filed 8-17-73;8:45 am]

CENTRAL BANCSHARES OF THE SOUTH, INC.

Order Permitting Revision in the Method of Acquisition of Shares of the Deposit National Bank of Mobile County, Prichard, Alabama

By Order dated April 19, 1973, the Board approved an application of Central Bancshares of the South, Inc., Birmingham, Alabama, a bank holding company within the meaning of the Bank Holding Company Act, to acquire not less than 80 per cent of the voting shares of The First National Bank of Auburn, Auburn, Ala.; and to acquire 100 per cent of the voting shares (less directors' qualifying shares) of the successor by merger to The Deposit National Bank of Mobile County, Prichard, Alabama ("Prichard Bank").

Applicant requested approval on July 13, 1973, of a change in the manner of acquiring Prichard Bank from the merger means of acquisition as stated in the application and the Board's Order to a direct exchange of not less than 80 per cent of the voting shares of Prichard Bank for Applicant's stock. Applicant stated that it had experienced delays in meeting its projected timetable for consummation, and the proposed direct method of acquiring this bank would result in a savings in both time and expense.

The Board has concluded that the request should be granted. The Board's Order of April 19, 1973, is hereby amended to permit Applicant to acquire not less than 80 per cent of the voting shares of Prichard Bank directly through an exchange of shares of Prichard Bank for shares of the stock of Applicant.

By order of the Board of Governors,[1] effective August 9, 1973.

CHESTER B. FELDBERG,
Secretary of the Board.

OFFICE OF MANAGEMENT AND BUDGET

COST OF HOSPITAL AND MEDICAL CARE AND TREATMENT FURNISHED BY THE UNITED STATES

Certain Rates Regarding Recovery From Tortiously Liable Third Persons

By virtue of the authority vested in the President by section 2(a) of the Act of September 25, 1962, (76 Stat. 593; 42 U.S.C. 2652), and delegated to the Director of the Office of Management and Budget by Executive Order No. 11541 of July 1, 1970, (35 FR 10737), the following three sets of rates are established for use in connection with the recovery, as authorized by such Act, from tortiously liable third persons of the cost of hospital and medical care and treatment furnished by the United States (Part 43 of Chapter I of Title 28 of the Code of Federal Regulations) through three separate Federal agencies. These rates have been determined to represent the reasonable value of hospital, nursing home, medical, surgical or dental care and treatment (including prostheses and medical appliances) furnished or to be furnished:

(a) For such care and treatment furnished by the United States in Federal hospitals and nursing homes, administered by any of the three Federal agencies—Department of Defense, Veterans Administration, or Department of Health, Education, and Welfare—with the exception of Canal Zone Government hospitals—

	Effective July 1, 1973 and thereafter		
	DOD	VA	HEW
Hospital care per inpatient day:			
Federal general, surgical, and tuberculosis hospitals	$126	$72	$93
Federal mental hospitals		47	
Veterans Administration nursing home units		31	
Outpaient medical and dental treatment: per facility visit	16	27	19

(b) For such care and treatment furnished at Government expense in a facility not operated by the United States, the rates shall be the amounts expended by the United States for such care and treatment;

(c) For such care and treatment at Canal Zone Government hospitals, the rates shall be those established, and in effect at the time the care and treatment is furnished, by the Canal Zone Government for such care and treatment furnished to beneficiaries of other United States Government agencies.

For the period beginning July 1, 1973, the rates prescribed herein supersede those established by the Director of the Office of Management and Budget on June 26, 1973 (38 FR 16806).

Dated: August 8, 1973.

ROY L. ASH,
Director,
Office of Management and Budget.

LEHMAN BROTHERS INC.

Filing of Application

Notice is hereby given that Lehman Brothers Inc. ("Applicant"), on behalf of itself, Bache & Co. Inc., duPont Walston Inc., Shearson, Hammill & Co. Inc., Crowell, Weedon & Co. and Sutro & Co. Inc., as prospective representatives ("Representatives") of a group of underwriters, and all other persons who will be underwriters, (collectively "Underwriters"), of a proposed offering of shares of Bunker Hill Income Securities, Inc. ("Corporation"), a new closed-end diversified management investment company recently registered under the Investment Company Act of 1940 ("Act"), has filed an application pursuant to section 6(c) of the Act for an order exempting the Underwriters in connection with their transactions incident to the distribution of shares of the Corporation, and such transactions, from section 30(f) of the Act to the extent that it adopt section 16(b) of the Securities Exchange Act of 1934 ("Exchange Act"). All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

V 38-160 AUG 20 73 XUM

Shares of the Corporation (the "Registered Shares") are to be purchased by the Underwriters pursuant to an Underwriting Agreement to be entered into between the Corporation and the Underwriters represented by Applicant and the other Representatives. It is intended that on the effective date of the Corporation's Regisration Statement under the Securities Act of 1933, the Registered Shares will be offered for sale to the public. Although it is initially proposed to offer 4,000,000 shares of Common Stock of the Corporation under the Registration Statement, the number actually to be offered may be greater or less than 4,000,000 depending upon market conditions and other factors.

It is possible that one or more of the Underwriters, including the Applicant and any of the other Representatives, may acquire, pursuant to the provisions of the Underwriting Agreement, more than 10 percent of the Registered Shares which will be outstanding at the time of the closing of the initial public offering of such shares. Since section 30(f) of the Act subjects every person who is directly or indirectly a beneficial owner of more than 10 percent of any class of outstanding securities of the Corporation to the same duties and liabilities as those imposed by section 16 of the Exchange Act on certain owners in respect of their transactions in certain securities, such Underwriter or Underwriters may, accordingly, become subject to the filing requirements of section 16(a) of the Exchange Act and, upon resale of the shares purchased by them to their customers, become subject to the obligations imposed by section 16(b) of the Exchange Act.

Rule 16b–2 under the Exchange Act exempts transactions in connection with a distribution of a substantial block of securities from the operation of Section 16(b) thereof. Applicant states that the purpose of the purchase by the Underwriters will be for resale in connection with the initial distribution of the Registered Shares. In addition to purchases of shares from the Corporation and sales of shares to customers, there may be the usual transactions of purchase or sale incident to a distribution such as purchases in stabilizing transactions, sales of shares so purchased and purchases to cover over-allotment or other short positions created in connection with the distribution. Such purchases and sales, therefore, will be transactions effected in connection with the distribution of a substantial block of securities within the purpose and spirit of Rule 16b–2.

It is possible, however, that one or more of the Underwriters will not be exempted from section 16(b) by the operation of Rule 16b–2, as they may fail to meet the requirement stated in paragraph (a)(3) of Rule 16b–2 that the aggregate participation of persons not within the purview of Section 16(b) of the Exchange Act be at least equal to the participation of persons receiving the exemption under Rule 16b–2. It is possible that one or more of the Underwriters who, pursuant to the Underwriting Agreement, will purchase more than 10% of the Registered Shares may purchase more than 50 percent of such shares being offered pursuant to the Underwriting Agreement. Moreover, this requirement of Rule 16b–2(a)(3) may not be met because it is possible that one or more of the Underwriters, even though they are obligated by the Underwriting Agreement to purchase less than 10 percent of the aggregate number of Registered Shares to be outstanding upon completion of the initial public offering of such shares, may, as a consequence of defaults by other Underwriters who do not purchase their respective underwriting commitments, become obligated to purchase at the closing of the public offering more than 10 percent of the aggregate number of Registered Shares to be outstanding after the closing.

Therefore, the Applicant submits, that the requested exemption from the provisions of section 30(f) of the Act is necessary The Applicant states that the requested exemption should be granted because there can be no inside information concerning the Corporation since the Corporation will have no assets and will not have commenced the conduct of any business prior to the distribution and sale of its shares. Applicant further states that no partner, director or officer or any of the Representatives, including the Applicant, is a director or officer of either the Corporation or Security Pacific National Bank, the Corporation's investment adviser ("Adviser"), or any affiliate of the Adviser and that it is not anticipated that any partner, director, or officer of any other Underwriter will be a director or officer of the Corporation or the Adviser or any such affiliate.

Section 6(c) of the Act provides that the Commission, by order upon application, may conditionally or unconditionally exempt any person, security or transaction, or any class or classes of persons, securities, or transactions from any provision of the Act and Rules promulgated thereunder if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Applicant contends that the requested exemption is necessary and appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested persons may, not later than September 7, 1973, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request and the issues of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon Applicant at the address stated above. Proof of such service (by affidavit or in case of an attorney-at-law by certificate) shall be filed contemporaneously with the request. At any time after said date, as provided by Rule 0–5 of the Rules and Regulations promulgated under the Act, an order disposing of the application herein may be issued by the Commission upon the basis of the information stated in said application, unless an order for a hearing upon said application shall be issued upon request or upon the Commission's own motion. Persons who request a hearing or advice as to whether a hearing is ordered will receive notice of further developments in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management Regulation, pursuant to delegated authority.

METROPOLITAN EDISON CO.

Notice Regarding Proposed Amendments of First Mortgage Indenture

In the Matter of Metropolitan Edison Company 2800 Pottsville Pike Muhlenberg Township Berks County, Pennsylvania 19605

Notice is hereby given that Metropolitan Edison Company ("Met Ed"), an electric utility subsidiary company of General Public Utilities Corporation, a registered holding company, has filed with this Commission post-effective amendments to the amended declaration, heretofore filed by Met Ed in this proceeding pursuant to sections 6(a), 7 and 12(e) of the Public Utility Holding Company Act of 1935 ("Act") and Rules 62 and 65 promulgated thereunder. Rule 24, promulgated under the Act has been designated as applicable to the post-effective amendments. All interested persons are referred to the declaration, as heretofore amended and as it now proposed to be further amended, summarized below, for a complete statement of the purposed transactions.

By order dated June 12, 1973 (Holding Company Act Release No. 18001), the Commission authorized Met Ed, subject to the affirmative vote of the holders of 75 percent in principal amount of First Mortgage Bonds, to amend its First Mortgage Indenture and Deed of Trust dated as of November 1, 1944 ("Indenture"), to effect two changes in that Indenture relating to the definition of bondable property and the conformance to all valid requirements of any governmental authority with respect to such property. The order also authorized Met Ed to solicit proxies from the bondholders in connection with the proposed amendments pursuant to Rule 62.

On July 23 and August 8, 1973, Met Ed filed post-effective amendments to the amended declaration requesting that the time within which it may seek the consent of its bondholders and enter into the supplemental indenture to give effect to the proposed Indenture changes be extended until February 1, 1974. Under Rule 24(c), unless otherwise indicated in a declaration, a transaction heretofore authorized by an order is to be consummated within 60 days after the effective date of such order. Met Ed does not now have the required consents for the amendments, and the extension of time herein sought is necessary in order for Met Ed to continue its solicitation for such consents. Under the same rule, the Commission has reserved jurisdiction to take further action with respect to unconsummated transactions, upon the request of a declarant, as the Commission shall determine to be appropriate.

It is further stated that on or about July 24 1973, a complaint was filed in the Federal District Court in Philadelphia, Pennsylvania (Civil Action No. 73–1684) by a Met Ed bondholder on behalf of himself and of all others similarly situated against Met Ed and Morgan Guaranty Trust Company of New York, the Indenture trustee. The complaint alleges as to matters therein specified that the Met Ed proxy statement, the subject of the instant declaration and amendments thereto, was false and misleading with respect to material facts and omitted to state material facts necessary in order to make the statements therein not false and misleading. Met Ed states that its expenses with respect to the tranaction will now be increased as a result of the aforesaid civil action, and it requests that the Commission reserve jurisdiction with respect to its expenses until such expenses can be finally determined.

Notice is further given that any interested person may, not later than September 7, 1973, request in writing that a hearing be held on the matters set forth in the declaration, as amended by the post-effective amendments, including the proxy solicitation material which has heretofore been used and which it is proposed to be used to secure the requisite consents to effect the amendments to the Indenture. Any such person shall state the nature of his interest, the reasons for his request, and the issues of fact or law raised by said declaration, as amended by the post-effective amendments, which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Met Ed has undertaken to serve a copy of this notice upon attorneys for plaintiff in the above-mentioned civil action. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon the declarant at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the declaration, as amended by the post-effective amendments, may be permitted to become effective as provided in Rule 23 of the General Rules and Regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive notice of further developments in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

SMALL BUSINESS ADMINISTRATION

STRUTHERS CAPITAL CORPORATION

Notice of Filing of Application for Transfer of Control of Licensed Small Business Investment Company

Notice is hereby given that an application has been filed with the Small Business Administration (SBA) pursuant to section 107.701 of the Regulations governing Small Business Investment Companies (13 CFR 107.701 (1973)) for the Transfer of Control of Struthers Capital Corporation, (the applicant), License No. 02/02–0270, 630 Fifth Avenue, New York, New York 10020, a Federal Licensee under the Small Business Investment Act of 1958, as amended (Act).

The Applicant was licensed on August 5, 1968, with paid-in capital and paid-in surplus of $2,405,760. As of May 31, 1973, its capital and surplus amounted to $2,405,760. It has 1,000 authorized and outstanding shares of common stock. Struthers Wells Corporation (Struthers) owns all of the outstanding stock of the Applicant. Developers Aid, Inc., is a wholly owned subsidiary of the Applicant.

Subsequent to the Change of Control, it is contemplated that the Applicant will transfer from surplus an amount approximating $350,000 to allowance for uncollectibles. The result of such transfer will be a reduction in the total paid-in capital and paid-in surplus of the Applicant to approximately $2,100,000.

FEDERAL REGISTER, VOL. 38, NO. 160—MONDAY, AUGUST 20, 1973

V 38-160 AUG 20 73 XUM

Pursuant to negotiations between Struthers and Prudential Funds, Inc. (Prudential), subject to necessary regulatory approvals, Prudential has agreed in principle to purchase from Struthers all of Struthers' stock in the Applicant. At the closing, Struthers will purchase from the Applicant, for book or carrying value, its investments in the Majestic Hotel property, Putnam Country Club, and the Pyramid Leasehold.

Prudential proposes to change the name of the Applicant to Pru-Fin Capital Corp. It intends to move the Applicant's office to One New York Plaza, New York, New York 10004. Prudential does not intend to change the plan of operations of the Applicant.

The names and addresses of the contemplated officers, directors and stockholder of the Applicant are as follows:

Victor Harz, One New York Plaza, New York, New York 10004, President and Director.
Anton J. Stasney, One New York Plaza, New York, New York 10004, Treasurer.
Arnold M. Sheidlower, One New York Plaza, New York, New York 10004, Secretary.
Frederick M. Glass, One New York Plaza, New York, New York 10004, Director.
Winston S. McAdoo, One New York Plaza, New York, New York 10004, Director.
Prudential Funds, Inc., One New York Plaza, New York, New York 10004, Owner of all the issued and outstanding stock of the Applicant.

Mr. Nathan M. Shippee, Chairman of the Board of Prudential, and members of his family own or control approximately 25.85 percent of the outstanding voting securities of Prudential.

Matters involved in SBA's consideration of the application include the general business reputation and character of the proposed purchaser and the probability of successful operation of the Applicant under its control and management in accordance with the Act and Regulations.

Notice is further given that any interested person may submit their comments on the proposed transfer of control to the Deputy Associate Administrator for Investment, Small Business Administration, 1441 "L" Street, NW., Washington, D.C. 20416, within 10 days.

A similar notice shall be published by the proposed purchaser in a newspaper of general circulation in New York, New York.

Dated: August 15, 1973.

JAMES THOMAS PHELAN,
Deputy Associate Administrator for Investment.

[FR Doc.73-17259 Filed 8-17-73;8:45 am]

VETERANS ADMINISTRATION

ADMINISTRATOR'S EDUCATION AND REHABILITATION ADVISORY COMMITTEE

Notice of Meeting

The Veterans Administration gives notice that a meeting of the Administrator's Education and Rehabilitation Advisory Committee, authorized by section 1792, title 38, United States Code, will be held at the Veterans Administration Central Office, 810 Vermont Avenue, NW., Washington, D.C., on August 30 and 31, 1973, at 9:30 a.m. The meeting will be for the purposes of reviewing the final report of the Independent Study (Public Law 92-540, section 413) submitted by the Educational Testing Service, Princeton, New Jersey, to prepare recommendations on the Study to the Administrator of Veterans Affairs, and to consider other related items.

The meeting will be open to the public up to the seating capacity of the conference room which is about 40 persons. Because of the limited seating capacity and the need for building security, it will be necessary for those wishing to attend to contact Dr. Andrew S. Adams, Deputy Director, Education and Rehabilitation Service, VA Central Office (phone 202-389-2152), prior to August 30.

Any interested person may attend, appear before, or file statements with the committee—which statements, if in written form, may be filed before or after the meeting, or, if oral, at the time and in the manner permitted by the committee.

Dated: August 14, 1973.

By direction of the Administrator.

[SEAL] RUFUS H. WILSON,
Associate Deputy Administrator.

INTERSTATE COMMERCE COMMISSION

FOURTH SECTION APPLICATION FOR RELIEF

AUGUST 15, 1973.

An application, as summarized below, have been filed requesting relief from the requirements of section 4 of the Interstate Commerce Act to permit common carriers named or described in the application to maintain higher rates and charges at intermediate points than those sought to be established at more distant points.

Protests to the granting of an application must be prepared in accordance with § 1100.40 of the General rules of practice (49 CFR 1100.40) and filed on or before September 4, 1973.

FSA No. 42733—*Liquefied Petroleum Gas from Huntley, Montana.* Filed by Trans-Continental Freight Bureau, Agent, (No. 483), for interested rail carriers. Rates on gas, liquefied petroleum, in tank-car loads, as described in the application, from Huntley, Montana, to points in western trunk-line and southwestern territories.

Grounds for relief—Market competition, modified short-line distance formula and grouping.

Tariff—Supplement 248 to Trans-Continental Freight Bureau, Agent, tariff 14-P, I.C.C. No. 1785. Rates are published to become effective on September 15, 1973.

By the Commission.

[SEAL] ROBERT L. OSWALD,
Secretary.

[No. 35868]

CHICAGO, ROCK ISLAND AND PACIFIC RAILROAD CO.

Order Regarding Arkansas Intrastate Freight Rates and Charges, 1973

ICC to investigate lawfulness of Arkansas intrastate rates and charges—notice to participate due on or before September 21, 1973.

At a session of the Interstate Commerce Commission, Division 2, held at its office in Washington, D.C., on the 2d day of August, 1973.

By joint petition filed July 17, 1973, the Chicago, Rock Island and Pacific Railroad Co., The Kansas City Southern Railway Co., Louisiana & Arkansas Railway Co., Missouri Pacific Railroad Co., St. Louis-San Francisco Railway Co., and St. Louis Southwestern Railway Co., common carriers by railroad, operating within the State of Arkansas, aver that the Arkansas Transportation Commission has refused to permit increases in intrastate rates and charges on freight traffic moving between points within that State corresponding to increases maintained by petitioners on like traffic moving in interstate commerce as authorized by this Commission in Ex Parte No. 281, Increased Freight Rates and Charges, 1972, 341 I.C.C. 288;

It appearing, that petitioners allege that increases were permitted on interstate rates and charges because of revenue needs, and result in rates and charges which are just and reasonable; that interstate and intrastate traffic transported by petitioners in the State of Arkansas is commingled and handled in the same trains; that revenue needs with respect to such intrastate commerce are as great as or greater than they are with respect to interstate commerce; that transportation conditions in Arkansas are no different than those with respect to interstate traffic; that the findings in the above-cited report that the advances in rates and charges were necessary on interstate commerce are equally applicable to the rates and charges on Arkansas intrastate traffic; that as a result of the denial of the increases on Arkansas intrastate traffic, the rates and charges on such traffic are and for the future will be unjustly and unreasonably low, do not produce a fair share of the revenues required by the petitioners to meet their maintenance and operating costs, nor yield a fair return on the value of the properties devoted to transportation, and do not contribute fairly and fully to the need in the public interest of adequate and efficient transportation service; and that the increases sought herein, when applied to intrastate rates and charges, will not divert traffic, but will result in intrastate rates and charges which are just and reasonable and which will produce substantial revenue;

It further appearing, that petitioners further allege that the disparity in the level of the rates and charges between interstate and intrastate commerce within the State of Arkansas caused by the failure of the intrastate rates and charges to bear the increases borne by the interstate rates and charges, results in undue, unreasonable, and unjust discrimination against, and an undue burden on, interstate or foreign commerce, and causes an undue and unreasonable advantage and preference in favor of persons and localities using the intrastate level of rates and charges within the State of Arkansas and against persons engaged in interstate or foreign commerce moving to, from, or through the State of Arkansas; and that, therefore, the petitoners request an investigation, under sections 13 and 15a of the Interstate Commerce Act, of the Arkansas intrastate rates and charges, and the issuance of an order requiring the removal of the unlawfulness;

And it further appearing, that there have been brought in issue by the said petition matters sufficient to require an investigation into the lawfulness of intrastate rate and charges made or imposed by the State of Arkansas;

Wherefore, and good cause appearing therefor:

It is ordered, That the petition be, and it is hereby, granted, and that an investigation be, and it is hereby, instituted under sections 13 and 15a of the Interstate Commerce Act to determine whether the said rates and charges of carriers by railroad, or any of them, operating in the State of Arkansas, for the intrastate transportation of freight traffic made or imposed by the State of Arkansas cause or will cause, by reason of the failure of such rates and charges to include increases corresponding to those permitted by this Commission for interstate transportation in Ex Parte No. 281, *Increased Freight Rates and Charges, 1972, supra,* any undue or unreasonable advantage, preference, or prejudice, as between persons or locations in intrastate commerce, on the one hand, and those in interstate or foreign commerce, on the other, or any undue, unreasonable, or unjust discrimination against, or undue burden on, interstate or foreign commerce; and to determine what rates and charges, if any, or what maximum, or minimum, or maximum or minimum rates and charges shall be prescribed to remove the unlawful advantage, preference, discrimination, or undue burden, if any, that may be found to exist.

It is further ordered, That all carriers by railroad operating within the State of Arkansas, subject to the jurisdiction of this Commission, be, and they are hereby, made respondents to this proceeding.

It is further ordered, That all persons who wish actively to participate in this proceeding and to file and receive copies of pleadings shall make known that fact by notifying the Office of Proceedings, Interstate Commerce Commission, in writing on or before September 21, 1973. Although individual participation is not precluded, to conserve time and to avoid unnecessary expense, persons having common interests should endeavor to consolidate their presentations to the greatest extent possible. The Commission desires participation only of those who intend to take an active part in the proceeding.

It is further ordered, That as soon as practicable after the date for indicating a desire to participate in the proceeding has passed, the Commission will serve a list of the names and addresses of all persons upon whom service of all pleadings must be made.

It is further ordered, That a copy of this order be served upon each of the said petitioners; and that the State of Arkansas be notified of the proceeding by sending copies of this order and of said petition by certified mail to the Governor of Arkansas, Little Rock, Ark., and to the Arkansas Transportation Commission at Little Rock; and that further notice of this proceeding be given to the public by depositing a copy of this order in the office of the Secretary of the Commission at Washington, D.C., and by filing a copy with the Director, Office of the Federal Register.

And it is further ordered, That this proceeding be assigned for hearing as may hereafter be designated.

This is not a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969.

By the Commission, Division 2.

[SEAL] ROBERT L. OSWALD,
Secretary.

[No. MC-119619 (Sub-No. 7)]

DISTRIBUTORS SERVICE CO. EXTENSION—FOODS AND FOOD PRODUCTS

Order Regarding Transport of Meat

AUGUST 15, 1973.

At a session of the Interstate Commerce Commission, Division 1, acting as an Appellate Division, held at its office in Washington, D.C., on the 13th day of August, 1973.

Upon consideration of the record in the above-entitled proceeding, and of:

(1) Petition of Curtis, Inc., protestant, filed July 6, 1973, for reconsideration or oral hearing, embracing request for review by the entire Commission;

(2) Petition of Coldway Food Express, Inc., protestant, filed July 9, 1973, for reconsideration or oral hearing;

(3) Reply by applicant filed July 19, 1973; and good cause appearing therefor:

It is ordered, That the petitions be, and they are hereby, denied, for the reason that the findings of Appellate Division 1, in its report and order on further proceedings of May 29, 1973, (reported at 118 M.C.C. 322), are in accordance with the evidence and the applicable law, and that no sufficient or proper cause appears for reopening the proceeding for reconsideration or oral hearing, or for granting any of the relief sought.

It is further ordered, That unless compliance is made by applicant with the requirements of sections 215, 217, and 221(c) of the Interstate Commerce Act, within 90 days after the date of service of this order, or within such additional time as may be authorized by the Commission, the grant of authority shall be considered as null and void, and the application shall stand denied in its entirely upon the expiration of the said compliance time.

By the Commission, Division 1, Acting as an Appellate Division.

[SEAL] ROBERT L. OSWALD,
Secretary.

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

AUGUST 14, 1973.

The following are notices of filing of application, except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application, for temporary authority under section 210a(a) of the Interstate Commerce Act provided for under the new rules of Ex Parte No. MC–67 (49 CFR 1131), published in the FEDERAL REGISTER, issue of April 27, 1965, effective July 1, 1965. These rules provide that protests to the granting of an application must be filed with the field official named in the FEDERAL REGISTER publication, within 15 calendar days after the date of notice of the filing of the application is published in the FEDERAL REGISTER. One copy of such protests must be served on the applicant, or its authorized representative, if any, and the protests must certify that such service has been made. The protests must be specific as to the service which such protest can and will offer, and must consist of a signed original and six (6) copies.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in field office to which protests are to be transmitted.

Would you like to know WHAT CHANGES HAVE BEEN MADE IN CERTAIN TITLES OF THE CODE OF FEDERAL REGULATIONS without reading the Federal Register every day? If so, you may wish to subscribe to the "List of CFR Sections Affected."

?

List of CFR Sections Affected — $5.00 per year

The "List of CFR Sections Affected" is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register, and is issued monthly in cumulative form. Entries indicate the nature of the changes.

Also available on a subscription basis . . .

The Federal Register Subject Index — $3.00 per year

Subject Indexes covering the contents of the daily Federal Register are issued monthly, quarterly, and annually. Entries are carried primarily under the names of the issuing agencies, with the most significant subjects additionally carried in appropriate alphabetical position.

A finding aid is included at the end of each publication which lists Federal Register page numbers with the date of publication in the Federal Register.

Order from: Superintendent of Documents
U.S. Government Printing Office
Washington, D.C. 20402

Note to FR Subscribers: FR Subject Indexes and the "List of CFR Sections Affected" will continue to be mailed free of charge to regular FR subscribers.

(Part II begins on page 22523)

HIGHLIGHTS OF THIS ISSUE

This listing does not affect the legal status of any document published in this issue. Detailed table of contents appears inside.

FEDERAL PAY—Advisory Committee asks for views on President's Pay Agent's report; comments by 9–4–73.... 22502

FOOD STAMPS—USDA allows purchase of imported foods and requires State implementation plans; effective 8–21–73 22465

FOOD STANDARDS/ADDITIVES—
FDA proposes optional use of colorants in french dressing; comments by 10–23–73..... 22490
FDA notices of petitions for additives to food–contact articles (2 documents)..... 22502

NEW DRUGS—
FDA approves ophthalmic solution for dogs; effective 8–21–73 22469
FDA notice of opportunity for hearing on proposal to withdraw approval of certain anti-infective drugs; hearing requests by 9–21–73..... 22499
FDA proposes to withdraw approval of methoxyphenamine tablets and syrup and application for combination steroid sympathoimetic nasal spray; hearing requests by 9–21–73 (2 documents)..... 22500, 22501

POLLUTION—
EPA interim nitrogen oxides emissions standard for 1976 light duty vehicles; effective 8–21–73..... 22474
EPA regulations for water user charge systems and industrial cost recovery; effective 8–21–73..... 22523

MOTOR VEHICLE SAFETY—
DOT proposes changed safety standards for retread tires; comments by 9–24–73..... 22493
DOT changes closing date for comments on bumper standards 22492

PESTICIDES—
EPA list of applications for use of DDT..... 22509
EPA sets tolerance for gibberellic acid; effective 8–21–73 22475

REVENUE SHARING—Treasury Department clarifies recipients' use of interest requirement..... 22498

LOANS—Farm Credit Administration removes certain approval requirements; effective 8–6–73..... 22467

REMINDERS

Rules Going Into Effect Today

This list includes only rules that were published in the FEDERAL REGISTER after October 1, 1972.

page no. and date

AEC—Codes and standards for Nuclear Power Plants 19907; 7–25–73
FCC—Deletion of requirements that Class II public coast stations in the Maritime Service apply for or provide very high frequency.. 19219; 7–19–73
—FM Broadcast stations in Woodstock and Rutland, Vermont 18896; 7–16–73

federal register
Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by the Executive Branch of the Federal Government. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $2.50 per month or $25 per year, payable in advance. The charge for individual copies is 20 cents for each issue, or 20 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

RADIATION EXPOSURE—AEC defines "calendar quarter" for licensee workers; effective 9–20–73 22467

COMMODITY EXCHANGES—USDA proposes reporting and publishing future trading data; comments by 10–8–73 22489

FIXED PUBLIC RADIOCOMMUNICATIONS SERVICES—FCC conforms its rules to international regulations; effective 9–19–73 22477

SHIPPING CONTRACTS—Maritime Commission proposals pertaining to international currency fluctuations; comments by 9–17–73 22495

USAF ACADEMY—DOD rules on entrance requirements.... 22471

HORSES FROM CANADA—USDA relieves certain inspection restrictions for re-entry of U.S. horses; effective 8–21–73 22466

ANTIDUMPING—Tariff Commission determines no injury from aluminum ingots from Canada 22509

AIR TAXI OPERATORS—CAB proposes to require additional reporting; comments by 10–5–73 22494

COTTON TEXTILES—CITA adjusts the import level for certain products from the Republic of Korea 22506

AIRCRAFT DIVERTED FROM INTERNATIONAL FLIGHT—Interior Department proposes to make entries of certain fuels subject to import license fees; comments by 9–20–73 22489

MEETINGS—
CLC: Health Industry Advisory Committee; meeting ... 22518
Interior Department: Monticello District Nine Advisory Board, 8–23–73 22498
Bighorn National Forest Multiple Use Advisory Committee, 9–22–73 22499
Fisheries and Wildlife Service meeting on use of iron shot for duct shooting, 8–28–73..... 22498
Commerce Department: Center for Building Technology Advisory Committee, 9–11–73..... 22499
DOT: Meeting on proposed bumper standard, 9–13–73; request for presentation by 9–6–73..... 22492
AEC: Advisory Committee on Reactor Safeguards, Working Group on Peaking Factors; 9–5–73..... 22502

Rules and Regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 5—Administrative Personnel

CHAPTER I—CIVIL SERVICE COMMISSION

PART 213—EXCEPTED SERVICE

Department of Justice

Section 213.3310 is amended to show that one position of Associate Attorney General is excepted under Schedule C.

Effective August 21, 1973, § 213.3310 (a) (8) is added as set out below.

§ 213.3310 Department of Justice.

(a) *Office of the Attorney General.*

• • • • •

(8) Associate Attorney General.

(5 U.S.C. 3301, 3302; E.O. 10547, 3 CFR 1954–58 Comp., p. 218)

UNITED STATES CIVIL SERVICE COMMISSION,
[SEAL] JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc.73-17772 Filed 8-20-73;8:45 am]

Title 7—Agriculture

SUBTITLE A—OFFICE OF THE SECRETARY OF AGRICULTURE

PART 15—NONDISCRIMINATION

Subpart B—Nondiscrimination—Direct USDA Programs and Activities

PROHIBITION OF SEX DISCRIMINATION

The statement of authority for Subpart B is corrected to delete reference to Sec. 602, 78 Stat. 252, 42 U.S.C. 2000d–1. Subpart B is amended to extend coverage to prohibit discrimination on the basis of sex and to substitute the term religion for the term creed.

As corrected, authority for this Subpart is as follows:

AUTHORITY: 5 U.S.C. 301.

Section 15.51 is revised to read as follows:

§ 15.51 Discrimination prohibited.

(a) No agency, officer, or employee of the United States Department of Agriculture, shall exclude from participation in, deny the benefits of, or subject to discrimination any person in the United States on the ground of race, color, religion, sex, or national origin under any program or activity adminstered by such agency, officer, or employee.

(b) No agency, officer, or employee of the Department shall on the ground of race, color, religion, sex, or national original deny to any person in the United States (1) equal access to buildings, facilities, structures, or lands under the control of any agency of this Department or (2) under any program or activity of the Department, equal opportunity for employment, for participation in meetings, demonstrations, training activities or programs, fairs, awards, field days, encampments, for receipt of information disseminated by publication, news, radio, and other media, for obtaining contracts, grants, loans, or other financial assistance or for selection to assist in the administration of programs or activities of this Department.

Dated August 16, 1973.

EARL L. BUTZ,
Secretary of Agriculture.

[FR Doc.73-17372 Filed 8-20-73;8:45 am]

CHAPTER II—FOOD AND NUTRITION SERVICE, DEPARTMENT OF AGRICULTURE

SUBCHAPTER C—FOOD STAMP PROGRAM

MISCELLANEOUS AMENDMENTS

Pursuant to the authority contained in the Food Stamp Act of 1964, as amended (78 Stat. 703, as amended; 7 U.S.C. 2011–2025), regulations governing the operation of the Food Stamp Program are hereby amended.

Public Law 93–86 approved August 10, 1973, includes a number of amendments to the Food Stamp Act. Among the changes in the Food Stamp Program are: 1) imported foods and garden seeds and plants used for the production of food for personal consumption may be purchased with food coupons; and, 2) States are required to submit a plan prior to January 1, 1974, to implement the Food Stamp Program in every political subdivision in the State no later than June 30, 1974, except where they can demonstrate that such implementation is impossible or impracticable.

It is the policy of this Department to give 30 days' notice for comments on amendments to the Regulations. However, Public Law 93–86 mandates the above mentioned provisions.

Further, immediate removal of the restriction on imported foods would allow food stamp participants the flexibility they need to get the most economical and nutritious foods available with their limited food purchasing power. Such immediate freedom is especially necessary because of the various pressures on, and demands for certain foods which affect food prices and availability. Finally, the changes in the eligible foods restrictions require action only by the Department of Agriculture and impose no demands on other cooperating agencies.

Any delay in the publication of the final regulation implementing the requirement that States submit prior to January 1, 1974, a plan for statewide implementation of the Food Stamp Program no later than June 30, 1974, except where impossible or impracticable, would be contrary to the interest of the States. They need time to develop their plans geared to the States' overall administrative organization and welfare programs, and to enable the States and the Department to comply with the law.

Parts 270, 271, and 272 of Chapter II, Title 7, Code of Federal Regulations, are amended as follows:

PART 270—GENERAL INFORMATION AND DEFINITIONS

Paragraph (s) of § 270.2 is revised to read as follows:

§ 270.2 Definitions.

• • • • • •

(s) "Eligible food" means any food or food product for human consumption except alcoholic beverages and tobacco and also includes seeds and plants for use in gardens to produce food for the personal consumption of the eligible household. It shall also mean meals delivered by an authorized nonprofit meal delivery service to elderly persons and their spouses and to households eligible under § 271.3(a) (2) of this subchapter.

• • • • • •

PART 271—PARTICIPATION OF STATE AGENCIES AND ELIGIBLE HOUSEHOLDS

Paragraph (i) of § 271.1 is revised to read as follows:

§ 271.1 General terms and conditions for state agencies.

• • • • • •

(i) *Plan of Operation requirement.* Each State agency shall submit for approval of FNS a Plan of Operation, prepared in accordance with the provisions of § 271.8. Such plan shall cover a Federal fiscal year and may be extended for succeeding Federal fiscal years at the option of FNS unless sooner terminated or suspended as provided in paragraph (t) of this section. Each State agency shall, prior to January 1, 1974, submit for approval of FNS a plan specifying the manner in which it intends to conduct the Food Stamp Program in every political subdivision in the State, unless such State agency can demonstrate that for any political subdivision it is impossible or impracticable to extend the program to such subdivision. FNS shall make a determination of approval or disapproval

V 38-161 AUG 21 73 XUM

of such plan in sufficient time to permit institution of such plan by no later than June 30, 1974.

• • • • •

PART 272—PARTICIPATION OF RETAIL FOOD STORES, WHOLESALE FOOD CONCERNS, NONPROFIT MEAL DELIVERY SERVICES, AND BANKS

Paragraph (b) of § 272.2 is revised to read as follows:

§ 272.2 Participation of retail food stores, and nonprofit meal delivery services.

• • • • •

(b) Coupons shall be accepted by an authorized retail food store only in exchange for eligible food as defined in § 270.2(s) of this subchapter. An authorized food retailer shall not accept coupons in payment for deposit on bottles or other returnable food containers.

• • • • •

(78 Stat. 703, as amended; 7 U.S.C. 2011–2025)

Effective date.—This amendment shall become effective August 21, 1973.

(Catalog of Federal Domestic Assistance Programs No. 10.551, National Archives Reference Services)

JAMES H. LAKE,
Acting Assistant Secretary.

AUGUST 17, 1973.

[FR Doc.73–17759 Filed 8–20–73;8:45 am]

CHAPTER III—ANIMAL AND PLANT HEALTH INSPECTION SERVICE, DEPARTMENT OF AGRICULTURE

PART 354—OVERTIME SERVICES RELATING TO IMPORTS AND EXPORTS

Commuted Traveltime Allowances

The purpose of this amendment is to establish commuted traveltime periods as nearly as may be practicable to cover the time necessarily spent in reporting to and returning from the place at which an employee of the Plant Protection and Quarantine Programs performs overtime or holiday duty when such travel is performed solely on account of such overtime or holiday duty. Such establishment depends upon facts within the knowledge of the Animal and Plant Health Inspection Service.

Therefore, pursuant to the authority conferred upon the Deputy Administrator, Plant Protection and Quarantine Programs, by 7 CFR 354.1 of the regulations concerning overtime services relating to imports and exports, the administrative instructions appearing at 7 CFR 354.2, as amended, February 28, 1973 (38 FR 5340), April 9, 1973 (38 FR 9006), and July 30, 1973 (38 FR 20233), prescribing the commuted traveltime that shall be included in each period of overtime or holiday duty are further amended by adding (in appropriate alphabetical sequence) or deleting the information as shown below:

§ 354.2 Administrative instructions prescribing commuted traveltime.

64 Stat. 561; 7 U.S.C. 2260.

Effective date. The foregoing amendment shall become effective on August 21, 1973.

It is to the benefit of the public that this instruction be made effective at the earliest practicable date. Accordingly, pursuant to 5 U.S.C. 553, it is found upon good cause that notice and public procedure on this instruction are impracticable, unnecessary, and contrary to the public interest, and good cause is found for making it effective less than 30 days after publication in the FEDERAL REGISTER.

Done at Washington, D.C., this 15th day of August 1973.

LEO G. K. IVERSON,
Deputy Administrator, Plant Protection and Quarantine Programs.

CHAPTER XIV—COMMODITY CREDIT CORPORATION, DEPARTMENT OF AGRICULTURE

SUBCHAPTER B—LOANS, PURCHASES, AND OTHER OPERATIONS

[CCC Grain Price Support Regs., 1973-Crop Rice Supplement, Amendment 2]

PART 1421—GRAINS AND SIMILARLY HANDLED COMMODITIES

Subpart—1973-Crop Rice Loan and Purchase Program

The regulations issued by the Commodity Credit Corporation and published at 38 FR 14088, which sets forth specific requirements with respect to loans and purchases for the 1973 crop of rice, are hereby amended to change certain value factors. It is impracticable to follow the notice of proposed rulemaking with respect to this amendment because 1973-crop rice is being harvested and it is essential that the rates provided for in this subpart be put into effect with respect to such rice on the earliest possible date.

Paragraph (a) of § 1421.328 is hereby amended to increase the value factors for all classes of whole kernel rice, 71 cents per hundredweight, and broken rice, 38 cents per hundredweight. The amended paragraph (a) reads as follows:

§ 1421.328 Basic rates.

• • • • •

VALUE FACTORS FOR WHOLE KERNEL AND BROKEN RICE
[Cents per pound]

Rough rice class	Whole kernels	Broken rice
Long grains	10.33	5.03
Medium grains	9.58	5.03
Short grains	9.58	5.03

(Sec. 4, 62 Stat. 1070, as amended; 15 U.S.C. 714b. Interpret or apply sec. 5, 62 Stat. 1072, secs. 101, 401, 61 Stat. 1051, as amended 1054, sec. 302, 72 Stat. 988; 15 U.S.C. 714c, 7 U.S.C. 1421, 1441)

Effective date: August 20, 1973.

Signed at Washington, D.C., on August 15, 1973.

GLENN A. WEIR,
Acting Executive Vice President, Commodity Credit Corporation.

Title 9—Animals and Animal Products

CHAPTER I—ANIMAL AND PLANT HEALTH INSPECTION SERVICE, DEPARTMENT OF AGRICULTURE

SUBCHAPTER D—EXPORTATION AND IMPORTATION OF ANIMALS (INCLUDING POULTRY) AND ANIMAL PRODUCTS

PART 92—IMPORTATION OF CERTAIN ANIMALS AND POULTRY AND CERTAIN ANIMAL AND POULTRY PRODUCTS; INSPECTION AND OTHER REQUIREMENTS FOR CERTAIN MEANS OF CONVEYANCE AND SHIPPING CONTAINERS THEREON

Re-entry of United States Horses From Canada

Statement of consideration.—The purpose of this amendment of the regulations in Part 92 is to provide for the re-entry into the United States from Canada of horses of United States origin which have been in Canada for temporary periods not exceeding 72 hours when such animals re-enter the United States via the same Customs port of entry through which they entered Canada and are accompanied by the same health certificate with which they entered that country. Similar procedures which provide for the importation and return of Canadian horses entering the United States for temporary periods were placed into effect July 24, 1973 (38 FR 19813).

Pursuant to the provisions of sec. 2 of the Act of February 2, 1903, as amended, and sections 2, 3, 4, and 11 of the Act of July 2, 1962 (21 U.S.C. 111, 134a, 134b, 134c, and 134f), Part 92, Title 9, Code of Federal Regulations, is hereby amended in the following respects:

1. In the table of sections, the heading of § 92.24 is amended to read:

92.24 Horses from Canada and re-entry of United States horses from Canada.

2. In § 92.24, the heading is amended, the present paragraph is designated as paragraph (a), and new paragraph (b) is added to read:

§ 92.24 Horses from Canada and re-entry of United States horses from Canada.

• • • • •

(b) Horses of United States origin which enter Canada for periods of not more than 72 hours may re-enter the United States without veterinary inspection at the port of entry provided they are accompanied by the health certificate under which they were permitted entry into Canada and that they re-enter the United States via the same Customs port of entry through which they entered Canada.

(Sec. 2, 32 Stat. 792, as amended; secs. 2, 3, 4, and 11, 76 Stat. 129, 130, 132; 21 U.S.C. 111, 134a, 134b, 134c, 134f; 37 FR 28464, 28477.)

Effective date.—The foregoing amendment shall become effective August 21, 1973.

The amendment relieves certain restrictions presently imposed but no longer deemed necessary to prevent the spread of animal diseases, and must be made effective immediately to be of maximum benefit to affected persons. It does not appear that public participation in this rulemaking proceeding would make additional relevant information available to the Department.

Accordingly, under the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to the amendment are impracticable and unnecessary and good cause is found for making it effective less than 30 days after publication in the FEDERAL REGISTER.

Done at Washington, D.C., this 16th day of August 1973.

G. H. WISE,
Acting Administrator, Animal and Plant Health Inspection Service.

[FR Doc.73–17406 Filed 8–20–73;8:45 am]

Title 10—Atomic Energy

CHAPTER I—ATOMIC ENERGY COMMISSION

PART 20—STANDARDS FOR PROTECTION AGAINST RADIATION

Definition of "Calendar Quarter"

On April 30, 1973, the Atomic Energy Commission published in the FEDERAL REGISTER (38 FR 10641) a proposed amendment to 10 CFR Part 20 of its regulations which would simplify the definition of "calendar quarter." Interested persons were invited to submit written comments and suggestions for consideration within 45 days after publication of the notice of proposed rulemaking in the FEDERAL REGISTER.

Two comments were received, one requesting staggered calendar quarters for different groups of workers, and the other suggesting a change in the period during which a calendar year could start. The Commission did not consider either of the recommended changes to be desirable. A system of staggered calendar quarters does not seem consistent with the Commission's policy to keep exposures to radiation "as low as practicable". Under such a system a licensee would not have to keep some potential worker exposure in reserve for unforeseeable problems at the end of a calendar quarter. A change in the period during which a calendar year could start would make the Part 20 definition inconsistent with the definition given by the Suggested State Regulations for Control of Radiation. The Commission has therefore adopted the amendment as it was set out in the notice of proposed rulemaking.

This amendment makes the definition of "calendar quarter" consistent with the definition given by the Suggested State Regulations for Control of Radiation prepared by The Council of State Governments in cooperation with The U.S. Atomic Energy Commission and The U.S. Public Health Service. The amendment does not prohibit the use of any system of calendar quarters now permitted by Part 20. For example, calendar quarters could be chosen as three month periods with the first quarter beginning on any day in January, the second quarter beginning on the same day in April, and so on. The amendment does, however, give licensees additional flexibility in establishing the length of calendar quarters; for example, it permits licensees to use calendar quarter sequences of 12, 12, 14, and 14 weeks and 12, 13, 14, and 13 weeks, sequences not permitted by the former definition. These variations from formerly allowable sequences are not considered significant from a radiological safety viewpoint.

Pursuant to the Atomic Energy Act of 1954, as amended, and Sections 552 and 553 of Title 5 of the United States Code, the following amendment of Title 10, Chapter 1, Code of Federal Regulations, Part 20 is published as a document subject to codification to be effective September 20, 1973.

1. In § 20.3, 10 CFR Part 20, paragraph (a) (4) is amended to read as follows:

§ 20.3 Definitions.

(a) As used in this part:

• • • • •

(4) "Calendar quarter" means not less than 12 consecutive weeks nor more than 14 consecutive weeks. The first calendar quarter of each year shall begin in January and subsequent calendar quarters shall be such that no day is included in more than one calendar quarter or omitted from inclusion within a calendar quarter. No licensee shall change the method observed by him of determining calendar quarters except at the beginning of a calendar year.

• • • • •

(Sec. 161, Pub. L. 83–703, 68 Stat. 948 (42 U.S.C. 2201)).

Dated at Bethesda, Maryland, this sixth day of August 1973.

For the Atomic Energy Commission.

LEE V. GOSSICK,
Acting Director of Regulation.

[FR Doc.73–17327 Filed 8–20–73;8:45 am]

Title 12—Banks and Banking

CHAPTER VI—FARM CREDIT ADMINISTRATION

PART 613—ELIGIBILITY AND SCOPE OF FINANCING

PART 614—LOAN POLICIES AND OPERATIONS

Deletion of Agency Approval Requirements

The Farm Credit Administration, by its Federal Farm Credit Board, took final action on amendments to its regulations and authorized their issuance effective August 6, 1973. These amendments (1) delete the requirement for prior Farm Credit Administration approval of production credit association loans to producers or harvesters of aquatic products, (2) provide for establishing prior loan approval limits on an individual bank basis, (3) delete the requirement for prior Farm Credit Administration approval of certain bank for cooperatives loans, and (4) delete the requirement for prior Farm Credit Administration approval of obligations accepted for discount or as direct loan collateral from another financing institution by a Federal intermediate credit bank. Interested persons were afforded by a notice published in the FEDERAL REGISTER on June 25, 1973, the opportunity to file written comments or suggestions on the proposed amendments not later than July 23, 1973. No comments were received.

Chapter VI of Title 12 of the Code of Federal Regulations is amended by deleting paragraph (c) and renumbering paragraph (d) as paragraph (c) in

V 38-161 AUG 21 73 XUM

§ 613.3030, by revising § 614.4490, and by deleting §§ 614.4500 and 614.4650. The renumbered paragraph and revised section are as follows:

§ 613.3030 Producers or harvesters of aquatic products.

* * * * *

(c) *Scope of financing.*—Production credit associations are authorized to make loans to producers or harvesters of aquatic products for aquatic needs and other requirements of the borrower. The total credit extended for other requirements shall not exceed the value of assets devoted to the production or harvesting of aquatic products. When the aquatic operation represents less than 50 percent of the borrower's total business, credit extended for other requirements shall be on a conservative basis scaled down proportionately as the aquatic assets become less significant in the total operation.

§ 614.4490 Loans requiring prior approval.

(a) Prior loan approval limits shall be established on an individual bank basis according to the adequacy and administration of policies and procedures relating to credit extension. Consideration shall also be given to performance in making proper credit analysis and decisions and compliance with farm credit law and regulations. For the Federal land banks and Federal intermediate credit banks, particular consideration shall be given to policies and procedures and bank performance relating to delegation of loan-making authority to associations, credit reviews, and association supervision.

(b) The following shall be subject to the prior approval of the appropriate bank board:

(1) Loans to a member of the Federal Farm Credit Board.

(2) Loans to a member of the district board unless the bank board has adopted a policy providing for the submission of such loans to the Farm Credit Administration for prior approval.

(3) Loans to an officer or employee of a bank.

(4) Loans to an employee of the Farm Credit Administration.

(5) Loans to any borrower where officers or employees designated above:

(i) Are to receive proceeds of the loan in excess of an amount prescribed by the appropriate bank board and approved by the Farm Credit Administration, or

(ii) Are stockholders or owners of equity in a legal entity to which a loan is to be made wherein they have a significant personal or beneficial interest in the loan, the proceeds thereof or the security.

(c) The following shall be subject to the prior approval of the district bank:

(1) Loans to a member of an association board.

(2) Loans to an employee of an association.

(3) Loans to any borrower where directors or employees designated above:

(i) Are to receive proceeds of the loan in excess of an amount prescribed by the appropriate bank board and approved by the Farm Credit Administration, or

(ii) Are stockholders or owners of equity in a legal entity to which a loan is to be made wherein they have a significant personal or beneficial interest in the loan, the proceeds thereof or the security.

(4) Any loan which will result in any one borrower being obligated, as defined in section 4360, in excess of an amount established by the district bank under its policies for delegation of authority to associations.

§ 614.4500 [Deleted]

§ 614.4650 [Deleted]

(Secs. 5.9, 5.18, 5.26, 85 Stat. 619, 621, 624.)

E. A. JAENKE,
Governor,
Farm Credit Administration.

[FR Doc.73-17376 Filed 8-20-73;8:45 am]

Title 14—Aeronautics and Space

CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Airspace Docket No. 73-SO-8]

PART 73—SPECIAL USE AIRSPACE

Alteration of Joint-Use Restricted Areas

On June 13, 1973, a notice of proposed rulemaking (NPRM) was published in the FEDERAL REGISTER (38 FR 15525) stating that the Federal Aviation Administration (FAA) was considering an amendment to Part 73 of the Federal Aviation Regulations that would revoke a major portion of Restricted Area R-2909 and include the remaining portion, with an increased altitude limit, in the Eglin AFB, Fla., R-2915B Restricted Area.

Interested persons were afforded an opportunity to participate in the proposed rulemaking through the submission of comments. Only one comment was received and it was favorable.

In consideration of the foregoing, Part 73 of the Federal Aviation Regulations is amended, effective 0901 G.m.t., November 8, 1973, as hereinafter set forth.

In § 73.29 (38 FR 640), Restricted Area R-2915B, Eglin AFB, Fla., is amended as follows:

R-2915B, EGLIN AFB, FLA.

BOUNDARIES

Beginning at Lat. 30°29'01'' N., Long. 86°38'02'' W.; to Lat. 30°20'50'' N., Long. 86°38'50'' W.; thence 3 nautical miles from and parallel to the shoreline to Long. 86°-51'30'' W.; thence along Long. 86°51'30'' W.; to Lat. 30°23'50'' N., Long. 86°51'30'' W.; to Lat. 30°24'20'' N., Long. 86°48'00'' W.; to Lat. 30°26'30'' N., Long. 86°51'30'' W.; to point of beginning.

Designated altitudes: Surface to FL 1200.
Time of designation: Continuous.
Controlling agency: Federal Aviation Administration, Jacksonville, ARTC Center.
Using agency: Commander, Armament Development and Test Center (ADTC), Eglin AFB, Fla.

In § 73.29 (38 FR 640), Restricted Area R-2909, Pensacola, Fla., is revoked.

(Sec. 307(a), Federal Aviation Act of 1958, 49 U.S.C. 1348(a); sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Washington, D.C., on August 13, 1973.

CHARLES H. NEWPOL,
Acting Chief, Airspace and Air Traffic Rules Division.

[FR Doc.73-17366 Filed 8-20-73;8:45 am]

Title 16—Commercial Practices

CHAPTER I—FEDERAL TRADE COMMISSION

[Docket C-2427]

PART 13—PROHIBITED TRADE PRACTICES

Foremost-McKesson, Inc.

Subpart—Discriminating in price under Section 5, Federal Trade Commission Act: § 13.892 *Knowingly inducing or receiving discriminating payments.* Subpart—Offering unfair, improper, and deceptive inducements to purchase or deal: § 13.1928 *Customer connection or action.*

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45) [Cease and desist order, Foremost-McKesson, Inc., San Francisco, California, Docket C-2427, July 26, 1973]

In the Matter of Foremost-McKesson, Inc., a corporation.

Consent order requiring a San Francisco, California, wholesale distributor of druggists' sundries, among other things to cease inducing or receiving discriminating payments and offering anticompetitive inducements.

The order to cease and desist, including further order requiring report of compliance therewith, is as follows:

It is ordered, That respondent, Foremost-McKesson, Inc., a corporation, and its officers, representatives, agents and employees, successors and assigns, directly or indirectly, through any corporate or other device, in or in connection with the purchase in commerce, as "commerce" is defined in the Federal Trade Commission Act, of products for resale by the respondent, or in connection with any other transactions between respondent and its various suppliers involving or pertaining to the regular business of the respondent in purchasing, promoting, advertising, distributing, and selling commodities and products in commerce, as "commerce" is defined in the Federal Trade Commission Act, shall cease and desist from:

1. Inducing and receiving, receiving or contracting for the receipt of anything of value from any supplier of druggists' sundries as compensation or in consideration for services and facilities furnished by or through respondent in connection with the processing, handling, sale or offering for sale of such supplier's products at respondent's trade shows, when respondent knows or has reason to know that such compensation is not affirmatively offered and otherwise made available by such supplier on proportionally equal terms to all of its other customers competing with respondent, including customers who purchase from intermediaries and compete with respondent in the resale of such supplier's products.

2. Inducing and receiving, receiving or contracting for the receipt of, the furnishing of services or facilities, including but not limited to inducing prizes or gifts awarded to retail druggist customers attending respondent's trade shows connected with respondent's offering for sale or sale of such products so purchased, when respondent knows or has reason to know that such services or facilities are not affirmatively offered or otherwise made available by such supplier on proportionally equal terms to all of its customers competing with the respondent, including customers who purchase from intermediaries and compete with respondent in the resale of such supplier's products.

It is further ordered, That respondent shall cease and desist from offering or providing to its customers, directly or indirectly, any material inducement, monetary or otherwise, to attend its trade shows whenever such customers' receipt of the inducement depends upon their purchases or volume of purchases of merchandise from respondent.

It is further ordered, That a copy of this Order shall be delivered to each person or organization invited to participate in any trade show sponsored, organized, or held by respondent, at the time such invitation is extended, for a period of five (5) years from the date of service of this Order.

It is further ordered, That respondent notify the Commission at least thirty (30) days prior to any proposed change in the corporate respondent such as dissolution, assignment, or sale resulting in the emergency of a successor corporation, the creation or dissolution of subsidiaries, or any other change in the corporation which may affect compliance obligations arising out of the Order.

It is further ordered, That respondent shall forthwith distribute a copy of this Order to each of its operating wholesale drug divisions.

It is further ordered, That respondent shall, within sixty (60) days of service of this Order, file with the Commission a report in writing, setting forth in detail the manner and form in which it has complied with the Order.

It is further ordered, That the effective date for compliance with this order shall commence September 1, 1973.

Issued: July 26, 1973.

By the Commission.

[SEAL] CHARLES A. TOBIN,
Secretary.

[FR Doc.73-17365 Filed 8-20-73;8:45 am]

[Docket C-2426]

PART 13—PROHIBITED TRADE PRACTICES

Hall's Furniture Company, Inc., et al.

Subpart—Advertising falsely or misleadingly: § 13.73 *Formal regulatory and statutory requirements;* 13.73-92 Truth in Lending Act; § 13.155 *Prices;* 13.155-95 Terms and conditions; 13.155-95(a) Truth in Lending Act. Subpart—Misrepresenting oneself and goods—Goods: § 13.1623 *Formal regulatory and statutory requirements;* 13.1623-95 Truth in Lending Act;—*Prices;* § 13.1823 *Terms and conditions;* 13.1823-20 Truth in Lending Act. Subpart—Neglecting, unfairly and deceptively, to make material disclosure: § 13.1852 *Formal regulatory and statutory requirements;* 13.1852-75 Truth in Lending Act; § 13.1905 Terms and conditions; 13.1905-60 Truth in Lending Act.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interpret or apply sec. 5, 38 Stat. 719, as amended, 82 Stat. 146, 147; 15 U.S.C. 45, 1601-1605) [Cease and desist order, Hall's Furniture Company, Inc., et al., Los Angeles, California, Docket C-2426, July 25, 1973]

In the Matter of Hall's Furniture Company, Inc., et al.

Consent order requiring a Los Angeles, California, seller and distributor of furniture, among other things to cease violating the Truth in Lending Act by failing to disclose to consumers, in connection with the extension of consumer credit, such information as required by Regulation Z of said Act.

The order to cease and desist, including further order requiring report of compliance therewith, is as follows:

It is ordered, That respondents, Hall's Furniture Company, Inc., a corporation, its successors and assigns, and its officers, and Harry Heller, individually and as an officer of said corporation, and respondents' agents, representatives, and employees, directly or through any corporation, subsidiary, division, or other device, in connection with any extension of consumer credit, as "consumer credit" is defined in Regulation Z (12 CFR Part 226) of the Truth in Lending Act (P.L. 90-321, 15 U.S.C. 1601 et seq.), do forthwith cease and desist from:

1. Failing to disclose the Annual Percentage Rate, computed in accordance with § 226.5 of Regulation Z, as required by § 226.8(b) (2) of Regulation Z.

2. Failing to disclose the number of payments scheduled to repay the indebtedness as required by § 226.8(b)(3) of Regulation Z.

3. Failing to include in the finance charge any charges or premiums for credit life, accident health or loss of income insurance when the customer has not given a specific dated and separately signed affirmative written indication of such desire after receiving written disclosure to him of the cost of such insurance as prescribed by § 226.4(a) (5) (ii) of Regulation Z.

4. Failing to furnish the customer with a duplicate of the instrument containing the disclosures required by § 226.8 or a statement by which the required disclosures are made at the time those disclosures are made, as prescribed by § 226.8(a) of Regulation Z.

5. Failing in any consumer credit transaction to make all disclosures determined in accordance with §§ 226.4 and 226.5 of Regulation Z at the time and in the manner, form, and amount required by §§ 226.6, 226.7, and 226.8 of Regulation Z.

It is further ordered, That respondents prominently display no less than two signs on each of its premises which will clearly and conspicuously state that a customer must receive a complete copy of the consumer credit cost disclosures as required by the Truth in Lending Act, in any transaction which is financed, before the transaction is consummated.

It is further ordered, That respondents deliver a copy of this order to cease and desist to each operating division and to all present and future personnel of respondents engaged in the consummation of any extension of consumer credit, and that respondents secure a signed statement acknowledging receipt of said order from each such person.

It is further ordered, That respondents notify the Commission at least 30 days prior to any proposed change in the corporate respondent such as dissolution, assignment, or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries or any other change in the corporation which may affect compliance obligations arising out of the order.

It is further ordered, That the respondents herein shall within sixty (60) days after service upon them of this order, file with the Commission a report, in writing, setting forth in detail the manner and form in which they have complied with this order.

Issued: July 25, 1973.

By the Commission.

[SEAL] CHARLES A. TOBIN,
Secretary.

[FR Doc.73-17370 Filed 8-20-73;8:45 am]

Title 21—Food and Drugs

CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

SUBCHAPTER C—DRUGS

PART 135a—NEW ANIMAL DRUGS FOR OPHTHALMIC AND TOPICAL USE

Flumethasone, Neomycin Sulfate, and Polymyxin B Sulfate Ophthalmic Solution, Veterinary

The Commissioner of Food and Drugs has evaluated a new animal drug application (49-725V) filed by Syntex Laboratories, Inc., Palo Alto, CA 94304, proposing the safe and effective use of

V 38-161 AUG 21 73 XUM

flumethasone, neomycin sulfate, and polymyxin B sulfate ophthalmic solution, veterinary in the treatment of certain ophthalmic conditions in dogs. The application is approved.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347; 21 U.S.C. 360b(i)) and under authority delegated to the Commissioner (21 CFR 2.120), Part 135a is amended by adding a new section as follows:

§ 135a.40 Flumethasone, neomycin sulfate and polymyxin B sulfate ophthalmic solution, veterinary.

(a) *Specifications.*—Each milliliter of the ophthalmic preparation contains 0.10 milligram flumethasone, 5.0 milligrams neomycin sulfate (3.5 milligrams neomycin base), and 10,000 units of polymyxin B sulfate.

(b) *Sponsor.*—See code No. 036 in § 135.501(c) of this chapter.

(c) *Conditions of use.*—(1) The drug is recommended for the treatment of the inflammation, edema and secondary bacterial infections associated with topical ophthalmological conditions of the eye such as corneal injuries, incipient pannus, superficial keratitis, conjunctivitis, acute nongranulomatous anterior uveitis, keratoconjunctivitis, and blepharitis in the dog.

(2) The recommended dosage is 1 to 2 drops in each eye every 6 hours.

(3) In treating ophthalmological conditions associated with bacterial infections, the drug is contraindicated in those cases in which microorganisms are not susceptible to the antibiotics incorporated in the drug.

(4) The drug is contraindicated in infectious tuberculous lesions of the eye, early acute stages of viral diseases of the cornea and conjunctiva, herpes simplex lesions of the eye, and fungal infections of the conjunctiva and eyelids.

(5) The usual precautions and contraindications for corticosteroids and adrenocorticoids are applicable with this drug. Corticosteroids may inhibit essential inflammatory responses intrinsic to the fundamental healing mechanism. Adrenocorticoid compounds have been reported to cause an increase in intraocular pressure. Intraocular pressure should be checked frequently. Ocular reexaminations should be made at frequent intervals during long-term therapy.

(6) Federal law restricts this drug to use by or on the order of a licensed veterinarian.

Effective date.—This order shall be effective on August 21, 1973.

(Sec. 512(i), 82 Stat. 347; 21 U.S.C. 360b(i))

Dated August 14, 1973.

C. D. VAN HOUWELING,
Director,
Bureau of Veterinary Medicine.

Title 43—Public Lands: Interior

CHAPTER II—BUREAU OF LAND MANAGEMENT, DEPARTMENT OF THE INTERIOR

APPENDIX—PUBLIC LAND ORDERS

[Public Land Order 5379]

[Sacramento 1805]

CALIFORNIA

Powersite Restoration No. 671; Revocation of Powersite Reserves Nos. 86, 388, and 705 in Whole or in Part

By virtue of the authority contained in section 24 of the Act of June 10, 1920, as amended, 16 U.S.C. 818 (1970), and pursuant to a determination of the Federal Power Commission in DA-1104-California, it is ordered as follows:

1. The Executive Orders of July 2, 1910, July 22, 1913, and August 22, 1919, creating Powersite Reserves No. 86, No. 388, and No. 705, respectively, are hereby revoked so far as they affect the following described lands:

MOUNT DIABLO MERIDIAN
POWERSITE RESERVE NO. 86

T. 2 N., R. 14 E.,
Sec. 4, lot 8;
Sec. 17, N½NE¼SE¼, SW¼NE¼SE¼.
T. 3 N., R. 14 E.,
Sec. 12, lot 3, SE¼SE¼;
Sec. 13, NW¼NW¼;
Sec. 14, SW¼SW¼;
Sec. 34, NE¼SW¼.

POWERSITE RESERVE NO. 388

T. 2 N., R. 15 E.,
Sec. 2, SE¼SW¼;
Sec. 9, NE¼SE¼SE¼;
Sec. 10, NE¼NW¼, NW¼SW¼SW¼.

POWERSITE RESERVE NO. 705

T. 2 N., R. 15 E.,
Sec. 1, lot 4;
Sec. 2, SW¼SW¼.

The areas described aggregate 435.61 acres in Calaveras and Tuolumne Counties.

2. Of the above described lands, the lands described as the SE¼SW¼, SW¼SW¼, sec. 2, T. 2 N., R. 15 E., are national forest lands within the Stanislaus National Forest, and are withdrawn for a Job Corps Campsite by Public Land Order No. 4007 of May 17, 1966, and will remain so withdrawn. The lands described as lot 4, sec. 1, NE¼NW¼, sec. 10, T. 2 N., R. 15 E., the SW¼SW¼, sec. 14, and NE¼SW¼, sec. 34, T. 3 N., R. 14 E., are patented lands. The lands described as the NE¼SE¼SE¼, sec. 9, and NW¼SW¼SW¼, sec. 10, T. 2 N., R. 15 E., are withdrawn for Federal Power Project No. 1061, and will remain so withdrawn. The lands described as the N½NE¼SE¼, SW¼NE¼SE¼, sec. 17, T. 2 N., R. 14 E., are included in a withdrawal application, Sacramento 1491, filed by the Corps of Engineers, Department of the Army, to which the regulations 43 CFR 2351.3(a) are applicable. The lands described as the N½NE¼SE¼, SW¼NE¼SE¼, sec. 17, T. 2 N., R. 14 E., and the SW¼SW¼, sec. 14, T. 3 N., R. 14 E., were previously restored from the withdrawal made for Powersite No. 86, subject to the provisions of section 24 of the Act of June 10, 1920, *supra*. The effect of this order is to relieve these restored lands of the limitations prescribed by said section 24.

3. At 10 a.m. on September 19, 1973, the unappropriated, unreserved public lands described above as lot 8, sec. 4, T. 2 N., R. 14 E., lot 3, SE¼SE¼, sec. 12, and NW¼NW¼, sec. 13, T. 3 N., R. 14 E., shall be open to operation of the public land laws generally, subject to valid existing rights, the provisions of existing withdrawals and classifications, and the requirements of applicable law. All valid applications received at or prior to 10 a.m. on September 19, 1973, shall be considered as simultaneously filed at that time. Those received thereafter will be considered in the order of filing. These public lands have been and will continue to be open to location and entry under the United States mining laws, and to leasing under the mineral leasing laws.

Inquiries concerning the lands should be addressed to the Chief, Division of Technical Services, Bureau of Land Management, Federal Office Building, 2800 Cottage Way, Sacramento, California 95825.

JACK O. HORTON,
Assistant Secretary of the Interior.

AUGUST 15, 1973.

[FR Doc.73-17343 Filed 8-20-73;8:45 am]

[Public Land Orders 5158 and 5342]

[Colorado 12101]

COLORADO

Correction of Public Land Orders No. 5158 and No. 5342

The No. 2032 erroneously cited in paragraph 2 of both Public Land Order No. 5158 of February 7, 1972, appearing in 37 FR 3058 of the issue of February 11, 1972, and Public Land Order No. 5342 of March 27, 1973, appearing in 38 FR 8445 of the issue of April 2, 1973, as the number of the Presidential Proclamation of March 2, 1933, establishing the Black Canyon of the Gunnison National Monument, is hereby corrected to read "No. 2033".

JACK O. HORTON,
Assistant Secretary of the Interior.

AUGUST 15, 1973.

Title 24—Housing and Urban Development

CHAPTER X—FEDERAL INSURANCE ADMINISTRATION, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

SUBCHAPTER B—NATIONAL FLOOD INSURANCE PROGRAM

PART 1914—AREAS ELIGIBLE FOR THE SALE OF INSURANCE

Status of Participating Communities

Section 1914.4 of Part 1914 of Subchapter B of Chapter X of Title 24 of the Code of Federal Regulations is amended by adding in alphabetical sequence a new entry to the table. In this entry, a complete chronology of effective dates appears for each listed community. Each date appearing in the last column of the table is followed by a designation which indicates whether the date signifies the effective date of the authorization of the sale of flood insurance in the area under the emergency or he regular flood insurance program. The entry reads as follows:

§ 1914.4 Status of participating communities.

State	County	Location	Map No.	State map repository	Local map repository	Effective date of authorization of sale of flood insurance for area
•	•	•	•	•	•	•
Florida	Palm Beach	Lake Park, Town of.				August 20, 1973. Emerg.
Pennsylvania	Columbia	Catawissa, Township of.				Do.
Do.	York	Mount Wolf, Borough of.				Do.
Wisconsin	Milwaukee	Oak Creek, City of.				Do.

(National Flood Insurance Act of 1968 (title XIII of the Housing and Urban Development Act of 1968), effective Jan. 28, 1969 (33 FR 17804, Nov. 28, 1968), as amended (secs. 408-410, Public Law 91-152, Dec. 24, 1969), 42 U.S.C. 4001-4127; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, Feb. 27, 1969)

Issued August 13, 1973.

CHARLES W. WIECKING,
Acting Federal Insurance Administrator.

Title 26—Internal Revenue

CHAPTER I—INTERNAL REVENUE SERVICE, DEPARTMENT OF THE TREASURY

[T.D. 7196]

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Income Averaging; Correction

On Thursday, July 13, 1972, Treasury Decision 7196 was published in the FEDERAL REGISTER (37 FR 13686).

The following correction is made:

In § 1.1304-5 (b) and (d) (column two, page 13689), delete the asterisks between paragraphs (b) and (d) and redesignate section 1.1304-5(d) to read "1.1304-5(c)."

JAMES F. DRING,
Director,
Legislation and Regulations Division.

[FR Doc.73-17339 Filed 8-20-73;8:45 am]

Title 32—National Defense

CHAPTER VII—DEPARTMENT OF THE AIR FORCE

SUBCHAPTER K—MILITARY TRAINING AND SCHOOLS

AIR FORCE ACADEMY PREPARATORY SCHOOL

This update redesignates Part 901a to Part 901, and adds the Precandidate Evaluation by the USAF Academy (§ 901.6b) and explains the eligibility requirements for nomination of a son of a disabled veteran, which was previously omitted through administrative error (§ 901.13(a)(2)); deletes Part 901b; and adds a new Part 903, which states the requirements for enrollment in the Air Force Academy Preparatory School.

Subchapter K, Chapter VII of Title 32 of the Code of Federal Regulations is revised as follows:

PART 901—APPOINTMENT TO THE U.S. AIR FORCE ACADEMY

§ 901.6b Precandidate evaluation by the USAF Academy.

Beginning with the 1973-74 selection cycle, the Air Force Academy will utilize a precandidate evaluation procedure to aid Members of Congress in their screening processes. Once a young man expresses an interest in seeking a nomination to a Member of Congress, the Congressional Assistant will send a card, made available by the Air Force Academy, to the young man. The young man will complete and mail the card to the Academy, which, in turn, will mail him a packet of information, including DD Form 1908, the "Service Academies Precandidate Questionnaire." He will complete this form, have it certified by his high school counselor, and forward it to the Academy. The Academy will evaluate DD Form 1908, and the information will be made available to Congressional offices—unless the Member of Congress has indicated that he would rather not participate in this program. Such information gives the Member of Congress an indication of the individual's current relative strength; it does not, however, reflect the individual's final admission status. It is intended only to aid the Member of Congress in selecting his best qualified applicants.

§ 901.13 Sons of deceased or disabled veterans (competitive).

(a) (1) • • •

(2) His parent has a permanent service-connected disability rated at no less than 100 per cent resulting from wounds or injuries received or diseases contracted in active service, or preexisting injury or disease aggravated by active service.

• • • • •

PART 901b [DELETED]

2. Part 901b is herewith deleted in its entirety.

PART 903—AIR FORCE ACADEMY PREPARATORY SCHOOL

3. Part 903 is added to read as follows:

Sec.
903.1 Purpose.
903.2 School location and schedule.
903.3 Requirements for enrollment.
903.4 Reassignment of Air Force applicants and nominees eliminated or not selected.
903.5 Reassignment of Air Force regular airmen and nominees selected as cadets.

AUTHORITY: 10 U.S.C. 8012, except as otherwise noted.

§ 903.1 Purpose.

This part explains the requirements for enrollment in the Air Force Academy

V 38 161 AUG 21 73 XUM

Preparatory School and tells how they are reassigned.

§ 903.2 School location and schedule.

The Air Force Academy Preparatory School is located at the United States Air Force Academy near Colorado Springs, Colorado. Classes are conducted annually from August through May. A limited number of Regular Air Force airmen may be enrolled in January of each year.

§ 903.3 Requirements for enrollment.

(a) Applicants and nominees must:

(1) Meet the eligibility requirements specified for the Air Force Academy in Part 901 of this chapter. (These requirements are also in the Air Force Academy catalog, obtainable from the Director of Admissions, USAFA/RR, USAF Academy, Colorado 80840.)

(2) Be on extended active duty. Air Force Reserve or Air National Guard of the United States (ANGUS) military applicants may apply for the preparatory school course while not on extended active duty. If selected they will be called to extended active duty solely for the purpose of attending the Prep School. ANGUS applicants will be transferred to the Air Force Reserve before being called to extended active duty.

(3) Meet the medical requirements for appointment to the Air Force Academy. Authorization for service academy medical examination will be provided the applicant by the Director of Admissions. The applicant will complete the form and send it to the Service Academies Central Medical Review Board (SACMRB), U.S. Academy, Colorado 80840, which schedules him for a medical examination at the nearest available medical facility.

(4) Regular military applicants must agree to extend their enlistment before enrollment if their obligated tours of duty or enlistment contracts expire before July 1 of the following year.

(5) Attain satisfactory scores on either the Airman Classification Test (ACT) or the Airman Qualifying Examination (AQE).

(i) If scores for the Air Force Officer Qualifying Test (AFOQT) are available, a separate authenticated statement of results will be submitted.

(ii) If the applicant previously took any of these tests, the scores recorded on his AF Form 7, "Airman Military Record," or "Uniformed Mechanized Personal Record," may be used.

(iii) Reexamination is not authorized within 1 year of the previous test date.

(6) Attain a satisfactory score on the Air Force Academy Selection Test (AST).

(i) The Associate Director of Admissions schedules the test after all records have been evaluated, including school transcripts and the AF Form 1786, "Application for Appointment to the USAF Academy Under Quota Allotted to Enlisted Men of the Regular and Reserve Components of the Air Force." Exception: USAFA/RRS may waive this requirement if other test data are available and acceptable.

(ii) The base military test control commissioned or noncommissioned officer administers the test.

(7) Have an acceptable academic record as determined by USAFA/RRS.

(b) Individuals who have previously attended a service academy preparatory school normally are not eligible to apply under this part.

(c) Members of the Army, Navy, and Marine Corps are not eligible under the Regular or Reserve competitive categories. Such applicants must be on active duty and have received nominations from Members of Congress or other authorized nominating sources prior to applying for the Air Force Academy Preparatory School.

(d) Headquarters Civil Air Patrol-USAF may nominate annually three primary and three alternate Civil Air Patrol (CAP) Mitchell Award winners to attend the Air Force Academy Preparatory School. The Associate Director of Admissions will review and approve selection criteria for CAP nominees.

§ 903.4 Reassignment of Air Force applicants and nominees eliminated or not selected.

(a) If a Reserve airman should be eliminated from the preparatory school for failure to meet one of the established conditions, or if a Reserve airman who has completed the course will not be selected for a cadet appointment, he will be released from active duty by USAFA and assigned to ARPC (ORS), 3800 York Street, Denver, Colorado 80205.

(b) All Reserve airmen who complete the preparatory school program and receive an appointment to the USAF Academy will be released from active duty immediately before entering the Air Force Academy Cadet Wing as cadets.

(c) The authority for release from active duty of Reserve airmen released under paragraph (a) of this section is Air Force Regulation (AFR) 53–14 and Air Force Manual (AFM) 39–10, Chap. 3, Sec. A, SDN 205. Specific attention is invited to 10 U.S.C. 516.

(d) The authority for release from active duty of Reserve airmen accepting appointment as a Cadet is Pub. L. 84–614, 70 Stat. 333 (now codified as 10 U.S.C. 516, 8201, 8203, and 8214 as it relates to the Air Force) and AFM 39–10.

(e) Nominees from armed forces other than the Air Force who are eliminated from preparatory school or who complete the academic year but fail to receive an appointment to the Air Force Academy will be reported to a designated holding unit.

§ 903.5 Reassignment of Air Force regular airmen and nominees selected as Cadets.

Air Force Regular airmen selected for admission to one of the service academies will be assigned by the Air Force Academy to one of the specified units for required processing. Students selected as Air Force Academy Cadets from other than the Air Force will be reported by the Air Force Academy to the appropriate holding unit.

NOTE: Preparatory School enrollment and successful completion of the course does not guarantee admission to the Academy.

(10 U.S.C. 8012, except as otherwise noted).

By order of the Secretary of the Air Force.

JOHN W. FAHRNEY,
Colonel, USAF, Chief, Legislative Division, Office of The Judge Advocate General.

[FR Doc.73–17342 Filed 8–20–73;8:45 am]

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

SUBCHAPTER A—GENERAL

PART 2—PUBLIC INFORMATION

Trade Secrets and Privileged or Confidential Information

By notice of proposed rulemaking published March 23, 1973 (38 FR 7573), the Environmental Protection Agency proposed certain technical amendments to 40 CFR 2.107a. Such amendments dealt with four separate issues:

(1) "Commercial or financial information obtained from a person and privileged or confidential", as that phrase is used in section 10(b) of the Federal Insecticide, Fungicide, and Rodenticide Act, 7 U.S.C. 135, as amended by the Federal Environmental Pesticide Control Act of 1972, P.L. 92–516;

(2) The form of notice to be served by the Office of General Counsel under 40 CFR 2.107a(a)(2), upon a determination of the status of information claimed to constitute trade secrets by a person submitting it to EPA;

(3) The discretionary authority of the General Counsel to issue such determinations in the absence of a specific request to do so, and the future effect of any such determination;

(4) The form of the pledge of confidential treatment extended by EPA pursuant to 40 CFR 2.107a(b)(2).

Pursuant to the notice of proposed rulemaking, comments were received from interested members of the public, and thorough consideration was given to all such comments that were germane to the issues addressed by the notice of proposed rulemaking. In response to one such comment, § 2.107a(a)(4) of the regulations, as hereby amended, now makes it clear that information determined not to constitute trade secrets will in no event be made publicly available without 30 days' advance notice to the person submitting it.

Although the notice of proposed rulemaking would not have altered the substance of Part 2 as it relates to "trade secrets", several comments were received suggesting that EPA define that term. Whether or not EPA could now do so without first publishing a new notice of proposed rulemaking, a deliberate decision has been made to leave the regulations no more explicit on this score than the several relevant statutes which refer, without elaboration, to "trade secrets". The notion of trade secrecy arises from the common law; although there have been several attempts to codify that common law (e.g., The Uniform Trade Secrets Protection Act, and section 757(b) of the Restatement of Torts), EPA sees no advantage to itself, to persons submitting technical information, or to the public at large in binding itself by regulation to follow any one of several marginally distinguishable definitions of "trade secret". As a practical matter, moreover, it is highly unlikely that EPA would ever release information which satisfies any one of the available definitions, and there appears no good reason to limit at this time any legitimate arguments that may be advanced in the future to support specific claims of trade secrecy.

Accordingly, 40 CFR § 2.107a is hereby amended to read as set forth below. In view of the fact that no member of the public will be required to modify his actions in light of the amendments, which will only affect internal Agency procedures, it is hereby found pursuant to 5 U.S.C. 553(d) that good cause exists for dispensing with the requirement of 30 days' delay in the effective date of the amendments, and they are therefore effective on August 21, 1973.

§ 2.107a Trade secrets and privileged or confidential information.

(a) *Trade secrets.*—(1) In the event records requested under this part may contain trade secrets, the office responsible for maintaining the records requested will forward the request for determination and accompanying materials referred to in § 2.105(b) only to the Office of General Counsel, and the notice referred to in § 2.105(b), unless published in the FEDERAL REGISTER, will be sent by certified mail (return receipt requested): *Provided,* That notice under § 2.105(b) need not be given if similar notice was given prior to referring the matter to the Office of General Counsel.

(2)(i) If a person, to whom notice of a request for records has been given under § 2.105(b), or otherwise, advises the Office of General Counsel, in writing, prior to the expiration of 10 working days following the receipt or publication of such notice, that the requested records contain trade secrets furnished by such person, the portions of such records said to contain trade secrets shall not be disclosed, nor copies provided, unless the General Counsel shall first have made a final written determination that such records do not in fact contain trade secrets, or unless such disclosure is authorized by statute in spite of the provisions of 18 U.S.C. 1905.

(ii) In the event no claim or other response is received by the Office of General Counsel prior to the expiration of the 10 working days specified herein, it will, before reaching a determination with respect to trade secrecy, make prompt inquiries to ensure that the absence of a response hereunder is not attributable to delay or failure of the mails. A claim, including a claim asserted by telephone, made at the time of such inquiries and confirmed in writing will be considered timely for purposes of paragraph (a)(3) of this section. The Office of General Counsel will promptly notify the requesting party whenever a claim is made under this paragraph.

(iii) In making a determination under this paragraph, the General Counsel will consider any additional information submitted to the Office of General Counsel within 30 days of receipt of a claim made hereunder, or within such longer time period requested by the claimant or the requesting party as it may agree to. If authorized by 5 U.S.C. 552(b)(4), the Office of General Counsel may agree to treat any such additional information as confidential at the request of the person submitting it, in which case it will not be disclosed without the express written permission of such person.

(iv) If the General Counsel determines that the records requested do not contain trade secrets, notice of such determination will be served by certified mail (return receipt requested) by the Office of General Counsel upon the person making the claim. No sooner than 30 days following the receipt of such notice, the requested records will be disclosed in accordance with this part.

(3) In the event a timely claim is made under paragraph (a)(2) of this section, the time limits specified in §§ 2.106(a) and 2.109(b) will not apply.

(4) Whether or not a request for information has been made under this part, the General Counsel may issue written determinations as to whether information contained in EPA records does or does not constitute trade secrets. Prior to making any such determination, however, the Office of General Counsel shall give notice of intent to make such a determination to any person who would have received notice under § 2.105(b) if a request for the information in question had been made under this part. The procedures of paragraph (a)(2) of this section shall be applicable, as appropriate, to determinations made by the General Counsel pursuant to the authority of this paragraph, and information determined not to constitute trade secrets will in no event be released to the public sooner than 30 days following the receipt of notice of any such determination, as provided in paragraph (a)(2(iv) of this section, or sooner than EPA notifies the person who submitted the information in question of its intent to release the information to the public, whichever is later. In the event a request is subsequently made under this part for information previously so determined to constitute trade secrets, EPA will be bound by that previous determination, unless the General Counsel: (i) Determines that subsequent events have destroyed the trade secrecy of the information in question, and (ii) gives written notice of such determination, and a full explanation of the basis therefor, to any person making a claim under paragraph (a)(2) of this section.

(b) *Privilegcd or confidential information.*—(1) Privileged or confidential information (other than trade secrets or financial information the disclosure of which is prohibited by 18 U.S.C. 1905), which is referred to in 5 U.S.C. 552(b)(4) and § 2.105(a)(4), and defined in paragraph (b)(2) of this section will not be disclosed under this part without the express written permission of the person providing it to EPA.

(2) For purposes of this subsection, "privileged or confidential information" means:

(i) Commercial or financial information obtained from a person pursuant to the Federal Insecticide, Fungicide, and Rodenticide Act, 7 U.S.C. 135, and privileged or confidential within the meaning of section 10(b) thereof; and

(ii) Information which an agency is authorized (but not required) by law to withhold from the public when it has been:

(A) Submitted to EPA pursuant to, and in reliance on, a pledge of confidentiality (*1*) obtained in writing from EPA, (*2*) contained in any EPA form, (*3*) contained in any request for proposals issued by EPA, or (*4*) extended by grants and procurement regulations under this title or Title 41, Code of Federal Regulations; or

(B) Received from a State or Federal agency which in turn has received the information pursuant to, and in reliance on, a pledge of confidentiality, and which continues to consider itself bound by such pledge (unless EPA is entitled by law to demand such information from the original private source).

(3) No pledge will be made by EPA under paragraph (b)(2)(ii) of this subsection in connection with information which EPA is entitled by law to demand (such as emission data under section 114 of the Clean Air Act, 42 U.S.C. 1857c–9) or which is submitted to EPA to fulfill a requirement imposed by statute or regulation in connection with a regulatory scheme of general applicability (such as information contained in applications for registrations, permits, certifications, and the like). Nothing herein is intended to affect the status of information which is required by law to be treated as confidential.

Dated: August 16, 1973.

JOHN R. QUARLES, Jr.,
Acting Administrator.

[FR Doc.73–17417 Filed 8–20–73;8:45 am]

SUBCHAPTER C—AIR PROGRAMS

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Approval of Plan Revisions

On May 31, 1972 (37 FR 10842), the Administrator approved, with specific

V 38-161 AUG 21 73 XUM

exceptions, the implementation plan submitted by the State of Maine for attainment and maintenance of national ambient air quality standards.

On March 29, 1973, after proper notification and public hearing, the Governor of the State of Maine submitted a revision to the Maine implementation plan. This revision removes fuel burning sources with a maximum heat input from three million up to, but not including, ten million Btu per hour from the control strategy for the attainment of national primary and secondary ambient air quality standards for particulate matter.

The affected sources are numerous but individually quite small. In the Portland air quality control region, for example, they account for an estimated two percent of total particulate emissions. Furthermore, many of these sources are reported already to be in compliance with the applicable particulate emission limitations. The Administrator has performed an analysis of the impact of this revision on air quality and has determined that the revision will not interfere with the attainment and maintenance of the national ambient air quality standards for particulate matter in the regions of Maine classified Priority I and IA. Therefore, this revision is approved and is incorporated as part of the Maine implementation plan. The purpose of this revision is to relieve the State of Maine and the affected source owners and operators of the administrative burden of developing individual compliance schedules for the many small sources covered by this action.

Copies of the Maine implementation plan, as revised, are available for public inspection at the Office of Public Affairs, Environmental Protection Agency, 401 M Street SW., Washington, D.C.; at the Agency's regional office, John F. Kennedy Federal Building, Boston, Massachusetts; and at the Maine Department of Environmental Protection, Augusta, Maine.

This approval is effective on August 21, 1973. The Agency finds that good cause exists for not publishing the regulation as a notice of proposed rulemaking and for making it effective immediately upon publication for the following reasons:

1. The implementation plan revision was adopted in accordance with procedural requirements of State and Federal law, which provided for adequate public participation through notice and public hearings and comments, and further participation is unnecessary and impracticable.

2. Immediate effectivenesss of the action enables the sources involved to proceed with certainty in conducting their affairs and persons wishing to seek judicial review of the actions may do so without delay.

(42 U.S.C. 1957c-5.)

Dated August 16, 1973.

JOHN QUARLES,
Acting Administrator.

Part 52 of Chapter 1, title 40, of the Code of Federal Regulations is amended as follows:

Subpart U—Maine

1. Section 52.1020 is amended by adding a new paragraph (d) as follows:

§ 52.1020 Identification of plan.

* * * * *

(d) A plan revision was submitted on March 29, 1973.

Source	Location	Regulation involved	Date of adoption	Effective date	Final compliance date
All sources subject to Regulation 100.3.1 (b) with a maximum heat input from three million up to but not including ten million Btu per hour.	Maine	100.3.1(b)	3/29/73	Immediately	N/A

3. A new § 52.1025 is added as follows:

§ 52.1025 Control strategy: Particulate matter.

(a) The revisions to the control strategy resulting from the modification to the emission limitations applicable to the sources listed below or resulting from the change in the compliance date for such sources with the applicable emission limitation is hereby approved. All regulations cited are air pollution control regulations of the State unless otherwise noted. (See § 52.1023 for compliance schedule approvals and disapprovals pertaining to one or more of the sources below.)

Source	Location	Regulation involved	Date of adoption
All sources subject to Regulation 100.3.1-(b) with a maximum heat input from three million up to but not including ten million Btu per hour.	Maine	100.3.1(b)	3/29/73

[FR Doc.73-17418 Filed 8-20-73;8:45 am]

PART 85—CONTROL OF AIR POLLUTION FROM NEW MOTOR VEHICLES AND NEW MOTOR VEHICLE ENGINES

Interim Standards for 1976 Model Year Light Duty Vehicles

On July 30, 1973, the Administrator suspended the effective date of the 1976 model year emission standards for oxides of nitrogen for those manufacturers who requested such suspension.

As required by section 202(b)(5)(B) of the Clean Air Act, the decision also established an interim nitrogen oxides emissions standard for light duty vehicles to be sold in the 1976 model year. In order to ensure that this interim standard will be incorporated in proper form in the Code of Federal Regulations, it is being republished in the form set out below.

The interim nitrogen oxides emissions standard prescribed for 1976 model year light duty vehicles of manufacturers who have been granted a suspension is 2.0 grams per mile. The statutorily required 1976 emissions standards of .41 grams per mile of hydrocarbons and 3.4 grams per mile of carbon monoxide remain in effect for all manufacturers. The nitrogen oxides emissions standard of 0.4 grams per mile originally promulgated on July 2, 1971 (36 FR 12664), for the 1976 model year remains in effect for those manufacturers who have not applied for and received a suspension and will become effective for all manufactures beginning with the 1977 model year.

Part 85 of Chapter 1, Title 40, of the Code of Federal Regulations as applicable to 1976 model year light duty vehicles is amended below. These regulations are a restatement of the requirements of the Administrator's decision which is already in effect. Since their substantive requirements have been in effect since July 30, 1973, their publication in this form is made effective on the publication date.

(Sec. 202 of the Clean Air Act, as amended, 42 U.S.C. 1957f-1)

Dated August 16, 1973.

JOHN QUARLES,
Acting Administrator.

Section 85.076-1 of Part 85, Title 40, of the Code of Federal Regulations, applicable to 1976 model year light duty vehicles, is revised to read as follows:

§ 85.076-1 Emission standards for 1976 model year vehicles.

(a) With the exception of the nitrogen oxides exhaust emission standard, the standards and test procedures set forth in § 85.075 remain applicable for the 1976 model year. Exhaust emissions from 1976 model year vehicles shall not exceed:

(1) Hydrocarbons: 0.41 gram per vehicle mile.

(2) Carbon monoxide: 3.4 grams per vehicle mile.

(3) Oxides of nitrogen: 0.40 gram per vehicle mile.

(b) For those manufacturers who have been granted a suspension of the oxides of nitrogen emissions standard specified in pargraph (a), the following standards for exhaust emissions from 1976 model year vehicles shall apply:

(1) Hydrocarbons: 0.41 grams per vehicle mile.

(2) Carbon monoxide: 3.4 grams per vehicle mile.

(3) Oxides of nitrogen: 2.0 grams per vehicle mile.

SUBCHAPTER E—PESTICIDE PROGRAMS

PART 180—TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

Gibberellic Acid

A petition (PP 3F1296) was filed by Abbott Laboratories, North Chicago, Ill. 60064, in accordance with provisions of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a), proposing establishment of a tolerance for residues of the plant regulator gibberellic acid in or on the raw agricultural commodity sugarcane at 0.15 part per million.

Subsequently, the petitioner amended the petition by proposing a tolerance for residues of the plant regulator in or on sugarcane and sugarcane fodder and forage at 0.15 part per million.

Based on consideration given the data submitted in the petition and other relevant material, it is concluded that:

1. The plant regulator is useful for the purpose for which the tolerance is being established.

2. There is no reasonable expectation of residues in eggs, meat, milk, or poultry, and § 180.6(a)(3) applies.

3. The tolerance established by this order will protect the public health.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 408(d)(2), 68 Stat. 512; 21 U.S.C. 346a(d)(2)), the authority transferred to the Administrator of the Environmental Protection Agency (35 FR 15623), and the authority delegated by the Administrator to the Deputy Assistant Administrator for Pesticide Programs (36 FR 9038), § 180.224 is revised to read as follows:

§ 180.224 Gibberellic acid; tolerances for residues.

Tolerances are established for negligible residues of the plant regulator gibberellic acid in or on the raw agricultural commodities artichokes, blueberries, citrus fruits, grapes, hops, leafy vegetables, stone fruits, sugarcane, and sugarcane fodder and forage at 0.15 part per million.

Any person who will be adversely affected by the foregoing order may at any time on or before September 20, 1973, file with the Hearing Clerk, Environmental Protection Agency, Room 3902A, 4th & M Streets SW., Waterside Mall, Washington, D.C. 20460, written objections thereto in quintuplicate. Objections shall show wherein the person filing will be adversely affected by the order and specify with particularity the provisions of the order deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought. Objections may be accompanied by a memorandum or brief in support thereof.

Effective date.—This order shall become effective on August 21, 1973.

(Sec. 408(d)(2), 68 Stat. 512; 21 U.S.C. 346a(d)(2))

Dated August 15, 1973.

EDWIN L. JOHNSON,
Acting Deputy Assistant Administrator for Pesticide Programs.

[FR Doc.73-17423 Filed 8-20-73;8:45 am]

Title 41—Public Contracts and Property Management

CHAPTER 5A—FEDERAL SUPPLY SERVICE, GENERAL SERVICES ADMINISTRATION

PURCHASE ORDERS AND SMALL PURCHASES

The following provides updated procedures for the use, preparation, and distribution of purchase orders.

PART 5A-1—GENERAL

The table of contents for Part 5A-1 is amended to add the following new entry:

5A-1.7301-1 Assigning purchase order numbers.

Subpart 5A-1.73—Preparation and Distribution of Contract Documents

Section 5A-1.7301 is revised as follows:

§ 5A-1.7301 Purchase order forms.

(a) *GSA Form 300, Purchase order.*—GSA Form 300, illustrated in § 5A-16.950-300, is available as an 8-part or 15-part form. The 15-part version incorporates as the 2nd, 3rd, and 4th copies, the original and two copies of GSA Form 301, Direct Delivery Invoice, illustrated in § 5A-16.950-301. GSA Form 300a, Purchase Order (Continuation Sheet), illustrated in § 5A-16.950-300a, is also available as an 8-part and 15-part form. GSA Form 300 may be used as a purchase order, a delivery order, or as an award document. Special instructions for preparation of GSA Form 300 are set forth in § 5A-16.950-300-1.

(b) *GSA Form 1430, GSA Stores Direct Delivery Order.*—GSA Form 1430, illustrated in § 5A-16.950-1430, is used for ordering stock items that are to be delivered by the vendor direct to the consignee. See HB, Supply Operations, chap. 9 (FSS P 2900.3). Special instructions for preparation of GSA Form 1430 are set forth in § 5A-16.950-1430-1.

(c) *GSA Form 3003, Order for Supplies or Services.*—GSA Form 3003 is a 6-part form designed for use as a computer prepared direct delivery printout, primarily for single line requisitions. The illustration in § 5A-16.950-3003 identifies the spaces that are filled in by ADP and the spaces that require manual completion by the procurement agent when used as a nonstock purchase order.

(d) *GSA Form 3014, Order for Supplies or Services.*—GSA Form 3014, illustrated in § 5A-16.950-3014, is a 10-part form designed for computer and manual preparation. It is used primarily in the automated delivery order (ADO) system for stock replenishment and nonstock direct delivery purchase orders against established sources.

§ 5A-1.7301-1 Assigning purchase order numbers.

(a) *Applicability.*—The purchase order numbering system prescribed below (see illustrations and codes in § 5A-76.320) applies to all purchase orders issued by FSS except stock replenishment purchase orders. The numbering system prescribed in the HB, Supply Operations (FSS P 2900.3), applies to all stock replenishment orders, whether issued against established source contracts by Inventory Management activities or as definitive quantity purchases by procurement activities.

(b) *Composition of purchase order number.*—The purchase order number is a 4-group, 11-position, hyphenated number, such as 6PN-E-25439-2, composed of the following elements:

(1) *Prefix.*—The prefix consists of a three-position code which identifies the buying activity, buying office, and buying program in that order.

EXAMPLE: The prefix "6PN" means Region 6, Procurement, nonstock program.

(2) *Basic number.*—The basic number is a five-digit case file number plus an alpha code prefix which denotes the type of transaction, such as "E-25439." The prefix "E" indicates it is for "export-nonstock regular surcharge," and the five-digit number "25439" denotes the case file number. To avoid any duplication of surcharge, if the cancellation results in termination charges, where a prefix code was used to make a surcharge applicable and the order is canceled, the replacement purchase order shall be issued using an "F" prefix code to indicate that no surcharge is applicable.

(3) *Suffix.*—The suffix consists of one or two positions, as required. The first position identifies the number of orders written against the case file. The first purchase order number and initial case number shall always be numbered "-1." Subsequent purchase orders on the same case file are to be numbered sequentially through 9. If the number of purchase orders exceed 9, additional orders shall be identified by alpha. The second position (alpha) is used to identify the amendments. Thus, in the example number shown in (b) above, the number "2" indicates that it is the second purchase order against the case. Since there is no alpha position shown in the suffix, the purchase order number does not represent an amendment or cancellation.

PART 5A-3 PROCUREMENT BY NEGOTIATION

Subpart 5A-3.6 Small Purchases

Section 5A-3.605-70 is revised as follows:

V 38-161 AUG 21 73 XUM

§ 5A-3.605-70 GSA Form 1430.

For use of GSA Form 1430, GSA Stores Direct Delivery Order, see §§ 5A-1.7301 (b) and 5A-72.107.

PART 5A-16—PROCUREMENT FORMS

The table of contents for Part 5A-16 is amended to add the following new entries:

5A-16.950-300-1	Special instructions for preparation of GSA Form 300, Purchase Order.
5A-16.950-1430-1	Special instructions for preparation of GSA Form 1430, GSA Stores Direct Delivery Order.
5A-16.950-3003	GSA Form 3003, Order for Supplies or Services.
5A-16.950-3014	GSA Form 3014, Order for Supplies or Services.

NOTE.—Copies of the above forms identified in this Part 5A-16 are filed with the original document.

PART 5A-76—EXHIBITS

The table of contents for Part 5A-76 is amended to add the following new entries:

5A-76.319	Purchase order forms used by buying programs.
5A-76.320	Composition of purchase order number and applicable codes.
5A-76.321	Guide for determination of billed office and consignee codes from incoming requisition data.

NOTE.—Copies of the above exhibits identified in this Part 5A-76 are filed with the original document.

(Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c); 41 CFR 5-1-101(c))

Effective date.—These regulations are effective on the date shown below.

Dated August 9, 1973.

L. E. SPANGLER,
Acting Commissioner,
Federal Supply Service.

[FR L...73-17380 Filed 8-20-73;8:45 am]

CHAPTER 14—DEPARTMENT OF THE INTERIOR

PART 14-1—GENERAL

Novation Agreements; Correction

FR Doc. 73-15076, published on page 19824 in the issue dated Tuesday, July 24, 1973, which amended Part 2 of Chapter 14 of Title 41 of the Code of Federal Regulations, is corrected by changing the title in § 14-2.407-1 from "Assistant Secretary—Congressional and Public Affairs" to "Assistant Secretary—Congressional and Legislative Affairs."

JAMES T. CLARKE,
Assistant Secretary of the Interior.

AUGUST 15, 1973.

[FR Doc.73-17352 Filed 8-20-73;8:45 am]

CHAPTER 101—FEDERAL PROPERTY MANAGEMENT REGULATIONS

SUBCHAPTER E—SUPPLY AND PROCUREMENT

[FPMR Amdt. E-132]

PART 101-32—GOVERNMENT-WIDE AUTOMATED DATA MANAGEMENT SERVICES

Implementation of Federal Information Processing Standards Publications (FIPS PUBS) Into Solicitation Documents

This amendment provides superseded and added standard terminology developed from Federal Information Processing Standards Publications (FIPS PUBS) initiated by the National Bureau of Standards, U.S. Department of Commerce.

The table of contents for Part 101-32 is amended by the following entries:

101-32.1304-3	FIPS PUB 3-1, Recorded Magnetic Tape for Information Interchange (800 CPI, NRZI).
101-32.1304-12	FIPS PUB 25, Recorded Magnetic Tape for Information Interchange (1,600 CPI, Phase Encoded).
101-32.1304-13	FIPS PUB 26, One-Inch Perforated Paper Tape for Information Interchange.
101-32.1304-14	FIPS PUB 27, Take-up Reels for One-Inch Perforated Tape for Information Interchange.
101-32.1305-2	FIPS PUB 24, Flowchart Symbols and Their Usage in Information Processing.

Subpart 101-32.13—Implementation of Federal Information Processing Standards Publications (FIPS PUBS) Into Solicitation Documents

1. Section 101-32.1304-3 is revised to read as follows:

§ 101-32.1304-3 FIPS PUB 3-1, Recorded Magnetic Tape for Information Interchange (800 CPI, NRZI).

(a) FIPS PUB 3-1 supersedes FIPS PUB 3, reflects a change in scope from the earlier version of X3.22-1967, and encompasses the recorded tape requirements only. The unrecorded tape standard will include the requirements for the physical property of the tape and reels that were previously included in FIPS 3. FIPS PUB 3-1 specifies the recorded characteristics of 9-track digital ½-inch-wide magnetic computer tape, including the data format for implementing the Federal Standard Code for Information Interchange at the recording density of 800 characters per inch (CPI). (Technical specifications of the standard are not included with FIPS PUB 3-1.)

(b) The standard terminology to be used in solicitation documents is:

All 9-track digital magnetic tape recording and reproducing equipments resulting from this solicitation employing ½-inch-wide tape at the recording density of 800 characters per inch (CPI), including associated programs, shall provide the capability to accept and generate recorded tapes in compliance with the requirements set forth in FIPS PUB 3-1.

2. Section 101-32.1304-12 is added as follows:

§ 101-32.1304-12 FIPS PUB 25, Recorded Magnetic Tape for Information Interchange (1600 CPI, Phase Encoded).

(a) FIPS PUB 25 specifies the recorded characteristics of 9-track digital ½-inch-wide magnetic computer tape, including the data format for implementing the Federal Standard Code for Information Interchange at the recording density of 1,600 characters per inch (CPI). (Technical specifications of the standard are not included with FIPS PUB 25.)

(b) The standard terminology for use in solicitation documents is:

All 9-track digital magnetic tape recording and reproducing equipments resulting from this solicitation employing ½-inch-wide tape at the recording density of 1,600 characters per inch (CPI, Phase Encoded), including associated programs, shall provide the capability to accept and generate recorded tapes in compliance with the requirements set forth in FIPS PUB 25.

3. Section 101-32.1304-13 is added as follows:

§ 101-32.1304-13 FIPS PUB 26, One-Inch Perforated Tape for Information Interchange.

(a) FIPS PUB 26 specifies the physical dimensions and tolerances of 1-inch-wide paper tape, including the size and location of the perforations used for recording information. (Technical specifications of the standard are not included with FIPS PUB 26.)

(b) The standard terminology for use in solicitation documents is:

All 1-inch-wide perforated tape and related 8-channel paper tape punch and reading equipment resulting from this solicitation utilized in Federal information processing systems, communication systems, and associated terminals employing perforated tape equipment shall provide the capability to accept and generate tapes in compliance with the requirements set forth in FIPS PUB 26.

4. Section 101-32.1304-14 is added as follows:

§ 101-32.1304-14 FIPS PUB 27, Take-up Reels for One-Inch Perforated Tape for Information Interchange.

(a) FIPS PUB 27 specifies the physical dimensions of paper tape take-up (or storage) reels with either fixed or separate flanges. The two types of reels specified differ in the size and shape of the drive hub, but both are intended for use with 1-inch perforated paper tape devices. (Technical specifications of the standard are not included with FIPS PUB 27.)

(b) The standard terminology for use in solicitation documents is:

All 1-inch perforated tape take-up reels and related devices employing such reels, including paper tape readers, punches, and related tape handling equipment, resulting from this solicitation utilized in Federal information processing systems and associated equipment employing such devices shall provide the capability to accept one of the two types of reels specified in FIPS PUB 27.

5. Section 101-32.1305-2 is added as follows:

§ 101-32.1305-2 FIPS PUB 24, Flowchart Symbols and Their Usage in Information Processing.

(a) FIPS PUB 24 establishes standard flowchart symbols and specifies their use in the preparation of flowcharts in documenting information processing systems. (Technical specifications of the standard are not included with FIPS PUB 24.)

(b) The standard terminology for use in solicitation documents is:

All new information processing system documentation involving the use of flowcharts that may result from this solicitation document must comply with FIPS PUB 24.

(Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c))

Effective date.—This regulation is effective on August 21, 1973.

Dated August 10, 1973.

ARTHUR F. SAMPSON,
Administrator of General Services.

[FR Doc.73-17381 Filed 8-20-73;8:45 am]

Title 47—Telecommunication

CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 19073; FCC 73-859]

PART 23—INTERNATIONAL FIXED PUBLIC RADIOCOMMUNICATION SERVICES

Report and Order

1. This proceeding was instituted by the Commission's notice of proposed rulemaking adopted on October 28, 1970 (35 FR 17057) for the purpose of amending certain portions of Part 23 of the Commission's rules and regulations dealing with the International Fixed Public Radiocommunications Services to bring them into conformity with the most recent revisions of the applicable international Radio Regulations and to add rules regarding certain matters which were not previously contained in this part.

2. Comments on the proposed rule revisions were received from the following parties:

All America Cables and Radio, Inc./ITT Communications, Inc.-Virgin Islands (AACR/ITT-CIVI).
American Telephone and Telegraph Company (AT&T).
ITT World Communications Inc./Press Wireless, Inc. (ITTWC).
International Telephone and Telegraph Corporation (ITT).
RCA Global Communications, Inc. (RCAGC).

with reply comments being filed by RCAGC. Except for ITT, who filed comments as a manufacturer of microwave communications equipment, these parties are licensees of radio facilities governed by Part 23, and their comments are concerned with the impact of the proposed rule revisions on the operations of their currently authorized radio facilities.

3. Standards for emission limitations are not presently specified in Part 23 of the Commission's rules and regulations. For high frequency (HF) transmitters operating at frequencies below 30 MHz, it was proposed to incorporate the current international standard for the limitation of spurious emissions set forth in Appendix 4 of the applicable International Radio Regulations in a new § 23.15(a)(2). This standard would require that spurious emissions of HF transmitters be attenuated by at least 40 decibels without exceeding the level of 50 milliwatts. This limit of 50 milliwatts is considered unnecessarily stringent by AT&T, ITTWC and RCAGC. Both AT&T and RCAGC state that they are unaware of any harmful interference resulting from spurious emissions from their HF transmitters, and AT&T proposes that this limit be increased to a level of 200 milliwatts which had been an earlier international standard and a level its HF transmitters were designed to meet. In addition, AT&T, ITTWC, and RCAGC estimate that expenditures of $1.5 million, $200,000 and $750,000, respectively, will be required to bring their HF transmitting facilities into compliance with the proposed standards.

4. The assertions of AT&T and RCAGC that they are unaware of harmful interference resulting from spurious emissions from their HF transmitters is not sufficient to guarantee that such interference has not in fact occurred. Nor do these assertions reflect the possibility that spurious emissions from their HF transmitters may have degraded the quality of the HF radio channels operated by others while not being classified as harmful interference. In view of the congested state of the HF portion of the radio spectrum, and since the operation of United States HF radio stations can have a significant impact on the quality of HF radio channels provided by stations located in other administrations at great distances from the United States, it would not be appropriate to adopt emission limitation standards for HF transmitters operated by the United States carriers which are less stringent than the applicable standards agreed to on an international basis. Moreover, the expenditures required to bring existing HF radio facilities into compliance with this international standard are small when compared to total investment in these facilities and do not justify the adoption of emission limitation standards for United States carriers in derogation of the currently applicable international standards.

5. A small measure of relief can be provided in this regard by incorporating the substance of the following provision from Appendix 4 of the International Radio Regulations into the rules to be adopted:

For transmitters of mean power exceeding 50 kilowatts and which operate below 30 MHz over a frequency range approaching an octave or more, a reduction below 50 milliwatts is not mandatory, but a minimum attenuation of 60 decibels shall be provided and every effort should be made to keep within the 50 milliwatt limit.

However, further relaxation of this standard is not warranted, and the proposed 50 milliwatt limit on spurious emissions, as modified by this provision, will be retained in the rules to be adopted.

6. For transmitters operating at frequencies above 30 MHz, emission limitation standards similar to those adopted in the Commission's Rules and Regulations for other services are proposed in the new § 23.15(b). The only comments on this proposal were filed by AT&T who states that it would be difficult to bring its existing over-the-horizon tropospheric scatter systems into compliance with this standard. Noting the limited area affected by the operations of its tropospheric scatter systems and the absence of international standards for emission limitations on transmitters operating at frequencies above 235 MHz, AT&T proposes the inclusion of a provision exempting over-the-horizon tropospheric scatter systems from compliance with the standard proposed in § 23.15(b).

7. In support of this proposal, AT&T states at one point in its comments that it "has been unable to determine the performance characteristics of these systems with respect to spurious emissions in order to comment upon the proposed limitation," but then concludes that "a special development effort of unknown duration and unknown cost will be required to determine if the necessary equipment can be purchased and modified to conform to the proposed tolerance." While there may be potential difficulties in bringing existing over-the-horizon tropospheric scatter systems into compliance with the proposed emission limitation standard, the comments of AT&T on this matter are clearly insufficient to justify a general provision in the rules exempting these systems from compliance with the emission limitation standard. Therefore, we will not incorporate this proposal in the rules to be adopted, noting that this does not foreclose AT&T from filing requests for a waiver of this requirement on a case-by-case basis, supported by detailed showings of the reasons why compliance is not technically or economically feasible.

8. The proposed rule revisions would replace the present § 23.30 with a new § 23.16 specifying more stringent standards for frequency stability of transmitters operating at frequencies below 30 MHz and establishing new standards for transmitters operating at frequencies between 30 MHz and 40 GHz.

9. RCAGC objects to proposed frequency tolerance of .001 percent applicable to its international control stations in the state of New York. Noting

V 38 161 AUG 21 73 XUM

that these stations are currently licensed with a frequency tolerance of .05 percent, RCAGC considers this proposed standard an unreasonably drastic tightening of the frequency tolerance standard governing these stations. We find some merit in these comments, and since the particular frequency band in which these stations operate, i.e. 1850–1990 MHz, is shared with stations in the operational fixed service for which a frequency tolerance standard of .02 percent is applicable, we consider it appropriate to adopt the same frequency tolerance standard of .02 percent for stations in the International Fixed Public Radiocommunications Services operating in the 1850–1990 MHz frequency band.

10. As a manufacturer of microwave communications equipment, ITT proposes that the frequency tolerance standard for the 2.2–10.5 GHz band be set at the same level as for stations in the domestic microwave service. We find merit in this proposal, and since the current standard in Part 21 of the Commission's rules and regulations for stations in the domestic common carrier microwave service in the 2.5–10.5 GHz band is currently set at .03 percent, it is this value that will be incorporated in the rules to be adopted.

11. In their joint comments, AACR/ITT–CIVI describe the facility modifications and replacements which they consider necessary to bring their currently authorized facilities into compliance with the proposed frequency stability and emission limitation standards, concluding that a period of approximately two years would be required. AT&T estimates that about six months would be required to bring its HF transmitters into compliance with the proposed frequency stability standard and that between one and two years would be required to develop the necessary equipment to bring its 840 and 880 MHz tropospheric scatter system into compliance with the applicable frequency stability standard. ITTWC and RCAGC estimate that about two and three years, respectively, would be required to bring their HF transmitters into compliance with the proposed emission limitation standard. In addition, ITTWC and RCAGC point to the declining use being made by them of their HF radio facilities in providing their international communications services and suggest that additional time be allowed to permit them to make determinations relating to the long term use to be made of these facilities in an international communications network comprised mainly of underseas cable and communication satellite facilities.

12. However, this latter point concerning the long term use to be made of HF radio facilities should have been addressed by these parties in the formulation of their comments in Docket No. 18875 (An Inquiry into policy to be followed in future licensing of facilities for overseas communications) which was initiated prior to the adoption of the Notice of Proposed Rule Making in this proceeding, and deferral of the effective date of compliance for this purpose is not warranted. We conclude that a period of two years should be sufficient to perform the necessary modifications to existing facilities to bring them into compliance with the frequency tolerance and emission limitations standards to be adopted, without causing interruption to the services being provided by these facilities, and the required date by which existing facilities must be brought into compliance with these standards will be deferred for a period of two years from the effective date of the rule revisions adopted here.

13. With respect to the proposed § 23.13 "Types of emission", both ITTWC and RCAGC propose that this section be modified to allow the use of emissions not centered on the assigned frequency in order to allow a measure of flexibility in avoiding interfering signals and in meeting fluctuating traffic loads. Provisions to this effect are presently contained in several licenses of HF radio stations, and there is merit in the incorporation of this provision in the rules to be adopted. However, use of non-centered emissions is not intended to be a normal operating practice, and the use of non-centered emissions will be subject to conditions that emsissions be contained within the authorized bandwidth centered on the assigned frequency and that a list of reference frequencies be maintained on file with the Commission.

14. ITTWC requests clarification of possible interpretations of certain portions of §§ 23.47 and 23.48 dealing with station record requirements. ITTWC states that it maintains a teleprinter connection between its New York City operating center and its HF radio station at Brentwood, New York, and that each entry of the station records is made on the continuous teleprinter roll together with the printed initials of the person making the entry. Actual signatures of persons making entries on this roll are entered only at the beginning and end of each watch. ITTWC believes that this system provides a complete and accurate record of the information required under Part 23 of the Rules, and ITTWC is concerned that a strict interpretation of the proposed rule revisions would require that each individual entry be signed, which it believes to be an inefficient procedure. ITTWC is also concerned with a strict interpretation of § 23.48 would require the maintenance of a physically separate technical log, which would require that entries made on the teleprinter roll be transferred to the technical log. In its opinion, such a procedure has the potential of introducing errors into the technical log, as well as being inefficient.

15. The intent of the proposed §§ 23.47 and 23.48 was to set forth standards for the maintenance of clear and accurate station records that could be accessed on an efficient basis. To the extent that the technical information specified in § 23.48 can be maintained in such a manner without physically separating this information from other station records, we do not construe the adoption of a separate § 23.48 of the rules dealing with this technical information to necessarily imply that this information has to be maintained in a physically separate log. In addition, we will also modify § 23.47(b) of the rules to be adopted to allow a person to certify a number of entries made by him during his watch by his signature, provided that the identity of the person making each entry is clearly indicated.

16. In addition to the modifications of the proposed rule revisions discussed above, several minor editorial changes will also be incorporated in the rules to be adopted for purposes of clarification. No matters of substance are involved in these changes. In addition, several additional definitions of technical terms referenced in Part 23 will be incorporated in the rules to be adopted.

17. Accordingly, pursuant to the authority contained in sections 4(i) and 303 of the Communication Act of 1934, as amended, *It is ordered*, That Part 23 of the Commission's rules and regulations are amended effective September 19, 1973 as set forth below.

18. *It is further ordered*, That the proceeding in Docket 19073 is terminated.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303.)

Adopted August 8, 1973.

Released August 15, 1973.

FEDERAL COMMUNICATIONS [1] COMMISSION,
[SEAL] VINCENT J. MULLINS,
Acting Secretary.

Part 23 of the Commission's rules and regulations is amended as follows:

1. Section 23.1 and headnote are revised to read as follows:

§ 23.1 Definitions.

Assigned frequency. The frequency coinciding with the center of an authorized bandwidth of emission.

Authorized bandwidth. The maximum bandwidth authorized to be used by a station as specified in the station license. This shall be occupied bandwidth or necessary bandwidth, whichever is greater.

Authorized reference frequency. A frequency having a fixed and specific position with respect to the assigned frequency.

Authorized service. The term "authorized service" of a point-to-point radiotelegraph or radiotelephone station means the transmission of public correspondence to a point of communication as defined herein subject to such special provisions as may be contained in the license of the station or in accordance with § 23.53.

Fixed public service. The term "fixed public service" means a radiocommunication service carried on between fixed stations open to public correspondence.

[1] Commissioners H. Rex Lee, Reid, and Hooks.

Fixed public press service. The term "fixed public press service" means a limited radio communication service carried on between point-to-point telegraph stations, consisting of transmissions by fixed stations open to limited public correspondence, of news items, or other material related to or intended for publication by press agencies, newspapers, or for public dissemination. In addition, these transmissions may be directed to one or more fixed points specifically named in a station license, or to unnamed points in accordance with the provisions of § 23.53.

NOTE.—This section is not intended as a definition of any press classification. Correspondence admissible under any press classification is determined by the tariffs of the various common carriers on file with the Commission.

Fixed station. The term "fixed station" in the fixed public or fixed public press service includes all apparatus used in rendering the authorized service at a particular location under a single instrument of authorization.

Frequency tolerance. The maximum permissible departure by the center frequency of the frequency band occupied by an emission from the assigned frequency or by the carrier, or suppressed carrier, from the reference frequency.

International fixed public radiocommunication service. A fixed service, the stations of which are open to public correspondence and which, in general, is intended to provide radiocommunication between any one of the contiguous 48 states (including the District of Columbia) and the State of Alaska, or the State of Hawaii, or any U.S. possession or any foreign point; or between any U.S. possession and any other point; or between the State of Alaska and any other point; or between the State of Hawaii and any other point. In addition, radiocommunications within the contiguous 48 states (including the District of Columbia) in connection with the relaying of international traffic between stations which provide the above service, are also deemed to be the international fixed public radiocommunications service; provided, however, that communications solely between Alaska, or any one of the contiguous 48 states (including the District of Columbia), and either Canada or Mexico are not deemed to be in the international fixed public radiocommunication service when such radiocommunications are transmitted on frequencies above 72 MHz.

International fixed public control service. A fixed service carried on for the purpose of communicating between transmitting stations, receiving stations, message centers or control points in the international fixed public radiocommunication service.

Occupied bandwidth. The frequency bandwidth such that, below its lower and above its upper frequency limits, the mean powers radiated are each equal to 0.5 percent of the total mean power radiated by a given emission.

Point-to-point telegraph station. The term "point-to-point telegraph station" means a fixed station authorized for radiotelegraph communication.

Point-to-point telephone station. The term "point-to-point telephone station" means a fixed station authorized for radiotelephone communication.

Point of communication. The term "point of communication" means a specific location designated in the license to which a station is authorized to communicate for the transmission of public correspondence.

Radiotelegraph. The term "radiotelegraph" as used in this part shall be construed to include types A0, A1, A2, A4, F1, F2, and F4 emission.

Radiotelephone. The term "radiotelephone" as used in this part, with respect to operation on frequencies below 30 MHz, means a system of radiocommunication for the transmission of speech or, in some cases, other sounds by means of amplitude modulation including double sideband (A3), single sideband (A3A, A3H, or A3J) or independent sideband (A3B) transmission.

§§ 23.2—23.10 [Deleted]

2. Sections 23.2 through 23.10 are deleted.

§ 23.11 [Amended]

3. In § 23.11, reference to § 23.10 is changed to § 23.1.

4. Section 23.13 and headnote are revised to read as follows:

§ 23.13 Types of emission.

Stations in the international fixed public radiocommunication services may be authorized to use any of the types of emission or combinations thereof, described in Part 2 of this chapter, as well as new types which may be developed: *Provided*, That harmful interference to adjacent operations is not caused thereby, *And provided further*, That the intelligence to be transmitted will use the bandwidth requested to a degree of efficiency compatible with the current state of the art. A determination of the possibilities of interference will be made as outlined in § 23.20. In certain cases frequencies or emissions may be authorized on a temporary basis to determine if interference will occur. During normal operations, emissions shall be centered about an assigned frequency. Non-centered emissions may be employed for short periods of time as needed to avoid interfering signals or meet fluctuating traffic loading *provided* that the occupied bandwidth of these emissions be contained within the authorized bandwidth, and *provided further* that prior to any such use, the Commission be notified of the reference frequency or frequencies proposed to be used in lieu of the assigned frequency.

5. Sections 23.14 through 23.19 are added to read as follows:

§ 23.14 Emission, bandwidth, modulation and transmission characteristics.

In the services under this part emissions are designated by their classification and their necessary bandwidth in accordance with the following procedures:

(a) Designation of emissions in applications. In applying for new frequency assignments for emissions not presently authorized, the emissions proposed to be used shall be described and their bandwidths specified as outlined in Part 2 of this chapter.

(b) Designation of emissions in authorizations. The emission designations used in authorizations will indicate only the maximum value of the necessary bandwidth in kilohertz for each type of modulation authorized.

(c) New types of emissions. If application is made for a type of emission not covered by Part 2 of this chapter, a full description of the emission must be provided and, if possible, measurements of its occupied bandwidth.

§ 23.15 Emission limitations.

(a) For all transmitters placed into operation after September 19, 1973, and for all transmitters after September 19, 1975, which operate on frequencies below 30 MHz:

(1) The occupied bandwidth of emission shall be confined within the least possible spectrum space consistent with the state of the art and the required quality of transmission, and in no event shall be more than the authorized bandwidth.

(2) Spurious emissions of transmitters of mean power of 50 kilowatts or less shall be attenuated at least 40 decibels below the mean power of the fundamental without exceeding the power of 50 milliwatts.

(3) Spurious emissions of transmitters of mean power exceeding 50 kilowatts shall be attenuated at least 60 decibels below the mean power of the fundamental and every effort should be made to keep the level of spurious emissions below the power of 50 milliwatts.

(b) For all transmitters placed into operation after September 19, 1973, and for all transmitters after September 19, 1975, which operate on frequencies above 30 MHz, the mean powers of emissions shall be attenuated below the mean output power of the transmitter in accordance with the following schedule:

(1) On any frequency removed from the assigned frequency by more than 50 percent up to and including 100 percent of the authorized bandwidth: at least 25 decibels;

(2) On any frequency removed from the assigned frequency by more than 100 percent up to and including 250 percent of the authorized bandwidth: at least 35 decibels;

(3) On any frequency removed from the assigned frequency by more than 250 percent of the authorized bandwidth: at least 40 plus 10 log (mean output power in watts) decibels, or 80 decibels, whichever is the lesser attenuation.

(c) When an emission outside of the authorized bandwidth causes harmful interference, the Commission may, at its discretion, require greater attenuation than that specified in this section.

V38-161 AUG 21 73 XUM

§ 23.16 Frequency tolerances.

The frequency tolerance for stations in the International Fixed Public Radiocommunications Services shall be maintained as prescribed in the following table:

Frequency range	Tolerances applicable to new transmitters installed after Sept. 19, 1973, and to all transmitters after Sept. 19, 1975	
	Percent	Parts per million
10 to 50 kHz	0.1	1,000
50 to 535 kHz	.02	200
1605 to 30,000 kHz	.0015	15
30 to 50 MHz	.002	20
50 to 1,000 MHz	.0005	5
1,000 to 1,850 MHz	.001	10
1,850 to 1,990 MHz	.02	200
1,990 to 2,500 MHz	.001	10
2,500 to 10,500 MHz	.03	300
10,500 to 40,000 MHz	.05	500

§ 23.17 Frequency measurement.

Each station shall provide for the measurement of all frequencies assigned thereto, and establish a procedure for checking them regularly. These measurements shall be made by means independent of the frequency control of the transmitter and shall be of accuracy sufficient to detect deviation from the assigned frequency within one-half of the allowed tolerance. A record shall be kept of the results and dates of all frequency measurements.

§ 23.18 Authorization of power.

(a) *Authorized power.* Power, when designated in the respective station license for a particular transmitter or transmitters, is peak envelope power for transmitters having full, unkeyed carrier, single sideband or independent sideband emissions, and mean power for transmitters having other emissions, unless specifically expressed otherwise. Designation of effective radiated power may appear in the station license in addition to designation of power for a transmitter or transmitters, when deemed necessary by the Commission.

(b) *Use of minimum power.* In the interest of avoiding interference to other operations, all stations shall radiate only as much power as is necessary to ensure a satisfactory service.

§ 23.19 Use of directional antennas.

Insofar as is practicable, directional antennas, of type consistent with the current state of art, shall be used on all circuits for both transmitting and receiving.

6. Section 23.21 and headnote are revised to read as follows:

§ 23.21 Communications by international control stations.

Stations in the international fixed public control service are authorized to communicate between transmitting stations, receiving stations, message centers or control points operating in the international fixed public radiocommunication services for the purpose of handling service messages or international traffic between these points: *Provided*, That only traffic originating in or destined to points outside the contiguous states may be handled. Frequencies in bands designated for international control stations in Part 2 of this chapter may be assigned to these stations.

§ 23.22 [Deleted]

7. Section 23.22 is deleted.

§ 23.29 [Amended]

8. In § 23.29, substitute the figure 5 for the figure 2 where it appears in the first sentence.

§ 23.30 [Deleted]

9. Section 23.30 is deleted.

§ 23.33—§ 23.34 [Deleted]

10. Sections 23.33 and 23.34 are deleted.

11. Section 23.41 and headnote are revised to read as follows:

§ 23.41 Quarterly report of frequency usage.

(a) Transmitted frequencies: Each licensee in the international fixed radiocommunication services shall submit a report of frequency usage for all authorized frequencies below 30 MHz for each station. If more than one station is operated from a common control point, reports for the stations may be combined into one. This report shall be due 40 days after the close of each calendar quarter and shall contain the following information: Each frequency assigned to the station or stations and the number of hours it was used during the quarter to each point of communication for each class of service rendered (such as telegraph, telephone, program, or radiophoto), the types of emission normally used to each point of communication, and the total hours each frequency was used.

(b) Received frequency report: Upon specific request by the Commission, licensees in the international fixed public radiocommunication services shall furnish promptly the following information regarding frequencies received from all points of communication: All frequencies received, including call signs, location of transmitting station, type and bandwidth of emission normally employed, point of reception, and a symbol from the following table indicating the amount of usage of the particular received frequency.

Symbol	*Usage*
D	Daily regular use during business days.
O	Occasional use; not used daily, but offered frequently when required by propagation or operational conditions.
S	Seldom received; where records indicate light use during the past year.
L	Limited use; limited by solar activity to a part of the solar cycle or to a part of each year.

The following criteria shall be used to determine whether or not a frequency shall be reported as received:

(1) Report all frequencies regularly used during the period under consideration.

(2) Report frequencies received consistently during a substantial part of any cyclical change in frequency usefulness even though they may be unused for considerable periods of time during another part of the cycle.

(3) Do not report any frequency, the use of which is known to have been discontinued or transferred to another operation by a foreign correspondent.

(4) Do not report any frequency which has been inactive for a period of 6 months or longer, except as indicated in paragraph (2) of this section.

12. Section 23.46 and headnote are revised to read as follows:

§ 23.46 Operators, class required and general duties.

(a) The operation and control of all transmitting apparatus licensed at a station in the international fixed public radiocommunication services shall be carried on only by a person holding a valid operator license issued by the Commission, except as provided in other paragraphs of this section.

(b) Classes of operator licenses required are as follows:

(1) Radiotelegraph stations: Radiotelegraph or Radiotelephone first- or second-class license: *Provided, however:*

(i) If manual morse code keying is used for transmitting public correspondence, the person manipulating the telegraph key shall be the holder of a radiotelegraph first- or second-class license except as provided by paragraph (iv of this section;

(ii) If manual morse code keying is used only for the purposes of identification or for sending service messages, the person manipulating the telegraph key shall be the holder of a radiotelegraph third-class permit or higher class of radiotelegraph license except as provided by paragraph (iv) of this section;

(iii) If automatic keying equipment is used, the operator of such equipment may send short service signals (requests for repeats, etc.) by manual morse code without being the holder of a radio operator license.

(iv) Unlicensed telegraph operators of appropriate skill as determined by the radio station licensee may manipulate the telegraph key of radiotelegraph stations provided that properly licensed radiotelegraph operators are on duty at the transmitting station or authorized remote control point and that such licensed operators are fully responsible for the proper operation of the transmitting equipment.

(2) Radiotelephone stations: Radiotelephone first- or second-class license: *Provided, however,* that, if manual morse code keying is employed in accordance with § 23.12, the person manipulating the telegraph key shall be the holder of a valid radiotelegraph third-class permit or higher class of radiotelegraph license.

(3) Radiotelegraph - Radiotelephone stations: Provisions under subparagraph (1) of this paragraph are applicable.

(4) International control stations: Radiotelegraph or radiotelephone first- or second-class license.

(c) One or more licensed operators of the grade specified in paragraph (b) of this section shall be on duty at the place where the transmitting apparatus is located and in actual charge thereof when it is being operated: *Provided, however,* That:

(1) In case of stations in these services operating on frequencies above 30 MHz, the Commission may authorize unattended operation upon application therefor and showing that the equipment is so designed and constructed as to make such operation feasible. When such unattended operation is authorized, properly licensed operators shall be on duty at a terminal of the system of which the unattended station or stations are a part or shall be available on call to perform necessary maintenance duties.

(2) In the case of a station where remote control is used, the Commission may grant authority to employ an operator or operators at the control point in lieu of the place where the transmitting apparatus is located, provided that the following conditions are complied with:

(i) The transmitter shall be so installed and protected that it is not accessible to other than duly authorized persons.

(ii) A device shall be provided at the remote control point which gives a continuous visual indication whenever the control circuits have been placed in a condition to activate the radio transmitting apparatus.

(iii) Provision shall be made to monitor aurally all transmissions originating under control of the responsible operator at the remote point.

(iv) The radiation of the transmitter shall be suspended immediately when there is a deviation from the terms of the station license or applicable provisions of this chapter.

(v) When remote control of a transmitter is performed from a separate location such as a message center or telephone exchange and manual morse code keying is not used, the operator(s) at that point need not be licensed by the Commission provided that licensed operator(s) are on duty at the transmitter location or authorized remote control point at all times that the station is in operation, and they are fully responsible for the proper operation of the transmitting equipment. If manual morse code keying is used at a remote control point, the provisions of paragraph (b)(1) of this section shall apply.

(3) When a radio station is radiating, all adjustments or tests during or coincident with the installation and servicing or maintenance of the transmitter and its associated equipment which may affect the quality of transmission or possibly cause the station radiation to exceed the limits specified in its instrument of authorization or in the rules pertaining to such station shall be made by or under the immediate supervision and responsibility of a person holding the proper license, who shall be responsible for the proper functioning of the radio facilities. A radiotelephone station must be under the supervision of a person holding a radiotelephone or radiotelegraph first- or second-class license, and a radiotelegraph station must be under the supervision of a person holding a radiotelegraph first- or second-class license.

(4) When a radio station is not radiating, persons of appropriate technical skill, who are not licensed radio operators, may perform the functions described in subparagraph (3) of this section without direct supervision after having been authorized to do so by the responsible licensed operator under whose immediate supervision the facilities shall thereafter initially be placed in operation and be determined to be operating properly.

13. Section 23.47 and headnote are revised to read as follows:

§ 23.47 Station records.

(a) Station records shall be kept in an orderly manner, and in such detail that the data required is readily available. Key letters, abbreviations, or symbols may be used if proper meaning or explanation is set forth in the record.

(b) Each entry in the records of a station shall be made by a person qualified to do so and having actual knowledge of the facts to be recorded, and each entry shall clearly identify the person making the entry. Each entry or group of entries shall be certified by the signature of the person or persons responsible: *Provided,* That each physical page contain such certification: *And provided further,* That any such group of entries contain entries made only during a single daily period of duty.

(c) No record or portions thereof shall be erased, obliterated, or wilfully destroyed within the required retention period. Any necessary correction may be made only by the person originating the entry, who shall strike out the erroneous portion, initial the corrections made, and indicate the date of correction.

(d) The records required by this part shall be retained for a period of at least 1 year: *Provided, that:*

(1) Records involving communications incident to a disaster or which include communications incident to, or involved in, an investigation by the Commission and concerning which the licensee has knowledge shall be retained by the licensee until specifically authorized in writing by the Commission to destroy them.

(2) Records incident to or involved in any claim or complaint of which the licensee has knowledge shall be retained by the licensee until such claim or complaint has been fully satisfied or until the same has been barred by statute limiting the time for the filing of suit upon such claim.

14. Section 23.48 are revised to read as follows:

§ 23.48 Content of station records.

(a) For each station in the services under this part, except stations in the international fixed public control service, the licensee shall maintain a technical log of the station operating showing:

(1) Signature of each licensed operator responsible for the operation of the transmitting equipment and an indication of his hours of duty.

(2) Hours of use of each frequency assignment and type of emission indicating time of beginning and end of each period of operation and points of communication to which each frequency is used (or area if service is pursuant to § 23.53).

(3) Hours of use of each transmitter indicating time of beginning and end of each period of operation.

(4) Power input to the final stage of each transmitter.

(5) Dates and results of each frequency measurement.

(b) For stations in the international fixed public control service, the licensee shall maintain a technical log of the station operating showing:

(1) Normal hours of operation and dates and times of interruptions to service.

(2) Dates and results of each frequency measurement.

(3) When service or mainfenance duties are performed, the responsible operator shall sign and date the station record giving pertinent details of all duties performed by him or under his supervision; his name and the class, serial number, and date of expiration of his license.

(c) For each station having an antenna structure which is required to be obstruction-lighted, appropriate entries shall be made in the station's technical log as required by § 23.39.

§ 23.49 [Redesignated]

15. Section 23.49, "Equal employment opportunities", is redesignated as § 23.55. Former § 23.48, "Discontinuance of operation", is redesignated as new § 23.49.

16. Section 23.50 is added to read as follows:

§ 23.50 Place of filing application; fees and number of copies.

(a) Standard numbered forms applicable to the international fixed public radiocommunication services discussed within the subpart are as follows:

Form No.	*Description*
403	Application for radio station license or modification thereof.
405	Application for renewal of radio station license in specified services.
407	Application for radio station construction permit.
408	Application for temporary authorization in addition to authority contained in license.
408	Application for temporary authorization in addition to authority contained in license.
701	Application for additional time to construct radio station.

V38-161 AUG 21 73 XUM

Form No.	Description
702---	Application for consent to assignment of radio station construction permit or license (for stations in services other than broadcast).
704---	Application for consent to transfer of control of corporation holding common carrier radio station construction permit or license.
714---	Supplement to application for new or modified radio station authorization (concerning antenna structure notification to FAA).

These forms may be obtained from the Secretary, Federal Communications Commission, Washington, D.C. 20554, or from any of the Commission's engineering field offices, the addresses of which are listed in § 0.121(a) of this chapter.

(b) Every application for a radio station authorization and all correspondence relating thereto shall be submitted to the Commission's office at Washington, D.C. 20554.

(c) Unless otherwise specified in a particular case, or for a particular form, each application, including exhibits and attachments thereto, shall be filed in duplicate.

(d) Each application shall be accompanied by a non-refundable fee prescribed in Subpart G of Part 1 of this chapter.

Title 49—Transportation

CHAPTER X—INTERSTATE COMMERCE COMMISSION

SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[S.O. 1148]

PART 1033—CAR SERVICE

Graham County Railroad Co.

At a session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 15th day of August 1973.

It appearing, that the Graham County Railroad Company has filed an application with the Interstate Commerce Commission in Finance Docket No. 27463 for a certificate of public convenience and necesssity authorizing the operation over approximately 12.5 miles of existing line of track, not now operated by a common carrier, between a point of connection with the Southern Railroad Company at Topton Junction, North Carolina, located approximately 11.5 miles east of Robbinsville, North Carolina, and a point approximately 1 mile west of Robbinsville, North Carolina, together with approximately 9,500 feet of existing yard, team, and interchange tracks; that this track is the only source of rail service between the aforementioned points; that the Commission is of the opinion that there is immediate need for service over this line pending decision by the Commission in Finance Docket No. 27463, and that the operation of this line by the Graham County Railroad Company is necessary in the interest of the public and the commerce of the people; and that notice and public procedure herein are impracticable and contrary to the public interest, and that good cause exists for making this order effective upon less than thirty days' notice.

It is ordered, That:

§ 1033.1148 Service Order No. 1148.

(a) *Graham County Railroad Company authorized to operate over trackage in Graham County, North Carolina.*—The Graham County Railroad Company be, and it is hereby, authorized to operate over approximately 12.5 miles of existing line of track in Graham County, North Carolina, not now operated by a common carrier, between a point of connection with the Southern Railroad Company at Topton Junction, North Carolina, located approximately 11.5 miles east of Robbinsville, North Carolina, and a point approximately 1 mile west of Robbinsville, North Carolina, together with approximately 9,500 feet of existing yard, team, and interchange tracks.

(b) *Application.*—The provisions of this order shall apply to intrastate, interstate, and foreign traffic.

(c) *Effective date.*—This order shall become effective at 12:01 a.m., August 21, 1973.

(d) *Expiration date.*—The provisions of this order shall expire at 11:59 p.m., December 31, 1973, unless otherwise modified, changed, or suspended by order of this Commission.

(Secs. 1, 12, 15, and 17(2), 24 Stat. 379, 383, 384, as amended; 49 U.S.C. 1, 12, 15, and 17(2). Interprets or applies Secs. 1(10–17), 15(4), and 17(2), 40 Stat. 101, as amended. 54 Stat. 911; 49 U.S.C. 1(10–17), 15(4), and 17(2).)

It is further ordered, That copies of this order shall be served upon the Association of American Railroads, Car Service Division, as agent of the railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that notice of this order shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board.

[SEAL] ROBERT L. OSWALD, *Secretary.*

[FR Doc.73-17391 Filed 8-20-73;8:45 am]

Title 50—Wildlife and Fisheries

CHAPTER I—BUREAU OF SPORT FISHERIES AND WILDLIFE, FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 28—PUBLIC ACCESS, USE AND RECREATION

Upper Mississippi River Wild Life and Fish Refuge, Illinois and Certain Other States

The following special regulations are issued and are effective on August 21, 1973.

§ 28.28 Special regulations, public access, use and recreation; for individual wildlife refuge areas.

ILLINOIS, IOWA, MINNESOTA AND WISCONSIN

UPPER MISSISSIPPI RIVER WILD LIFE AND FISH REFUGE

Public use is permitted on the Upper Mississippi River Wild Life and Fish Refuge in accordance with state laws and subject to the following special conditions:

(1) The cutting of all live trees is prohibited, except that willow may be used for trap stakes, commercial fishing gear and hunting blinds.

(2) No live fire, including hot charcoal, shall be buried and/or left unattended.

(3) The abandonment, burying or placing in the water of garbage, trash, camping and picnic debris, and all other deleterious materials is prohibited.

(4) The use on refuge lands of motorized vehicles of any type is prohibited except on designated public roads and routes of travel as established by the refuge manager.

(5) All state laws on use, possession, transportation and sale of alcoholic beverages which are applicable to the geographic area concerned are adopted and made a part hereof.

(6) The use and/or possession on the refuge of all controlled substances, including but not limited to opiates, cocaine, marijuana, hashish, depressants, stimulants, or hallucinogenic drugs is prohibited except when such use or possession is for the person's own use as authorized by law. All state laws on controlled substances applicable to the geographic area concerned are adopted and made a part hereof.

(7) Camping, defined as the use of tent camps; bedrolls; and all types of floating craft, motorized vehicles, trailers and other shelters for overnight stays for the purpose of sleeping, is permitted on the Upper Mississippi River Wild Life and Fish Refuge subject to the following restrictions:

(a) The period of camping by an individual or group shall not exceed fourteen (14) consecutive days at any one site or within 300 feet of such site.

(b) The leaving of tents, camping equipment or floating craft at an unoccupied campsite for more than 24 hours is prohibited. Such gear will be considered as abandoned and is subject to impoundment.

(c) The erection of tables, fireplaces, latrines and other structures and facilities related to camping is prohibited unless all vestiges of same are removed when the camper departs from the site.

(d) Camping is prohibited on developed access and parking areas and on all other areas posted against camping. Camping on the refuge while engaged in fur animal trapping is prohibited. Camping on land on the refuge while engaged in hunting is prohibited except on sites readily visible from the main commercial navigation channel of the Mississippi River or on designated developed camp sites. Camping while engaged in hunting is prohibited in all areas closed to such hunting.

(8) The placement on the refuge of boathouses, boat docks, boat slips, storage boxes or sheds, stairways, wells, septic systems, sewer systems of any type, and all other kinds and types of construction is prohibited without written authorization of the refuge manager or his authorized representative. All new structures, including boathouses, houseboats, docks, piers and floats authorized by permit to be moored, anchored, or secured along the shoreline and on the waters of the Mississippi River within the Upper Mississippi River Wild Life and Fish Refuge must use flotation methods and devices of a type constructed of polyurethane, high-impact polyethylene fiberglass material, wood timbers, or other inert materials to provide flotation. The use of any iron or steel container not fabricated originally for flotation purposes, including barrels, tanks and other containers originally constructed for the purpose of containing fluids, powders or similar products is prohibited for new structures *or for replacement of flotation devices in existing structures* unless filled with polyurethane.

The provisions of this special regulation supplement the regulations which govern public access, use and recreation on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 28, and are effective until June 30, 1974.

WAYNE E. GUESWEL,
Refuge Manager, Upper Mississippi River Wild Life and Fish Refuge.

JULY 23, 1973.

[FR Doc.73-17351 Filed 8-20-73;8:45 am]

PART 32—HUNTING

Seney National Wildlife Refuge, Michigan

The following special regulation is issued and is effective on August 21, 1973.

§ 32.22 Special regulations; upland game, for individual wildlife refuge areas.

MICHIGAN

SENEY NATIONAL WILDLIFE REFUGE

The public hunting of Ruffed Grouse and Snowshoe Hare on the Seney National Wildlife Refuge is permitted only on the area designated as open to hunting. This open area, comprising 33,525 acres, is delineated on maps available at refuge headquarters, Seney, Michigan and from the Regional Director, Bureau of Sport Fisheries and Wildlife, Federal Building, Fort Snelling, Twin Cities, Minnesota 55111.

Hunting shall be in accordance with all applicable State regulations governing the hunting of these species subject to the following special conditions:

(1) That portion of the refuge designated as Area A is closed to all hunting until November 15.

(2) All motorized conveyances are prohibited from traveling on dikes or off established roads and trails. Motorized bikes, All-Terrain Vehicles, and snowmobiles are not permitted on the refuge.

The provisions of this special regulation supplements the regulations which govern hunting on wildlife refuge areas, generally, which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through February 28, 1974.

LAWRENCE G. KLINE,
Refuge Manager, Seney National Wildlife Refuge, Seney, Michigan.

AUGUST 9, 1973.

[FR Doc.73-17346 Filed 8-20-73;8:45 am]

PART 32—HUNTING

Sherburne National Wildlife Refuge, Minnesota

The following special regulation is issued and is effective on August 21, 1973.

§ 32.22 Special regulations; upland game, for individual wildlife refuge areas.

MINNESOTA

SHERBURNE NATIONAL WILDLIFE REFUGE

The public hunting of ruffed grouse, grey and fox squirrels, rabbits and hares, and pheasants on the Sherburne National Wildlife Refuge is permitted only on the area designated by signs as open to hunting. This open area, comprising 17,679 acres, is delineated on a map available at refuge headquarters, Box 158, Princeton, Minnesota 55371, and from the Regional Director, Bureau of Sport Fisheries and Wildlife, Federal Building, Fort Snelling, Twin Cities, Minnesota 55111.

Hunting shall be in accordance with all applicable State regulations covering the hunting of upland game subject to the following special conditions:

(1) All motorized conveyances are prohibited from traveling off of established roads and parking areas open to such travel.

(2) Parking of vehicles is restricted to designated parking areas.

(3) Snowmobile operation is prohibited on the refuge except within the rights-of-way of County Roads 4, 5, 9, 11, and 48.

(4) Overnight camping and open fires are prohibited.

(5) Boats, without motors, may be used on the St. Francis River only from designated river access sites.

(6) Construction of any permanent artificial scaffold, platform, blind, or other construction is prohibited.

The provisions of these special regulations supplement the regulations which govern hunting on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through March 1, 1974.

JOHN E. WILBRECHT,
Refuge Manager, Sherburne National Wildlife Refuge, Princeton, Minnesota.

AUGUST 14, 1973.

[FR Doc.73-17350 Filed 8-20-73;8:45 am]

PART 32—HUNTING

National Wildlife Refuges in Certain States

The following special regulations are issued and are effective on September 21, 1973.

§ 32.32 Special regulations; big game; for individual wildlife refuge areas.

ALABAMA

WHEELER NATIONAL WILDLIFE REFUGE

Public hunting of white-tailed deer on the Wheeler National Wildlife Refuge is

V 38-161 AUG 21 73 XUM

permitted only on the area designated by signs and/or on hunt maps as open to hunting. This open area, comprising that part of the Wheeler National Wildlife Refuge located within the boundaries of the Redstone Arsenal Reservation, is delineated on maps available at the Refuge Headquarters, Box 1643, Decatur, Alabama 35601, the Provost Marshal's Office at Redstone Arsenal, and from the office of the Regional Director, Bureau of Sport Fisheries and Wildlife, 17 Executive Park Drive NE., Atlanta, Ga. 30329. Hunting shall be in accordance with all applicable State regulations covering the hunting of white-tailed deer and regulations governing hunting on Redstone Arsenal, subject to the following special conditions:

(1) Hunting shall be by daily permit only, to be obtained from the Provost Marshal's Office, Redstone Arsenal, or his representatives. Civilians will be given parity with military personnel in the issuance of these permits.

(2) Hunting will be limited to the periods October 20–21, 1973, November 3–4, 1973, and November 17–18, 1973, archery only, either sex; November 24–25, 1973, December 8–9, 1973, and December 21–23, 1973, guns only, antlered bucks only; and December 29, 1973, January 5, 1974, and January 12, 1974, guns only, either sex.

(3) Arms are limited to shotguns of gauges 20 to 12 and loaded with single ball only and longbows with broadhead arrows.

The provisions of this special regulations supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through January 12, 1974.

ARKANSAS

HOLLA BEND NATIONAL WILDLIFE REFUGE

Public hunting of deer with longbow and arrow on the Holla Bend National Wildlife Refuge, Arkansas, is permitted. This area, comprising approximately 6,367 acres, is delineated on a map available at Refuge Headquarters, Box 746, Russellville, Arkansas 72801, and from the office of the Regional Director, Bureau of Sport Fisheries and Wildlife, 17 Executive Park Drive NE., Atlanta, Ga. 30329. Hunting shall be in accordance with all applicable State and Federal regulations covering the hunting of deer subject to the following special conditions:

(1) Hunting dates: October 1 through November 17, 1973.

(2) Hunters may not enter the refuge earlier than 2 hours before official sunrise daily.

(3) No firearms permitted.

(4) All deer taken must be reported before leaving the refuge.

(5) Only portable tree stands capable of being quickly removed are permitted.

(6) Hunters are prohibited from driving vehicles across or otherwise damaging standing crops and may not park their vehicle so as to block any road or thoroughfare.

(7) All hunters must register upon entering the refuge each day.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through November 17, 1973.

WHITE RIVER NATIONAL WILDLIFE REFUGE

Public hunting for white-tailed deer on the White River National Wildlife Refuge, Arkansas, is permitted only on the areas designated by signs as open to hunting. These open areas are delineated on maps available at the refuge headquarters and from the office of the Regional Director, Bureau of Sport Fisheries and Wildlife, 17 Executive Park Drive NE., Atlanta, Ga. 30329. Hunting shall be in accordance with all applicable State regulations and subject to the following special conditions:

(1) Species permitted to be taken: White-tailed deer, beaver, and feral hogs.

(2) Open season: Archery—October 16–30; Muzzle loading rifle—October 26–27; Gun—November 23–24 and November 30–December 1, 1973.

(3) Bag limits: Muzzle loading rifle—one antlered deer having at least 3 points or forked antlers, beaver, and feral hogs; Archery and Gun—one deer of either sex, beaver, and feral hogs.

(4) Weapons: (a) Gun—in accordance with State regulations.

(b) Archery—longbows only with a minimum pull of 40 pounds and arrows with a ⅞ inch minimum width blade.

(c) Muzzle loading rifles—fired by flintlock or percussion cap, with bore not smaller than forty caliber using a single ball or slug.

(5) Shooting is not allowed from boats, vehicles, or roadways used by vehicles. Dogs and horses are not allowed, and all vehicles, including Jeeps, Scouts, Tote Goats, Hondas, etc., must stay on roads and trails. Shooting hours are 30 minutes before sunrise to 30 minutes after sunset. Camping is permitted in designated areas. Hunters may enter the open hunting area at noon on the date preceding each hunt. Fires can be built only at the campsites.

(6) Deer killed during the 4 days of gun hunting must be tagged immediately with the State and Federal tags and also checked at one of the designated check stations between 7:30 A.M. and 7 P.M.

(7) Hunters may not return to hunt hogs or beaver after they have killed a deer.

(8) No permit required for archery hunt. Permits are required for the gun hunts. Gun hunters under 18 years of age must be accompanied by an adult.

(9) All hunters must exhibit their hunting license, deer tag, game, and vehicle contents to Federal and State officers upon request.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through December 31, 1973.

FLORIDA

LAKE WOODRUFF NATIONAL WILDLIFE REFUGE

Public hunting of white-tailed deer and feral hogs is permitted on approximately 775 acres of Lake Woodruff National Wildlife Refuge. The area open to hunting includes all of Tick Island as delineated on a map available at the Refuge Headquarters, Post Office Box 488, DeLeon Springs, Fla. 32028, or from the office of the Regional Director, Bureau of Sport Fisheries and Wildlife, 17 Executive Park Drive NE., Atlanta, Ga. 30329. Hunting shall be in accordance with all applicable State regulations governing the hunting of white-tailed deer and hogs, subject to the following special conditions:

(1) Species permitted to be taken: White-tailed deer (either sex on archery hunt; antlered bucks only on primitive gun hunt) and hogs.

(2) Bag limits: White-tailed deer—one per season; hogs and pigs—no limit.

(3) Open seasons: Bow and arrow—November 17–18, 1973, and December 1–2, 1973. Primitive gun—December 15–16, 1973, and December 29–30, 1973.

(4) Methods of hunting—(a) Bow and arrow seasons—longbows capable of casting a 1-ounce hunting arrow 150 yards. Sharp broadhead arrows must be used. Firearms and crossbows are prohibited. Hunters must be on stands from one-half hour before sunrise to 1½ hours after sunrise. No stalking or movement through the woodlands is permitted during the stand hours.

(b) Primitive gun season—Weapons permitted are muzzle loading percussion cap or flint lock rifles with a single or double rifled barrel of .40 caliber (.40 inch) minimum and a .58 caliber (.58 inch maximum bore. Minimum barrel length is 20 inches.

(5) Access and hours of use: No overnight use is permitted on the refuge. No entry will be permitted on the island prior to 1½ hours before sunrise and all hunters must be off the island by 1 hour after sunset. Access to the island is by boat, and hunters must furnish their own transportation. All access shall be through the check station on the north side of the island. Boats must be left at the check station while the hunter is on the island.

(6) Permits: Each participant must have in his possession a valid hunting permit issued by the Lake Woodruff National Wildlife Refuge in addition to any required State permits, licenses, etc. Permits are not transferable.

(7) Scouting: All participants issued a hunting permit by the refuge will be allowed to visit the hunt area on November 9 and 10, 1973, from 8 a.m. to 5 p.m. The hunting permit should be in possession. Weapons or dogs are not allowed. Participants may bring their families or friends while scouting the area.

(8) A red, orange, or yellow outer garment (cap, hat, shirt, coat, vest, etc.,) must be visible while hunting.

(9) Individuals under 18 years of age will not be permitted to hunt unless accompanied by a responsible adult.

(10) All fires are prohibited.

(11) No dogs are allowed on the refuge.

(12) It is unlawful to drive a nail, spike, or other metal object into any tree, or to hunt from any tree in which a metal object has been driven.

(13) Littering, cutting, or blazing live trees; disturbing any other forms of wildlife; or digging in Indian mounds is prohibited.

(14) Apprehension of a participant for any infraction of regulations shall be cause for immediate revocation of his hunting permit.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through December 30, 1973.

ST. MARKS NATIONAL WILDLIFE REFUGE

Public hunting of deer and wild hogs on the St. Marks National Wildlife Refuge, Florida, is permitted only in the area designated by signs as open to hunting. This open area, comprising approximately 1,200 acres, is delineated on a map available at the refuge headquarters and from the office of the Regional Director, Bureau of Sport Fisheries and Wildlife, 17 Executive Park Drive NE., Atlanta, Ga. 30329. Hunting shall be in accordance with all applicable State regulations governing the hunting of deer and wild hogs.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through December 31, 1973.

ST. VINCENT NATIONAL WILDLIFE REFUGE

Public hunting of white-tailed deer, feral (wild) hogs, raccoons, and opossums is permitted on 12,358 acres of St. Vincent National Wildlife Refuge. The open area, including all of St. Vincent Island, is delineated on a map available at the Refuge Headquarters, Post Office Box 447, Apalachicola, Fla. 32320, or from the office of the Regional Director, Bureau of Sport Fisheries and Wildlife, 17 Executive Park Drive NE., Atlanta, Ga. 30329. Hunting shall be in accordance with all applicable State regulations governing the hunting of white-tailed deer, wild hogs, raccoons, and opossums, subject to the following special conditions:

(1) Species permitted to be taken: White-tailed deer—either sex on archery hunts. Antlered bucks only on primitive gun hunt. Hogs and pigs (any size) raccoons, and opossums.

(2) Bag limits: White-tailed deer—1 per day, 2 per season. Hogs and pigs, raccoons, and opossums—no bag limits.

(3) Open seasons: Bow and arrow—October 18–21, 1973, and November 22–25, 1973. Primitive gun—December 13–16, 1973.

(4) Methods of hunting: (a) Bow and arrow seasons: Longbows capable of casting a 1-ounce hunting arrow 150 yards and sharp broadhead arrows. Firearms and crossbows are prohibited. Hunters must be on stands from ½ hour before sunrise to 1½ hours after sunrise. No stalking or movement through the woodlands is permitted during the stand hunt hours. There will be no required afternoon stand period although still hunting is encouraged from 4:00 P.M. until sunset.

(b) Primitive gun season: Weapons permitted are muzzle loading percussion cap or flint lock rifles with a single or doubled rifled barrel of .40 caliber (.40 inch) minimum and a .58 caliber (.58 inch) maximum bore. Minimum barrel length is 20 inches. Stand hunting is not required during the hunt season December 13–16, 1973.

(5) Permit requirements: (a) Archery hunts: a nontransferable hunting permit must be obtained at one of the check stations on the island before hunting. This permit must be kept in possession while hunting.

(b) Primitive gun hunt: Each participant must have in his possession a valid hunting permit issued by the St. Vincent National Wildlife Refuge office in Apalachicola. These permits are not transferable.

(6) Access: Initial entry onto St. Vincent Island is restricted to two check stations throughout the hunts. These are designated Campsite 1 and Campsite 2 on the hunting area map. Each hunter must check in upon initial entry and check out before he leaves the island on his last hunting day. The use of boats to gain access at other designated locations is permitted following check-in. Boats to be used to gain access at points other than check stations must first be registered at one of the check stations. The use of boats for ingress and egress at unauthorized locations is prohibited.

(7) A red, orange, or yellow outer garment (cap, hat, shirt, coat, vest, etc.) must be visible while hunting.

(8) Young people under 18 years of age will not be permitted to hunt unless accompanied while on the island by a parent or responsible adult.

(9) Camping and fires are restricted to two designated camping areas. Participants may set up camp one day prior to the opening of each hunt season and must remove all camping equipment from St. Vincent Island by 3:00 P.M. following the last day of each hunt season.

(10) Dogs are not permitted on the island.

(11) No motorized vehicles or equipment such as scooters, tote bikes, beach buggies, jeeps, portable electric generators, chain saws, etc., will be permitted.

(12) Littering and cutting of live trees is prohibited. Only dead wood may be cut.

(13) It is unlawful to drive a nail, spike, or other metal object into any tree or to hunt from any tree in which a nail, spike, or other metal object has been driven.

(14) Any infraction of regulations shall be cause for immediate revocation of hunting permits.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through December 17, 1973.

GEORGIA

BLACKBEARD ISLAND NATIONAL WILDLIFE REFUGE

Public hunting for deer on Blackbeard Island National Wildlife Refuge, Georgia, is permitted only on the area designated by signs as open to hunting. This open area, comprising 4,535 acres, is delineated on a map available at the Refuge Headquarters, Route 1, Hardeeville, S.C. 29927, and from the office of the Regional Director, Bureau of Sport Fisheries and Wildlife, 17 Executive Park Drive NE., Atlanta, Ga. 30329. Hunting shall be in accordance with all applicable State regulations covering the hunting of deer subject to the following conditions:

(1) Deer of either sex may be taken during the following open periods: October 16–19, 1973; November 20–23, 1973; and December 27–29, 1973.

(2) Hunting hours will be from daylight to 9:30 A.M. and from 3:30 P.M. to sunset daily.

(3) The season bag limit is two deer, only one of which may be a doe.

(4) Raccoons may also be taken during the above season.

(5) Only bows and arrows may be used. Bows must have not less than 40 pounds pull and arrows must be broadhead ⅞ inch or more in width. Firearms, crossbows, and mechanical bows are prohibited.

(6) Dogs are prohibited.

(7) Camping and fires will be permitted only at the designated camping area.

(8) Participants must arrange their own transportation to the island and may not enter the refuge more than 2 days in advance of each opening date.

(9) Hunters will be restricted to the camping area until the morning of the first day of each hunt period.

(10) A Federal permit is required. Permit applications must be received by the Refuge Manager, Savannah National Wildlife Refuge, Route 1, Hardeeville, S.C. 29927, by the following dates: September 25 for the hunt beginning October 16; October 30 for the hunt beginning November 20; and December 3 for the hunt beginning December 27.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally as set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through December 31, 1973.

V 38 161 AUG 21 73 XUM

PIEDMONT NATIONAL WILDLIFE REFUGE

Public hunting of white-tailed deer on the Piedmont National Wildlife Refuge, Georgia, is permitted on the refuge except in those areas designated by signs as closed. The open area, comprising approximately 32,000 acres, is delineated on the map available at the refuge headquarters and from the office of the Regional Director, Bureau of Sport Fisheries and Wildlife, 17 Executive Park Drive NE., Atlanta, Ga. 30329. Hunting shall be in accordance with all applicable State regulations covering the hunting of deer subject to the following special conditions:

(1) Open season and bag limit: (a) Archery Hunt—October 1–13, 1973. Limit two bucks or one buck and one doe.

(b) Trophy Buck Hunt—October 22–27, 1973. Limit one buck with four or more points on one side.

(c) Either Sex Hunt—November 3, November 10, and November 17, 1973. Limit one deer. Same person will not be on two hunts.

(2) Refuge roads open to travel by permit hunters only during the either sex hunts.

(3) Buckshot, handguns, crossbows, and drug-tipped arrows may not be used or possessed. Target practice during the gun hunts is prohibited.

(4) All deer killed must be checked in at refuge headquarters on the same day they are killed and before leaving the refuge area.

(5) All hunters must answer questionnaire on permit and give to refuge official by closing time on the last day of each hunt.

(6) Dogs are prohibited.

(7) Camping and fires are restricted to the designated camping area in Compartment 19 which will be open on the following dates: September 29–30; September 30–October 14; October 21–28; November 2–4; November 9–11; and November 16–18, 1973.

(8) Hunters not having reached their 18th birthday must be under the immediate supervision of a responsible adult.

(9) Hunters must furnish and wear either red, orange, or yellow vests, coats, or coveralls while on the refuge hunting areas.

(10) It is unlawful to drive a nail, spike, or metal object into any tree or to hunt from any tree in which a nail, spike, or other metal object has been driven.

(11) All areas open for hunting may be visited for scouting purposes on September 29–30, 1973, during daylight hours only. Weapons and dogs are not permitted.

(12) A refuge permit is required. Hunt permits are nontransferable. Hunters for the gun hunts will be selected by computer from applications received. Applications for the gun hunts must be made on the form available from the Piedmont National Wildlife Refuge, Round Oak, Georgia 31080. Completed applications must be in the office of the Bureau of Sport Fisheries and Wildlife, 17 Executive Park Drive NE., Atlanta, Ga. 30329, by 4:30 P.M. on September 7, 1973. Only one application per hunter is allowed. Applications may be submitted individually or as a group of not more than five. Group applications must be mailed stapled together.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally as set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through November 18, 1973.

WASSAW ISLAND NATIONAL WILDLIFE REFUGE

Public hunting for deer and raccoon on Wassaw Island National Wildlife Refuge, Georgia, is permitted on the area designated by signs as open to hunting. This open area, comprising 1,795 acres, is delineated on a map available at Refuge Headquarters, Route 1, Hardeeville, S.C. 29927, and from the office of the Regional Director, Bureau of Sport Fisheries and Wildlife, 17 Executive Park Drive NE., Atlanta, Ga. 30329. Hunting shall be in accordance with all applicable State regulations covering the hunting of deer and raccoon subject to the following conditions:

(1) Deer and raccoon may be taken during the following period: November 20 through November 23, 1973, and December 11 through December 14, 1973.

(2) Hunting hours will be from 30 minutes before sunrise to 9:30 A.M. and from 3:30 P.M. until 30 minutes after sunset each day.

(3) The season bag limit is two deer: two bucks or one buck and one doe. There is no bag limit on raccoons.

(4) Only bows and arrows may be used. Firearms, crossbows, and mechanical bows are prohibited. The bows must have a draw weight of 40 pounds or more. Arrowheads must be ⅞-inch wide or wider.

(5) Dogs are prohibited.

(6) All camping will be at designated camping areas on Pine Island. Fires must be confined to the camping areas.

(7) Participants must arrange their own transportation to Pine Island and from Pine Island to Wassaw Island.

(8) Participants may not enter the refuge more than 1 day prior to the hunt. Hunters will be restricted to the camping area until the morning of the first day of each hunt period.

(9) Individuals under 18 years of age will not be permitted to hunt unless accompanied to the island by a parent or a responsible adult.

(10) Blazing trees, driving spikes in trees, or damaging trees and shrubbery in any manner is prohibited.

(11) Litter must be deposited in the proper trash receptacles.

(12) A Federal permit is required. Permit applications must be received by the Refuge Manager, Savannah National Wildlife Refuge, Route 1, Hardeeville, S.C. 29927 by October 30 for the November 20 through November 23 hunt, and November 20 for the December 11 through December 14 hunt.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through December 14, 1973.

NORTH CAROLINA

PUNGO NATIONAL WILDLIFE REFUGE

Public hunting of white-tailed deer on the Pungo National Wildlife Refuge, N.C., is permitted on all areas not designated by signs as closed to hunting. This open area, comprising 7,000 acres, is delineated on maps available at the Refuge Headquarters, Plymouth, North Carolina, and from the office of the Regional Director, Bureau of Sport Fisheries and Wildlife, 17 Executive Park Drive NE., Atlanta, Ga. 30329. Hunting shall be in accordance with all applicable State regulations governing the hunting of white-tailed deer, subject to the following special conditions:

(1) Deer may be taken from sunrise to sunset during the following open seasons: (a) Bow and arrow only—either sex—September 21 through October 13.

(b) Two 2-day shotgun hunts—bucks only—October 15–16 and October 17–18.

(c) Two 1-day shotgun hunts—either sex—October 19 and 20.

(2) Bag limit: One deer per day, two per season.

(3) Weapons: (a) Bow and arrow as provided for in State regulations.

(b) Shotguns—20 gauge or larger used with rifled slugs or shot no smaller than No. 4 buckshot. Muzzle loading percussion cap or flint lock rifles are permitted.

(4) Permits are required for the gun hunts. Two hundred permits per hunt will be issued. Permittees will be selected by computer drawing.

(5) Modern rifles, pistols, crossbows, dogs, fires, camping, and littering are prohibited.

(6) All deer harvested must be checked out at the refuge subheadquarters on Coulbourn Road before leaving the refuge.

(7) No hunting permitted within 200 yards of the refuge subheadquarters.

(8) Motor vehicular traffic will be confined to established roads.

(9) Weapons must be unloaded while being transported in or on a vehicle.

(10) Hunters under 18 years of age must be accompanied by a responsible adult.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through October 20, 1973.

SOUTH CAROLINA

CAPE ROMAIN NATIONAL WILDLIFE REFUGE

Public hunting of big game on the Bulls Island Unit of the Cape Romain National Wildlife Refuge, Awendaw, S.C., is permitted only on the area designated by signs as open to hunting. This open area, comprising 2,500 acres, is delineated on maps available at the refuge headquarters and from the office

of the Regional Director, Bureau of Sport Fisheries and Wildlife, 17 Executive Park Drive NE., Atlanta, Ga. 30329. Hunting shall be in accordance with all applicable State regulations governing the hunting of white-tailed deer except the following special conditions.

(1) The open season for bow and arrow hunting of white-tailed deer (either sex) is October 29–November 3, November 22–24, and December 10–15, 1973, during daylight hours only.

(2) Only archery equipment which complies with the State laws of South Carolina for deer hunting is permitted. Firearms, crossbows, poison arrows, or any other weapons are prohibited.

(3) Stand hunting only is permitted on the area north of the beach road from 30 minutes before sunrise to 9 A.M. and from 3 P.M. until 30 minutes after sunset. Stalk hunting is permitted at all times on the area south of the beach road.

(4) No dogs allowed on the island.

(5) Hunters must check in with refuge personnel upon arrival and check out upon departure from Bulls Island.

(6) Hunters under 18 years of age must be accompanied by an adult.

(7) There is no limit on the number of deer taken.

(8) Camping for hunters only is authorized in the designated camp area from October 28–November 4, November 21–25, and December 9–16. Fires are restricted to the designated camp area. A camping fee of $1.00 per person per day will be required for use of the camping area during the hunts. Recreational camping by nonhunters is not permitted during the hunts.

(9) Number of hunters is not limited. Permits are required and will be issued upon arrival on Bulls Island.

(10) Arrangements for transportation to the island must be made by the hunters.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through December 17, 1973.

CAROLINA SANDHILLS NATIONAL WILDLIFE REFUGE

Public hunting of white-tailed deer is permitted on 97 percent of the Carolina Sandhills National Wildlife Refuge. This open area is designated by signs as open to hunting and delineated on a map available from Refuge Headquarters, McBee, S.C. and from the office of the Regional Director, Bureau of Sport Fisheries and Wildlife, 17 Executive Park Drive, NE., Atlanta, Ga. 30329. Hunting shall be in accordance with all applicable State regulations and subject to the following special conditions:

(1) Season: Archery only—October 15–20, 1973; gun hunts—October 29–November 3 and November 8–10, 1973.

(2) Hunters are allowed on the hunting area from 5:30 A.M. until 6:30 P.M. EST. Hunters must enter the hunting area at designated entrance points and must park their vehicles on the hunting area.

(3) Bag limits: Archery only—one buck with visible antlers and one antlerless deer. Gun hunt—bucks only with visible antlers, limit not to exceed that set by State regulations. It is illegal to pursue or shoot white colored deer.

(4) Deer drives permitted only on designated areas.

(5) Each hunter must sign in and out at a register that will be provided at the checking station.

(6) Weapons: Same as allowed on State Game Management Areas.

(7) Individuals under 18 years of age must be accompanied by a responsible adult.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through November 13, 1973.

PHILLIP S. MORGAN,
Acting Regional Director, Bureau of Sport Fisheries and Wildlife.

AUGUST 14, 1973.

[FR Doc.73–17345 Filed 8–20–73;8:45 am]

PART 32—HUNTING

Seney National Wildlife Refuge, Michigan

The following special regulation is issue and is effective on August 21, 1973.

§ 32.32 Special regulations; big game; for individual wildlife refuge areas.

MICHIGAN

SENEY NATIONAL WILDLIFE REFUGE

Public hunting of deer and bear on the Seney National Wildlife Refuge is permitted only on the area designated as open to hunting. The open area, comprising 85,200 acres, is delineated on a map available at the refuge headquarters, Seney, Michigan, and from the Regional Director, Bureau of Sport Fisheries and Wildlife, Federal Building, Fort Snelling, Twin Cities, Minnesota 55111.

Hunting shall be in accordance with all applicable State and Federal regulations covering the hunting of deer and bear subject to the following special conditions:

(1) Bow and arrow hunting is permitted only on 33,525 acres of the refuge, designated as Area B, from October 1 through November 14; and on the 85,200 acres of the refuge, designated as Area A and Area B, from December 1 through December 31.

(2) Bear may be taken by archers only from October 1 through November 14 and by gun hunters only from November 15 through November 30. Bear may not be taken with aid of dogs.

(3) Camping is permitted only west of the Driggs River except in designated Wilderness Area during the gun season. A Camp Registration Permit, obtainable at refuge headquarters, is required.

(4) All motorized conveyances are prohibited from traveling on dikes or off established roads and trails. Motorized bikes, All-Terrain Vehicles, and snowmobiles are not permitted on the refuge.

The provisions of these special regulations supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through December 31, 1973.

LAWRENCE G. KLINE,
Refuge Manager, Seney National Wildlife Refuge, Seney, Michigan.

AUGUST 9, 1973.

[FR Doc.73–17347 Filed 8–20–73;8:45 am]

PART 32—HUNTING

Sherburne National Wildlife Refuge, Minnesota

The following special regulation is issued and is effective on August 21, 1973.

§ 32.32 Special regulations; big game; for individual wildlife refuge areas.

MINNESOTA

SHERBURNE NATIONAL WILDLIFE REFUGE

Public hunting of deer on the Sherburne National Wildlife Refuge is permitted only on the area designated open to hunting. The open area, comprising 17,679 acres, is delineated on a map available at the refuge headquarters, Box 158, Princeton, Minnesota 55371, and from the Regional Director, Bureau of Sport Fisheries and Wildlife, Federal Building, Fort Snelling, Twin Cities, Minnesota 55111.

Hunting shall be in accordance with all applicable State regulations covering the hunting of deer subject to the following special conditions:

(1) All motorized conveyances are prohibited from traveling off of established roads and parking areas open to such travel.

(2) Parking of vehicles is restricted to designated parking areas.

(3) Snowmobile operation is prohibited on the refuge except within the rights-of-way of County Roads 4, 5, 9, 11, and 48.

(4) Overnight camping and open fires are prohibited.

(5) Boats, without motors, may be used on the St. Francis River only from designated river access sites.

(6) Construction of any permanent artificial scaffold, platform, blind, or other construction is prohibited.

The provision of this special regulation supplements the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50,

V 38-161 AUG 21 73 XUM

Code of Federal Regulations, Part 32, and are effective through December 16, 1973.

JOHN E. WILBRECHT,
Refuge Manager, Sherburne National Wildlife Refuge, Princeton, Minnesota.

AUGUST 14, 1973.

[FR Doc.73-17349 Filed 8-20-73;8:45 am]

PART 32—HUNTING

Audubon National Wildlife Refuge, North Dakota

The following special regulation is issued and is effective on August 21, 1973.

§ 32.32 Special regulations; big game, for individual wildlife refuge areas.

NORTH DAKOTA

AUDUBON NATIONAL WILDLIFE REFUGE

Public hunting of pronghorn antelope by gun on the Audubon National Wildlife Refuge, North Dakota, is permitted only in the area designated by signs as open to hunting. This open area, comprising 13,837 acres, is delineated on a map available at refuge headquarters and from the Area Manager, Bureau of Sport Fisheries and Wildlife, Federal Building, Bismarck, North Dakota 58501. Hunting shall be in accordance with all applicable State regulations covering the hunting of pronghorn antelope, subject to the following special conditions:

(1) Hunting is permitted from 12 noon c.d.t. September 28, 1973, to sunset of that day, and from sunrise to sunset of each day from September 29 through October 7, 1973.

(2) Hunting will be by permit only. The North Dakota Game and Fish Department will determine the number of permits to be issued for Audubon Refuge.

(3) All hunters must exhibit their hunting license, antelope tag and permit, game, and vehicle contents to Federal and State officers upon request.

(4) Vehicular traffic, including the use of boats by hunters, is prohibited on the refuge during the antelope season.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through October 7, 1973.

DAVID C. MCGLAUCHLIN,
Refuge Manager, Audubon National Wildlife Refuge, Colebarbor, North Dakota.

AUGUST 13, 1973.

Proposed Rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rulemaking prior to the adoption of the final rules.

DEPARTMENT OF THE INTERIOR

Office of Oil and Gas

[32A CFR Ch. X]

[Oil Import Reg. 1 (Rev. 5)]

O I REG. 1

Entries of Small Quantities of Crude Oil, Unfinished Oils, or Finished Products

Section 8 of Oil Import Regulation 1 (Revision 5), as amended, provides authority for the District Directors of Customs to permit without license entries of small quantities of crude oil, unfinished oils, or finished products. One type of entry covered by sec. 8 is bonded fuel which is loaded aboard an aircraft scheduled for an international flight but which aircraft is diverted from the international flight for some reason. The privilege of entry without license was provided specifically to cover such a contingency. It now appears, however, that from time to time "international" flights have been routinely diverted to domestic service after fueling with bonded fuel—a definite abuse of the entry without license privilege.

In view of the suspension by Presidential Proclamation 4210 of tariffs on petroleum and petroleum products it is believed that closer control of bonded fuel being used by the airlines is required. Accordingly, it is proposed that entries of jet fuel or motor gasoline made by reason of diverting an aircraft from an international flight be subject to the applicable import license fees. Under the proposed rulemaking the District Director of Customs may still permit the entry without license. However, each aircraft operator must file a certified report with the Director, Office of Oil and Gas, each month listing the diverted flights and the type and amount of fuel entered on each flight. The aircraft operator, not the fuel supplier, will be responsible for the payment of license fees due as the result of diverted international flights.

Failure of the aircraft operator to comply with the provisions of sec. 8 may result in suspension of the privilege of making such entries without license.

Final action upon the proposed amendment is subject to the approval of the Chairman, Oil Policy Committee.

Interested persons are invited to submit written comments on the proposed sec. 8A by September 20, 1973, to the Director, Office of Oil and Gas, Department of the Interior, Washington, D.C. 20240. Each person who submits comments is asked to provide fifteen (15) copies.

DUKE R. LIGON,
Director.

Paragraph (a) of sec. 8 of Oil Import Regulation 1 (Revision 5), as amended, is amended to read as follows:

Sec. 8 Small quantities.

(a) District Directors of Customs are authorized to permit without a license an entry for consumption of not to exceed 550 U.S. gallons of crude oil, unfinished oils, or finished products which are certified as samples for testing or analysis or which are included in shipments of machinery or equipment and are certified as intended for use in connection therewith, and baggage entries. Unless notified by the Director to the contrary, District Directors of Customs are authorized to permit without a license the entry for consumption of bonded fuel aboard an aircraft diverted from an international flight. Such fuel, however, is subject to the import license fees set forth in paragraph (i) of sec. 32. In such cases, for purposes of this regulation liability for payment of license is deemed to have occurred at the time the aircraft is diverted from an exempt international flight or a non qualifying flight has been misfueled and the owner of the aircraft is the person accruing liability. The owner(s) of aircraft so diverted shall file with the Director, Office of Oil and Gas, Department of the Interior, Washington, D.C. 20240, a written report for each calendar month listing each such flight diverted during that month and the type and quantity of fuel involved. Reports must be filed not later than the last working day of the month following the month for which the report is filed and must be accompanied by a certified check or a cashier's check payable to the Treasurer of the United States for the correct amount of license fees due. Each such report will include a statement certifying as to the accuracy and completeness of the information contained and will be signed by an officer or an authorized agent of the owner. Failure to file timely reports of diversions of international flights or misfuelings or to pay license fees as prescribed may result in the suspension or abrogation of the privilege of making such entries.

DEPARTMENT OF AGRICULTURE

Commodity Exchange Authority

[17 CR Part 16]

REPORTS BY CONTRACT MARKETS

Information To Be Furnished and Made Public; Time and Place of Filing Reports and Publication

Notice is hereby given in accordance with Administrative Procedure Provisions of 5 U.S.C. section 553 that the Secretary of Agriculture, pursuant to the authority of sections 5(b) and 8a(5) of the Commodity Exchange Act (7 U.S.C. 7(b) and 12a(5)), is considering revising Part 16 of the regulations (17 CFR Part 16) to read as set forth below. In addition, the Secretary of Secretary of Agriculture is considering revoking paragraph (a) of § 15.01 (17 CFR 15.01(a)) and deleting the column in § 15.02 (17 CFR 15.02) headed "Clearing members."

The purpose of the proposed revision of Part 16 and the changes in §§ 15.01 and 15.02 is to place on contract markets responsibility for assembling and reporting to the Commodity Exchange Authority information currently being reported separately by each clearing member and to shift from the Commodity Exchange Authority to the contract markets responsibility for keeping the public informed with regard to the daily volume of trading and open contracts in commodities traded on each such contract market. Early in the history of regulation of commodity exchanges the Grain Futures Administration found that the public needed to know the daily volume of trading and open contract data. In the 1920's, because the contract markets would not make these data public, the Grain Futures Administration began doing so and the Commodity Exchange Authority currently is continuing to release such data daily. However, all exchanges now recognize the necessity of making the data public and all nonregulated exchanges routinely are doing so. With the contract markets assuming the function of assembling such data, they will be in a position to publish it more expeditiously than will the Commodity Exchange Authority.

PART 16—REPORTS BY CONTRACT MARKETS

Sec.
16.00 Information to be furnished by contract markets.
16.01 Time and place of filing reports.
16.02 Publication of volume of trading and open contracts.
16.03 Errors or omission.

V 38-161 AUG 21 73 XUM

AUTHORITY: Secs. 5(b) and 8a(5) of the Commodity Exchange Act (7 U.S.C. 7(b) and 12a(5)).

§ 16.00 Information to be furnished by contract markets.

Each contract market shall report for each business day the following information, by commodity, by future, and by clearing member within each such future, in a form and manner approved by the Commodity Exchange Authority Regional Director having local jurisdiction with respect to such contract market:

(a) The total of all long open contracts and the total of all short open contracts carried at the end of the day covered by the report;

(b) The quantity of such contracts bought and the quantity sold during the day covered by the report;

(c) The quantity of purchase transfer trades or office trades and the quantity of sale transfer trades or office trades, which are included in the total quantity of contracts bought and sold during the day covered by the report, and the names of the clearing members who made the transfers;

(d) The quantity of purchases of futures in connection with cash commodity transactions or of futures for cash commodities and the quantity of sales of futures in connection with cash commodity transactions or of futures for cash commodities, which are included in the total quantity of contracts bought and sold during the day covered by the report, and the names of the clearing members who made the exchanges; and

(e) The quantity of the commodity delivered and the quantity received in fulfillment of such contracts during the day covered by the report.

§ 16.01 Time and place of filing reports.

Such reports shall be submitted the business day following the day for which the reports are filed and shall be filed in accordance with the instructions of the Commodity Exchange Authority Regional Director having local jurisdiction with respect to such contract market.

§ 16.02 Publication of volume of trading and open contracts.

Each contract market shall publish for each business day the following information by commodity and by future within each such commodity:

(a) The total volume of trading, excluding transfer trades or office trades;

(b) The total quantity of futures for cash transactions which are included in the total volume of trading;

(c) The total gross open contracts; and

(d) The total quantity of the commodity delivered in fulfillment of such contracts.

Such information shall be made readily available to the news media and the general public in printed form and without charge at the office and trading floor of the contract market not later than the business day following the day for which publication is made.

§ 16.03 Errors or omissions.

Any contract market discovering any errors or omissions in any report which has been filed shall promptly inform the Commodity Exchange Authority with respect thereto.

If any interested person desires a hearing with reference to this proposed regulation, he should make a request to that effect stating the reasons therefor, addressed to the Administrator, Commodity Exchange Authority, U.S. Department of Agriculture, Washington, D.C. 20250, on or before October 8, 1973.

Written statements with reference to the subject matter of this proposal may be submitted by any interested person. Such statements should be mailed to the Administrator of the Commodity Exchange Authority prior to October 8, 1973.

The transcript of the proceedings at any hearing which may be held and all written submissions made pursuant to this notice will be made available for public inspection in the Office of the Administrator, Commodity Exchange Authority, during regular business hours.

Issued August 15, 1973.

ALEX C. CALDWELL,
Administrator,
Commodity Exchange Authority.

Food and Drug Administration

[21 CFR Part 25]

DRESSINGS FOR FOOD

Identity Standards; Proposed Colorants as Optional Ingredients

Notice is given that a petition has been filed jointly by Mr. Albert J. Finberg, Consultant in Food Technology, 19A Garden Place, Brooklyn, N.Y. 11201, and copetitioners: Thomas J. Lipton, Inc., 800 Sylvan Ave., Englewood Cliffs, N.J. 07632; Hostess Products Corp., 137 Garden Ave., Brooklyn, N.Y. 11237; Supreme Oil Co., 87-11 130th St., Richmond Hill, N.Y. 11418; Purity Condiments, Inc., 3590 NW. 60th St., Miami, Fla. 33142; Venice Importing Co., 66 North 6th St., Brooklyn, N.Y. 11211; Continental Coffee Co., 2550 North Clybourn Ave., Chicago, Ill. 60614; McCormick & Co., Inc., Baltimore, Md. 21202; proposing that the provisions of § 25.2(d) be expanded to allow for optional addition of β-apo-8'-carotenal as an artificial color at a level not to exceed 33 parts per million (ppm) by weight of the finished french dressing.

Label declaration of the ingredients as required under sec. 403(k) of the Federal Food, Drug, and Cosmetic Act would be used.

Grounds given in support of the proposal are:

1. Paprika and/or oleoresin of paprika, although now listed by the standard for french dressing as a seasoning, is usually used by manufacturers of the food to produce a characteristic color for french dressing rather than as a seasoning. This characteristic color has come to be expected by the consumer of french dressing.

2. Supplies of paprika are subject to severe fluctuations in availability and quality, having a like effect on its oleoresin as well. The color intensity, listed as C.V. (color value) units in suppliers' catalogs, is an important consideration for its suitability in french dressing. β-apo-8'-carotenal (hereinafter referred to as apo-carotenal) being a synthetic material is not subject to fluctuating supply and its quality is constant.

3. Apo-carotenal is a listed food color (21 CFR 8.302) exempt from certification under the Color Additive Amendments to the Federal Food, Drug, and Cosmetic Act. It may be used up to a maximum of 15 mg. per pint (33 parts per million by weight of the finished food) in all nonstandardized foods as well as in those foods whose standards permit the use of added color. Synthetic apo-carotenal is readily available commercially and its use would assure a stable supply of pure material at stable cost.

4. The apo-carotenal serves no functional effect other than to provide a uniform, stable color. Flavor and taste are not affected. Extensive laboratory testing, as well as commercial evaluation in nonstandardized dressings, have demonstrated that apo-carotenal produces the "typical" french dressing color consumers prefer. Laboratory and pilot plant results further indicate that apo-carotenal possesses superior color shelf life stability in french dressing as compared to paprika and/or oleoresin of paprika.

The Commissioner of Food and Drugs believes reasonable grounds have been set forth in the petition to warrant publishing the proposed amendment. Having reviewed the good manufacturing practices of french dressing technology and the findings of fact for french dressing standards of identity (15 FR 5227, August 12, 1950), the Commissioner also believes that while the characteristics color for french dressing has been obtained from paprika, other safe and suitable colorants may also be used to obtain the desired color; and thus proposes on his own initiative that the standard provide for the use of any safe and suitable color additive that will impart to french dressing the color traditionally expected of french dressing. The proposed definition of "safe and suitable" to be added separately to 21 CFR 10.1 would be applicable to all food standards (38 FR 10274, April 26, 1973).

The Commissioner recognizes the desire of consumers that complete ingredient information be given on labels of standardized foods. Statutory authority does not exist to require declaration of the mandatory ingredients in such foods, and sec. 403(i) of the Federal Food, Drug, and Cosmetic Act provides that the use of artificial coloring in food need not be declared by common name. Required labeling of artificial coloring in foods is detailed in 21 CFR 1.12.

In accordance with policy set forth in 21 CFR 3.88 (38 FR 2137), included herein is a proposal on the Commissioner's own initiative to amend the standards for french dressing to require declaration of all optional ingredients by common name as required by the applicable sections of Part 1 of this chapter.

The mandatory ingredients of french dressing are a vegetable oil and an acidifying ingredient; however, because within each of these classes of mandatory ingredients more than one option exists in choosing what ingredient to use, the specific vegetable oil and acidifying ingredients used are optional ingredients. Thus, all ingredients of french dressing are required to be declared on the label.

In recently published documents to amend existing standards of identity, the Commissioner has proposed that safe and suitable optional ingredients be permitted in contrast to the more restrictive "recipe" type listing traditionally employed in food standards. However, in considering this approach for french dressing, the Commissioner recognizes that there is in the market a myriad of pourable dressings that are not included in the present standard because they do not purport to be, nor are they represented to be, french dressing. These nonstandardized pourable dressings do contain a broad range of emulsifying and acidifying ingredients which are responsible for the conspicuous differences between these foods and the standardized french dressings. Such differences occur in the appearance, the taste (sourness), and the sensory reaction (mouth-feel) of such dressings in the mouth. The french dressing standard, by restricting the acidifying and emulsifying ingredients, assures that the dressings covered by this standard maintain these characteristics traditional for french dressings.

To provide for the use of "safe and suitable" optional ingredients in place of the presently permitted emulsifying and acidifying ingredients would make these foods less discernible to consumers who now appear to have a clear choice between the french dressings covered by the food standard and other nonstandardized pourable dressings. Due to the potential impact of including the "safe and suitable" provision in the french dressing standard of identity, and because such impact cannot be adequately judged without comment from all interested parties, the Commissioner invites comments on this matter.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (secs. 401, 701, 52 Stat. 1046, 1055 as amended by 70 Stat. 919 and 72 Stat. 948; 21 U.S.C. 341, 371) and in accordance with the authority delegated to the Commissioner (21 CFR 2.120), it is proposed that § 25.2 be amended by revising paragraphs (d) and (e) to read as follows:

§ 25.2 French dressing; identity; label statement of optional ingredients.

* * * * *

(d)(1) French dressing may contain calcium disodium EDTA (calcium disodium ethylenediaminetetraacetate) or disodium EDTA (disodium ethylenediaminetetraacetate), singly or in combination. The quantity of such added ingredient or combination does not exceed 75 parts per million by weight of the finished food.

(2) French dressing may contain any safe and suitable color additives that will impart the color traditionally expected.

(e) All ingredients used in the food shall be declared on the label in accordance with the applicable sections of Part 1 of this chapter.

Interested persons are invited to submit their views in writing (preferably in quintuplicate) regarding this proposal on or before October 23, 1973. Such views and comments should be addressed to the Hearing Clerk, Department of Health, Education, and Welfare, Room 6-88, 5600 Fishers Lane, Rockville, MD 20852, and may be accompanied by a memorandum or brief in support thereof. Received comments may be seen in the above office during working hours, Monday through Friday.

Dated: August 2, 1973.

VIRGIL O. WODICKA,
Director, Bureau of Foods.

DEPARTMENT OF TRANSPORTATION

Coast Guard

[33 CFR Part 117]

[CGD 73-171N]

GREEN RIVER, KENTUCKY

Proposed Drawbridge Operation Regulations

The Coast Guard is considering amending the regulations for the Louisville and Nashville Railway bridge across the Green River at Spottsville, Livermore, and Smallhouse to require constant attendance when the vertical clearance is 40 feet or less and at least 4 hours notice at all other times. Present regulations require constant attendance when the vertical clearance is 30 feet or less and at least 8 hours notice at all other times. This proposed amendment is being considered because of an increase in commercial vessel traffic (100 percent during the past 8 years) and because of the use of towboats which require a greater vertical clearance.

Interested persons may participate in this proposed rulemaking by submitting written data, views, or arguments to the Commander (oan), Second Coast Guard District, Federal Building, 1520 Market Street, St. Louis, Missouri 63103. Each person submitting comments should include his name and address, identify the bridge, and give reasons for any recommended change in the proposal. Copies of all written communications received will be available for examination by interested persons at the office of the Commander, Second Coast Guard District.

The Commander, Second Coast Guard District, will forward any comments received before September 25, 1973, with his recommendations to the Chief, Office of Marine Environment and Systems, who will evaluate all communications received and take final action on this proposal. The proposed regulations may be changed in the light of comments received.

In consideration of the foregoing, it is proposed that Part 117 of Title 33 of the Code of Federal Regulations, be amended by:

1. Revising subparagraph (7) of paragraph (g) of § 117.560 to read as follows:

§ 117.560 Mississippi River and its tributaries and outlets; bridges where constant attendance of draw tenders is not required.

* * * * *

(g) * * *

(7) Green River, Ky. (i) Louisville and Nashville Railroad bridge at Spottsville. When there is 40 feet or less of vertical clearance beneath the draw, constant attendance is required and the draw shall open on signal. When the vertical clearance is more than 40 feet at least 4 hours notice shall be given, and during this period if a vessel informs the drawtender during its passage through the draw that it will return within 4 hours, the drawtender shall remain on duty until the vessel returns but shall not be required to remain for longer than 4 hours.

(ii) Louisville and Nashville Railroad bridges at Livermore and Smallhouse. The draws of these bridges are normally maintained in the fully open position and when they are open, a vessel may pass through the draw without further signals. When the draws are in the closed position their operation is governed by paragraph (g)(7)(i) of this section.

(iii) The owners of or agencies controlling these bridges shall arrange for ready telephone communication with the authorized representative at any time from the bridges or their immediate vicinity. Copies of these regulations shall be conspicuously posted at Green River Navigation Locks Nos. 1, 2, 3, and 4.

* * * * *

2. Redesignate § 117.560(g)(7)(ii) as § 117.560(g)(7)(iii).

(Sec. 5, 28 Stat. 362, as amended, sec. 6(g)(2), 80 Stat. 937; 33 U.S.C. 499, 49 U.S.C. 1655(g)

V 38-161 AUG 21 73 XUM

(2); 49 CFR 1.46(c)(5), 33 CFR 1.05-1(c)(4)).

Dated: August 13, 1973.

W. M. BENKERT,
Rear Admiral, U.S. Coast Guard Chief, Office of Marine Environment and Systems.

[FR Doc.73-17374 Filed 8-20-73;8:45 am]

[46 CFR Part 160]

[CGD 73-103R]

LIFEBOAT WINCHES FOR MERCHANT VESSELS

Notice of Proposed Rulemaking

The Coast Guard is considering amending the regulations for lifeboat winches for merchant vessels by eliminating a duplication existing in the requirements for power-driven winches and relocating a pertinent sentence applicable to hand cranks.

Written comments. Interested persons are invited to participate in this rule making by submitting written data, views or arguments to the Executive Secretary, Marine Safety Council (GCMC/82), Room 8234, 400 Seventh Street, SW., Washington, D.C. 20590 (Phone 202-426-1477). Written comments should include the docket number of this notice, the name and address of the person submitting the comments, and the specific section of the proposal to which each comment is addressed. (A separate page for each section commented upon and two or more copies are encouraged).

A public hearing is not contemplated for this rule making, but will be held if requested by anyone who raises a genuine issue.

Closing date for comments. All relevant communications received on or before *September 28, 1973*, will be fully considered before final action is taken on this proposal. This proposal may be changed in the light of the comments received; however, acknowledgment of individual comments will not be made. Copies of comments received will be available for examination in Room 8234. Copies of comments will be furnished to interested persons upon request to the Coast Guard (GCMC/82) and payment of the fees prescribed in 49 CFR 7.81.

Under the proposed rulemaking, § 160.015-3(j)(1), appearing in Title 46—Shipping, Parts 150 to 199, would be revoked since it now duplicates part of the requirements for power-driven winches given in § 160.015-3(1). Also in § 160.015-3(1), appearing in the same volume of the code, the last sentence would be rewritten in order to bring forward a particular requirement applicable to hand cranks now erroneously contained in § 160.015-3(j)(1).

In consideration of the foregoing, it is proposed to amend Part 160 of Title 46 of the Code of Federal Regulations as follows:

1. By revoking § 160.015-3(j)(1).

2. By revising the last sentence of § 160.015-3(1) to read:

• • • Mechanical means for accomplishing the above, such as throw-out couplings on the sockets of the hand cranks, will be given special consideration.

(46 U.S.C. 391a, 404, 481, 489; 49 U.S.C. 1655(b)(1), and 49 CFR 1.46(b) and (o)(4)).

W. F. REA, III,
Rear Admiral, U.S. Coast Guard, Chief, Office of Merchant Marine Safety.

AUGUST 15, 1973.

[Airspace Docket No. 73-CE-23]

TRANSITION AREA

Proposed Designation

The Federal Aviation Administration is considering amending Part 71 of the Federal Aviation Regulations so as to designate a transition area at Aurora, Nebraska.

Interested persons may participate in the proposed rule making by submitting such written data, views or arguments as they may desire. Communications should be submitted in triplicate to the Director, Central Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, Federal Building, 601 East 12th Street, Kansas City, Mo. 64106. All communications received by September 20, 1973, will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Regional Air Traffic Division Chief. Any data, views, or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

A public docket will be available for examination by interested persons in the Office of the Regional Counsel, Federal Aviation Administration, Federal Building, 601 East 12th Street, Kansas City, Mo. 64106.

A new public use instrument approach procedure is being developed for the Aurora, Nebraska Municipal Airport. Consequently, it is necessary to provide controlled airspace protection for aircraft executing this new approach procedure by designating a transition area at Aurora, Nebraska.

In consideration of the foregoing, the Federal Aviation Administration proposes to amend Part 71 of the Federal Aviation Regulations as hereinafter set forth:

In § 71.181 (38 FR 435), the following transition area is added:

AURORA, NEBRASKA

That airspace extending upward from 700 feet above the surface within a 5-mile radius of Aurora Municipal Airport (latitude 40°53'34" N., longitude 97°59'37"W.); and within two miles each side of the 123° radial of the Grand Island VOR, extending from the 5-mile radius to seven miles west of the airport, excluding that portion which overlies the Grand Island, Nebraska transition area.

This amendment is proposed under the authority of sec. 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348), and of Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Kansas City, Missouri, on August 2, 1973.

JOHN M. CYROCKI,
Director, Central Region.

PROPOSED BUMPER STANDARD

Correction of Closing Date

In the notice published at 38 FR 20899 (August 3, 1973) of a Bumper Standard as Part 581 of Title 49, Code of Federal Regulations, the comment closing date was stated to be September 14, 1973. The closing date intended for the comment period is October 14, 1973, and that date is hereby substituted for the September date.

(Sec. 102(e)(1), Pub. L. 92-513, 86 Stat. 947; delegation of authority at 49 CFR 1.51.)

Issued on August 15, 1973.

JAMES B. GREGORY,
Administrator.

[49 CFR Part 581]

[Docket 73-19; Notice 2]

PROPOSED BUMPER STANDARD

Notice of Public Meeting

On September 13, 1973, the National Highway Traffic Safety Administration will hold a meeting to permit a full public discussion of the bumper standard the agency has proposed under the Motor Vehicle Information and Cost Savings Act, P.L. 92-513. The proposed standard, together with a list of several subjects the agency finds appropriate for comment, was published in the FEDERAL REGISTER on August 3, 1973, (38 FR 20899).

The meeting will convene at 9:30 A.M. in room 2232 of the Department of Transportation Headquarters Building, 400 Seventh Street, SW., Washington, D.C. Persons desiring to make a formal presentation are asked to submit their requests to the Associate Administrator for Motor Vehicle Programs, NHTSA, not later than September 6, 1973. An estimate of the time required for each presentation should be given. If the presentations cannot be completed in one day, the meeting will be continued on September 14, beginning at 9:30 a.m. An agenda of the meeting will be made available by September 11, 1973.

(Sec. 102(e)(1) of the Motor Vehicle Information and Cost Savings Act, Pub. L. 92-513, 86 Stat. 947, 15 U.S.C. 1912(e)(1), and the delegation of authority at 49 CFR 1.51.)

Issued on August 15, 1973.

JAMES B. GREGORY,
Administrator.

[49 CFR Part 571]

[Docket 1-8; Notice 13]

RETREADED PNEUMATIC TIRES

Physical Dimension and Labeling Requirements

This notice proposes the amendment of the physical dimension and labeling requirements of Motor Vehicle Safety Standard No. 117, "Retreaded Pneumatic Tires".

Standard No. 117 was issued in its present form on March 23, 1972 (37 FR 5950), and subsequently amended on January 31, 1973 (38 FR 2982), March 15, 1973 (38 FR 6999), and April 19, 1973 (38 FR 9668). Petitions for reconsideration were filed in response to the notice of January 31, 1973. Several of the issues raised by the petitions were not, under NHTSA procedural rules, appropriate for reconsideration at that time. The agency indicated, in its response to the petitions of May 3, 1973 (38 FR 10940), that the petitions, insofar as these issues were concerned, were petitions for rulemaking under the procedural rules (49 CFR §§ 553.31, 35). This notice is in part issued in response to those petitions.

Several of the petitions requested that the NHTSA modify its position regarding the physical dimension requirements of the standard, requesting that the standard be amended to allow a 3 percent tolerance from the minimum size factor requirement. The petitions also implicitly request deletion of the 3 percent negative tolerance for tire maximum section width. The agency previously denied the request regarding size factor on the basis of test data which indicated that an extremely small percentage of retreaded tires did not conform to the requirement, and that its relaxation was therefore unnecessary. The industry has presented data showing a larger percentage of tires that would not meet the requirements. Irrespective of these failure rates, the NHTSA has decided to grant the request because the shrinkage of the tire during retreading, which is responsible for its inability to meet the size factor requirement, disappears after the tire is placed in service. Consequently, violations of the size factor requirement, without this amendment, would be only of a technical nature. It is proposed, therefore, that the standard be amended to allow a 3 percent tolerance from the minimum size factor requirement. The 3 percent negative tolerance for tire maximum section width would be deleted, on the grounds that this requirement unnecessarily subjects retreaded tires to a physical dimension restriction greater than that imposed on new tires.

The NHTSA also proposes in this notice that certain amendments be made to the standard's labeling provisions. The NHTSA views these amendments as technical in nature and proposes them primarily to allow comment on the solutions proposed.

The labeling requirements of the standard, both affixed (S6.3.1) and permanent (S6.3.2), provide that the tire be labeled "bias/belted" when a bias/belted tire is retreaded. This requirement is a substitution for the requirement applicable to new tires, that the tire be labeled with the actual number of plies in the sidewall, and the actual number of plies in the tread area if different (S4.3(e), 49 CFR 571.109). The phrase "bias/belted" is, in the opinion of NHTSA, less burdensome to label onto a retreaded tire than the full description of ply construction, but imparts, in the case of the bias/belted tire, essentially the same information. It was also the agency's intention to allow the labeling requirements of Standard No. 117 to be met if the retreaded tire retained through the retreading process the information labeled onto the new tire at the time of manufacture. New tires, however, are not required to be labeled "bias/belted", and consequently that information would have to be relabeled onto each bias/belted retreaded tire irrespective of whether the retreaded tire retained its original new tire labeling. The NHTSA is therefore proposing that the labeling requirements be amended to permit as an alternative to the labeling of the words "bias/belted", the labeling of the actual number of plies in the sidewall and the actual number of plies in the tread area, which will in practice be retainable from the casing.

Amendments are also proposed to make clear which methods may be used to permanently label retreaded tires. Although the standard presently specifies "molding", there was no intention to preclude other satisfactory means of permanently labeling safety information onto retreaded tires. The standard therefore would be amended to make it clear that molding, branding, or any other method that will produce a permanent label are permitted. "Permanent" is used in the sense that one could reasonably expect the label to remain on the tire throughout its useful life.

In the notice of March 15, 1973, the minimum size for labeling in paragraph S6.3.2 was changed from three thirty-seconds of an inch to 0.078 inches. That change should have also been made in paragraph S6.3.1, and is hereby proposed.

In light of the above, it is proposed that Motor Vehicle Safety Standard No. 117, appearing at 49 CFR § 571.117, be amended as follows:

1. S5.1.2 would be revised to read:

S5.1.2 Except as specified in S5.1.3, each retreaded tire, when mounted on a test rim of the width specified for the tire's size designation in Appendix A of § 571.109, shall comply with the requirements of S4.2.2 of § 571.109, except that the tire's section width shall not be more than 110 percent of the section width specified, and the tire's size factor shall be at least 97 percent of the size factor specified, in Appendix A of § 571.109 for the tire's size designation.

2. Paragraphs S6.3.1 would be revised as follows:

S6.3.1 Each retreaded pneumatic tire manufactured on or after June 1, 1973, shall be labeled, in at least one location on the tire sidewall in letters and numerals not less than 0.078 inches high, with the following information:

• • • • • •

(f) If the tire is of bias/belted construction, the words "bias/belted", or the actual number of plies in the sidewall and the actual number of plies in the tread area.

• • • • • •

The information shall either be retained from the casing used in the manufacture of the tire, or may be labeled into or onto the tire during the retreading process, either permanently (through molding, branding, or other method that will produce a permanent label) or by the addition of a label that is not easily removable.

3. Paragraph S6.3.2 would be revised as follows:

S6.3.2 Each retreaded pneumatic tire manufactured on or after February 1, 1974, shall be permanently labeled (through molding, branding, or other method that will produce a permanent label) in at least one location on the tire sidewall, in letters and numerals not less than 0.078 inches high, with the following information:

• • • • • •

(f) If the tire is of bias/belted construction, the words "bias/belted", or the actual number of plies in the sidewall and the actual number of plies in the tread area.

• • • • • •

Interested persons are invited to submit comments on the proposal. Comments should refer to the docket number and be submitted to: Docket Section, National Highway Traffic Safety Administration, Room 5221, 400 Seventh Street SW., Washington, D.C. 20590. It is requested but not required that 10 copies be submitted.

All comments received before the close of business on the comment closing date indicated below will be considered, and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will be also be considered by the Administration. However, the rulemaking action may proceed at any time after that date, and comments received after the closing date and too late for consideration in regard to the action will be treated as suggestions for future rulemaking. The Administration will continue to file relevant material, as it becomes available in the docket after the closing date, and

V 38-161 AUG 21 73 XUM

it is recommended that interested persons continue to examine the docket for new material.

Comment closing date: September 24, 1973.

Proposed effective date: Thirty days after publication of the final rule.

(Sec. 103, 112, 113, 114, 119 Pub. L. 89–563, 80 Stat. 718, 15 U.S.C. 1392, 1401, 1402, 1403, 1407, 1421; delegations of authority at 49 CFR 1.51, 49 CFR 501.8.)

Issued on August 15, 1973.

ROBERT L. CARTER,
Associate Administrator,
Motor Vehicle Programs.

CIVIL AERONAUTICS BOARD

[14 CFR Part 298]

[Economic Regs. Docket No. 25800]

CLASSIFICATION AND EXEMPTION OF AIR TAXI OPERATORS

Reporting of Certain Data by Commuter Air Carriers and Other Air Taxi Operators

AUGUST 15, 1973.

Notice is hereby given that the Civil Aeronautics Board has under consideration an amendment to Part 298 of the economic regulations (14 CFR Part 298) which would require certain additional statistical data to be reported quarterly by commuter air carriers and require all air taxi operators, including commuter air carriers, to report certain statistical data annually. The principal features of the proposed amendment are described in the attached explanatory statement, and the proposed amendment is set forth in the attached proposed rule. The amendment is proposed under the authority of sections 204(a), 407, and 416 of the Federal Aviation Act of 1958, as amended (72 Stat. 743, 766, and 771; 49 U.S.C. 1324, 1377, and 1386).

Interested persons may participate in the proposed rule making through submission of twelve (12) copies of written data, views or arguments pertaining thereto, addressed to the Docket Section, Civil Aeronautics Board, Washington, D.C. 20428. All relevant matter received on or before October 5, 1973, will be considered by the Board before taking final action on the proposed rule. Copies of such comunications will be available for examination by interested persons in the Docket Section of the Board, Room 712 Universal Building, 1825 Connecticut Avenue NW., Washington, D.C., upon receipt thereof.

By the Civil Aeronautics Board:

[SEAL] EDWIN Z. HOLLAND,
Secretary.

EXPLANATORY STATEMENT

Under the Board's present regulations, air taxi operators, other than commuter air carriers,[1] are not required to file periodic reports with respect to their operations. Moreover, the reports required of commuter air carriers include information only with respect to their scheduled operations or mail service operations.[2]

The National Transportation Safety Board (NTSB) has issued a document entitled Air Taxi Safety Study,[3] containing, *inter alia*, various data concerning air taxi accidents and the causes of such accidents. In this report NTSB notes that, because of the unavailability of certain basic data with respect to the operations of air taxis, it is not possible to accurately compare the level of air taxi safety with that of other types of air transportation. In order to have such data available, and thereby help make its future air taxi safety reports more meaningful, NTSB requests that the Board do the following:

1. Require those air taxi operators which are commuter air carriers to report the hours flown, the miles flown, and the number of departures in scheduled revenue operations.

2. Require all air taxi operators to report the number of passengers carried, the hours flown and miles flown, and the number of departures in all revenue operations.

In considering the recommendation of NTSB, the Board has reached the tentative conclusion that the suggested reporting requirements might not only help meet the needs of NTSB, but would assist us in fulfilling our direct regulatory responsibilities, with respect to air taxis, in general, and commuter air carriers, in particular. Indeed, we are of the tentative view that certain information, in addition to that requested by NTSB, should also be reported by commuter air carriers. Accordingly, we are herein proposing to require the annual reporting by all air taxis, including commuters, of the information described in the NTSB recommendations, and to expand the present quarterly reports of commuters' scheduled operations to include the additional data requested of them by NTSB, as well as the four following items: revenue passenger-miles, revenue seat-miles available, revenue ton-miles, and revenue ton-miles available.

The commuter air carrier industry has been growing rapidly in recent years. It thus appears desirable that the Board have available to it regularly reported statistics enabling it to make a continuing review of the scheduled operations of these carriers, particularly for the purpose of comparison with those of certificated air carriers. We have tentatively determined that the information which the instant proposal would require is necessary to accomplish these purposes, since it is the kind of basic data needed for analyses of route density, capacity per mile flown, and traffic per mile flown.

Since commuter air carriers are presently required to file with the Board certain operating data with respect to their scheduled operations on a quarterly basis, on CAB Form 298–C,[1] it would be feasible to accommodate on this form all of the additional data which we are proposing herein to require with respect to their scheduled operations. Accordingly, we are proposing to revise Schedule A–1 of Form 298–C in the manner set forth in Appendix A hereto.

As stated above, air taxi operators other than commuters are not presently required to file any statistical data with the Board; nor are commuter air carriers presently required to report as to their nonscheduled operations. Therefore, we propose to establissh a new form, CAB Form 298–D,[1] for the annual reporting of data relating to all revenue operations performed by air taxi operators, including commuter air carriers, whether scheduled or nonscheduled. Thus, under our proposal, commuter air carriers would henceforth have to maintain separate statistics for their scheduled and nonscheduled operations, reporting the former quarterly, on the revised Form 298–C, and reporting both the former and the latter annually on the new CAB Form 298–D.

PROPOSED RULE

It is proposed to amend Part 298 of the Economic Regulations (14 CFR Part 298), as follows:

1. Amend the Table of Contents by adding a new § 298.6—Extension of filing time, under Subpart A—General; deleting and reserving § 298.62 under Subpart F—Reporting of Scheduled Operations by Commuter Air Carriers; and adding a new Subpart F–1—Reporting by Air Taxi Operators, consisting of a new § 298.67—Reporting instructions, the table as amended to read as follows:

298.6 Extension of filing time.
298.62 [Reserved].
298.66 Public disclosure of schedule T–1 data.

[1] Filed as part of original document.

[1] A "commuter air carrier" is defined in § 298.2 as an air taxi operator which (1) performs at least five round trips per week between two or more points and publishes flight schedules which specify the times, days of the week and places between which such flights are performed, or (2) transports mail by air pursuant to a current contract with the Postal Service.

[2] The commuter air carriers' reports, filed on CAB Form 298–C, are described in Subpart F of Part 298. It should be noted that, under the present provisions of Subpart F, commuter air carriers are required to—and under the amended provisions of Subpart F they would continue to be required to—report the required information with respect to all flights performed pursuant to published schedules, even if the frequency of any particular scheduled flights is fewer than five scheduled round trips per week.

[3] Report NTSB–AAS–72–9, adopted September 27, 1972.

Subpart F–1—Reporting by Air Taxi Operators

298.67 Reporting instructions.

2. Amend § 298.2 by adding thereto certain definitions, the section as amended to read as follows:

§ 298.2 Definitions.

• • • • • •

"Air transportation" means • • •

"Aircraft hours" means the airborne hours of aircraft computed from the moment an aircraft leaves the ground until it touches the ground at the end of a flight.

"Aircraft miles" means the miles (computed in airport-to-airport distances) for each flight stage actually completed, whether or not performed in accordance with the scheduled pattern.

• • • • • •

"Competitive market" means • • •

"Departure" means takeoff from an airport.

"Flight stage" means the operation of an aircraft from takeoff to landing.

• • • • • •

"Maximum payload capacity" means • • •

"Mile" means a statute mile *i.e.*, 5,280 feet.

"Noncompetitive market" means • • •

"Passengers carried" means passengers on board each flight stage.

"Point" when used • • •

"Revenue passenger-mile" means one revenue passenger transported one mile. Revenue passenger-miles are computed by summation of the products of the revenue aircraft miles flown on each flight stage multiplied by the number of revenue passengers carried on that flight stage.

"Revenue seat-miles available" means the total of the products of aircraft miles and number of seats available for revenue use on each flight stage, representing the total passenger-carrying capacity offered.

"Revenue ton-mile" means one ton of revenue traffic transported one mile. Revenue ton-miles are computed by summation of the products of the revenue aircraft miles flown on each flight stage multiplied by the number of revenue tons carried on that stage. (A standard weight of 200 pounds per passenger may be used in the computation.)

"Revenue ton-miles available" means the aggregate of the products of the aircraft miles flown on each flight stage multiplied by the capacity in tons available for use on that stage.

"Ton" means a short ton, *i.e.*, 2,000 pounds.

3. Add a new § 298.6, following § 298.5, to read as follows:

§ 298.6 Extension of filing time.

If circumstances prevent the filing of a report within the prescribed time limit, consideration will be given to the granting of an extension upon receipt of a written request therefor, addressed to the Director, Bureau of Accounts and Statistics, Civil Aeronautics Board, Washington, D.C. 20428. Such a request must give a sufficient reason for granting the extension, set forth the date when the report can be filed, and be submitted sufficiently in advance of the due date to permit proper time for consideration and communication to the carrier of the action taken. Except in cases of emergency, no request for extension will be entertained which is not received in sufficient time to enable the Board to pass thereon before the prescribed due date. If a request is denied, the carrier remains subject to the filing requirements to the same extent as if no request for extension had been made.

4. Delete and reserve § 298.62, as follows:

§ 298.62 [Reserved]

5. Amend paragraph (b) of § 298.64 by adding thereto new subparagraphs (5) and (6), the section as amended to read as follows:

§ 298.64 Reporting instructions.

• • • • • •

(b) • • •

• • • • • •

(5) Columns (5), (6), and (7) shall set forth, respectively, aircraft hours flown, aircraft miles flown and aircraft departures performed during the reporting quarter.

(6) Columns (8), (9), (10), and (11) shall set forth, respectively, revenue passenger-miles, revenue seat-miles available, revenue ton-miles and revenue ton-miles available for the reporting quarter.

6. Amend Part 298 by adding a new Subpart F–1, consisting of a new § 298.67, the caption and text of the subpart to read as follows:

Subpart F–1—Reporting by Air Taxi Operators

§ 298.67 Reporting instructions.

(a) Each air taxi operator (including commuter air carriers) shall file CAB Form 298–D, entitled "Report of All Revenue Operations Performed by Air Taxi Operators and Commuter Air Carriers," in accordance with the provisions of this part and in the manner set forth in said form, which is made a part hereof and annexed hereto.

(b) CAB Form 298–D shall be prepared for the period January 1 through December 31 of each year. It shall be completed in triplicate and filed with the Board (*i.e.*, postmarked) not more than forty (40) days after the end of each calendar year, and shall be addressed to the Civil Aeronautics Board, Attention of the Bureau of Accounts and Statistics, Washington, D.C. 20428.

(c) Items 1 through 4 on CAB Form 298–D shall set forth, respectively, the number of passengers carried, aircraft hours flown, aircraft miles flown and number of aircraft departures performed in all revenue operations, whether scheduled or nonscheduled.

(d) The certificate contained in CAB Form 298–D shall be executed by the officer in charge of the carrier's accounts.

[FR Doc.73–17392 Filed 8–20–73;8:45 am]

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 52]

APPROVAL AND PROMULGATION OF PENNSYLVANIA IMPLEMENTATION PLANS

Public Hearing on Proposed Transportation and/or Land Use Control Strategies

On July 23, 1973 the Environmental Protection Agency held a public hearing on the proposed Transportation Control Strategies for the Philadelphia Metropolitan area. Although there was significant response and comment at that hearing, it was decided that the hearing would be reconvened at a later date to allow for the submission of additional comments and testimony by the general public and the City of Philadelphia.

Notice is hereby given that the public hearing concerning the proposed regulations for the Metropolitan Philadelphia Interstate Region will be reconvened on Friday, September 14, 1973 at 10:00 a.m., in the Jefferson Room of the Benjamin Franklin Hotel, 9th & Chestnut Streets, Philadelphia, Pennsylvania 19107.

The Administrator's final promulgation of transportation controls for the Philadelphia area will be significantly influenced by the comments and testimony he receives, as well as by the approvable strategies submitted by the State in mid-April as part of the State plan. These influences, and the additional analysis of alternative strategies that can be made in the time between this proposal and final promulgation, may lead the Administrator to adopt final regulations that differ in important ways from the proposed regulations as published in the FEDERAL REGISTER on July 3, 1973 (38 FR 17793) and as corrected by the Errata Sheet available in the Region III Office.

SUBMITTAL OF WRITTEN COMMENTS

Interested persons may participate in this rule making by submitting written comments, preferably in triplicate, to the Regional Administrator, EPA, Region III, Curtis Building, 6th & Walnut Streets, Philadelphia, Pennsylvania, 19106. All comments received by September 14, 1973 will be considered. Proposed regulations and comments will be available for public inspection during normal business hours at the EPA Region III Office.

Dated August 14, 1973.

ROBERT L. SANSOM,
Assistant Administrator for
Air and Water Programs.

FEDERAL MARITIME COMMISSION

[46 CFR Part 538]

[General Order 19; Docket No. 73–53]

INCREASES IN CONTRACT RATES

Rules Governing Filing

It has come to the Commission's attention that a number of conferences employing dual rate systems have been considering the possibility of modifying their merchant's contracts to provide

V 38-161 AUG 21 73 XUM

broader authority for short notice increases due to the devaluation of tariff currency. In fact, one conference has already applied for such increased authority which is being held in abeyance pending finalization of this rulemaking proceeding. These actions obviously stem from the two recent devaluations of the United States dollar, the growing instability among international currencies and the Commission's recent ruling [1] that the contract provision "currency devaluation by governmental action," does not encompass *de facto* devaluation nor devaluation resulting from the actions of governments other than the one issuing the currency under which the terms of the contract are written.

Although the Commission also indicated in conjunction with that ruling its possible rejection of an application to include these two elements as authority for short-notice increases, it is, nevertheless, mindful of the growing impact of currency fluctuations on the operations of conferences and carriers operating in the foreign commerce of the United States, especially those with dual rate systems. Because of this and the actions of the conferences, the Commission has decided to explore the possibility of allowing greater rate flexibility under dual rate contracts with respect to changes in the value of tariff currency relative to other operating currencies. However, to insure that contract signatories are not subjected to a constant barrage of short-notice increases and to preserve the purpose of the dual rate contract, it is considered necessary to impose certain restrictions and safeguards.

In this respect, the Commission has formulated proposed contract provisions and related rules governing the implementation of such provisions which it proposes to add to its rules relating to dual rate contract systems. Comments of all interested persons are sought with respect to the need, desirability and adequacy of these proposed provisions and rules in order that the Commission may proceed in the most enlightened manner. As an aid to analysis, the Commission, in developing these rules and provisions, considered the following criteria:

1. To be adequate and equitable, short notice increases due to currency fluctuations should be allowed on the basis of actual operating experience, therefore, changes in the value of a tariff currency should be calculated on the basis of its actual market value vis-a-vis other operating currencies used in the same trade.

2. Unqualified terms such as "*de facto* devaluation" which can raise issues of fact should be avoided.

3. All operating currencies used must be plainly identified.

4. The total amount of devaluation should not be allowed but only that portion equal to the percent of total expenses incurred in non-tariff currencies.

5. Relief should be sufficient merely to restore the approximate prior relationship of the parties to the contract.

6. A single currency exchange market to be used to evidence changes in currency value should be specified and should be reasonably accessible to the Commission.

7. The operative parts of the contract provisions should not be sensitive to normal market fluctuations.

8. In the event of tariff currency appreciation, contract signatories should be granted the same relief as the carriers.

9. With respect to conferences and rate agreements, the amount of increase allowable should not exceed the average percentage increase in expenses for all the members.

Accordingly, pursuant to section 4 of the Administrative Procedure Act as codified in 5 U.S.C. 553 and Section 14b and 43 of the Shipping Act, 1916, 46 U.S.C. 813a, 841a, notice is hereby given that the Federal Maritime Commission is considering the amendment of Part 538 of Title 46 CFR by:

1. Inserting a new § 538.4 reading as follows:

§ 538.4 Procedures and requirements for making rate adjustments due to changes in the value of tariff currency.

(a) *Rate Increases.* (1) A carrier or conference of carriers desiring to provide for an increase in contract rates on less than statutory notice in the event of a decrease in the value of its tariff currency relative to other currencies accepted in payment of freight must do so by including in its form of dual rate contract language as set forth in Article 14 (d) of the Uniform Merchant's Contract of Subpart B hereof.

(2) Concurrent with the filing of the above provisions the carrier or conference shall file with the Commission and with any other appropriate governmental body a statement listing the percentage of total expenses incurred and payable in each of the currencies which are accepted as payment of freight under the contract. Such currencies are to be identified in the applicable tariff(s) of the carrier or conference. Expenses incurred and payable in currencies which are not accepted as payment of freight are to be excluded from the report and shall not be considered for the purposes of this section. This report shall be updated at the beginning of each calendar quarter.

(3) When the market exchange rate of the tariff currency depreciates relative to the other currencies accepted in payment of freight by 5.0 percent or more compared with levels prevailing not more than 20 days prior thereto, the carrier or conference may advise contract shippers on 15 days' notice as provided in the contract that rates shall be increased by an amount to be determined as set forth below, provided the 5.0 percent depreciation is sustained for 14 days after notice is given. If the 5.0 percent depreciation is not sustained for 14 days thereafter, the notice of increase is void and will not become effective.

(4) The authority for determining fluctuations in the market exchange rates shall be the daily noon rates in the New York currency market.

(5) At the same time it files notice of increase pursuant hereto, the carrier or conference shall file with the Commission a statement showing that such increase meets the criteria set forth herein. Before expiration of the 15-day notice period the Commission will verify the information contained in the statement and notify the carrier or conference whether the announced increase may become effective.

(6) The amount of depreciation and the amount of increase needed to offset such depreciation is to be determined as follows:

(i) The nominal appreciation of each non-tariff currency accepted in payment of freight relative to the tariff currency is to be determined by comparing the daily New York noon quotations on the date of notice to those twenty days prior.

(ii) If the nominal appreciaton of any non-tariff currency is 5.0 percent or more, the nominal appreciation of each is to be weighted in proportion to the percentage of costs, payable in that currency and summed to determine the net depreciation in the tariff currency and the necessary rate increase. Example:

	Tariff currency (U.S. dollars)	Currency "A"	Currency "B"
Percent of Expenses incurred in above currencies		52%	28%	20%
New exchange value		$0.0	$1.17	$1.20
Base value (in terms of tariff currency)	0.0	1.05	1.10
Increase over base value	0.0	0.12	0.10
Percent nominal appreciation	0.0%	$\frac{\$0.12}{\$1.05}$=+11.4%	$\frac{\$0.10}{\$1.10}$=+9.1%
Weighted appreciation (according to the proportion of expenses actually incurred in the indicated currency)	0.0%	28% (11.4%)=3.19%	20% (9.1%)=1.82%
Total weighted percent surcharge		3.19%+1.82%=5.01% or 5.0%	

(b) *Rate reductions.* (1) A carrier or conference making provision in its dual rate contract for rate increases due to currency depreciation is likewise obligated by sec. 14(d)(2) of the uniform contract to provide shippers with corresponding rate relief in the event the value of its tariff currency *appreciates* with respect to the other currencies accepted for the payment of freight. The criteria applicable to rate increases shall also apply to reductions.

2. Inserting a new Article 14(d) to the Uniform Merchant's Contract in § 538.10 to read as follows:

14. (d) (1) In the event of a change in the market exchange rate of any currency or currencies used for the payment of freight under this contract which results in a depreciation of the Carrier's or Carriers' tariff currency of five (5) percent or more whether through action of any government or otherwise, the Carrier or Carriers may *increase* any rates affected thereby on not less than 15 days' written notice to the Merchant, pursuant to procedures and requirements set forth in § 538.4 of the Federal Maritime Commission's General Order 19 or otherwise established. With respect to such increase or increases, the Merchant may notify the Carrier or Carriers in writing not less than ten (10) days before the increases are to become effective of its intention to suspend the contract insofar as such increase or increases is or are concerned, and in such event the contract shall be suspended as of the effective date of such increase or increases, unless the Carrier or Carriers shall give written notice that such increase or increases has or have been rescinded and cancelled.

(2) It is agreed that in the event the Carrier's or Carriers' tariff currency appreciates relative to the other currencies accepted for the payment of freight under this contract, the rates hereunder will be correspondingly reduced using the same criteria applicable to rate increases under (1) above, except that reductions may become effective on the date filed.

Interested persons may participate in this rulemaking proceeding by filing with the Secretary, Federal Maritime Commission, 1405 I Street NW., Washington, D.C. 20573, on or before September 17, 1973, an original and 15 copies of their views or comments pertaining to the proposed amendments. All suggestions for changes in the text as set out above should be accompanied by drafts of the language thought necessary to accomplish the desired changes and by comments and arguments supporting the suggested changes.

The Federal Maritime Commission Office of Hearing Counsel shall participate in the proceeding and shall file Reply to Comments on or before October 1, 1973, by serving an original and 15 copies on the Commission and one copy to each party who filed written comments. Answers to the Replies shall be submitted to the Commission on or before October 12, 1973.

By the Commission.

[SEAL] FRANCIS C. HURNEY, *Secretary.*

Notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF THE TREASURY

Office of Revenue Sharing

[Administrative Ruling 73-2]

REVENUE SHARING FUNDS

Entitlement Periods in Which Interest on Is Accountable

Section 51.40(b) of the regulations governing Fiscal Assistance to State and Local Governments (31 CFR 51, § 51.40 (b)) requires that interest earned on entitlement funds while in the recipient government's trust fund be used, obligated, or appropriated within 24 months of the end of the entitlement period to which the revenue sharing check is applicable. Advice has been requested by recipient governments whether § 51.40(b) may be construed to permit the use, obligation, or appropriation of such interest within 24 months from the end of the entitlement period during which such interest is actually received or credited to the recipient government's trust fund.

It is the determination of the Department of the Treasury that accounting and financial reporting requirements of recipient governments will be simplified if § 51.40(b) was construed to permit the use, obligation or appropriation of interest within 24 months from the end of that entitlement period during which such interest was actually received or credited. Accordingly, interest actually received or credited on entitlement funds shall be used, obligated or appropriated within 24 months from the end of the entitlement period during which such interest was actually received or credited.

Dated August 15, 1973.

[SEAL] GRAHAM W. WATT,
Director,
Office of Revenue Sharing.

MONTICELLO DISTRICT NINE ADVISORY BOARD

Notice of Meeting

Notice is hereby given that the Monticello District Nine Advisory Board will hold a business meeting on August 23, 1973, commencing at 9:00 a.m. at the Federal Building Conference Room, Moab, Utah. The agenda for the meeting will include consideration of grazing applications, exchange of use applications, applications to transfer grazing privileges, and range improvement program for 1974.

The meeting will be open to the public.

The Advisory Board Chairman is Lawrence Aubert, 211 Country Club Park, Grand Junction, Colorado 81501.

Dated August 13, 1973.

RULON G. MCRAE,
Acting District Manager.

Fish and Wildlife Service

BUREAU OF SPORT FISHERIES AND WILDLIFE

Notice of Meeting

A meeting will be held at 1:30 p.m. on August 28, 1973, in Room 8068 of the U.S. Department of the Interior Building, Washington, D.C. Purpose of the meeting will be to review information pertaining to the use of iron shot for waterfowl hunting in the United States as provided by recent tests and studies and to discuss future program direction.

The meeting will be open to the public. Persons wishing to attend should notify the Director, Bureau of Sport Fisheries and Wildlife, U.S. Department of the Interior, Washington, D.C. 20240, or call AC 202-343-8655. Statements of interested persons must be filed in writing with the Director before or after the meeting. To the extent time permits, the Chairman of the meeting will accept brief oral statements from the public at the close of the agenda providing that such statements are also submitted in writing before or after the meeting.

F. V. SCHMIDT,
Acting Director, Bureau of Sport Fisheries and Wildlife.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

GRAIN STANDARDS

Texas Inspection Point

Statement of considerations. Because of the low volume of inspection work in the inspection area in which it is operative, the Dallas Grain Exchange, Dallas, Texas, has voluntarily requested that effective August 15, 1973, its designation to operate as an official grain inspection agency under the U.S. Grain Standards Act (7 U.S.C. 71 *et seq.*) be cancelled, in accordance with the voluntary cancellation provision of § 26.101 of the regulations (7 CFR 26.101) under the Act.

It appears that through no fault of the Dallas Grain Exchange, the volume of grain inspection work may not warrant locating an official inspection agency in Dallas. Accordingly, the Agricultural Marketing Service proposes to cancel without prejudice to the Dallas Grain Exchange the designation of the Dallas Grain Exchange to operate as an official inspection agency. Interested organizations and persons are hereby given opportunity to submit comments in writing with respect to the proposed cancellation and to make application for designation to operate as an official inspection agency at Dallas, Texas, according to the requirements in § 26.97 of the regulations (7 CFR 26.97) under the U.S. Grain Standards Act.

The Fort Worth Grain Exchange, Fort Worth, Texas, is designated to operate as an official inspection agency in the Fort Worth inspection area. The Fort Worth Grain Exchange has requested that effective August 15, 1973, the inspection area in which the Dallas Grain Exchange is now operative be reassigned to the Fort Worth Grain Exchange, in accordance with the reassignment provisions of § 26.99 of the regulations (7 CFR 26.99) under the Act. Other official inspection agencies are hereby given opportunity to make application for the reassignment of the Dallas inspection area in accordance with the provisions of § 26.99 of the regulations (7 CFR 26.99) under the Act.

There is no known opposition to the requested reassignment of the Dallas inspection area to the Fort Worth Grain Exchange. Further, there is a need to provide continuing inspection service in the Dallas inspection area. Accordingly, the requested reassignment of the Dallas inspection area to the Fort Worth Grain Exchange is hereby approved on an interim basis pending final determination of this matter.

Opportunity is hereby afforded all interested persons to submit written data, views, or arguments with respect to these matters to the Hearing Clerk, U.S. Department of Agriculture, Washington, D.C. 20250. All written submissions shall be in duplicate and shall be mailed to the Hearing Clerk not later than September 20, 1973. All submissions made pursuant to this notice will be made available for public inspection at the Office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)). Consideration will be given to the written data, views, or arguments so filed with the Hearing Clerk and to other information available to the U.S. Department of Agriculture before final determination is made with respect to these matters.

Done in Washington, D.C., on: August 16, 1973.

E. L. PETERSON,
Administrator,
Agricultural Marketing Service.

MULTIPLE USE PLAN FOR WHITE PINE PLANNING UNIT

Availability of Draft Environmental Statement

Pursuant to sec. 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a draft environmental statement for the Multiple Use Plan for the White Pine Planning Unit, Forest Service report number USDA-FS-DES (Adm) 73-96.

The environmental statement concerns a proposed long-range multiple use plan for the White Pine Planning Unit on the Palouse Ranger District of the St. Joe National Forest. Effective July 1, 1973, the Palouse District was attached administratively to the Clearwater National Forest.

This draft environmental statement was filed with CEQ on August 15, 1973.

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service, South Agriculture Bldg., Room 3230, 12th St. & Independence Avenue., S.W., Washington, D.C. 20250.
USDA, Forest Service, Northern Region, Federal Building, Missoula, Montana 59801.
USDA, Forest Service, Clearwater National Forest, Route 3, Orofino, Idaho 83544.
USDA, Forest Service, Palouse Ranger District, Potlatch, Idaho 83855.

A limited number of single copies are available upon request to Kenneth P. Norman, Forest Supervisor, Clearwater National Forest, Orofino, Idaho 83544.

Copies are also available from the National Technical Information Service, U.S. Department of Commerce, Springfield, Virginia 22151. Please refer to the name and number of the environmental statement above when ordering.

Copies of the environmental statement have been sent to various Federal, State, and local agencies as outlined in the CEQ guidelines.

Comments are invited from the public, and from State and local agencies which are authorized to develop and enforce environmental standards, and from Federal agencies having jurisdiction by law or special expertise with respect to any environmental impact involved for which comments have not been requested specifically.

Comments concerning the proposed action and requests for additional information should be addressed to Kenneth P. Norman, Forest Supervisor, Clearwater National Forest, Route 3, Orofino, Idaho 83544. Comments must be received by September 29, 1973 in order to be considered in the preparation of the final environmental statement.

PHILIP L. THORNTON,
Deputy Chief, Forest Service.

TUITION FEE FOR COLLISION AVOIDANCE RADAR TRAINING COURSE

Notice of Change of Procedures

Notice is hereby given that beginning October 1, 1973, a tuition fee in the amount of twenty five dollars ($25.00) will be assessed for either the eight (8) day or the five (5) day collision avoidance radar training course and a fee of fifteen dollars ($15.00) for the three day simulator refresher course.

These courses are presently being offered at the three Maritime Administration Training Centers, located in New York, N.Y., New Orleans, La., and San Francisco, California.

Payment shall be to the registrar in the form of a check or money order made payable to "Maritime Adm.—Commerce" in the amount of the fee assessed for the course selected. Such receipts will be deposited in an appropriate account as general receipts of the Treasury of the United States.

Dated August 14, 1973.

By Order of the Assistant Secretary of Commerce for Maritime Affairs.

AARON SILVERMAN,
Assistant Secretary,
Maritime Administration.

National Bureau of Standards

CENTER FOR BUILDING TECHNOLOGY ADVISORY COMMITTEE

Notice of Public Meeting

Pursuant to the provisions of the Federal Advisory Committee Act of October 6, 1972 (Public Law 92-463, 86 Stat. 770), notice is hereby given that a public meeting of the Department of Commerce Center for Building Technology Advisory Committee will be held on September 11, 1973, at the National Bureau of Standards, Gaithersburg, Maryland. The meeting will convene at 9:00 a.m. and adjourn at 4:00 p.m. in Building 101, Lecture Room A. The meeting is open to the public.

The purposes of this meeting are to be brief the committee members on programs being carried out by the Center, to establish operational committee guidelines and to select topics for study and consideration.

Further information concerning this meeting may be obtained by contacting James L. Haecker, Executive Secretary, Secretary, Center for Building Technology Advisory Committee, Building 226, Room B-206, Washington, D.C. 20234. Interested persons may file written statements with the Committee before or after the meeting.

Dated: August 15, 1973.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[DESI 6002; Docket No. FDC-D-309; NDA 9-594 etc.]

CERTAIN ANTI-INFECTIVE DRUGS

Opportunity for Hearing on Proposal To Withdraw Approval of New Drug Applications

In a notice (DESI 6002) published in the FEDERAL REGISTER of August 7, 1971 (36 FR 14662), the Commissioner of Food and Drugs announced his conclusions pursuant to the evaluation of reports received from the National Academy of Sciences-National Research Council, Drug Efficacy Study Group, concerning the subject drugs. Among the drugs included in that announcement were the following:

1. That part of NDA 9-980 providing for Camoprim Infatabs containing amodiaquine and primaquine phosphate; formerly marketed by Parke, Davis and Co., Joseph Campau at the River, Detroit, Mich. 48232

2. NDA 9-594; Perin Syrup containing piperazine calcium edetate; formerly marketed by Endo Laboratories, Inc., 1000 Stewart Avenue, Garden City, N.Y. 11530

3. NDA 11-258; Vermizine Syrup containing piperazine gluconate; formerly marketed by Conal Pharmaceuticals Inc.,

V 38-161 AUG 21 73 XUM

Chicago Pharmacal Division, 5547 North Ravenswood Avenue, Chicago, Ill. 60640.

The notice stated that these drugs were regarded as probably effective for their labeled indications. The drugs have been reclassified as lacking substantial evidence of effectiveness in that no new evidence of effectiveness has been submitted pursuant to the announcement. The drugs are no longer marketed.

Therefore, notice is given to the holder(s) of the new drug application(s) and to any other interested person that the Commissioner proposes to issue an order under section 505(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(e)) withdrawing approval of the listed new drug application(s) or pertinent parts thereof and all amendments and supplements thereto on the grounds that new information before him with respect to the drug(s), evaluated together with the evidence available to him at the time of approval of the application(s), shows there is a lack of substantial evidence that the drug(s) will have all the effects purported or represented to have under the conditions of use prescribed, recommended, or suggested in the labeling.

All identical, related, or similar products, not the subject of an approved new drug application, are covered by the new drug application(s) reviewed. See 21 CFR 130.40 (37 FR 23185, October 31, 1972). Any manufacturer or distributor of such an identical, related, or similar product is an interested person who may in response to this notice submit data and information, request that the new drug application(s) not be withdrawn, request a hearing, and participate as a party in any hearing. Any person who wishes to determine whether a specific product is covered by this notice should write to the Food and Drug Administration, Bureau of Drugs, Office of Compliance (BD–300), 5600 Fishers Lane, Rockville, Maryland 20852.

In accordance with the provisions of section 505 of the act (21 U.S.C. 355) and the regulations promulgated thereunder (21 CFR Part 130), the Commissioner hereby gives the applicant(s) and any other interested person an opportunity for a hearing to show why approval of the new drug application(s) should not be withdrawn.

On or before September 30, 1973 the applicant(s) and any other interested person is required to file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 6–88, 5600 Fishers Lane, Rockville, Maryland 20852, a written appearance electing whether or not to avail himself of the opportunity for a hearing. Failure of an applicant or any other interested person to file a written appearance of election within the specified time will constitute an election by him not to avail himself of the opportunity for a hearing. No extension of time may be granted.

If no person elects to avail himself of the opportunity for a hearing, the Commissioner without further notice will enter a final order withdrawing approval of the application(s) or pertinent parts thereof.

If an applicant or any other interested person elects to avail himself of the opportunity for a hearing, he must file, on or before September 30, 1973, a written appearance requesting the hearing, giving the reasons why approval of the new drug application(s) should not be withdrawn, together with a well-organized and full-factual analysis of the clinical and other investigational data he is prepared to prove in support of his opposition. A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that a genuine and substantial issue of fact requires a hearing (21 CFR 130.14(b)).

If review of the data submitted by an applicant or any other interested person warrants the conclusion that there exists substantial evidence demonstrating the effectiveness of the product(s) for the labeling claims involved, the Commissioner will rescind this notice of opportunity for hearing.

If review of the data in the application(s) and data submitted by the applicant(s) or any other interested person in a request for a hearing, together with the reasoning and factual analysis in a request for a hearing, warrants the conclusion that no genuine and substantial issue of fact precludes the withdrawal of approval of the application(s), the Commissioner will enter an order of withdrawal making findings and conclusions on such data.

If, upon the request of the new drug applicant(s) or any other interested person, a hearing is justified, the issues will be defined, a hearing examiner will be named, and he shall issue, as soon as practicable after September 30, 1973, a written notice of the time and place at which the hearing will commence. All persons interested in identical, related, or similar products covered by the new drug application(s) will be afforded an opportunity to appear at the hearing, file briefs, present evidence, cross-examine witnesses, submit suggested findings of fact, and otherwise participate as a party. The hearing contemplated by this notice will be open to the public except that any portion of the hearing that concerns a method or process the Commissioner finds entitled to protection as a trade secret will not be open to the public, unless the respondent specifies otherwise in his appearance.

Requests for a hearing and/or elections not to request a hearing may be seen in the Office of the Hearing Clerk (address given above) during regular business hours, Monday through Friday.

This notice is issued pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052–53, as amended; 21 U.S.C. 355), and the Administrative Procedure Act (5 U.S.C. 554), and under authority delegated to the Commissioner (21 CFR 2.120).

Dated August 14, 1973.

SAM D. FINE,
Associate Commissioner for Compliance.

[FR Doc.73–17331 Filed 8–20–73;8:45 am]

[DESI 9363; Docket No. FDC–D–653; NDA No. 9–363]

COMBINATION STEROID-SYMPATHOMIMETIC NASAL SPRAY

Opportunity for Hearing on Proposal To Withdraw Approval of New Drug Application

In a notice (DESI 9363) published in the FEDERAL REGISTER of June 8, 1971 (36 FR 11051) the Commissioner of Food and Drugs announced his conclusions pursuant to the evaluation of a report received from the National Academy of Sciences-National Research Council, Drug Efficacy Study Group, on the drug described below stating that the drug was regarded as possibly effective for use in the local treatment of acute, chronic, and allergic rhinitis. The drug has been reclassified as lacking substantial evidence of effectiveness in that no data have been submitted pursuant to the notice.

NDA 9–363; Vasocort Spraypak containing hydrocortisone, hydroxyamphetamine hydrobromide, and phenylephrine hydrochloride; Smith Kline and French Laboratories, 1500 Spring Garden Street, Philadelphia, Pa. 19101.

Therefore, notice is given to the holder(s) of the new drug application(s) and to any other interested person that the Commissioner proposes to issue an order under section 505(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(e)) withdrawing approval of the listed new drug application(s) and all amendments and supplements thereto on the grounds that new information before him with respect to the drug(s), evaluated together with the evidence available to him at the time of approval of the application(s), shows there is a lack of substantial evidence that the drug(s) will have all the effects purported or represented to have under the conditions of use prescribed, recommended, or suggested in the labeling.

All identical, related, or similar products, not the subject of an approved new drug application, are covered by the new drug application(s) reviewed. See 21 CFR 130.40 (37 F.R. 23185, October 31, 1972). Any manufacturer or distributor of such an identical, related, or similar product is an interested person who may in response to this notice submit data and information, request that the new drug application(s) not be withdrawn, request a hearing, and participate as a party in any hearing. Any person who wishes to determine whether a specific product is covered by this notice should write to the Food and Drug Administration, Bureau of Drugs, Office of Compliance (BD–300), 5600 Fishers Lane, Rockville, Maryland 20852.

In accordance with the provisions of section 505 of the act (21 U.S.C. 355) and the regulations promulgated thereunder (21 CFR Part 130), the Commissioner hereby gives the applicant(s) and any other interested person an opportunity for a hearing to show why approval of the new drug application(s) should not be withdrawn.

On or before September 30, 1973, the applicant(s) and any other interested person is required to file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 6–88, 5600 Fishers Lane, Rockville, Maryland 20852, a written appearance electing whether or not to avail himself of the opportunity for a hearing. Failure of an applicant or any other interested person to file a written appearance of election within the specified time will constitute an election by him not to avail himself of the opportunity for a hearing. No extension of time may be granted.

If no person elects to avail himself of the opportunity for a hearing, the Commissioner without further notice will enter a final order withdrawing approval of the application(s).

If an applicant or any other interested person elects to avail himself of the opportunity for a hearing, he must file, on or before September 30, 1973, a written appearance requesting the hearing, giving the reasons why approval of the new drug application(s) should not be withdrawn, together with a well-organized and full-factual analysis of the clinical and other investigational data he is prepared to prove in support of his opposition. A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that a genuine and substantial issue of fact requires a hearing (21 CFR 130.14(b)).

If review of the data submitted by an applicant or any other interested person warrants the conclusion that there exists substantial evidence demonstrating the effectiveness of the product(s) for the labeling claims involved, the Commissioner will rescind this notice of opportunity for hearing.

If review of the data in the application(s) and data submitted by the applicant(s) or any other interested person in a request for a hearing, together with the reasoning and factual analysis in a request for a hearing, warrants the conclusion that no genuine and substantial issue of fact precludes the withdrawal of approval of the application(s), the Commissioner will enter an order of withdrawal making findings and conclusions on such data.

If, upon the request of a new drug applicant(s) or any other interested person, a hearing is justified, the issues will be defined, a hearing examiner will be named, and he shall issue as soon as practicable after September 30, 1973, a written notice of the time and place at which the hearing will commence. All persons interested in identical, related, or similar products covered by the new drug application(s) will be afforded an opportunity to appear at the hearing, file briefs, present evidence, cross-examine witnesses, submit suggested findings of fact, and otherwise participate as a party. The hearing contemplated by this notice will be open to the public except that any portion of the hearing that concerns a method or process the Commissioner finds entitled to protection as a trade secret will not be open to the public, unless the respondent specifies otherwise in his appearance.

Requests for a hearing and/or elections not to request a hearing may be seen in the Office of the Hearing Clerk (address given above) during regular business hours, Monday thorugh Friday.

This notice is issued pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052–53, as amended; 21 U.S.C. 355), and the Administrative Procedure Act (5 U.S.C. 554), and under authority delegated to the Commissioner (21 CFR 2.120).

Dated August 14, 1973.

SAM D. FINE,
Associate Commissioner for Compliance.

[FR Doc.73–17332 Filed 8–20–73;8:45 am]

[DESI 6550; Docket No. FDC–D–650; NDA No. 6–550]

UPJOHN CO.

Methoxyphenamine Hydrochloride; Opportunity for Hearing on Proposal To Withdraw Approval of New Drug Application

In a notice (DESI 6550) published in the FEDERAL REGISTER of April 26, 1972 (37 FR 8405) the Commissioner of Food and Drugs announced his conclusions pursuant to the evaluation of a report received from the National Academy of Sciences-National Research Council, Drug Efficacy Study Group, on the drug described below stating that the drug was regarded as possibly effective for the various labeled indications. The possibly effective indications have been reclassified as lacking substantial evidence of effectiveness in that no data have been submitted pursuant to the notice.

The parts of NDA 6–550 pertaining to Orthoxine Hydrochloride Tablets and Syrup (methoxyphenamine hydrochloride); The Upjohn Co., 7171 Portage Road, Kalamazoo, Michigan 49002 (NDA 6–550).

Therefore, notice is given to the holder(s) of the new drug application(s) and to any other interested person that the Commissioner proposes to issue an order under section 505(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(e)) withdrawing approval of pertinent parts of the listed new drug application(s) and all amendments and supplements thereto on the grounds that new information before him with respect to the drug(s), evaluated together with the evidence available to him at the time of approval of the application(s), shows there is a lack of substantial evidence that the drug(s) will have all the effects purported or represented to have under the conditions of use prescribed, recommended, or suggested in the labeling.

All identical, related, or similar products, not the subject of an approved new drug application, are covered by the new drug application(s) reviewed. See 21 CFR 130.40 (37 FR 23185, October 31, 1972). Any manufacturer or distributor of such an identical, related, or similar product is an interested person who may in response to this notice submit data and information, request that the new drug application(s) not be withdrawn, request a hearing, and participate as a party in any hearing. Any person who wishes to determine whether a specific product is covered by this notice should write to the Food and Drug Administration, Bureau of Drugs, Office of Compliance (BD–300), 5600 Fishers Lane, Rockville, Maryland 20852.

In accordance with the provisions of section 505 of the act (21 U.S.C. 355) and the regulations promulgated thereunder (21 CFR Part 130), the Commissioner hereby gives the applicant(s) and any other interested person an opportunity for a hearing to show why approval of the new drug application(s) should not be withdrawn.

On or before September 30, 1973, the applicant(s) and any other interested person is required to file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 6–88, 5600 Fishers Lane, Rockville, Maryland 20852, a written appearance electing whether or not to avail himself of the opportunity for a hearing. Failure of an applicant or any other interested person to file a written appearance of election within the specified time will constitute an election by him not to avail himself of the opportunity for a hearing. No extension of time may be granted.

If no person elects to avail himself of the opportunity for a hearing, the Commissioner without further notice will enter a final order withdrawing approval of the pertinent parts of the application(s).

If an applicant or any other interested person elects to avail himself of the opportunity for a hearing, he must file, on or before September 30, 1973, a written appearance requesting the hearing, giving the reasons why approval of the new drug application(s) should not be withdrawn, together with a well-organized and full-factual analysis of the clinical and other investigational data he is prepared to prove in support of his opposition. A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that a genuine and substantial issue of fact requires a hearing (21 CFR 130.14(b)).

If review of the data submitted by an applicant or any other interested person warrants the conclusion that there exists substantial evidence demonstrating the effectiveness of the product(s) for the

V 38-161 AUG 21 73 XUM

labeling claims involved, the Commissioner will rescind this notice of opportunity for hearing.

If review of the data in the application(s) and data submitted by the applicant(s) or any other interested person in a request for a hearing, together with the reasoning and factual analysis in a request for a hearing, warrants the conclusion that no genuine and substantial issue of fact precludes the withdrawal of approval of the application(s), the Commissioner will enter an order of withdrawal making findings and conclusions on such data.

If, upon the request of the new drug applicant(s) or any other interested person, a hearing is justified, the issues will be defined, a hearing examiner will be named, and he shall issue, as soon as practicable after September 30, 1973, a written notice of the time and place at which the hearing will commence. All persons interested in identical, related, or similar products covered by the new drug application(s) will be afforded an opportunity to appear at the hearing, file briefs, present evidence, cross-examine witnesses, submit suggested findings of fact, and otherwise participate as a party. The hearing contemplated by this notice will be open to the public except that any portion of the hearing that concerns a method or process the Commissioner finds entitled to protection as a trade secret will not be open to the public, unless the respondent specifies otherwise in his appearance.

Requests for a hearing and/or elections not to request a hearing may be seen in the Office of the Hearing Clerk (address given above) during regular business hours, Monday through Friday.

This notice is issued pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052–53, as amended; 21 U.S.C. 355), and the Administrative Procedure Act (5 U.S.C. 554) and under authority delegated to the Commissioner (21 CFR 2.120).

Dated: August 14, 1973.

SAM D. FINE,
Associate Commissioner for Compliance.

ADVISORY COMMITTEE ON FEDERAL PAY

PRESIDENT'S PAY AGENT'S REPORT

Solicitation of Comments and Notice of Meeting

The Advisory Committee on Federal Pay invites any organizations representing Federal employees or any interested government officials to send the Committee their views on the President's Pay Agent's report on the proposed adjustment in Federal pay for Fiscal 1974. The Pay Agent's report is scheduled for completion about August 27. Organizations representing Federal employees can request a copy of that report from the Advisory Committee on Federal Pay, 1016 16th Street NW. (Room 101), Washington, D.C. 20036 (telephone: Area Code 202–382–2296). (The Committee was established in accordance with Section 5306 of Title 5, U.S. Code, as added by the Federal Pay Comparability Act of 1970.)

Written statements about the Pay Agent's report should reach the Advisory Committee by Tuesday, September 4 (five copies should be submitted).

On Monday, September 10, the Committee will meet with any organizations or officials that wish to discuss the report orally. The meetings will be held in the Committee's office (at the above address). Any organization or official wishing to meet with the Committee should notify it of that fact by Tuesday, September 4, either by writing or calling the Committee. Either written submissions or a request for an opportunity to discuss the issues should include a telephone number where the organization or official can be reached.

JEROME M. ROSOW,
Chairman, Advisory Committee on Federal Pay.

ATOMIC ENERGY COMMISSION

ADVISORY COMMITTEE ON REACTOR SAFEGUARDS—WORKING GROUP ON PEAKING FACTORS

Notice of Meeting

AUGUST 17, 1973.

In accordance with the purposes of sec. 29 and 182 b. of the Atomic Energy Act (42 U.S.C. 2039, 2232 b.), the Advisory Committee on Reactor Safeguards Working Group on Peaking Factors will hold a meeting on September 5, 1973, in Room 1046, at 1717 H Street NW., Washington, D.C. The purpose of this meeting will be to discuss calculational techniques and plant operating conditions related to peaking factors, with reference to nuclear reactors designed by Combustion Engineering, Inc., (CE).

The following constitutes that portion of the Subcommittee's agenda for the above meeting which will be open to the public:

WEDNESDAY, SEPTEMBER 5, 1973
9 A.M.–2:30 P.M.

Discussion With the AEC Regulatory Staff and CE

In connection with the above agenda item, the Subcommittee will hold an executive session at 8:30 a.m., which will involve discussion of its preliminary views, and an executive session at approximately 4:30 p.m. to exchange opinions and formulate recommendations to the ACRS. In addition, prior to the executive session at the end of the day, the Subcommittee may hold a closed session with the Regulatory Staff and Applicant to discuss privileged information relating to nuclear fuel design, calculational techniques and plant operating conditions related to peaking factors, if necessary.

I have determined, in accordance with subsec. 10(d) of Public Law 92–463, that the executive sessions at the beginning and end of the meeting will consist of an exchange of opinions and formulation of recommendations, the discussion of which, if written, would fall within exemption (5) of 5 U.S.C. 552(b); and that a closed session may be held, if necessary, to discuss certain documents which are privileged, and fall within exemption (4) of 5 U.S.C. 552(b). It is essential to close such portions of the meeting to protect such privileged information and protect the free interchange of internal views and to avoid undue interference with Committee operation.

Practical considerations may dictate alternations in the above agenda or schedule.

The Chairman of the Subcommittee is empowered to conduct the meeting in a manner that, in his judgment, will facilitate the orderly conduct of business.

With respect to public participation in the open portion of the meeting, the following requirements shall apply:

(a) Persons wishing to submit written statements regarding the agenda item may do so by mailing 25 copies thereof, postmarked no later than August 28, 1973 to the Executive Secretary, Advisory Committee on Reactor Safeguards, U.S. Atomic Energy Commission, Washington, D.C. 20545. Such comments shall be based upon CE topical reports and various other related documents on file and available for public inspection at the Atomic Energy Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. 20545.

(b) Those persons submitting a written statement in accordance with paragraph (a) above may request an opportunity to make oral statements concerning the written statement. Such requests shall accompany the written statement and shall set forth reasons justifying the need for such oral statement and its usefulness to the Subcommittee. To the extent that the time available for the meeting permits, the Subcommittee will receive oral statements during a period of no more than 30 minutes at an appropriate time, chosen by the Chairman of the Subcommittee, between the hours of 1 p.m. and 2 p.m. on the day of the meeting.

(c) Requests for the opportunity to make oral statements shall be ruled on by the Chairman of the Subcommittee, who is empowered to apportion the time available among those selected by him to make oral statements.

(d) Information as to whether the meeting has been cancelled or rescheduled, and in regard to the Chairman's ruling on requests for the opportunity to present oral statements, and the time allotted, can be obtained by a prepaid telephone call on August 31, 1973, to the Office of the Executive Secretary of the Committee (telephone: 301–973–5651) between 8:30 a.m. and 5:15 p.m., e.d.t.

(e) Questions may be propounded only by members of the Subcommittee and its consultants.

(f) Seating for the public will be available on a first-come, first-served basis.

(g) A copy of the transcript of the open portions of the meeting will be available for inspection during the following workday at the Atomic Energy Commission's Public Document Room, 1717 H Street NW., Washington, D.C. 20545. On request, copies of the minutes of the meeting will be made available for inspection at the Atomic Energy Commission's Public Document Room, 1717 H Street NW., Washington, D.C. 20545 on or after November 5, 1973. Copies may be obtained upon payment of appropriate charges.

JOHN C. RYAN,
Advisory Committee Management Officer.

[Docket No. 50-367]

NORTHERN INDIANA PUBLIC SERVICE CO.

Notice and Order for Holding Further Evidentiary Hearings

AUGUST 15, 1973.

In the matter of Northern Indiana Public Service Company (Bailly Generating Station Nuclear 1).

Take notice that further evidentiary hearings in this proceeding shall take place as follows:

Courtroom, Superior Court of Porter County, Valparaiso, Indiana.
September 11–14, 1973, commencing 9:00 a.m. (Local Time).
September 18–21, 1973, commencing 9:00 a.m. (Local Time).
September 25–28, 1973, commencing 9:00 a.m. (Local Time).
October 2–5, 1973, commencing 9:00 a.m. (Local Time).
October 9–12, 1973, commencing 9:00 a.m. (Local Time).

The exact Courtroom will be determined immediately prior to the evidentiary hearing on September 11, 1973.

The Board will appreciate every effort on the part of the parties to complete the taking of evidence in this proceeding no later than the close of business October 5, 1973.

It is so ordered.

Issued at Washington, D.C., this 15th day of August 1973.

ATOMIC SAFETY AND LICENSING BOARD,
JEROME GARFINKEL,
Chairman.

CIVIL AERONAUTICS BOARD

[Docket No. 25784]

CONTINENTAL AIR LINES, INC.

Order of Investigation

By tariff revision[1] marked to become effective August 15, 1973, Continental Air Lines, Inc. (Continental), proposes to expand by one hour the availability of adult standby fares from Kansas City to Los Angeles. Adult standby hours, which presently begin at 10:00 p.m. for Los Angeles-bound departures, would be advanced to 9:00 p.m. The fares reflect a 28-percent discount and would continue to be unavailable after 2:30 a.m.

In support of its proposal, Continental alleges that it has been unable to offer adult standby service in the market for over a year because depatures for Los Angeles from Kansas City were scheduled two hours before the fares became available, but that as of June 1, 1973, they now operate a scheduled departure at 9:00 p.m., only one hour earlier; that during the year it has received numerous requests from the public to reinstate the service; and that it expects the 9:00 p.m. departure will generate 10 to 15 passengers each day, five to 10 of which would be adult standby. In further justification, the carrier cites current adult standby hours from Chicago to Los Angeles, where the fares become available at 8:45 p.m., permitting as a result arrival of a TWA flight carrying adult standby passengers at Los Angeles one hour earlier than Continental's present 9:00 p.m. multistop flight from Kansas City.

Trans World Airlines, Inc. (TWA), has requested suspension and investigation of the proposal, alleging that Continental's reliance on its 8:45 p.m. departure from Chicago is unwarranted, since TWA extended adult standby availability to 8:45 p.m. in that market only as a competitive response to identical extensions instituted by United and Continental; that the proposed revision risks undue dilution of yield in view of the discount involved; and that it would be anomalous at best for the Board to permit an extension of adult standby fares in view of its recent action in Phase 5 of the *Domestic Passenger-Fare Investigation (DPFI)*[2] to phase out youth and family fares.

Continental has not answered the complaint.

Upon consideration of all relevant matters, the Board concludes that the complaint does not set forth sufficient facts to warrant suspension and the request therefor will be denied. However, we have concluded that all adult standby fares published by the domestic trunkline and local service carriers may be unjustly discriminatory, unduly preferential, unduly prejudicial, or otherwise unlawful, and should be investigated.

While Continental has not presented evidence to show that a 9:00 p.m. departure in the Kansas City-Los Angeles market is off-peak, we are inclined to believe it is. The latest nonstop flight scheduled at present is a 5:50 p.m. TWA flight,[3] and the latest through flight is a 6:45 p.m. one-stop flight on Continental. It thus seems likely that load factors on the 9:00 p.m. departure will be relatively low and that the risk of yield dilution as a result of the instant proposal is not great. On this basis, we will

[1] Revision to Airline Tariff Publishers, Inc., Agent, Tariff C.A.B. No. 142.

[2] Docket 21866-5.

[3] Except for a 12:05 a.m. TWA departure.

V 38 161 AUG 21 73 XUM

permit the particular revision here proposed by Continental.

Nevertheless, TWA's allegation concerning the relationship of Continental's proposal to the Board's action in Phase 5 of the *DPFI* raises a basic issue. Restriction of adult standby fares to travelers over 22 years of age would appear to be *prima facie* unjustly discriminatory in light of the phase-out of youth fares ordered because of similar age-related application. We will, therefore, institute an investigation of all adult standby fares currently offered, to determine whether or not the age restriction is unlawful or inconsistent with our final decision *vis-a-vis* youth fares. Order 73–5–2 (May 1, 1973).

Accordingly, pursuant to the Federal Aviation Act of 1958, and particularly sections 204, 403, 404, and 1002 thereof,

It is ordered That:

1. An investigation be instituted to determine whether the fares and provisions described in Appendix A attached hereto, and rules, regulations, and practices affecting such fares and provisions, are or will be unjust, unreasonable, unjustly discriminatory, unduly preferential, unduly prejudicial, or otherwise unlawful, and if found to be unlawful, to determine and prescribe the lawful fares and provisions, and rules, regulations, or practices affecting such fares and provisions;

2. Except to the extent granted herein, the complaint in Docket 25694 is dismissed;

3. The investigation ordered herein be assigned before an Administrative Law Judge of the Board at a time and place hereafter to be designated; and

4. Copies of this order be filed with the aforesaid tariff and served upon American Airlines, Inc., Continental Air Lines, Inc., Frontier Airlines, Inc., National Airlines, Inc., New York Airways, Inc., Trans World Airlines, Inc., and United Air Lines, Inc., which are hereby made parties to this proceeding.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

[SEAL] PHYLLIS T. KAYLOR,
Acting Secretary.

[Docket No. 25535]

TRANS WORLD AIRLINES, INC.

Order Authorizing Discussions

Trans World Airlines, Inc. (TWA), requests that the Board issue an order authorizing all carriers legally permitted to engage in air passenger transportation on a scheduled basis to engage in discussions looking toward the establishment of a new Commercial Credit Card Program. It is contemplated that the new program would replace the current Universal Air Travel Plan (UATP) agreement.[1]

To support its application, TWA states that UATP, also sometimes referred to as the Plan, a credit program which in many respects preceded adoption of the Civil Aeronautics Act of 1938, has become obsolete; that as UATP is constituted today, certain participating carriers do not equitably share in defraying the cost of the plan thereby placing the largest financial burden upon certain "contractor" [2] carriers; [3] and that efforts to modernize the plan through a modest expansion of benefits and a proposal which would put the distribution of the Plan's costs among the UATP members [4] on a more equitable footing have been defeated since any member, no matter what the level of its participation in the plan, may veto final passage of an amendment to the agreement.

TWA believes the time has come for discussion of the present obstacles to the continued efficient administration of the Plan with a view toward establishing a new Commercial Card Program in a manner which will assure that the relationships among the participating member carriers are based upon principles of fundamental fairness and equity. In sum, TWA states that the areas that require a change are basically three-fold: (1) the new plan must provide for an equitable sharing of costs, (2) the present unanimity voting procedures, which in point of fact permitted the inequities noted above to continue, must be supplanted, and (3) the new plan should be expanded to include travel-related services because this, among other things, will also offset the inequities in cost burden.

Answers supporting TWA's application have been filed by American Airlines, Inc. (American), United Air Lines, Inc. (United), the American Society of Travel Agents, Inc. (ASTA), and the National Passenger Traffic Association, Inc. (NPTA).[5]

In addition to expressing support of TWA's proposal, United requests that the permissible scope of any discussion authority granted by the Board be expanded somewhat beyond that defined by TWA, stating that an obvious corollary to a new commercial credit card program would be an industrywide personal credit card program to replace the numerous individual carrier programs now in effect. It believes that the carrier parties to the discussions will find it desirable simultaneously to consider such a program which would probably incorporate many of the same features as the contemplated commercial credit card program; *i.e.*, equitable sharing of costs and applicability to additional travel-related services. Thus, United urges the Board to authorize the carriers to discuss establishing an industry-wide personal credit card program at the same time they consider a new commercial credit card program pursuant to TWA's application. However, United states that its support of TWA's request for discussions is in no manner contingent upon the Board's authorizing the expansion of such discussions to cover a personal credit card system.

ASTA, in favoring the discussions, urges the Board to condition its approval of the discussions in the same manner it conditioned approval of the application of United to engage in capacity reduction discussion in Docket 22908.[6] It believes that imposition of these conditions will impose no hardship upon the participating carriers and will encourage participation by individuals and groups which may well result in a credit card plan which more clearly represents the interests of the carriers and the traveling public.

NPTA expresses no objection to granting TWA's request, but believes any authorization by the Board should require (a) prior notice of the carrier meeting, (b) the opportunity for NPTA representatives to attend, to raise appropriate questions on an orderly basis at the conclusion of the meeting as to the impact of the discussions, possible changes, and other matters related to the concepts there discussed, and (c) official written notification to NPTA by the carrier participants as to the results of the meeting, including any agreement or agreements reached as a result thereof. Also, like ASTA, NPTA requests that the additional protective conditions imposed in Order 73–4–98 be imposed herein.

Upon consideration of the foregoing, we have decided to grant TWA's request. On the basis of representations by TWA, there is some question whether UATP has not in fact become obsolete due in large part to the passage of time since its inception. Questions have been raised as a result of the members' inability to reach unanimity on modifications of the plan designed to achieve a more equitable sharing of costs by all participating carriers, and to expand the plan to include travel-related services.[7]

While the public benefits of a common personal credit card program have not been made entirely clear and we have little information on industry views favoring or opposing such a program, we have decided in the interest of possible industry economies to grant United's request that the discussions authorized herein also embrace the question of an industry-wide personal credit card system.

Turning now to the requests of ASTA and NPTA, we have decided to condition our approval of the discussions essentially along the lines of those conditions imposed in Order 73–4–98, except that we will not in this instance require that a full transcript be maintained of all meetings. In the context of the latter, we are unable to envision that the contemplated discussions will raise anti-competitive issues of the degree and importance of those envisioned in our approval of the discussions authorized by Order 73–4–98. It has been determined therefore to follow the Board's usual practice of requiring the carriers to keep complete and accurate minutes of all discussions and to file such with the Board.[8] Also, we have decided, along the lines requested by NPTA, to permit limited participation by interested persons in the proposed discussions in the manner and to the extent provided for herein.

Accordingly, it is ordered, That:

1. The request of Trans World Airlines, Inc., for an order authorizing all carriers legally permitted to engage in air passenger transportation on a scheduled basis to engage in discussions looking toward establishment of a new Commercial Credit Card Program be and it it hereby is granted;

2. The request of United Air Lines, Inc., that the permissible scope of the discussions be expanded to include the subject of an industrywide Personal Credit Card System be and it hereby is granted;

3. The foregoing authorizations shall be subject to the following conditions:

(a) discussions shall be held in Washington, D.C., the hour and date of such meetings to be determined by the carriers. A notice of such meetings shall be served upon the Civil Aeronautics Board at least three business days prior to such meetings;

(b) representatives of the Civil Aeronautics Board and any other Federal Government Agency, shall be permitted to attend and view the discussions as observers;

(c) any interested person may advise the applicant herein of his interest in these discussions and upon request all meeting notices and agendas shall be mailed to such interested third person with such notice to include an invitation to submit comments upon the agenda matters and to request appointments for personal appearance;

(d) the carriers shall keep complete and accurate minutes of such discussions and a true copy of such minutes and all documentation shall be filed with the Board's Docket Section not later than two weeks after close of each meeting;

(e) any agreement reached as a result of the discussions authorized herein shall be filed with the Board for approval under sec. 412 of the Act within fifteen days of consummation thereof, accompanied by an explanatory statement and a statement of justification; *provided*, that no agreement shall be implemented without having been previously approved by the Board; *provided further*, that upon filing with the Board such agreement shall be served upon the persons stated in subparagraph (c) *supra;*

(f) comments pertaining to any agreements filed pursuant to subparagraph (e) shall be filed within fifteen days from the date of the filing of such agreements with the Board;

(g) comments in reply to any previously filed document authorized to be filed in subparagraphs (e) and (f) shall be filed within ten days of the date of filing of such document;

(h) the relief granted herein shall expire 120 days from the date of this order and may be revoked or amended at any time in the discretion of the Board; and

(i) this authorization does not extend to discussions of rates, fares, charges, or inflight or other services pertaining to air transportation, other than as specifically authorized.

4. Copies of this order shall be served on the Departments of Justice and Transportation; all certificated scheduled air carriers; The American Society of Travel Agents, Inc.; and the National Passenger Traffic Association, Inc.; and

5. To the extent not granted herein all outstanding requests be and they hereby are dismissed.

This order shall be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

[SEAL] EDWIN Z. HOLLAND,
Secretary.

[FR Doc.73-17390 Filed 8-20-73;8:45 am]

[1] Universal Air Travel Plan Case, 12 C.A.B. 601 (1951).

[2] A "contractor" carrier is defined as any party having a contract with any subscriber pursuant to the UATP.

[3] Thus when a card issuing carrier's card is accepted by a ticketing airline for purchase of air transportation the ticketor is reimbursed for the sale at face value. The card issuing carrier must then absorb the cost of billing and collecting the sale. Non-contractor carriers do not absorb any of these costs.

[4] At present, there are approximately 70 members of the Plan.

[5] NPTA's answer is accompanied by a motion for leave to file a late answer to TWA's application. We have decided pursuant to 14 CFR 302.17, to grant NPTA's motion.

[6] Order 73–4–98, April 24, 1973.

[7] We do not mean to intimate views concerning UATP's merits under 49 U.S.C. 1382 since that very question is soon up for decision in CAB Agreement 22333.

[8] Cf. Orders 73–7–7 and 73–6–79 dated July 3, 1973, and June 19, 1973, respectively.

[Docket No. 25009]

WILMINGTON SERVICE INVESTIGATION

Notice of Hearing

Having the objections of Allegheny Airlines, Inc., and Eastern Air Lines, Inc., in mind, notice is hereby given pursuant to the Federal Aviation Act of 1958, as amended, that hearing in the above-entitled proceeding is assigned to be held before the undersigned Administrative Law Judge commencing on September 18, 1973, at 10 a.m., local time, in Room 1031N, North Universal Building, 1875 Connecticut Avenue NW, Washington, D.C. Hearing will resume on September 25, 1973, at 10 a.m., local time, in the Court of Chancery, Court Room No. 2, Public Building, 11th and King Streets, Wilmington, Delaware.

For information concerning the issues involved and other details of this proceeding, interested persons are referred to the various documents which are in the docket of this case on file in the Docket Section of the Civil Aeronautics Board.

Dated at Washington, D.C., August 16, 1973.

[SEAL] JOHN E. FAULK,
Administrative Law Judge.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

CERTAIN COTTON TEXTILE PRODUCTS PRODUCED OR MANUFACTURED IN THE REPUBLIC OF KOREA

Entry or Withdrawal from Warehouse for Consumption

AUGUST 17, 1973.

On October 3, 1972, there was published in the FEDERAL REGISTER (37 FR 20746), a letter dated September 28, 1972, from the Chairman, Committee for the Implementation of Textile Agreements, to the Commissioner of Customs, establishing levels of restraint applicable to certain specified categories of cotton textiles and cotton textile products produced or manufactured in the Republic of Korea and exported to the United States during the twelve-month period beginning October 1, 1972. As set forth in that letter, the levels of restraint are subject to adjustment pursuant to paragraph 6 of the bilateral cotton textile agreement of December 30, 1971, as amended, between the Governments of the United States and the Republic of Korea, which provides that within the aggregate and applicable group limits, limits on certain categories may be exceeded by not more than five (5) percent.

Accordingly, at the request of the Government of the Republic of Korea and pursuant to the provision of the bilateral agreement referred to above, there is published below a letter of August 17, 1973, from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs amending the level of restraint applicable to cotton textile products in Category 50 for the twelve-month period which began on October 1, 1972.

SETH M. BODNER,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Resources and Trade Assistance.

AUGUST 17, 1973.

COMMISSIONER OF CUSTOMS,
Department of the Treasury,
Washington, D.C. 20229.

DEAR MR. COMMISSIONER: On September 28, 1972, the Chairman, Committee for the Implementation of Textile Agreements, directed you to prohibit entry during the twelve-month period beginning October 1, 1972 of cotton textiles and cotton textile products in certain specified categories, produced or manufactured in the Republic of Korea, in excess of designated levels of restraint. The Chairman further advised you that the levels of restraint are subject to adjustment.[1]

Under the terms of the Long-Term Arrangement Regarding International Trade in Cotton Textiles done at Geneva on February 9, 1962, pursuant to paragraph 6 of the bilateral cotton textile agreement of December 30, 1971, as amended, between the Governments of the United States and the Republic of Korea, and in accordance with the procedures of Executive Order 11651 of March 3, 1972, you are directed to amend, effective as soon as possible, the level of restraint established in the aforesaid directive of September 28, 1972 for cotton textile products in Category 50 to 67,157 dozen for the twelve-month period beginning October 1, 1972.

The actions taken with respect to the Government of the Republic of Korea and with respect to imports of cotton textiles and cotton textile products from the Republic of Korea have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, the directions to the Commissioner of Customs, being necessary to the implementation of such actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553. This letter will be published in the FEDERAL REGISTER.

Sincerely yours,

SETH M. BODNER,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Resources and Trade Assistance.

[FR Doc.73-17817 Filed 8-20-73;8:45 am]

[1] The term "adjustment" refers to those provisions of the bilateral cotton textile agreement of December 30, 1971, as amended, between the Governments of the United States and the Republic of Korea which provide in part that within the aggregate and applicable group limits, limits on certain categories may be exceeded by not more than five (5) percent; for limited carryover of shortfalls in certain categories to the next agreement year; and for administrative arrangements.

ENVIRONMENTAL PROTECTION AGENCY

EFFLUENT LIMITATIONS GUIDELINES

Public Review Procedures; Correction

There appeared in the FEDERAL REGISTER of August 6, 1973 (38 FR 21202-206), an advance notice of public review procedures concerning regulations to be promulgated under secs. 304(b), 306, and 307(c) of the Federal Water Pollution Control Act, as amended (33 U.S.C. 1251 et seq.; "the Act"). The purpose of the notice was to facilitate public comment and generally explain EPA's overall plans for development of regulations required to be promulgated under the Act.

This supplemental notice corrects certain technical or typographical errors which appeared in the August 6, 1973, notice as follows:

1. To insure understanding that the regulations referred to in the notice apply to both existing sources ("effluent limitations guidelines" under sec. 304(b)) and new sources ("standards of performance" under sec. 306) discharging pollutants into the waters of the United States, the title has been changed to more clearly reflect the applicability of the regulations to be promulgated.

2. The list of contractors' studies set forth on page 21203 of the notice inadvertently repeated the beet sugar and insulated fiberglass categories and omitted the asbestos manufacturing and rubber processing categories. The correct list of categories covered by the technical studies and for which EPA plans to propose regulations under secs. 304(b), 306, and 307 of the Act is as follows:

1. Pulp, Paper and Paperboard Mills.
2. Builders Paper and Board Mills.
3. Meat Product and Rendering Processing.
4. Dairy Product Processing.
5. Grain Mills.
6. Canned and Preserved Fruits and Vegetables Processing.
7. Canned and Preserved Seafood Processing.
8. Beet Sugar Processing.
9. Cane Sugar Processing.
10. Textile Mills.
11. Cement Manufacturing.
12. Feedlots.
13. Electroplating.
14. Organic Chemicals Manufacturing.
15. Inorganic Chemicals Manufacturing.
16. Plastics and Synthetic Materials Manufacturing.
17. Soap and Detergent Manufacturing.
18. Fertilizer Manufacturing.
19. Petroleum Refining.
20. Iron and Steel Manufacturing.
21. Nonferrous Metals Manufacturing.
22. Phosphate Manufacturing.
23. Steam Electric Powerplants.
24. Ferroalloy Manufacturing.
25. Leather Tanning and Finishing.
26. Glass Manufacturing.
27. Insulation Fiberglass Manufacturing.
28. Timber Products Processing.
29. Asbestos Manufacturing.
30. Rubber Processing.

3. The list of states which have been sent copies of contractors' draft technical reports inadvertently omitted the State of Illinois. The agency of that state and the correct address is as follows:

Illinois Environmental Protection Agency
2200 Churchill Road
Springfield, Illinois 62706

Dated August 15, 1973.

ROBERT L. SANSOM,
Assistant Administrator for Air and Water Programs.

[FR Doc.73-17421 Filed 8-20-73;8:45 am]

ENVIRONMENTAL IMPACT STATEMENTS

Availability of Agency Comments

Pursuant to the requirements of section 102(2)(C) of the National Environmental Policy Act of 1969 and section 309 of the Clean Air Act, as amended, the Environmental Protection Agency (EPA) has reviewed and commented in writing on Federal agency actions impacting the environment contained in the following appendices during the period of July 1, 1973, and July 15, 1973.

Appendix I contains a listing of draft environmental impact statements reviewed and commented upon in writing during this review period. The list includes the Federal agency responsible for the statement, the number and title of the statement, the classification of the nature of EPA's comments as defined in Appendix II, and the EPA source for copies of the comments as set forth in Appendix V.

Appendix II contains the definitions of the classifications of EPA's comments on the draft environmental impact statements as set forth in Appendix I.

Appendix III contains a listing of final environmental impact statements reviewed and commented upon in writing during this reviewing period. The listing will include the Federal agency responsible for the statement, the number and title of the statement, a summary of the nature of EPA's comments, and the EPA source for copies of the comments as set forth in Appendix V.

Appendix IV contains a listing of proposed Federal agency regulations, legislation proposed by Federal agencies, and any other proposed actions reviewed and commented upon in writing pursuant to section 309(a) of the Clean Air Act, as amended, during the referenced reviewing period. The listing includes the Federal agency responsible for the proposed action, the title of the action, a summary of the nature of EPA's comments, and the EPA source for copies of the comments as set forth in Appendix V.

Appendix V contains a listing of the names and addresses of the sources for copies of EPA comments listed in Appendices I, III, and IV.

Copies of the EPA order, setting forth the policies and procedures for EPA's review of agency actions, may be obtained by writing the Public Inquiries Branch, Office of Public Affairs, Environmental Protection Agency, Washington, D.C. 20460. Copies of the draft and final environmental impact statements referenced herein are available from the originating Federal department or agency or from the National Technical Information Service, U.S. Department of Commerce, Springfield, Virginia 22151.

Dated August 2, 1973.

SHELDON MEYERS,
Director,
Office of Federal Activities.

V 38-161 AUG 21 73 XUM

APPENDIX II

DEFINITION OF CODES FOR THE GENERAL NATURE OF EPA COMMENTS

Environmental Impact of the Action

LO—Lack of Objection.—EPA has no objections to the proposed action as described in the draft impact statement; or suggests only minor changes in the proposed action.

ER—Environmental Reservations.—EPA has reservations concerning the environmental effects of certain aspects of the proposed action. EPA believes that further study of suggested alternatives or modifications is required and has asked the originating Federal agency to reassess these aspects.

EU—Environmentally Unsatisfactory.—EPA believes that the proposed action is unsatisfactory because of its potentially harmful effect on the environment. Furthermore, the Agency believes that the potential safeguards which might be utilized may not adequately protect the environment from hazards arising from this action. The Agency recommends that alternatives to the action be analyzed further (including the possibility of no action at all).

Adequacy of the Impact Statement

Category 1—Adequate.—The draft impact statement adequately sets forth the environmental impact of the proposed project or action as well as alternatives reasonable available to the project or action.

Category 2—Insufficient Information.—EPA believes that the draft impact statement does not contain sufficient information to assess fully the environmental impact of the proposed project or action. However, from the information submitted, the Agency is able to make a preliminary determination of the impact on the environment. EPA has requested that the originator provide the information that was not included in the draft statement.

Category 3—Inadequate.—EPA believes that the draft impact statement does not adequately assess the environmental impact of the proposed project or action, or that the statement inadequately analyzes reasonable available alternatives. The Agency has requested more information and analysis concerning the potential environmental hazards and has asked that substantial revision be made to the impact statement.

APPENDIX III. FINAL ENVIRONMENTAL IMPACT STATEMENTS FOR WHICH COMMENTS WERE ISSUED BETWEEN JULY 1, 1973 AND JULY 15, 1973

Identifying No.	Title	General nature of comments	Source for copies of comments
	Federal Highway Administration		
F-FHW-41742-KY:	Louisa-Catlettsburg Road, Lawrence-Boyd County, Kentucky.	EPA generally agreed with the proposed project. However, EPA requested further clarification of air modeling techniques.	E

APPENDIX IV. REGULATIONS, LEGISLATION AND OTHER FEDERAL AGENCY ACTIONS FOR WHICH COMMENTS WERE ISSUED BETWEEN JULY 1, 1973 AND JULY 15, 1973

Agency	Title	General nature of comments	Source for copies of comments
Department of Agriculture			
R-AFS-40075-00	36 CFR Part 221—National Forest Timber.	The proposed rulemaking for compliance with land use plans and applicable environmental quality standards in the conduct of forest service timber sales contracts, permits and other national forest timber disposal actions. EPA generally agrees with the proposed revisions to these rules which will make land use plans and environmental quality standards meaningful requirements in the handling of national forest timber.	A
R-AFS-40017-00	36 CFR Part 221—Timber—cancellation of sales.	Based on the review of the proposed rulemaking, EPA finds nothing objectionable, as the proposed rule was viewed as a forward step in the endeavor to protect the environment. Three comments were offered to assist in clarifying the proposed rulemaking.	A
R-SCS-40029-00	Environmental Quality Program, 7 CFR, Part 636.	EPA's comments suggest that the regulations be modified to include more substantive program information. In addition, the comments suggested that consideration be given to including local and State owned land in the program and that further consideration be given to State program review functions.	A
R-SCS-40268-00	7 CFR, chapter VI, proposed water quality management guidelines.	EPA's comments suggested that the regulation be modified to indicate that the identifiable beneficiaries, who require water quality storage to meet water quality standards, shall pay for costs of construction of such storage. In addition, EPA recommended that water quality storage be provided only after the consideration of alternative to modifying streamflow to improve water quality.	A
	Corps of Engineers		
R-COE-32414-00	33 CFR, Part 209, permits for activities in navigable or ocean waters—proposed policy, practice and procedures.	EPA's review indicated that these regulations are generally thorough and environmentally protective. In particular, the incorporation of specific criteria to protect wetlands is a significant improvement. EPA's comments offer recommended changes to permit issuance, surveillance, reporting and enforcement procedures which strengthen both the corps and EPA roles in these activities.	A

GLASSIC INDUSTRIES, INC. AUTOMOBILI' F. LAMBORGHINI S.P.A.

Suspension Request

In the June 4, 1973, FEDERAL REGISTER (38 FR 14708), notice was given of application by Checker Motors Corporation for a one year suspenson of the 1975 light duty vehicle exhaust emission standards. After public hearing, the Administrator on July 16, 1973, granted a one year suspension to Checker and twenty six other manufacturers who had subsequently filed applications. The decision on these applications and the interim standards that will apply to these manufacturers for 1975 model year vehicles were announced at 38 FR 20365 (July 31, 1973).

Subsequently, Glassic Industries, Inc., and Automobili' F. Lamborghini s.p.a. have applied for suspension of 1975 emission standards. Review of these applications indicates that each company has made all good faith efforts to meet the 1975 emission standards. Therefore, I intend to grant suspension of the standards with respect to those manufacturers September 20, 1973, unless by August 24, 1973, any interested person requests in writing a public hearing on the applications. Such written request must be filed with the Director, Mobile Source Enforcement Division, Environmental Protection Agency, Room 3220, 401 M Street SW., Washington, D.C. 20460, no later than August 24, 1973.

Any request for hearing should state the reasons why the announced intention of the Administrator should be considered further at a public hearing. Any person requesting such a hearing may be subpoenaed pursuant to sec. 307(a) of the Clean Air Act to give testimony at the hearing.

The Clean Air Act requires that Interim Standards be set if a suspension is granted. The Interim Standards to apply to 1975 model year light duty vehicles sold by the applicants to whom suspension is granted are set forth at 38 FR 17441.

Dated August 15, 1973.

JOHN QUARLES,
Acting Administrator.

Office of Hazardous Materials Control

ELI LILLY AND COMPANY ET AL.

Receipt of Applications

Notice is hereby given of the receipt of applications for registration of pesticides containing DDT for various uses listed below, pursuant to the provisions of the Federal Insecticide, Fungicide, and Rodenticide Act as amended (86 Stat. 973), by the following firms:

Company name, city, and pest involved:

	Application No.
Eli Lilly and Company, Indianapolis, Indiana 46206—Human (Prescription Only), public lice, scabies, pediculosis.	1471-OI
Micro Chemical Company, Inc., Winnsboro, Louisiana 71295—Cotton—Cotton Pest Complex.	4841-AN
Custom Chemicides, Inc., Berkeley, California 94710—Mice and lice.	9319-RI
Bakersfield Ag-Chem, Bakersfield, California 93308—Seed alfalfa—lygus bugs. Citrus (Oranges, Lemons)—Fruit Tree Leafroller, Western Tussock Moth, Beet Army Worm, Orange Dog Caterpillar, Citrus Cut worm.	11369-R
Michigan Pest Control Operators Association, Troy, Michigan 48084—House mice, lice, fleas, bedbugs, batbugs.	28298-R
Michigan Pest Control Operators Association, Troy, Michigan 48084—Lice, fleas, bedbugs, batbugs.	28298-E
Michigan Pest Control Operators Association, Troy, Michigan 48084—Bats, lice, fleas, bedbugs, batbugs.	28298-G
North Carolina Forest Service, Raleigh, North Carolina 27611—Pine Trees—Pales Weevil.	29260-R

Notice is given in order that any Federal agency or other interested party may comment in writing with respect to this request, and solely as a matter of information. It should not be construed as indicating a decision by this Agency on the application. Please address comment to the Director, Registration Division, Office of Pesticides Programs, Environmental Protection Agency, Washington, D.C. 20460, and refer to "DDT-Cotton" or to the application number.

CHARLES L. ELKINS,
Acting Assistant Administrator for Hazardous Materials Control.

[FR Doc.73-17420 Filed 8-20-73;8:45 am]

TARIFF COMMISSION

[AA1921-121]

ALUMINUM INGOT FROM CANADA

Determination of No Injury or Likelihood Thereof

AUGUST 15, 1973.

On May 15, 1973, the Tariff Commission received advice from the Treasury Department that aluminum ingot from Canada is being, or is likely to be, sold at less than fair value within the meaning of the Antidumping Act, 1921, as amended. In accordance with the requirements of sec. 201(a) of the Antidumping Act (19 U.S.C. 160(a)), the Tariff Commission instituted investigation No. AA1921-121 to determine whether an industry in the United States is being, or is likely to be injured, or is prevented from being established, by reason of the importation of such merchandise into the United States.

Notice of the institution of the investigation and of a public hearing to be held on June 26, 1973 in connection therewith was published in the FEDERAL REGISTER of May 29, 1973 (38 FR 14130, 14131). The hearing was subsequently rescheduled and held on July 17, 1973. Notice of the rescheduling was published in the FEDERAL REGISTER of June 7, 1973 (38 FR 14990).

In arriving at a determination in this case, the Commisison gave due consideration to all written submissions from interested parties, evidence adduced at the hearing, and all factual information obtained by the Commission's staff from questionnaires, personal interviews, and other sources.

On the basis of the investigation, the Commission has unanimously determined [1] that an industry in the United States is not being or is not likely to be injured, or is not prevented from being established, by reason of the importation of aluminum ingot from Canada sold, or likely to be sold, at less than fair value within the meaning of the Antidumping Act, 1921, as amended.

STATEMENT OF REASONS

The Antidumping Act of 1921, as amended, requires that before an affirmative determination can be made by the Tariff Commission it must find injury or likelihood of injury to an industry in the United States by reason of the sale of imports at less than fair value (LTFV).[2]

Data developed during the course of this investigation show that the Canadian suppliers were not price aggressors in the U.S. market, making no apparent effort to undersell U.S. producers. As a

[1] Commissioners Leonard and Young did not participate in the decision.
[2] The prevention of establishment of an industry is not at issue in this case.

V 38-161 AUG 21 73 XUM

result of the LFTV sales the Canadian exporters did not increase their share of the U.S. market. To the contrary their share of the nonintegrated fabricator market for aluminum ingot in the United States declined by 34 percent between 1968 and 1972.

In our opinion, the sharp decline in the price of aluminum ingot which occurred in 1971 and 1972 did not result from LTFV sales of Canadian ingot, but was largely attributable to an increase in U.S. productive capacity and the entry of new U.S. producers into the domestic market during a period when demand was leveling off.

Further evidence that the U.S. primary aluminum industry is not being injured by LTFV sales of Canadian ingot is the fact that this industry has operated virtually at full capacity since late 1972 with accompanying full employment, except where production was curtailed due to power shortages. It is evident that many U.S. aluminum fabricators would be unable to obtain an adequate supply of ingot were it not for the availability of Canadian imports and large sales of ingot from the U.S. Government stockpile.

Public notice of the Commission's investigation was given to all of the U.S. industry. The Commission notes that the complainant in this investigation and three other U.S. aluminum producers who collectively account for about 70 percent of total U.S. output of primary aluminum formally advised the Commission that imports of aluminum ingot from Canada are not injuring and are not likely to injure a U.S. industry. No other domestic producers appeared or claimed that an industry is being, or is likely to be, injured as a result of imports sold at LFTV.[1]

On the basis of all the evidence available to the Commission, we conclude that an industry in the United States is not being, and is not likely to be, injured by reason of sales of aluminum ingot from Canada at less than fair value.

By order of the Commission:

[SEAL] KENNETH R. MASON, *Secretary.*

[FR Doc.73-17395 Filed 8-20-73;8:45 am]

[1] The Commission further notes that a representative of the U.S. Department of Justice entered an apperance at the Commission's public hearing and presented testimony and briefs in support of a negative determination in this investigation.

PORT OF SAN FRANCISCO AND CALIFORNIA STEVEDORE AND BALLAST CO.

Notice of Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to sec. 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1405 I Street NW., Room 1015; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, Louisiana, and San Francisco, California. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C., 20573, by September 10, 1973. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of agreement filed by:

Miss Miriam E. Wolff, Port Director, Port of San Francisco, Ferry Building, San Francisco, California 94111.

Agreement No. T-2813, between the Port of San Francisco (Port) and the California Stevedore and Ballast Company (CS&B), provides for the 10-year

V 38-161 AUG 21 73 XUM

operation by CS&B of a wharfinger facility and marine terminal at the Port of San Francisco, California. As compensation, Port is to receive a minimum of $34,000 per month of port tariff charges, said charges to include crane rental but exclude utilities or rent for other properties occupied under the agreement. CS&B shall have the nonexclusive and preferential right to use of crane number 2. CS&B will be relieved of the rent due on unused portions of Pier 31, as provided for in a previous non-cancellable lease dated March 13, 1972. Should a possessory interest tax be assessed against CS&B, tariff charges in excess of the guaranteed minimum may be retained by CS&B until the tax payment is fully credited, with all tariff charges thereafter accruing to be paid to the Port. By order of the Federal Maritime Commission.

Dated: August 15, 1973.

FRANCIS C. HURNEY
Secretary.

[Independent Ocean Freight Forwarder License No. 1196]

TRI-CITY FORWARDING CO.

Order of Revocation

On August 8, 1973, the Federal Maritime Commission received notification that Walter L. Geis d/b/a Tri-City Forwarding Co., P.O. Box 3525, Beaumont, Texas 77704, wishes to voluntarily surrender its Independent Ocean Freight Forwarder License No. 1196 for revocation, effective September 1, 1973.

By virtue of authority vested in me by the Federal Maritime Commission as set forth in Manual of Orders, Commission Order No. 1 (revised) Section 7.04(f) (dated 5/1/72);

It is ordered, That Independent Ocean Freight Forwarder License No. 1196 be returned to the Commission for cancellation.

It is further ordered, That the Independent Ocean Freight Forwarder License of Walter L. Geis d/b/a Tri-City Forwarding Co. be and is hereby revoked effective September 1, 1973, without prejudice to reapply for a license at a later date.

It is further ordered, That a copy of this Order be published in the FEDERAL REGISTER and served upon Walter L. Geis d b/a Tri-City Forwarding Co.

AARON W. REESE,
Managing Director.

[Doc. Nos. E-7400, etc.]

BOSTON EDISON CO.

Notice of Extension of Time

AUGUST 14, 1973.

In the matter of Municipal Light Boards of Reading and Wakefield, Massachusetts, Complainants, v. Boston Edison Company, Respondent, (Docket No. E-7400), Norwood Municipal Light Department Norwood, Massachusetts, Complainant, v. Boston Edison Company, Respondent (Docket No. E-7517), and Boston Edison Company (Docket Nos. E-7485 and E-7533).

On July 25, 1973, Boston Edison Company filed a motion for an extension of time to file briefs on exceptions to the decison issued July 19, 1973, in the above-designated matter. On August 8, 1973, The Towns of Concord, Norwood and Wellesley, Massachusetts, filed a response opposing the request.

Upon consideration, notice is hereby given that the time is extended to and including September 19, 1973, within which all participants may file briefs on exceptions. Briefs opposing exceptions may be filed on or before October 9, 1973.

KENNETH F. PLUMB,
Secretary.

[Project No. 2732]

CAROLINA POWER & LIGHT CO.

Notice of Application

AUGUST 14, 1973.

Public notice is hereby given that an application for a preliminary permit was filed on June 19, 1973, under the Federal Power Act (16 U.S.C. 791a–825r) by the Carolina Power & Light Company (Correspondence to: J. A. Jones, Executive Vice President, Carolina Power & Light Company, 336 Fayetteville Street, Raleigh, North Carolina 27602), for proposed Project No. 2732, to be known as the Jackson County Pumped Storage Project. The proposed project would be located in the region of the towns of Cullowhee and Sylva in Jackson County and near the town of Waynesville in Haywood County, North Carolina. The proposed project would be located on the Caney Fork, a tributary of the Tuckasegee River, and Frady Creek, a branch of Chastine Creek which is a tributary of Caney Fork.

According to the application, the proposed Jackson County Pumped Storage Project would consist of: (1) an upper reservoir having a maximum pool elevation of 4,000 feet (m.s.l.) formed by a rockfill dam on Frady Creek with an approximate height of 420 feet and a crest length of 2,100 feet; (2) a lower reservoir having a maximum pool elevation of 2,640 feet (m.s.l.) formed by a rockfill dam located on the Caney Fork of the Tuckasegee River with an approximate height of 255 feet and a crest length of 1,600 feet; (3) connecting pressure tunnels and penstocks; and (4) a powerhouse (possibly underground) housing an ultimate installation of four reversible pump-turbine motor-generating units, each rated at 250 megawatts, designed to operate under a head range from 1,275 feet to 1,398 feet. The power developed by the project would be used to supplement future load requirements. No construction is authorized under a preliminary permit; its function is to allow the applicant to conduct detailed studies to determine the feasibility of the proposed project.

Any person desiring to be heard or to make protest with reference to said application should on or before October 23, 1973, file with the Federal Power Commission, Washington, D.C., 20426, petitions to intervene or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be heard but will not serve to make the protestants parties to a proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules. The application is on file with the Commission and available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.73-17399 Filed 8-20-73;8:45 am]

[Project No. 2503]

DUKE POWER CO.

Notice of Application

AUGUST 14, 1973.

Public notice is hereby given that application was filed June 20, 1973, under the Federal Power Act (16 U.S.C. 791a–825r) by the Duke Power Company (Correspondence to: Mr. C. J. Blades, Vice President-Real Estate, Duke Power Company, 422 South Church Street, Charlotte, North Carolina 28201) for

change in land rights for partially constructed Project No. 2503, known as the Keowee-Toxaway Project, located on the Keowee, Little, Whitewater, Toxaway, Thompson, and Horsepasture Rivers, all tributaries to the Savannah River which is a navigable waterway of the United States in Oconee and Pickens Counties, South Carolina, and Transylvania County, North Carolina.

Licensee seeks Commission approval of an easement conveying a right-of-way to Rochester Real Estate Company, Inc., and Rochester Real Estate of Seneca, Inc., for the purpose of constructing a sewer line across a small arm of Keowee Reservoir located in Oconee County, South Carolina.

Rochester is constructing a new residential subdivision north of Seneca, South Carolina, and desires to provide sewage service to the development. Rochester proposes to construct a sewer line across a small arm of Lake Keowee in order to connect said line to the municipal sewage system of the Town of Seneca.

Any person desiring to be heard or to make protest with reference to said application should on or before September 28, 1973, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to a proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules. The application is on file with the Commission and available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. RI74-23]

FOSTER T. CORP.

Order Regarding Rate Change and Providing for Hearing

AUGUST 9, 1973.

Respondent has filed a proposed change in rate and charge for the jurisdictional sale of natural gas, as set forth in Appendix A hereof.

The proposed changed rate and charge may be unjust, unreasonable, unduly discriminatory, or preferential, or otherwise unlawful.

The Commission finds. It is in the public interest and consistent with the Natural Gas Act that the Commission enter upon a hearing regarding the lawfulness of the proposed change, and that the supplement herein be suspended and its use be deferred as ordered below.

The Commission orders. (A) Under the Natural Gas Act, particularly sections 4 and 15, the Regulations pertaining thereto [18 CFR, Chapter I], and the Commission's rules of practice and procedure, a public hearing shall be held concerning the lawfulness of the proposed change.

(B) Pending hearing and decision thereon, the rate supplement herein is suspended and its use deferred until date shown in the "Date Suspended Until" column. This supplement shall become effective, subject to refund, as of the expiration of the suspension period without any further action by the Respondent or by the Commission. Respondent shall comply with the refunding procedure required by the Natural Gas Act and section 154.102 of the regulations thereunder.

(C) Unless otherwise ordered by the Commission, neither the suspended supplement, nor the rate schedule sought to be altered, shall be changed until disposition of this proceeding or expiration of the suspension period, whichever is earlier.

By the Commission.

[SEAL] MARY B. KIDD,
Acting Secretary.

APPENDIX A

Docket No.	Respondent	Rate schedule No.	Supplement No.	Purchaser and producing area	Amount of annual increase	Date filing tendered	Effective date unless suspended	Date suspended until	Cents per Mcf* Rate in effect	Cents per Mcf* Proposed increased rate	Rate in effect subject to refund in docket Nos.

		1	12		(5)	7-16-73	8-16-73	Accepted [6]	11.0	[3] [4] 22.0	
					(5)	7-16-73	8-16-73	(7)	11.0	[3] [4] 28.0	

*Unless otherwise stated, the pressure base is 15.025 psia.
[1] Contract agreement dated May 15, 1973.
[2] For gas delivered from wells completed prior to June 1, 1970.
[3] For gas delivered from wells completed on or subsequent to June 1, 1970.
[4] Subject to Btu adjustment.
[5] Not stated.
[6] Accepted effective as of the date shown in the "Effective Date Unless Suspended" column.
[7] Accepted effective as of the date shown in the "Effective date unless suspended" column insofar as the proposed rate does not exceed the ceiling prescribed in Order No. 435, and suspended until 1-16-74 insofar as the proposed rate exceeds the ceiling in Order No. 435.

The primary term of Foster's contract has expired and an amendatory agreement has been filed providing for higher rates and extending the term of the original contract. Consequently, the vintaging policy set forth in Opinion No. 639 and the ceiling in Order No. 435 are applicable.

We shall therefore accept Foster's rate increases to the extent they do not exceed the ceiling prescribed in Order No. 435 and suspend for five months that portion of its proposed 28.0¢ rate which exceeds the ceiling in Order No. 435.

Nothing contained in this order shall relieve the respondents of any responsibility imposed by the Economic Stabilization Act of 1970, (Pub. L. 91-379, 84 Stat. 799, as amended by Pub. L. 92-15, 85 Stat. 38), or by any Executive Order or rules and regulations promulgated pursuant to such Act.

Order Providing for Hearing on and Suspension of Proposed Change in Rate, and Allowing Rate Change To Become Effective Subject to Refund

AUGUST 9, 1973.

Respondent has filed a proposed change in rate and charge for the jurisdictional sale of natural gas, as set forth in Appendix A hereof.

The proposed changed rate and charge may be unjust, unreasonable, unduly discriminatory, or preferential, or otherwise unlawful.

The Commission finds: It is in the public interest and consistent with the Natural Gas Act that the Commission enter upon a hearing regarding the lawfulness of the proposed change, and that the supplement herein be suspended and its use be deferred as ordered below.

The Commission orders: (A) Under the Natural Gas Act, particularly sections 4 and 15, the regulations pertaining thereto [18 CFR, Chapter I], and the Commission's rules of practice and procedure, a public hearing shall be held concerning the lawfulness of the proposed change.

(B) Pending hearing and decision thereon, the rate supplement herein is

V 38-161 AUG 21 73 XUM

suspended and its use deferred until date shown in the "Date Suspended Until" column. This supplement shall become effective, subject to refund, as of the expiration of the suspension period without any further action by the Respondent or by the Commission. Respondent shall comply with the refunding procedure required by the Natural Gas Act and section 154.102 of the Regulations thereunder.

(C) Unless otherwise ordered by the Commission, neither the suspended supplement, nor the rate schedule sought to be altered, shall be changed until disposition of this proceeding or expiration of the suspension period, whichever is earlier.

By the Commission.

[SEAL] MARY B. KIDD, *Acting Secretary.*

APPENDIX A

Docket No.	Respondent	Rate schedule No.	Supplement No.	Purchaser and producing area	Amount of annual increase	Date filing tendered	Effective date unless suspended	Date suspended until—	Cents per Mcf* Rate in effect	Cents per Mcf* Proposed increased rate	Rate in effect subject to refund in docket Nos.
RI74-16...	Gulf Oil Corporation	395	3	Natural Gas Pipeline Company of America (Lockridge Fld, Ward Co, Texas, Permian Basin).	$6,221	7-16-73		9-19-73	[1] 18.1453	[1] 19.1822	RI69-600

* Unless otherwise stated, the pressure base is 11.65 psia.

[1] Includes quality adjustment.

The proposed rate increase exceeds the applicable area ceiling rate, but does not exceed the rate limit for a one day suspension, and is suspended for one day from the contractual due date which is beyond the expiration of the 60 day notice period.

Gulf's proposed increased rate and charge exceeds the applicable area price levels for increased rates as set forth in the Commission's Statement of General Policy No. 61–1, as amended (18 CFR, Chapter I, Part 2, § 2.56).

Nothing contained in this order shall relieve the respondent of any responsibility imposed by the Economic Stabilization Act of 1970, (Pub. L. 91–379, 84 Stat. 799, as amended by Pub. L. 92–15, 85 Stat. 38), or by any Executive Order or rules and regulations promulgated pursuant to such Act.

[Docket No. E–8336]

IOWA POWER AND LIGHT CO.

Notice of Application

AUGUST 14, 1973.

Take notice that on July 30, 1973, Iowa Power and Light Company (Applicant) of Des Moines, Iowa, filed an application seeking authority pursuant to sec. 204 of the Federal Power Act to issue on or before December 31, 1974, amounts not exceeding in the aggregate at any one time the sum of $50,000,000, of which an amount not exceeding $25,000,000 in the aggregate at any one time may be in the form of commercial paper, with final maturities not more than one year after date of issuance.

Applicant is incorporated under the laws of the State of Iowa with its principal business office at Des Moines, Iowa, and is engaged in the electric and gas utility businesses within the State of Iowa.

The notes are to be issued from time to time to banking institutions or sold through a commercial paper dealer.

Notes to banking institutions will be issued in accordance with various informal lines of credit agreements. The notes are to have maturities of not more than one year from their dates and are to bear interest at the prime rate in effect at the time of issuance.

Commercial paper will be issued as unsecured promissory notes through an established commercial paper dealer. Commercial paper notes are to have maturities of not more than nine months from their dates and the interest rate will be dependent upon the terms of the notes and money market conditions at the time of issuance.

The proceeds from the issuance of notes will be used as interim financing of the Applicant's construction program.

Any person desiring to be heard or to make any protest with reference to the application should on or before August 28, 1973, file with the Federal Power Commission, Washington, D.C. 20426, petitions or protests in accordance with the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceedings. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission rules. The application is on file with the Commission and is available for public inspection.

KENNETH F. PLUMB, *Secretary.*

[FR Doc.73–17400 Filed 8–20–73;8:45 am]

[Project No. 2709–West Virginia]

MONONGAHELA POWER COMPANY ET AL.

Availability of Staff Draft Environmental Impact Statement

AUGUST 17, 1973.

Notice is hereby given in the captioned project, that on August 15, 1973, as required by § 2.81(b) of Commission Order No. 415–C, a draft environmental statement prepared by the Staff of the Federal Power Commission was made available for comments. This statement deals with the environmental impact of an application for license filed pursuant to the Federal Power Act by Monongahela Power Company *et al.*, for the proposed Davis Pumped Storage Project No. 2709 to be located on the Blackwater River and Red Creek in Tucker and Grant Counties, West Virginia.

This statement has been circulated for comments to Federal, State, and local agencies, has been placed in the public files of the Commission, and is available for public inspection both in the Commission's Office of Public Information, Room 1000, 825 North Capitol Street NE., Washington, D.C. 20426, and at its New York Regional Office. Copies may be ordered from the National Technical Information Service, Department of Commerce, Springfield, Virginia 22151.

The project would consist of a 600-acre upper reservoir on Cabin Mountain (full pond elevation 4,042 feet m.s.l.), a 7,000-acre lower reservoir (full pond elevation 3,182 feet m.s.l.) located in Canaan Valley, a tunnel and above ground penstocks, and a surface powerhouse which would contain 4–250 mw pump-turbine generating units. Also associated with the project would be 2–500 kv transmission lines about 12 miles long. Proposed recreation facilities include fisherman access areas, a camping area, a marina, an information center and an interpretive center overlooking the lower reservoir. All recreation facilities within Canaan Valley would be day-use types.

Any person who wishes to do so may file comments on the staff draft statement for the Commission's consideration. All comments must be filed on or before September 29, 1973.

Any person who wishes to present evidence regarding environmental matters in this proceeding must file with the Commission a petition to intervene pursuant to § 1.8 of the Commission's rules of practice and procedure. Petitioners must also file timely comments on the draft statement in accordance with § 2.81 (c) of Order No. 415–C.

All petitions to intervene must be filed on or before September 29, 1973.

KENNETH F. PLUMB, *Secretary.*

[Docket No. E–7777]

PACIFIC GAS AND ELECTRIC CO.

Further Extension of Time and Postponement of Prehearing Conference and Hearing

AUGUST 14, 1973.

On August 7, 1973, Staff Counsel filed a motion for the postponement of the prehearing conference and an adjustment of the other procedural dates accordingly as fixed by notice issued July 11, 1973, in the above designated matter. The motion states that the parties have no objection to the motion.

Upon consideration, notice is hereby given that the procedural dates are further modified as follows:

Prehearing Conference, August 28, 1973 (10:00 a.m., EDT).
Intervener Service Date, September 4, 1973.
Company Rebuttal Date, September 18, 1973.
Hearing, September 25, 1973 (10:00 a.m., EDT).

FEDERAL RESERVE SYSTEM

COMMERCE BANCSHARES, INC.

Application To Engage in the Underwriting of Credit Life and Credit Accident and Health Insurance

Commerce Bancshares, Inc., Kansas City, Missouri, has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y, for permission to acquire voting shares of a company to be organized to engage in the activity of underwriting, as reinsurer, credit life and credit accident and health insurance. Notice of the application was published in the following newspapers on the dates listed below:

Date	Newspaper	City and State
May 12, 1973	The Kansas City Star.	Kansas City, Missouri.
May 23, 1973	St. Louis Globe-Democrat.	St. Louis, Missouri.
May 29, 1973	Arizona Weekly Gazette.	Phoenix, Arizona.

Applicant states that the proposed subsidiary would engage in the activities of underwriting, as reinsurer, credit life and credit accident and health insurance in connection with extensions of credit by its subsidiary banks. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question should be accompanied by a statement summarizing the evidence the person requesting the hearing proposes to submit or to elicit at the hearing and a statement of the reasons why this matter should not be resolved without a hearing.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Kansas City.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than September 9, 1973.

Board of Governors of the Federal Reserve System, August 13, 1973.

WEST DAKOTA CORP.

Formation of Bank Holding Company

West Dakota Corporation, Lead, South Dakota, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company through acquisition of 84.8 percent or more of the voting shares of Miners & Merchants Bank, Lead, South Dakota. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the office of the Board of Governors or at the Federal Reserve Bank of Minneapolis. Any person wishing to comment on the application should submit his views in writing to the Reserve Bank, to be received not later than August 28, 1973.

Board of Governors of the Federal Reserve System, August 12, 1973.

ICM FINANCIAL FUND, INC.

Notice of Proposal To Terminate Registration Pursuant to Section 8(f) of the Act

AUGUST 14, 1973.

Notice is hereby given that the Commission proposes, pursuant to section 8 (f) of the Investment Company Act of 1940 (Act), to declare by order upon its own motion that ICM Financial Fund, Inc., c/o Norbert J. Magrath, 185 Cross Street, Fort Lee, New Jersey 07024 (Fund), registered under the Act as an open-end diversified management investment company, has ceased to be an investment company as defined in the Act.

Fund was organized as a Maryland corporation on July 20, 1959, and registered under the Act by filing a Form N-8A notification of registration on July 30, 1959, and a Form N-8B-1 Registration Statement on September 21, 1959.

At a special meeting held on December 14, 1971, shareholders approved the transfer of business and assets of Fund to Pilgrim Fund, Inc. (Pilgrim), a registered investment company, in exchange for shares of capital stock of Pilgrim. The Pilgrim shares were distributed to Fund shareholders on December 15, 1971, and Fund ceased to act as an investment company as of the close of business on December 21, 1971.

Section 8(f) of the Act, provides, in pertinent part, that when the Commission, on its own motion or upon application, finds a registered investment company has ceased to be an investment company, it shall so declare by order and, upon the effectiveness of such order, the registration of such company shall cease to be in effect.

Notice is further given that any interested person may, not later than September 7, 1973 at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission should order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon the Fund at the address set forth above. Proof of such service (by affidavit, or in case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. At any time after said date, as provided by Rule 0-5 of the rules and regulations promulgated under the Act, an order disposing of the matter may be issued by the Commission upon the basis of the information stated herein, unless an order for a hearing shall be issued upon request or upon the Commission's own motion. Persons who request a hearing or advice as to whether a hearing is ordered will receive notice of further developments in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management Regulation, pursuant to delegated authority.

[SEAL] RONALD F. HUNT, *Secretary.*

[811-1322]

ICM EQUITY FUND, INC.

Notice of Proposal to Terminate Registration Pursuant to Section 8(f) of the Act

AUGUST 14, 1973.

Notice is hereby given that the Commission proposes, pursuant to section 8(f) of the Investment Company Act of 1940 (Act), to declare by order upon its own motion that ICM Equity Fund, Inc., c/o Nobert J. Magrath, 185 Cross Street, Fort Lee, New Jersey 07024 (Fund), registered under the Act as an open-end,

diversified management investment company, has ceased to be an investment company.

Fund was organized as a Delaware corporation on May 3, 1965, and registered under the Act by filing a notification of registration on Form N-8A and a Registration Statement on Form N-8B-1 with the Commission on June 28, 1965.

At a special meeting held on December 14, 1971, shareholders approved the transfer of the business and assets of Fund to MagnaCap Fund, Inc. (MagnaCap), a registered investment company, in exchange for shares of capital stock of MagnaCap. The MagnaCap shares were distributed to Fund shareholders on December 15, 1971, and Fund ceased to act as an investment company as of the close of business on December 21, 1971.

Section 8(f) of the Act, provides, in pertinent part, that when the Commission, on its own motion or upon application, finds a registered investment company has ceased to be an investment company, it shall so declare by order and, upon the effectiveness of such order, the registration of such company shall cease to be in effect.

Notice is further given that any interested person may, not later than September 7, 1973 at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission should order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon the Fund at the address set forth above. Proof of such service (by affidavit, or in case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. At any time after said date, as provided by Rule 0-5 of the rules and regulations promulgated under the Act, an order disposing of the matter may be issued by the Commission upon the basis of the information stated herein, unless an order for a hearing shall be issued upon request or upon the Commission's own motion. Persons who request a hearing or advice as to whether a hearing is ordered will receive notice of further developments in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management Regulation, pursuant to delegated authority.

[811-976]

OXFORD TRUST FUND

Notice of Proposal To Terminate Registration

AUGUST 14, 1973.

Notice is hereby given that the Commission proposes, pursuant to section 8(f) of the Investment Company Act of 1940 (Act), to declare by order upon its own motion that Oxford Trust Fund (formerly Bankers Mutual Trust Fund), Room 432, Candler Building, Atlanta, Georgia, (Oxford), a trust formed under the laws of the State of Georgia and registered under the Act as an open-end, diversified management investment company, has ceased to be an investment company as defined in the Act.

Oxford was initially organized in Georgia in August, 1960, under the name of Bankers Mutual Trust Fund (Bankers). Bankers filed a Form N-8A Notification of Registration with the Commission on August 31, 1960. On August 30, 1961 Bankers was reorganized in Georgia and changed its name to Oxford, and on September 8, 1961, Oxford filed a Form N-8B-1 Registration Statement with the Commission.

Oxford has never conducted any business operations other than initial organizational activities; it presently has no assets; its registration statement under the Securities Act of 1933 was withdrawn on June 14, 1972; and it has abandoned any intention of making a public offering of its shares.

Section 8(f) of the Act provides, in pertinent part, that when the Commission, on its own motion, finds that a registered investment company has ceased to be an investment company, it shall so declare by order, and upon the effectiveness of such order, the registration of such company shall cease to be in effect.

Notice is further given that any interested person may, not later than September 7, 1973, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reasons for such request, and the issues of fact or law proposed to be controverted, or he may request that he be notified if the Commission should order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon Oxford at the address stated above. Proof of service (by affidavit, or in case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. At any time after said date, as provided by Rule 0-5 of the rules and regulations promulgated under the Act, an order disposing of the matter herein may be issued by the Commission upon the basis of the information stated herein, unless an order for a hearing shall be issued upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive notice of further developments in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management Regulation, pursuant to delegated authority.

[811-2056]

ROYDEN FUND, INC.

Notice of Proposal To Terminate Registration

AUGUST 14, 1973.

Notice is hereby given that the Commission proposes, pursuant to section 8(f) of the Investment Company Act of 1940 ("Act"), to declare by order upon its own motion that Royden Fund, Inc., (formerly Equitable Growth Fund, Inc.), 7000 East Camelback Road Suite 201, Scottsdale, Arizona 85251, (Royden), a corporation organized under the laws of the State of Maryland and registered under the Act as an open-end diversified management investment company, has ceased to be an investment company.

Royden was initially organized in Maryland on April 1, 1970, under the name of Equitable Growth Fund, Inc. (Equitable). Equitable registered under the Act on April 6, 1970 by filing a Form N-8A Notification of Registration. On May 6, 1970, Equitable filed a Form N-8B-1 Registration Statement under the Act and a Form S-5 Registration Statement under the Securities Act of 1933 ("1933 Act") on May 20, 1970.

On August 20, 1970 Equitable changed its name to Royden, and on that date Royden filed a Form N-8B-1 Registration Statement under the Act and a Pre-effective amendment to the 1933 Act registration statement.

Royden has never conducted any business operations other than initial organizational activities; its registration statement under the 1933 Act was abandoned on September 13, 1972; and it has abandoned any intention of making a public offering of its shares.

Section 8(f) of the Act provides, in pertinent part, that when the Commission, on its own motion, finds that a registered investment company has ceased to be an investment company, it shall so declare by order, and upon the effectiveness of such order, the registration of such company shall cease to be in effect.

Notice is further given that any interested person may, not later than September 7, 1973, at 5:30 p.m., submit to the Commission in writing a request for

V 38-161 AUG 21 73 XUM

a hearing on the matter accompanied by a statement as to the nature of his interest, the reasons for such request, and the issues of fact or law proposed to be controverted, or he may request that he be notified if the Commission should order a hearing thereon. Any such communications should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon the Fund at the address stated above. Proof of service (by affidavit, or in case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. At any time after said date, as provided by Rule 0-5 of the rules and regulations promulgated under the Act, an order disposing of the matter herein may be issued by the Commission upon the basis of the information stated herein, unless an order for a hearing shall be issued upon request or upon the Commission's own motion. Persons who request a hearing or advice as to whether a hearing is ordered will receive notice of further developments in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management Regulation, pursuant to delegated authority.

COST OF LIVING COUNCIL

HEALTH INDUSTRY ADVISORY COMMITTEE

Notice of Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (P.L. 92-463, 86 Stat. 770), notice is hereby given that the Health Industry Advisory Committee, created by section 6(b) of Executive Order 11695, will meet on August 23, 1973 in Room 204A, Dirkson Building, 219 S. Dearborn, Chicago, Illinois.

The morning portion of the meeting, which will be held from 10 a.m. to 12:30 p.m., will be open to the public. The Chairman and the Staff will present to the Committee alternative control mechanism for hosptitals and practitioners for consideration by the Committee.

The Chairman of the Committee is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Only members of the Committee, and its staff, may question the witnesses. Due to space limitations, it is possible that there will not be enough seating. For that reason, persons will be admitted on a first-come-first-served basis.

While no unscheduled oral presentations will be entertained, anyone may submit a written statement by mailing it to Robert Saner, 2000 M Street NW., Washington, D.C. 20508.

Any statement received three or more days prior to the meeting will be provided to the Committee before the meeting. Any statement over three pages in length should be submitted with twenty copies.

The afternoon portion of the meeting, to run from 12:30 p.m. to 4:30 p.m., will be closed to the public. Since the afternoon meeting will be discussing the substance of Phase IV and other possible governmental actions therewith, I have determined that the meeting will fall within Exemption 5 of 5 U.S.C. 552(b) and it is essential to close the meeting to protect the free exchange of internal views and to avoid interference with the operation of the Committee.

Issued in Washington, D.C. on August 17, 1973.

HENRY H. PERRITT, JR., *Executive Secretary, Cost of Living Council.*

INTERSTATE COMMERCE COMMISSION

Office of Hearings

[Notice No. 324]

ASSIGNMENT OF HEARINGS

AUGUST 16, 1973.

Cases assigned for hearing, postponement, cancellation, or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested. No amendments will be entertained after the date of this publication.

MC 77972 Sub 19, Merchants Truck Line, Inc., now assigned September 10, 1973, at Memphis, Tenn., is postponed indefinitely.

I. & S. No. 8851, TOFC, Freight All Kinds, Plan IV, Trans-Continental Territory, now being assigned hearing September 25, 1973, at the Offices of the Interstate Commerce Commission, Washington, D.C.

No. 35825, Board of Trade of the City of Chicago-V-The Akron, Canton & Youngstown Railroad Company Et Al., now assigned September 17, 1973, at Chicago, Ill., is postponed to October 23, 1973, at Chicago, Ill., in a hearing room to be later designated.

MC 127669 Sub 5, Cherry Hill Transit, now assigned September 24, 1973, at Trenton, N.J., is postponed to October 29, 1973 (1 week), in Room 407, New Jersey Public Utility Commission, 28 West State Street, Trenton, New Jersey.

[SEAL] ROBERT L. OSWALD, *Secretary.*

[Notice No. 337]

MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

Synopses of orders entered by the Motor Carrier Board of the Commission pursuant to Secs. 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act, and rules and regulations prescribed thereunder (49 CFR, Part 1132), appear below:

Each application (except as otherwise specifically noted) filed after March 27, 1972, contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application. As provided in the Commission's special rules of practice any interested person may file a petition seeking reconsideration of the following numbered proceedings on or before September 10, 1973. Pursuant to sec. 17(8) of the Interstate Commerce Act, the filing of such a petition will postpone the effective date of the order in that proceeding pending its disposition. The matters relied upon by petitioners must be specified in their petitions with particularity.

No. MC-FC-74309. By order of August 14, 1973, the Motor Carrier Board approved the transfer to BCD Trucking, Inc., Forestville, N.Y., of the operating rights in Permits No. MC-123672, MC-123672 (Sub-No. 1), and MC-123672 (Sub-No. 5) issued December 27, 1961, January 20, 1964, and April 17, 1967, respectively to J. Kenneth Brotz, Silver Creek, N.Y., authorizing the transportation of bakery products from, to and between specified points and areas in Massachusetts, Michigan, New Jersey, New York, and Ohio. Robert G. Gawley, 126 East Fourth St., Dunkirk, N.Y., attorney for applicants.

No. MC-FC-74540. By order of August 15, 1973, the Motor Carrier Board approved the transfer to J. H. Beers, Inc., P.O. Box 266, Male St., Wind Gap, Pa., of Certificate No. MC-47890 (Sub-No. 1) issued to Joseph H. Beers, Bangor, Pa., authorizing the transportation of: Slate and slate products, from Bangor, Pa., and 10 miles thereof to points in New Jersey, New York, Delaware, Connecticut, Maryland, Massachusetts, Virginia, West Virginia, and Dist. of Columbia.

No. MC-FC-74632. By order of August 15, 1973, the Motor Carrier Board approved the transfer to Don's Towing and Automotive Service, Inc., doing business as Bishop Towing Service, St. Paul, Minn., of the operating rights in Certificate No. MC-109741 issued December 8, 1969, to Consolidated Towing Service, Inc., doing business as Bishop Towing Service, St. Paul, Minn., authorizing the transportation of various commodities between points in Illinois, Iowa, Minnesota, North Dakota, South Dakota, and Wisconsin. F. H. Kroeger, 2288 University Ave., St. Paul, Minn., 55114, attorney for applicants.

[SEAL] ROBERT L. OSWALD, *Secretary.*

GRANTS FOR CONSTRUCTION OF TREATMENT WORKS

User Charges and Industrial Cost Recovery

V 38-161 AUG 21 73 XUM

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

SUBCHAPTER D—GRANTS

PART 35—STATE AND LOCAL ASSISTANCE

Subpart E—Grants for Construction of Treatment Works, Federal Water Pollution Control Act Amendments of 1972

USER CHARGES AND INDUSTRIAL COST RECOVERY

Notice is hereby given that the Environmental Protection Agency is amending Part 35 of Title 40 to include regulations for user charge systems and industrial cost recovery, pursuant to section 204(b) of the Federal Water Pollution Control Act Amendments of 1972.

The regulations require that a system of user charges be adopted by all applicants for treatment works construction grants. User charges are payments to a grantee by recipients of waste treatment services to offset the cost of operation and maintenance of treatment works provided by the applicant. User charge systems are intended to enable the grantee to be financially self-sufficient with respect to operation and maintenance of treatment works.

The regulations also require that all grantees recover from industrial users that portion of the grant amount allocable to the treatment of wastes from such users. An industrial user's share is to be based on all factors which significantly influence the cost of the treatment works, including strength, volume, and flow characteristics.

The Act provides that a grantee may retain an amount of the revenues recovered from industry equal to (1) the amount of the non-Federal cost of the project paid by the grantee, plus (2) the amount necessary for future reconstruction and expansion of the project. The total amount retained, however, cannot exceed 50 percent of the amount recovered.

In the development of the regulations, it was determined that the 50 percent limitation would be applicable except at an amount for reconstruction and expansion which would not be sufficient to expand and reconstruct the treatment works. Therefore, in the interest of minimizing paper work pursuant to section 101(f) of the Act, the regulations permit a grantee to retain 50 percent of the amounts recovered in all cases. The remainder, together with any interest earned thereon, must be returned to the U.S. Treasury.

On May 22, 1973, notice of this proposed rulemaking was published in the FEDERAL REGISTER (38 FR 13524). Written comments were invited and received from interested parties and are on file with the Environmental Protection Agency. The Agency has carefully considered all submitted comments. Certain of these comments have been adopted or substantially satisfied by editorial changes in, deletions from, or additions to the regulations. The major comments received and principal changes made in the regulations are discussed below:

a. Many comments were made to the effect that existing industrial users should be exempt from cost recovery if a treatment works is expanded to accommodate new industries. No change was made in the regulations because it is the intent of the statute that all industrial users of a treatment works, for which a grant is made, must share in repaying the Federal contribution.

b. Several comments suggested that the definition of an industrial user was too broad (See § 35.905–19), especially with regard to Division I—Services. The intent of including Division I was to ensure that industries contributing significant quantities of process wastes would be subject to cost recovery when appropriate. Industries included in Division I which discharge primarily domestic-type wastes are specifically excluded from the cost recovery requirements.

c. Several comments indicated that the definition of Recovery Period was too restrictive (see § 35.905–20). In accordance with those comments, the section was revised to allow an applicant to commence its cost recovery program prior to the beginning of operation of a treatment works.

d. Section 35.905–22, *User charge*, was interpreted by many responders to prohibit a grantee from including debt service or other local charges in its billings to users of the wastewater treatment system. Such a prohibition was not intended. The terms "user charges" and industrial cost recovery in the regulations refer to specific requirements of the Act and must be included in the charges made by treatment authorities for wastewater collection and treatment. Other charges, such as payments for local debt service for previous construction and debt service for the local share of the treatment works, are not precluded by the Federal requirements and may be included in bills to users. To clarify this section, and remove doubt over any possible preclusion, the sentence "User charges do not include construction costs" was removed.

e. Many comments indicated that it was not clear that domestic users were subject to the user charge requirements. User charges must be paid by all recipients of wastewater collection and treatment services including domestic users, other non-industrial users, and industrial users. In order to provide clarity, this section was divided into two parts: § 35.925–11, user charges, and § 35.925–12, industrial cost recovery.

f. Several comments requested clarification of the length of the commitment period for industry (See § 35.925–12). The letter of intent is required to ensure that industries will use the treatment works when operation begins and that the period of use will be considered in plant design. In the event an industry discontinues use of the treatment works in the future, its payments for cost recovery and user charges would cease and the capacity formerly used by such industry would be available for increases in loading from existing users, or for new industrial users who would assume their proportionate share of the capital costs during the remaining portion of the recovery period.

g. Section 35.925–15, *Treatment of industrial wastes*, was partially revised for clarity of language.

h. Many responders interpreted § 35.925–14, *Federal activities*, to mean that Federal installations were to be excluded from user charges. It was not intended to exclude Federal installations from the user charge requirements. All users—industrial, commercial, institutional, domestic, and governmental—must pay the costs of operation and maintenance of treatment works.

The industrial cost recovery provisions of the Federal Water Pollution Control Act Amendments of 1972 are general conditions for grants made under this subpart. In consequence, the section entitled Federal Activities (and which dealt with these provisions) has been deleted from these regulations, and will be published with the final construction grant regulations.

i. Section 35.925–17 was corrected to conform with § 35.928–2.

j. The following changes were made to § 35.928–1, *Recovered amounts:*

(1) "Service life" was changed to "Useful life."

(2) Section 35.928–1(f) was modified for clarity.

Certain other suggested changes could not be made because, in the Administrator's judgment, they would have made these regulations inconsistent with the language and intent of the statute.

k. A large number of comments were received concerning a grantee's use of retained funds recovered from industry (§ 35.928–2).

Pursuant to the authority of the Administrator under section 204(b)(3) to determine the portion of retained amounts which is necessary for future expansion and reconstruction of treatment works, the regulations state that 80 percent of the retained amounts, together with any interest earned thereon, shall be used solely for eligible costs of reconstruction and expansion of treatment works associated with the project and necessary to meet the intent of the Act. The remainder of retained amounts may be used as the grantee sees fit.

It was determined to distribute the retained amounts in this manner because the 80/20 percent split between trust funds and discretionary funds bears a reasonable relationship to the Federal share of a project for future expansion and reconstruction. That is, the total amount necessary for reconstruction and expansion of the project would be, at a minimum, 100 percent of the eligible costs of the project and the non-Federal share would be 25 percent of the eligible project costs. Thus the ratio between the minimum amount necessary for reconstruction and expansion and the local amount for both reconstruction and expansion and the non-Federal share of the project would be (100)(100)/(100 plus 25)=80 percent. Since the amount retained will be less than the full amount necessary for future reconstruction and expansion plus the non-Federal share, the amount retained for future reconstruction and expansion will bear the same ratio to the amount attributable to the non-Federal share as if the full amount for both purposes were available. This appears to be the most equitable manner of distributing the retained funds.

l. Comments were received objecting to the requirement that quantity discounts not be given to large volume users (See Appendix—(h). Other Considerations). No change was made in the regulations because savings resulting from economies of scale should be shared by all users. However, costs for services, such as meter reading and billing that are not a function of the extent of use of the treatment works, could be the same for all users, with the remaining costs apportioned on the basis of flow and wastewater characteristics.

m. Questions were raised concerning how the costs for stormwater treatment, correction of combined sewer overflows, and infiltration correction or treatment will be apportioned to users of the treatment works. These situations will be handled by guidance to the States in accordance with the principles outlined in the Act and these regulations.

Because of the statutory mandate that all grants awarded after March 1, 1973, shall be subject to the requirements for user charges and industrial cost recovery of Section 204, and because of the importance of promptly making known to States and treatment authorities the content of these regulations, the Administrator finds good cause to declare these regulations effective immediately upon publication.

Dated August 15, 1973.

JOHN QUARLES,
Acting Administrator.

35.940 Determination of allowable costs.
35.940–1 Allowable costs.
35.940–2 Unallowable costs.
35.940–3 Costs allowable, if approved.
35.940–4 Indirect costs.
35.940–5 Disputes.
35.945 Grant payments.
35.950 Suspension or termination of grants.
35.955 Grant amendments to increase grant amounts.

1. Section 35.901 is amended to read as follows:

§ 35.901 Authority.

This subpart is promulgated pursuant to sections 201 through 205, 207, 210 through 212, 501(a), and 502(18) of the Act.

2. Sections 35.905–17 through 35.905–22 are added to read as follows:

§ 35.905–17 Useful life.

The estimated period during which a treatment works will be operated.

§ 35.905–18 Industrial cost recovery.

Recovery by the grantee from the industrial users of a treatment works of the grant amount allocable to the treatment of wastes from such users.

§ 35.905–19 Industrial user.

Any nongovernmental user of publicly owned treatment works identified in the Standard Industrial Classification Manual, 1972, Office of Management and Budget, as amended and supplemented, under the following divisions:

(a) Division A—Agriculture, Forestry, and Fishing.

(b) Division B—Mining.

(c) Division D—Manufacturing.

(d) Division E—Transportation, Communications, Electric, Gas, and Sanitary Services.

(e) Division I—Services.

A user in the Divisions listed may be excluded if it is determined that it will introduce primarily segregated domestic wastes or wastes from sanitary conveniences.

§ 35.905–20 Industrial cost recovery period.

That period during which the grant amount allocable to the treatment of wastes from industrial users is recovered from the industrial users of such works.

§ 35.905–21 Replacement.

Expenditures for obtaining and installing equipment, accessories, or appurtenances which are necessary during the service life of the treatment works to maintain the capacity and performance for which such works were designed and constructed. The term "operation and maintenance" includes replacement.

§ 35.905–22 User charge.

A charge levied on users of treatment works for the cost of operation and maintenance of such works.

3. Section 35.925–11 is revised to read as follows:

§ 35.925–11 User charges.

In the case of any grant awarded after March 1, 1973, for a project which includes the preparation of construction plans and specifications (step 2), that the applicant has developed an approvable plan and schedule of implementation for a system of user charges to assure that each recipient of waste treatment services will pay its proportionate share of the costs of operation and maintenance (including replacement) of treatment works provided by the applicant.

§ 35.925–12 Industrial cost recovery.

(a) In the case of any grant awarded after March 1, 1973, for a project which includes the preparation of construction plans and specifications (step 2), that the applicant has received

V 38-161 AUG 21 73 XUM

signed letters of intent from each significant industrial user to pay that portion of the grant amount allocable to the treatment of its wastes. Each such letter shall also include a statement of the industrial user's intended period of use of the treatment works. A significant industrial user is one that will contribute greater than 10 percent of the design flow or design pollutant loading of the treatment works. In addition, the applicant must agree to require all industrial users to pay that portion of the grant amount allocable to the treatment of wastes from such users.

(b) That the applicant has legal, institutional, managerial, and financial capability to insure adequate construction, operation, and maintenance of treatment works throughout the applicant's jurisdiction.

Grants awarded prior to March 2, 1973, are subject to 40 CFR 35.835–5 requirements in lieu of paragraphs (a) and (b) of this section.

4. Sections 35.925–15 and 35.925–17 are added to read as follows:

§ 35.925–15 Treatment of industrial wastes.

That the allowable costs for the project do not include costs allocable to the treatment for control or removal of pollutants in wastes introduced into the treatment works by industrial users unless the applicant is required to remove the same pollutants introduced from non-industrial sources.

§ 35.925–17 Retained amounts for reconstruction and expansion.

That the allowable costs for the project have been reduced by an amount equal to the unexpended balance of the amounts retained by the applicant for future reconstruction and expansion pursuant to 35.928–2, together with interest earned thereon.

5. Sections 35.928 through 35.928–2 are added to read as follows:

§ 35.928 Industrial cost recovery.

The system for industrial cost recovery shall be approved by the Regional Administrator and shall be implemented and maintained by the grantee in accordance with the following requirements.

§ 35.928–1 Recovered amounts.

(a) Each year during the industrial cost recovery period, each industrial user of the treatment works shall pay its share of the total grant amount divided by the recovery period.

(b) The industrial cost recovery period shall be equal to 30 years or the useful life of the treatment works, whichever is less.

(c) Payments shall be made by industrial users no less often than annually. The first payment by an industrial user shall be made not later than 1 year after such user begins use of the treatment works.

(d) An industrial user's share shall be based on all factors which significantly influence the cost of the treatment works. Factors such as strength, volume, and delivery flow rate characteristics shall be considered and included to insure a proportional distribution of the grant amount allocable to industrial use to all industrial users of the treatment works. As a minimum, an industry's share shall be based on its flow versus treatment works capacity except in unusual cases.

(e) If there is a substantial change in the strength, volume, or delivery flow rate characteristics introduced into the treatment works by an industrial user, such user's share shall be adjusted accordingly.

(f) If there is an expansion or upgrading of the treatment works, each existing industrial user's share shall be adjusted accordingly.

(g) An industrial user's share shall not include any portion of the grant amount allocable to unused or unreserved capacity.

(h) An industrial user's share shall include any firm commitment to the grantee of increased use by such user.

(i) All unallocated treatment works capacity must conform with the requirements of section 204(a)(5) of the Act and such cost-effectiveness guidelines as may be promulgated by the Administrator pursuant to section 212(2)(C) of the Act.

(j) An industrial user's share shall not include an interest component.

§ 35.928–2 Retained amounts.

(a) The grantee shall retain 50 percent of the amounts recovered from industrial users. The remainder, together with any interest earned thereon, shall be returned to the U.S. Treasury on an annual basis.

(b) A minimum of 80 percent of the retained amounts, together with interest earned thereon, shall be used solely for the eligible costs (in accordance with § 35.940 of this subpart) of the expansion or reconstruction of treatment works associated with the project and necessary to meet the requirements of the Act. The grantee shall obtain the written approval of the Regional Administrator prior to commitment of the retained amounts for any expansion and reconstruction. The remainder of the retained amounts may be used as the grantee sees fit.

(c) Pending use, the grantee shall invest the retained amounts for reconstruction and expansion in: (1) Obligations of the U.S. Government or (2) obligations guaranteed as to principal and interest by the U.S. Government or any agency thereof or (3) shall deposit such amounts in accounts fully collateralized by obligations of the U.S. Government or by obligations fully guaranteed as to principal and interest by the U.S. Government or any agency thereof.

6. Section 35.935–13 is added to read as follows:

§ 35.935–13 User charges and industrial cost recovery.

(a) The grantee will maintain such records as necessary to document compliance by the grantee with the Federal guidelines on user charges for operation and maintenance of publicly owned treatment works (see appendix hereto) and § 35.928 of this subpart.

(b) The grantee will obtain the approval of the Regional Administrator of the system of user charges and the system of industrial cost recovery based on the Federal guidelines on user charges for operation and maintenance of publicly owned treatment works (see appendix hereto) and § 35.928 of this subpart. The Regional Administrator shall not pay more than 80 percent of the amount of any Step 3 grant unless the grantee shall have received approval of its system of user charges and industrial cost recovery.

(c) Upon approval of a grantee's system of user charges and industrial cost recovery, such system shall become a condition of the grant and the grantee shall be subject to the provisions with respect to non-compliance with grant conditions of 40 CFR 30.404.

APPENDIX B

FEDERAL GUIDELINES

USER CHARGES FOR OPERATION AND MAINTENANCE OF PUBLICLY OWNED TREATMENT WORKS

(a) *Purpose.*—To set forth user charge guidelines pursuant to Section 204 of the Federal Water Pollution Control Act Amendments of 1972, PL 92–500, hereinafter referred to as the Act.

(b) *Authority.*—The Authority for establishment of the user charge guidelines is contained in section 204(b)(2) of the Act.

(c) *Background.*—Section 204(b)(1) of the Act provides that after March 1, 1973, Federal grant applicants shall be awarded grants only after the Regional Administrator has determined that the applicant has adopted or will adopt a system of charges to assure that each recipient of waste treatment services will pay its proportionate share of the costs of operation and maintenance, including replacement. The intent of the Act with respect to user charges is to distribute the cost of operation and maintenance of publicly owned treatment works to the pollutant source and to promote self-sufficiency of treatment works with respect to operation and maintenance costs.

(d) *Definitions.*—(1) *Replacement.*—Expenditures for obtaining and installing equipment, accessories, or appurtenances which are necessary to maintain the capacity and performance during the service life of the treatment works for which such works were designed and constructed. The term "operation and maintenance" includes replacement.

(2) *User charge.*—A charge levied on users of treatment works for the cost of operation and maintenance of such works.

(e) *Classes of users.*—At least two basic types of user charge systems are common. The first is to charge each user a share of the treatment works operation and maintenance costs based on his estimated or measured proportional contribution to the total treatment works loading. The second system establishes classes for users having similar flows and wastewater characteristics; i.e., levels of biochemical oxygen demand, suspended solids, etc. Each class is then assigned

its share of the waste treatment works operation and maintenance costs based on the proportional contribution of the class to the total treatment works loading. Either system is in compliance with these guidelines.

(f) *Criteria against which to determine the adequacy of user charges.*—The user charge system shall be approved by the Regional Administrator and shall be maintained by the grantee in accordance with the following requirements:

(1) The user charge system shall result in the distribution of the cost of operation and maintenance of treatment works within the grantee's jurisdiction to each user (or user class) in proportion to such user's contribution to the total wastewater loading of the treatment works. Factors such as strength, volume, and delivery flow rate characteristics shall be considered and included as the basis for the user's contribution to ensure a proportional distribution of operation and maintenance costs to each user (or user class).

(2) For the first year of operation, operation and maintenance costs shall be based upon past experience for existing treatment works or some other rational method that can be demonstrated to be applicable.

(3) The grantee shall review user charges annually and revise them periodically to reflect actual treatment works operation and maintenance costs.

(4) The user charge system shall generate sufficient revenue to offset the cost of all treatment works operation and maintenance provided by the grantee.

(5) The user charge system shall be incorporated in one or more municipal legislative enactments or other appropriate authority. If the project is a regional treatment works accepting wastewaters from treatment works owned by others, then the subscribers receiving waste treatment services from the grantee shall have adopted user charge systems in accordance with this guideline. Such user charge systems shall also be incorporated in the appropriate municipal legislative enactments or other appropriate authority.

(g) *Model user charge systems.*—The user charge system adopted by the applicant must result in the distribution of treatment works operation and maintenance costs to each user (or user class) in approximate proportion to his contribution to the total wastewater loading of the treatment works. The following user charge models can be used for this purpose; however, the applicant is not limited to their use. The symbols used in the models are as defined below:

C_T = Total operation and maintenance (O. & M.) costs per unit of time.
C_u = A user's charge for O. & M. per unit of time.
C_s = A surcharge for wastewaters of excessive strength.
V_c = O&M cost for transportation and treatment of a unit of wastewater volume.
V_u = Volume contribution from a user per unit of time.
V_T = Total volume contribution from all users per unit of time.
B_c = O&M cost for treatment of a unit of biochemical oxygen demand (BOD).
B_u = Total BOD contribution from a user per unit of time.
B_T = Total BOD contribution from all users per unit of time.
B = Concentration of BOD from a user above a base level.
S_c = O&M cost for treatment of a unit of suspended solids.
S_u = Total suspended solids contribution from a user per unit of time.
S = Concentration of SS from a user above a base level.
P_c = O&M cost for treatment of a unit of any pollutant.
P_u = Total contribution of any pollutant from a user per unit of time.
P_T = Total contribution of any pollutant from all users per unit of time.
P = Concentration of any pollutant from a user above a base level.

(1) *Model No. 1.*—If the treatment works is primarily flow dependent or if the BOD, suspended solids, and other pollutant concentrations discharged by all users are approximately equal, then user charges can be developed on a volume basis in accordance with the model below:

$$C_u = \frac{C_T}{V_T}(V_u)$$

(2) *Model No. 2.*—When BOD, suspended solids, or other pollutant concentrations from a user exceed the range of concentration of these pollutants in normal domestic sewage, a surcharge added to a base charge, calculated by means of Model No. 1, can be levied. The surcharge can be computed by the model below:

$$C_s = [B_c(B) + S_c(S) + P_c(P)]V_u$$

(3) *Model No. 3.*—This model is commonly called the "quantity/quality formula":

$$C_u = V_cV_u + B_cB_u + S_cS_u + P_cP_u$$

(h) *Other Considerations.*—(1) Quantity discounts to large volume users will not be acceptable. Savings resulting from economies of scale should be apportioned to all users or user classes.

(2) User charges may be established based on a percentage of the charge for water usage only in cases where the water charge is based on a constant cost per unit of consumption.

PART I

(Part II begins on page 22605)

HIGHLIGHTS OF THIS ISSUE

This listing does not affect the legal status of any document published in this issue. Detailed table of contents appears inside.

PRICE STABILIZATION—CLC issues petroleum and petroleum products regulations; effective 8–19–73 22536

SPRAY ADHESIVES—Consumer Product Safety Commission bans certain products due to risk of chromosome damage 22569

WATER POLLUTION—EPA proposed guidelines and standards for beet sugar processing and insulation fiberglass manufacturing (2 documents); comments by 9–21–73..... 22605

VETERAN BENEFITS—VA proposes plot and burial allowance for service-connected death; comments by 9–21–73 . 22561

FARM LOANS—USDA amendments for disposal of association surplus property; effective 8–22–73 22544

UPLAND COTTON—
USDA determination procedures for prices in world markets; effective 8–21–73..... 22543
USDA proposed determinations regarding 1974 crop.... 22560

CUSTOMS SERVICE—Regulations regarding foreign military personnel; effective 9–21–73..... 22548

MEETINGS—
DOT: National Highway Traffic Safety Administration, 11–7 and 11–8–73..... 22566
Commission on Civil Rights:
Maryland State Advisory Committee, 8–22–73..... 22568
Virginia State Advisory Committee, 8–23–73..... 22568
AEC: Advisory Committee on Reactor Safeguards, 9–6 and 9–8–73..... 22567

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by the Executive Branch of the Federal Government. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $2.50 per month or $25 per year, payable in advance. The charge for individual copies is 20 cents for each issue, or 20 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

Contents

AGENCY FOR INTERNATIONAL DEVELOPMENT

Rules and Regulations

Participants in nonmilitary economic development training programs; per diem payments 22549

Notices

John F. Keyes; redelegation of authority 22564

AGRICULTURAL MARKETING SERVICE

Proposed Rules

Cranberries grown in the states of Massachusetts, Rhode Island, Connecticut, New Jersey, Wisconsin, Michigan, Minnesota, Oregon, Washington, and Long Island in the State of New York; decisions and referendum order with respect to proposed further amendment of the marketing agreement and order 22554

Milk in the New York-New Jersey marketing area; decision and order to terminate proceeding on proposed amendments to marketing agreement and to order 22559

AGRICULTURAL STABILIZATION AND CONSERVATION SERVICE

Proposed Rules

Upland cotton; 1974 crop determinations 22560

AGRICULTURE DEPARTMENT

See also Agricultural Marketing Service; Agricultural Stabilization and Conservation Service; Commodity Credit Corporation; Farmers Home Administration; Forest Service.

Notices

International Commercial Exchange, Inc.; order vacating designations 22565

ATOMIC ENERGY COMMISSION

Rules and Regulations

Transportation and traffic management; updating to reflect transfer of functions 22549

Notices

Advisory Committee on Reactor Safeguards; notice of meeting 22567

Mississippi Power & Light Co.; availability of final environmental statement 22567

Texas Utilities Generating Co., et al.; receipt of application for construction permits and facility licenses and availability of applicants' environmental report; time for submission of views on antitrust matter 22568

CIVIL AERONAUTICS BOARD

Rules and Regulations

Delegations and review of actions under delegation; nonhearing matters; revisions of delegations of authority 22546

Notices

International Air Transport Association; order relating to currency matters 22568

CIVIL RIGHTS COMMISSION

Notices

State Advisory Committee meetings:

Maryland 22568

Virginia 22568

CIVIL SERVICE COMMISSION

Rules and Regulations

Applicability of regulations; definitions 22535

Classification under general schedule and pay under other systems 22536

Excepted service:

Commerce Department 22535

Interior Department 22535

Justice Department 22535

Labor Department 22535

Incentive awards; correction 22535

COMMERCE DEPARTMENT

See Domestic and International Business Administration; National Oceanic and Atmospheric Administration.

COMMODITY CREDIT CORPORATION

Rules and Regulations

Cotton; procedures and factors for determining three-year average price for middling 1-inch American upland cotton in world markets 22543

Wheat; 1973 crop loan and purchase program; correction 22543

CONSUMER PRODUCT SAFETY COMMISSION

Notices

Order deeming certain spray adhesives to be banned hazardous substances; finding of imminent hazard 22569

COST OF LIVING COUNCIL

Rules and Regulations

Phase IV price regulations; petroleum and petroleum products 22536

Notices

Proposed price increases; notice of public hearing:

Automobile prices 22569

Steel prices 22570

CUSTOMS SERVICE

Rules and Regulations

Foreign military personnel; personal declarations and exemptions 22548

Ports of entry; extension of port limits of Omaha, Nebr 22547

Proposed Rules

Customs warehouses, container stations, and control of merchandise; transfer of merchandise 22554

DOMESTIC AND INTERNATIONAL BUSINESS ADMINISTRATION

Notices

Fordham University, et al.; applications for duty-free entry of scientific articles 22565

ENVIRONMENTAL PROTECTION AGENCY

Proposed Rules

Effluent limitation guidelines and standards;

Insulation fiberglass manufacturing industry 22605

Beet sugar processing industry 22605

FARMERS HOME ADMINISTRATION

Rules and Regulations

Management and sale of acquired real estate 22544

FEDERAL DEPOSIT INSURANCE CORPORATION

Rules and Regulations

Interest on deposits; payment of time deposits before maturity 22544

FEDERAL DISASTER ASSISTANCE ADMINISTRATION

Notices

Colorado; amendment to notice of major disaster 22566

FEDERAL MARITIME COMMISSION

Notices

Farrell Lines Inc. and Delta Steamship Lines Inc.; agreement filed 22571

Georgia Ports Authority and J. R. Shipping Co., Inc.; agreement filed 22571

Terminal Operators Inc.; order of revocation 22571

U.S. West Coast/Japan Trade and U.S. Atlantic and Gulf/Japan Trade; publication of discriminatory rates; revised procedures 22572

FEDERAL POWER COMMISSION

Notices

National Power Survey; Technical Advisory Committee on Research and Development Task Force on Energy Conversion Research; meeting 22575

(Continued on next page)

V 38-162 AUG 22 73 XUM

Hearings, etc.:
City and County of Denver 22572
Coastal States Gas Producing Co 22572
Colorado Interstate Co 22573
Columbia Gas Transmission Corp 22573
Connecticut Light and Power Co 22573
Consolidated Gas Supply Corp 22573
Exxon Corp. et al 22574
Exxon Pipeline Co. of California 22574
Florida Gas Transmission Co 22575
G. Phil Roberts & Glynn D. Buie 22576
Monsanto Co. et al 22575
Natural Gas Pipeline Co. of America 22575
Phillips Petroleum Co 22575
Reserve Oil and Gas Co 22576
Sea Robin Pipeline Co 22577
Stingray Pipeline Co., et al 22577
Transcontinental Gas Pipe Line Corp. and Texas Gas Transmission Corp 22577
Transcontinental Gas Pipe Line Corp 22577

FEDERAL RESERVE SYSTEM
Notices
Bankamerica Corp.; order granting request for reconsideration and approving acquisition of GAC Finance, Inc 22578
Central Mortgage Co., Inc.; order granting determination 22580
Marine Bancorporation; order approving acquisition of certain assets of Triway Finance Co 22581

FISCAL SERVICE
Rules and Regulations
Offering of United States Savings Bonds, Series H; amount of interest checks and investment yields; correction 22549

FISH AND WILDLIFE SERVICE
Rules and Regulations
Hunting; special regulations; big game:
New Mexico; San Andres National Wildlife Refuge (2 documents) 22553
Wyoming; Pathfinder National Wildlife Refuge; (2 documents) 22553

FOREST SERVICE
Notices
Boundary Waters Canoe Area Plan, Superior National Forest; availability of draft environmental statement 22565
Oregon; Freezeout Road N-38; availability of final environmental statement 22565

GENERAL SERVICES ADMINISTRATION
Notices
Ambulances, sedans, and station wagons; industry specification development conference 22581

HAZARDOUS MATERIALS REGULATIONS BOARD
Rules and Regulations
Specifications; 3AX, 3AAX, and 3T cylinders; correction 22552

HOUSING AND URBAN DEVELOPMENT DEPARTMENT
See Federal Disaster Assistance Administration.

INTERIOR DEPARTMENT
See also Fish and Wildlife Service; Land Management Bureau; Reclamation Bureau.
Notices
Chassahowitzka Wilderness Area, Florida; availability of final environmental statement 22564
Oregon Islands Wilderness Area; availability of final environmental statement 22564

INTERNAL REVENUE SERVICE
Rules and Regulations
Income tax; taxable years beginning after December 31, 1953; amendments relating to DISC's; correction 22549

INTERSTATE COMMERCE COMMISSION
Rules and Regulations
Graham County Railroad Co.; authorization to use certain trackage 22552
Notices
Assignment of hearings 22587
Atchinson, Topeka and Santa Fe Railway Co., et al.; exemption under mandatory car service rules 22587
Fourth section application for relief 22589
Increases in freight rates and charges to offset retirement tax increases, 1973 22600
Montana and Idaho; shipment of hay by rail 22599
Motor carriers:
Alternate route deviations 22589
Applications and certain other proceedings 22589
Board transfer proceedings 22592
Intrastate applications 22588
Temporary authority applications (2 documents) 22593, 22596

LAND MANAGEMENT BUREAU
Rules and Regulations
Alaska; exclusions of land from Chugach and Tongass National Forest 22551
Arizona:
Final revocation of withdrawal for air navigation site no. 27 22550
Partial revocation of withdrawals for national forest administrative sites 22550
Withdrawal for national forest recreational and administrative sites 22552
Missouri; addition to national forest 22551
Montana; partial revocation of reclamation withdrawal; Milk River Irrigation Project 22552
New Mexico:
Partial revocation of national forest reserve; transfer of administrative jurisdiction over land in the Rio Grande National Wild and Scenic Rivers area 22550
Withdrawal for national forest recreation areas and for national forest administrative sites (2 documents) 22550
Oregon; partial revocation of reclamation project withdrawal 22551

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION
Notices
NASA Sounding Rockets Program; availability of final environmental impact statement 22582

NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION
Notices
Air brake systems; public meeting 22566

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION
Notices
Importers of halibut; minimum size limit 22566

Service connected burial benefit; plot or interment allowance 22561

List of CFR Parts Affected

The following numerical guide is a list of the parts of each title of the Code of Federal Regulations affected by documents published in today's issue. A cumulative list of parts affected, covering the current month to date, appears following the Notices section of each issue beginning with the second issue of the month. In the last issue of the month the cumulative list will appear at the end of the issue.

A cumulative guide is published separately at the end of each month. The guide lists the parts and sections affected by documents published since January 1, 1973, and specifies how they are affected.

International Monetary Fund and the International Bank for Reconstruction and Development, alternate governors (Aug 15, 1973; 87 Stat. 314)

S. 1993..... Pub. Law 93–88
EURATOM Cooperation Act of 1958, amendment (Aug. 14, 1973; 87 Stat. 296)

S. 2120..... Pub. Law 93–90
Federal Railroad Safety Authorization Act of 1973 (Aug. 14, 1973; 87 Stat. 305)

S. J. Res. 25..... Pub. Law 93–103
National Next Door Neighbor Day, designation (Aug. 16, 1973; 87 Stat. 349)

Rules and Regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 5—Administrative Personnel

CHAPTER I—CIVIL SERVICE COMMISSION

PART 210—BASIC CONCEPTS AND DEFINITIONS (GENERAL)

Applicability of Regulations; Definitions

Part 210 is amended to revise the definition of the metropolitan area of Washington, D.C., by adding Charles County, Maryland. This makes the definition accord with the current definition of the Washington, D.C., Standard Metropolitan Statistical Area issued by the Office of Management and Budget.

Effective on Aug. 22, 1973, § 210.102 is amended as set out below.

§ 210.102 Definitions.

• • • • • •

(b) In this chapter:

• • • • • •

(7) Metropolitan area of Washington, D.C., means the District of Columbia; Alexandria, Fairfax, and Falls Church Cities, Va.; Arlington, Fairfax, Loudoun, and Prince William Counties, Va.; and Charles, Montgomery, and Prince Georges Counties, Md.

(5 U.S.C. secs. 1302, 3302; E.O. 10577, 3 CFR 1954–58 Comp., p. 218)

UNITED STATES CIVIL SERVICE COMMISSION,
[SEAL] JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc.73–17773 Filed 8–21–73;8:45 am]

PART 213—EXCEPTED SERVICE

Department of Justice

Section 213.3310 is amended to show that one additional position of Special Assistant to the Director, Community Relations Service, is excepted under Schedule C.

Effective August 22, 1973, § 213.3310(r) (5) is amended as set out below.

§ 213.3310 Department of Justice.

• • • • • •

(r) *Community Relations Service.* • • •

(5) Three Special Assistants to the Director.

• • • • • •

PART 451—INCENTIVE AWARDS

Correction

In the document appearing in the FEDERAL REGISTER of July 11, 1973, (FR Doc. 73–14107) on page 18445, § 451.309 was inadvertently omitted. Section 451.309 reads as set out below:

§ 451.309 Award by other benefiting agency.

(a) *Contribution approved.* When the head of an agency approves a contribution which originated in another agency, he shall report the approval to either the originating agency or the Commission, whichever referred the contribution.

(b) *The report.* The approving agency shall report its approval as soon as possible and not later than six months after receipt of the referral except that the report may be made at a later date with prior approval of the Commission. The report shall state the estimated first year net tangible benefits, if any; the intangible benefits, if any; and the incentive award it will grant, under this part.

(c) *Funds for award.* (1) When the head of an agency approves a contribution referred by another agency, he shall arrange with the originating agency for transfer of funds necessary to pay the incentive award.

(2) When more than one agency benefits from a contribution, the Commission shall determine the total interagency first year net measurable benefits, and the total intangible benefits, and recommend to the appropriate benefiting agencies, their proportionate share of the award.

V 38-162 AUG 22 73 XUM

(3) Within thirty days after receipt of the recommendation referred to in paragraph (c)(2) of this section, each benefiting agency shall notify the Commission in writing of its action on the recommendation.

(5 USC 4506)

UNITED STATES CIVIL SERVICE COMMISSION,
[SEAL] JAMES C. SPRY,
Executive Assistant to the Commissioners.

PART 511—CLASSIFICATION UNDER THE GENERAL SCHEDULE

PART 534—PAY UNDER OTHER SYSTEMS

Miscellaneous Amendments

Section 511.201(b) is amended to show exclusion from part 511 and from classification under the General Schedule of position of Student Physician's Assistant, Department of Health, Education and Welfare. Section 534.202(b) is amended to show additional maximum stipends prescribed for positions of Student Physician's Assistant, Department of Health, Education and Welfare as set out below.

1. Effective August 19, 1973, the following item is added in alphabetical sequence to paragraph (b) of § 511.201.

§ 511.201 Coverage of and exclusions from the General Schedule.

. . . . . .

(b) *Exclusions.* . . .

Student Physician's Assistant, Department of Health, Education and Welfare, approved first year postgraduate training.

. . . . . .

(5 U.S.C. sec. 5102)

2. Effective August 19, 1973, the following item is added in alphabetical sequence to paragraph (b) of Section 534.202.

§ 534.202 Maximum Stipends.

. . . . . .

(b) . . .

Student Physician's Assistant, Department of Health, Education and Welfare, approved first year postgraduate training-------- L-5

. . . . . .

Title 6—Economic Stabilization

CHAPTER I—COST OF LIVING COUNCIL

PART 150—COST OF LIVING COUNCIL PHASE IV PRICE REGULATIONS

Petroleum and Petroleum Products

The purpose of this amendment to Part 150 of the Cost of Living Council Regulations is to add Subpart L—Petroleum and Petroleum Products.

On July 19, 1973, the Cost of Living Council established Part 150 and issued Subpart N in final form, 38 FR 19462 (July 20, 1973). On the same day the Council issued a notice of proposed rulemaking, 38 FR 19464 (July 20, 1973) setting out proposed Phase IV regulations, and inviting interested persons to submit written data, views, or arguments. On August 6, 1973, the Council issued Subparts A through K and P in final form, 38 FR 21592, (August 9, 1973). On August 9, 1973, the Council issued Subparts M and O in final form, 38 FR 21978 (August 15, 1973).

The Council stated in the July 19 notice of proposed rulemaking that all comments received before July 31, 1973, would be considered by the Council before taking action on the proposed regulations.

The Council received 272 comments on Subpart L of the proposed Phase IV regulations. This number includes 110 comments which were received after July 31, 1973, all of which the Council considered, notwithstanding the fact that they were filed late. On August 10, 1973, the Council extended the freeze on petroleum and petroleum products for one week, until August 19, 1973, to provide time to consider all of the 272 comments and prepare the Subpart L regulations in the final form, 38 FR 21933 (August 14, 1973).

As in the case of comments on the subparts already issued in final form, each comment on proposed Subpart L was reviewed by the attorneys and economic analysts responsible for the subpart. Staff officials of the Council conducted numerous meetings with affected parties and made an intensive reexamination of the regulations, independently as well as in light of the comments received, in order to assure the maximum degree of clarity and consistency of the policy decisions that were made and of the regulations written to reflect these decisions. As a result of these efforts Subpart L in its final form has been changed extensively from the proposal that was published on July 19, 1973. The substantive policy changes were publicly announced on August 10. These regulations implement those policy decisions and, in addition, incorporate numerous changes to better implement the program.

Subpart L sets forth Phase IV petroleum regulations which apply to all sales and purchases of crude petroleum (Standard Industrial Classification Code 1311, excluding natural gas), natural gas liquids (Standard Industrial Classification Code 1321), and refined petroleum products (Standard Industrial Classification Code 2911), and to leases of gasoline stations used in the retail sales or resellers of gasoline. The Small Business exemption which appears in § 150.60 of the already-published main body of Phase IV price stabilization regulations (38 FR 21602) provides that no firm which produces, manufactures or sells covered products qualifies for the exemption.

The provisions of Subpart L supersede the provisions of Subparts E, F, G, the rules applicable to manufacturers and service organizations, and the provisions of Subpart K which prescribe pricing rules for wholesalers and retailers. The prenotification provisions for prices subject to Subpart L apply only to the extent specified in Subpart L. The loss-low profit rule § 150.201, is not applicable to prices subject to the provisions of Subpart L. To the extent this subpart is inconsistent with any other provisions of this part, the provisions of this subpart govern.

I. *Domestic crude petroleum.* A 2-tier price system has been adopted, providing for a ceiling on domestic crude petroleum prices but allowing new crude and an equivalent amount of old crude to be sold at prices above the ceiling. The system, as published in final form in § 150.354, modifies in several respects the plan as originally proposed on July 19, 1973.

The ceiling price for domestic crude petroleum, as specified in § 150.353, is the highest posted price on May 15, 1973, plus an amount not in excess of 35 cents. Comments received during the rulemaking proceeding indicated that prices of more than a third of the domestic output of crude petroleum had increased on the order of 20 cents to 45 cents per barrel above the May 15 posted prices by June 13, 1973, the date on which the freeze was instituted. Moreover, during this period, the world price of domestic crude continued to increase significantly. The initial authorization of a 35 cent increase above the May 15, 1973 prices will permit continuation up to a maximum of 35 cents, of those posted price increases which were implemented in some fields after May 15, 1973 and prior to the freeze and it will allow domestic crude prices to move toward the world prices. However, it will also require rollbacks in those fields where prices had moved higher than 35 cents above the May 15 level. The Council will continually monitor the ceiling prices of domestic crude petroleum and intends to make periodic upward adjustments in the ceiling price toward the higher world prices for crude petroleum.

II. *Retail sales of gasoline, No. 2 heating oil and No. 2–D diesel fuel.* The ceiling price rules for gasoline, No. 2 heating oil and No. 2–D diesel fuel as set forth in § 150.353 have been modified in several respects. The ceiling prices for No. 2 heating oil becomes effective at 11:59 p.m., e.s.t., August 19, 1973. The ceiling prices for gasoline and No. 2–D diesel fuel become effective at 11:59 p.m., on August 31, 1973. In each case, the ceiling price is computed as the average cost of inventory on August 1, 1973, plus the actual markup as of January 10, 1973. However, for purposes of computing the ceiling prices for gasoline and No. 2 heating oil, retailers may use an actual markup of not less than 7 cents per gallon. This change is intended to avoid undue hardship for those retailers who were engaged in price wars on January 10, 1973, and, as a result, had actual markups of less than 7 cents per gallon on that date.

Effective September 1 retail sellers of gasoline and No. 2–D diesel fuel must post at each pump their selling prices and the minimum octane number for sales of gasoline. Stickers used to post ceiling prices and octane numbers have been prescribed by the Council and may be obtained from local post offices in accordance with instructions being issued by the Council and mailed to each gasoline retailer.

The ceiling price for No. 2 heating oil may be adjusted at the beginning of each month, beginning September 1, 1973, to reflect increased costs of imported No. 2 heating oil. However, the retailer must notify the Council of such upward adjustments by the 5th day of the month in which such an adjustment has been made. If in a subsequent month the cost of the retailer's inventory of No. 2 heating oil decreases, the selling price must be adjusted downward on a dollar-for-dollar basis to reflect the reduced cost of No. 2 heating oil. These monthly adjustments to the ceiling price are intended to assure that the regulations do not restrict importation of No. 2 heating oil which will be vitally needed in the U.S. this winter.

A separate section has been added which sets forth the method by which refiners making retail sales must compute their ceiling prices for gasoline, No. 2 heating oil and No. 2–D diesel fuel. For these "refiner-retailers" the ceiling prices on these products are the May 15, 1973 selling price at each location plus increased costs of imports incurred after May 15 and prior to July 31. The method of computing and allocating the increased costs of imports is set forth in § 150.356.

The Council intends to monitor the ceiling prices of gasoline No. 2 heating oil and No. 2–D diesel fuel and will make periodic upward adjustments in the ceiling prices for those products to account for increased costs of imports and of domestic crude.

III *Refiners.* The base price for sales of covered products by a refiner as set forth in § 150.358 is the May 15 selling price plus an adjustment for (1) increased cost of imports above May 15 costs and (2) increased costs of domestic crude petroleum over May 15 crude prices. Increases above the base price may be made only to reflect on a dollar-for-dollar basis increased costs other than increases in the costs of imports and increases in domestic crude prices. However, a firm making such an increase must prenotify that increase and is subject to the profit margin test.

Section 150.358(c) through (k) prescribes the method for calculating a price increase above base price and is similar to the general rules applicable to other manufacturers. However, the period for determining the base costs with respect to labor, crude petroleum and other input costs is the rate at which those costs were incurred on May 15. For other costs, which cannot be determined as of May 15, 1973, the base cost is the average cost incurred during the last fiscal quarter which ended prior to May 15.

In order to assure that a retailer of gasoline can comply with the octane number posting requirements, the refiner is required to certify the octane number in each sale of gasoline other than a retail sale. In order to allow a retailer of No. 2 heating oil to adjust his ceiling price to reflect increased costs of imports of No. 2 heating oil, the refiner must certify the amount by which the base price of No. 2 heating oil exceeds the May 15 price due solely to increased costs of imported No. 2 heating oil.

The pricing rule also allows a refiner to adjust its May 15, 1973 selling prices to reflect increased costs of imports in computing both base prices and ceiling prices. The specific method of calculating these increased costs is set forth in § 150.356. For purposes of computing ceiling prices, the increased costs of imports is the difference between the landed costs on July 31, 1973, and the landed costs on May 15, 1973. For purposes of adjusting base prices, the increased cost of imports is the difference between current costs and the May 15, 1973 cost.

Increased costs of imports incurred prior to August 1, 1973. Increases in costs of imports incurred prior to August 1, 1973, may be used to compute the base prices for covered products other than gasoline, No. 2–D diesel fuel or No. 2 heating oil. To the extent the refiner does not use these costs to increase base prices of those other products, he may use the balance to adjust both ceiling and base prices of gasoline, No. 2 diesel and No. 2 heating oil subject to the following limitations:

1. The part of increased costs of product or crude oil used to adjust the base and ceiling prices of gasoline may not exceed the fraction which sales of gasoline in the same quarter of the most recently completed fiscal year bears to total sales of covered product in that quarter.

2. The increased costs for gasoline so computed must be allocated between ceiling and base prices of gasoline. The amount used to adjust ceiling prices may not exceed the fraction which the sales of gasoline at retail during the same quarter of the most recently completed fiscal year bear to total sales of gasoline in that quarter. The remainder of the increased costs allocated to gasoline may be applied only to the base price of gasoline.

The same calculations must be made for adjustments to the ceiling and base prices of No. 2 heating oil and No. 2–D diesel.

Increased costs of imports incurred after July 31. The increase costs of imports incurred after July 31, 1973, may be used to adjust the base prices for covered products other than gasoline, No. 2–D diesel fuel or No. 2 heating oil. The balance may be used in computing the base prices for gasoline, No. 2–D diesel fuel and No. 2 heating oil.

The amount of these increased costs of imports which may be applied to gasoline is computed in the same manner as set forth above with respect to increased costs of imports incurred prior to August 1, 1973. Of this amount, the part used to increase base prices of gasoline may not exceed the proportion that sales of gasoline, other than sales at retail, during the same quarter of the most recently completed fiscal year bore to total gasoline sales in that quarter. Moreover, that part of the amount allocated to gasoline which represents the fraction that retail sales of gasoline bore to total sales of gasoline during the same quarter of the most recently completed fiscal year, may not be passed on either in the ceiling price or base price of retail gasoline or in the base price of any other covered product. The same calculations and limitations apply to increases in the base prices of No. 2–D diesel fuel or No. 2 heating oil.

Increased cost of domestic crude petroleum. Increases in the cost of domestic crude petroleum over the May 15, 1973 cost of crude petroleum of the same grade from the same field may be passed on in the base price of products sold by the refiner in a manner consistent with the allocation of increased costs of imports incurred after July 31, 1973. Therefore, increased costs of domestic crude petroleum may not be used to calculate the ceiling prices for retail sale of gasoline No. 2 heating oil or No. 2–D diesel fuel by a refiner. If the increased cost in domestic crude is used to adjust the base prices of gasoline, No. 2–D diesel or No. 2 heating oil, the fraction of the increased costs attributable to those products sold at retail may not be passed on and must be absorbed by the refiner. Any increase in base prices or a ceiling price of a product due to increased costs of crude petroleum or increased costs of imports must be applied equally to all classes of purchasers of that product.

IV. *Resellers and retailers of products other than gasoline, No. 2–D diesel fuel and No. 2 heating oil.* The price rule set forth in the notice of proposed rulemaking which limited these sellers to actual cost plus January 10, 1973 markups has been adopted by the Council. However, in order to enable the retailer of gasoline to post the minimum octane number, these sellers must certify to their retail vendees the octane number for each sale of gasoline. Moreover, in order to allow a retailer of No. 2 heating oil to adjust his ceiling price for increases in the cost of imports, the seller of No. 2 heating oil must certify any increase in prices over the August 10, 1973 prices which reflect an increase in the cost of imported No. 2 heating oil incurred since August 19, 1973.

V. *Leases.* The base rent with respect to the lease of any real property used in the retailing of gasoline is the rent charged for that property on May 15, 1973. The rule substantially as set forth in the proposed rulemaking.

V 38-162 AUG 22 73 XUM

In consideration of the foregoing, Part 150 of Title 6 of the Code of Federal Regulations is amended as set forth below, effective 11:59 p.m., e.s.t., August 19, 1973.

(Economic Stabilization Act of 1970, as amended, Pub. L. 92-210, 85 Stat. 743; Pub. L. 93-28, 87 Stat. 27; E.O. 11695, 38 FR 1473, E.O. 11730, 38 FR 19345, Cost of Living Council Order No. 14, 38 FR 1489)

Issued in Washington, D.C., on August 17, 1973.

JOHN T. DUNLOP,
Director,
Cost of Living Council.

1. The table of sections is amended by adding the following items regarding Subpart L:

Subpart L—Petroleum and Petroleum Products

Sec.
150.351 Purpose and scope.
150.352 Definitions.
150.353 Ceiling price determination: Domestic crude petroleum.
150.354 Ceiling price rule: Crude petroleum.
150.355 Retail sales of gasoline, No. 2–D diesel fuel, and No. 2 heating oil.
150.356 Allocation of refiners' increased costs of imports.
150.357 Allocation of refiners' increased costs of domestic crude petroleum.
150.358 Price rule: Refiners.
150.359 Price rule: Resellers and retailers.
150.360 Price rule: Leases.
150.361 New item and lease rule.
150.362 Price information.
150.363 Reports and recordkeeping.

2. The part is amended by adding a new Subpart L to read as follows:

Subpart L—Petroleum and Petroleum Products

§ 150.351 Purpose and scope.

(a) This subpart applies to the sales of products described in the 1972 Industrial Classification Manual, Industry Code 1311 (except natural gas), 1321, or 2911 and the leasing of real property used in the retailing of gasoline. These industry codes include crude petroleum, certain petroleum products, liquefied petroleum gas and other natural gas liquids.

(b) This subpart supersedes the provisions of § 150.11, § 150.201, Subparts E, F, G, and K, and the prenotification provisions of Subpart H except to the extent specifically required, with respect to sales and leases subject to this subpart. To the extent that this subpart may be inconsistent with any other provisions in this part, the provisions in this subpart govern.

§ 150.352 Definitions.

For purposes of this subpart—

"Base price" means the base price determined pursuant to § 150.358 or in the case of a new product § 150.361.

"Ceiling price" means the ceiling price determined pursuant to § 150.355 with respect to No. 2–D diesel fuel, No. 2 heating oil and gasoline and § 150.353 with respect to domestic crude petroleum.

"Class of purchaser" means purchasers or lessees to whom a person has charged a comparable price for comparable property or service pursuant to customary price differentials between those purchasers or lessees and other purchasers or lessees.

"Covered product" means a product described in the 1972 edition, Standard Industrial Classification Manual, Industry Code 1311 (except natural gas), 1321, or 2911.

"Domestic crude petroleum" means a crude petroleum produced in any of the several States, or the District of Columbia or from the "outer continental shelf" as defined in 43 USC 1331.

"Gasoline" means any of the various grades of retail gasoline other than aviation gasoline.

"Item" means a product sold, leased or offered for sale or lease to a class of purchaser as defined in this section.

"No. 2 heating oil" means heating oil grade No. 2 as defined in American Society for Testing and Materials (ASTM) D396–71.

"No. 2–D diesel fuel" means diesel fuel grade No. 2 defined in American Society for Testing and Materials (ASTM) D975–71.

"Octane number" means the octane number derived from the sum of Research (R) and Motor (M) octane numbers divided by two (R+M)/2. The research octane (R) and motor octane number (M) shall be as described in the American Society for Testing and Materials (ASTM) "Standard Specifications for Gasoline" D439–70, and subsequent revisions, and ASTM Test Methods D2699 and D2700. When gasoline of different octane numbers is mixed for sale, "octane number" means the lowest octane number of the gasoline used in this mixture.

"Producer" means a firm or that part of a firm which produces crude petroleum or any firm which owns crude petroleum when it is produced.

"Refiner" means a firm (other than a reseller or retailer) or that part of such a firm which refines covered products or blends and substantially changes covered products, or refines liquid hydrocarbons from oil and gas field gases, or recovers liquefied petroleum gases incident to petroleum refining and sells those products to resellers, retailers, reseller-retailers or ultimate consumers. "Refiner" includes any owner of covered products which contracts to have those covered products refined and then sells the refined covered products to resellers, retailers, reseller-retailers or ultimate consumers.

"Refiner-reseller" means that part of a refiner which carries on the trade or business of purchasing covered products in arms-length transactions and selling those products to other resellers or to retailers without substantially changing their form.

"Refiner-retailer" means a refiner or that part of a refiner which sells covered products to ultimate consumers.

"Reseller" means a firm (other than a refiner or retailer) or that part of such a firm which carries on the trade or business of purchasing covered products, and reselling them without substantially changing their form to purchasers other than ultimate consumers.

"Reseller-retailer" means a firm (other than a refiner) or that part of such a firm which carries on the functions of both a reseller and retailer.

"Retail sales" means sales of covered products to ultimate consumers.

"Retailer" means a firm (other than a refiner or reseller) or that part of such a firm which carries on the trade or business of purchasing covered products and reselling them to ultimate consumers without substantially changing their form.

"Transaction" means an arms-length sale or lease between unrelated persons which are not members of a controlled group (as defined in 26 U.S.C. 1536(c)) and is considered to occur at the time and place when a binding contract is entered into between the parties.

§ 150.353 Ceiling price determination: Domestic crude petroleum.

The ceiling price for a particular grade of domestic crude petroleum in a particular field is the sum of (i) the highest posted price at 6:00 a.m., local time, May 15, 1973, for that grade of crude petroleum at that field, or if there are no posted prices in that field, the related price for that grade of domestic crude petroleum which is most similar in kind and quality at the nearest field for which prices are posted; and (ii) a maximum of 35 cents per barrel.

§ 150.354 Ceiling price rule: Crude petroleum.

(a) *Applicability.* This section applies to the first sale of domestic crude petroleum.

(b) *Definitions.* As used in this section—

"Based production control level" for a particular month for a particular property means:

(1) If crude petroleum was produced and sold from that property in every month of 1972, the total number of barrels of domestic crude petroleum produced and sold from that property in the same month of 1972;

(2) If domestic crude petroleum was not produced and sold from that property in every month of 1972, the total number of barrels of domestic crude petroleum produced and sold from that property in 1972 divided by 12.

"Property" is the right which arises from a lease or from a fee interest to produce domestic crude petroleum.

"New crude petroleum" means the total number of barrels of domestic crude petroleum produced and sold from a property in a specific month less the base production control level for that property.

(c) *Rule.* (1) General. Except as provided in paragraphs (c)(2) and (3) of this section, no producer may charge a price higher than the ceiling price for the first sale of domestic crude petroleum.

(2) *Special release rule.* Notwithstanding paragraph (c)(1) of this section, a producer of new crude petroleum produced and sold from a property may in the month produced, beginning with the month of September 1973, or in any subsequent month, sell that new crude petroleum without respect to the ceiling price. However, if the amount of crude petroleum produced and sold in any month subsequent to the first month in which new crude petroleum was produced and sold, is less than the base production control level for that property for that month, any new crude petroleum produced from that property during any subsequent month may not be sold pursuant to this subparagraph until an amount of the new crude petroleum equal to the difference between the amount of crude petroleum actually produced from that property during the earlier month and the base production control level for that property for the earlier month has been sold at or below its ceiling price.

(3) *Released crude.* Notwithstanding paragraph (c)(1) of this section, if during a particular month new crude petroleum which could be sold at other than the ceiling price pursuant to paragraph (c)(2) of this section is produced from a property, the entire base production control level crude petroleum for that month may be sold at a price which exceeds the ceiling price provided that the maximum price charged per barrel of that base production control level crude petroleum does not exceed the following:

$$P_{max} = P_s + \left[\frac{C_{pr}}{C_{bpc}} - 1\right]\left[P_m - P_s\right]$$

Where:
P_{max} = Maximum price that may be charged for the crude petroleum (other than new crude) purchased from the property (dollars per barrel);
P_s = Ceiling price of the crude petroleum (dollars per barrel);
C_{bpcl} = Base production control level for property (barrels);
C_{pr} = Total amount of crude petroleum produced from the property during the month (barrels); and
P_m = Current free market price of the particular quality and grade of crude petroleum (dollars per barrel).

Application of this formula may be illustrated by the following example:

Example: During September 1973, Firm X produces 8,170 barrels of a single grade of crude petroleum from a particular property. During September 1972, 6,420 barrels of crude petroleum were produced from the same property. The ceiling price for the September 1973 crude petroleum is $4.10 per barrel, and its free market price (i.e., the price X can get on the market for the 1,750 barrels of new crude) is $4.95 per barrel. The maximum price that X may charge for the 6,420 barrels of other than new crude petroleum (i.e., old plus released crude) produced in September 1973 is:

$P_{max} = \$4.10 + (8{,}170/6{,}420 - 1)\ (\$4.95 - \$4.10)$
$P_{max} = \$4.10 + (.27)\ (\$0.85)$
$P_{max} = \$4.10 + \$0.23$
$P_{max} = \$4.33$/barrel.

(4) *Certification.* Each producer of domestic crude petroleum which charges a price above the ceiling price pursuant to the provisions of paragraphs (c)(2) or (3) of this section, must, with respect to each sale of domestic crude petroleum, certify in writing to the purchaser: (i) The ceiling price of domestic crude petroleum, (ii) the amount of the new crude petroleum, and (iii) the amount of the base production control level crude petroleum. The certification shall also contain a statement that the price charged for the domestic crude petroleum is no greater than permitted pursuant to this section.

§ 150.355 Retail sales of gasoline, No. 2–D diesel fuel and No. 2 heating oil.

(a) *Applicability.* This section applies to each retail sale of No. 2–D diesel fuel, No. 2 heating oil and gasoline by a refiner-retailer, reseller-retailer, or retailer.

(b) *Rule.* (1) Prior to 11:59 p.m., local time, August 31, 1973, no refiner-retailer, reseller-retailer, or retailer of gasoline, No. 2–D diesel fuel may charge a price with respect to a retail sale of any such item which exceeds the freeze price or other authorized price for such item established pursuant to the provisions of Part 140 of this chapter.

(2) Effective 11:59 p.m., local time, August 31, 1973, no refiner-retailer, reseller-retailer, or retailer of gasoline, or No. 2–D diesel fuel may charge a price with respect to a retail sale of any such item which it exceeds the ceiling price for that item.

(3) Effective 11:59 p.m., e.s.t., August 19, 1973, no refiner-retailer, reseller-retailer, or retailer of No. 2 heating oil may charge a price with respect to a retail sale of any such item which exceeds the ceiling price for that item.

(c) *Ceiling prices: refiner-retailers.* The ceiling price for retail sales of gasoline of a particular octane number, No. 2–D diesel oil or No. 2 heating oil by a refiner-retailer at each outlet where the refiner-retailer sells such item is (1) the price at which each such item was lawfully priced in transactions on May 15, 1973, at each such outlet plus (2) increased costs of imports incurred after May 15, 1973, and calculated pursuant to § 150.356(d). If the refiner-retailer first offered gasoline, No. 2–D diesel fuel or No. 2 heating oil at a particular outlet after May 15, 1973, the price at which each such item was priced in transactions on May 15, 1973, at the nearest comparable outlet shall be used in computing the ceiling price.

(d) *Ceiling prices: retailers and resellers-retailers.*

(1) *Definitions.* As used in this paragraph—

"Seller" means a retailer or a reseller-retailer.

"Actual cost" means the weighted average unit cost of the seller's inventory of the item concerned on August 1, 1973, incurred in arms-length transactions. If a particular item was not in inventory on August 1, 1973, the date for computing actual cost is the most recent day preceding August 1, 1973, when the seller had the item in inventory. If that item was first offered for sale after August 1, 1973, the date for purposes of computing the actual cost is the first day on which the item is offered for sale.

"Actual markup" means the difference between the weighted average unit price at which the item concerned was lawfully priced in transactions on January 10, 1973, and the weighted average cost of the seller's inventory of that item on January 10, 1973. If no transaction occurred on that date with respect to that item, then the date for the purpose of determining actual markup is the next preceding day in which a transaction occurred with respect to that item. If a seller first offered an item for sale after January 10, 1973, and prior to 11:59 p.m., e.s.t., August 19, 1973, the date for purposes of determining actual markup is the first day on which a transaction occurred with respect to that item. If a seller first offered an item for sale after 11:59 p.m., e.s.t., August 19, 1973, the actual markup is computed as the difference between the average price received for the same or most similar item sold by other sellers in transactions occurring on the same day at the nearest comparable outlet when the seller first offered the item for sale, and the actual cost of the item when first offered for sale.

(2) *Gasoline.* The ceiling price for retail sales of gasoline of a particular octane number by a seller at each outlet where the seller retails that item, is the actual cost to the seller for that gasoline, plus the actual markup applied by the seller at that outlet to the actual cost of that gasoline except that in no event shall the seller be required to use an actual markup of less than 7 cents per gallon for purposes of computing a ceiling price.

(3) *No. 2 heating oil.* The ceiling price for retail sales of No. 2 heating oil by a seller at each outlet where the seller retails that item, is the actual cost to the seller for that No. 2 heating oil, plus the actual markup applied by the seller at that outlet to the actual cost of that No. 2 heating oil, except that in no event shall the seller be required to use an actual markup of less than 7 cents per gallon for purposes of computing a ceiling price. A seller may increase the ceiling price on No. 2 heating oil on the first day of each month to reflect, on a dollar-for-dollar basis, certified increases in the cost of imported No. 2 heating oil incurred since the first day of the preceding month provided that any seller which increases the ceiling price on No. 2 heating oil pursuant to this subparagraph must submit a report in accordance with the forms and instructions issued by the Cost of Living Council by the fifth day of the month in which the ceiling is increased. For any month in which the cost of No. 2 heating oil decreases, the seller's ceiling price of No. 2 heating oil must be decreased to reflect on a dollar-for-dollar basis the decreases in cost of No. 2 heating oil.

(4) *No. 2–D diesel fuel.* The ceiling price for retail sales of No. 2–D diesel fuel by a seller at each outlet where the seller retails that item is the actual cost

V 38-162 AUG 22 73 XUM

to the seller for that No. 2–D diesel fuel plus the actual markup applied by the seller at that outlet to the actual cost of the No. 2–D diesel fuel.

(e) *Posting.* No later than 11:59 p.m., local time, August 31, 1973, each refiner-retailer, reseller-retailer, or retailer of gasoline or No. 2–D diesel fuel shall post the ceiling price in a prominent place on each pump used to dispense retail sales of gasoline or No. 2–D diesel fuel and the octane number for that gasoline. The ceiling price and octane number must be certified and posted in the form and manner prescribed by the Cost of Living Council.

§ 150.356 Allocation of refiner's increased cost of imports.

(a) *Scope.* This section prescribes the requirements governing the inclusion of a refiner's increased costs of imports in the computation of its—

(1) Base prices for covered products: and

(2) Ceiling prices for retail sales of gasoline, No. 2–D diesel fuel, and No. 2 heating oil. This section does not apply to increased costs of imports of products a refiner resells as a refiner-reseller pursuant to § 150.359.

(b) *Measuring amount of increased costs.* Except as used in paragraphs (e) and (f) of this section, "increased costs of imports" is the difference between the landed cost for the particular imported covered product and the landed cost on May 15, 1973, for that same grade of imported covered product from the same point of origin. For purposes of paragraph (e) and (f) of this section, "increased costs of imports" is the difference between the landed cost for the particular imported covered product on July 31, 1973, or if none was purchased on July 31, 1973, the next preceding day on which that imported covered product was landed and the landed cost on May 15, 1973, of the same grade of imported covered product from the same point of origin. In either case, if no covered product was landed on May 15, 1973, from the particular point of origin, the landed cost for May 15, 1973, shall be computed by reference to the posted or published price for that grade of imported covered product on May 15, 1973, at the point of origin plus transportation at world scale 160.

(c) *Cost incurred before August 1, 1973: inclusion in base prices of covered products other than gasoline, No. 2–D diesel fuel or No. 2 heating oil.* Subject to the limitation of paragraph (g) of this section, a refiner may, in computing its base prices for covered products (other than gasoline, No. 2–D diesel fuel, or No. 2 heating oil) pursuant to § 150.358(g), include an amount to reflect those increased costs of imports incurred between May 15, 1973, and August 1, 1973, which are attributable to imports of all covered products. To the extent that a refiner does not allocate increased costs of imports pursuant to this paragraph, it may include that part of those increased costs of imports attributable to gasoline, No. 2–D diesel fuel, or No. 2 heating oil in computing its ceiling and base prices for those products pursuant to paragraph (d) of this section.

(d) *Cost increases incurred before August 1, 1973: inclusion in ceiling and base prices of gasoline, No. 2–D diesel fuel, and No. 2 heating oil.* (1) Subject to the limitation of paragraph (g) of this section, a refiner may, in computing its ceiling prices for gasoline, No. 2–D diesel fuel, or No. 2 heating oil which it sells at retail as a refiner-retailer pursuant to § 150.355(c) and in computing its base prices for gasoline, No. 2–D diesel fuel, or No. 2 heating oil which it sells as a refiner pursuant to § 150.358(g), include an amount to reflect increased costs of imports of a covered product incurred between May 15, 1973, and August 1, 1973, which are attributable to that product and which have not been otherwise allocated pursuant to paragraph (c) of this section. A refiner may attribute a part of its increased costs of imports of covered products to gasoline, No. 2–D diesel fuel or No. 2 heating oil only if those imported covered products are refined by the refiner or co-mingled for accounting purposes with products refined by the refiner. In no case may the ratio that the attributed part bears to the total increased costs of imports exceed the ratio which sales during the corresponding fiscal quarter of the preceding year of the particular product receiving this allocation bear to the total sales of covered products during the same quarter.

(2) A refiner which elects to include such costs in computing its ceiling prices and base prices for gasoline, No. 2–D diesel fuel and No. 2 heating oil must also allocate those costs between ceiling prices and base prices for the product concerned in accordance with the following rules.

(i) The part of those costs allocated to the ceiling price of any product computed pursuant to § 150.355(c) may not exceed the proportion which the sales of that product at retail during the most recently completed fiscal quarter bears to the total sales of that product during the same quarter.

(ii) The part of those costs allocated to base prices of any product computed pursuant to § 150.358(g) may not exceed the proportion which the sales of that product it sold as a refiner during the most recently completed fiscal quarter bears to total sales of that product during the same quarter.

(e) *Cost incurred after July 31, 1973: inclusion in base prices of covered products other than gasoline, No. 2–D diesel fuel or No. 2 heating oil.* Subject to the limitation of paragraph (g) of this section, a refiner may, in computing its base prices for covered products (other than gasoline, No. 2–D Diesel fuel, or No. 2 heating oil) pursuant to § 150.358(g), include an amount to reflect increased costs of imports incurred after July 31, 1973, which are attributable to imports of all covered products. To the extent that a refiner does not allocate increased costs of imports pursuant to this paragraph, it may include that part of those increased costs of imports attributable to gasoline, No. 2–D diesel fuel, or No. 2 heating oil in computing its base prices for those products pursuant to paragraph (f) of this section.

(f) *Cost increases incurred after July 31, 1973: inclusion in base prices of gasoline, No. 2–D diesel fuel, and No. 2 heating oil.* (1) Subject to the limitation of paragraph (g) of this section, a refiner may, in computing its base prices for gasoline, No. 2–D diesel fuel, or No. 2 heating oil which it sells as a refiner pursuant to § 150.357, include an amount to reflect increased costs of imports incurred after July 31, 1973, which are attributable to that product and which have not been otherwise allocated pursuant to paragraph (e) of this section. A refiner may attribute a part of its increased costs of imports of covered products to gasoline, No. 2–D diesel fuel or No. 2 heating oil only if those imported covered products are refined by the refiner or co-mingled for accounting purposes with products refined by the refiner. In no case may the ratio that the attributed part bears to the total increased costs of imports exceed the ratio which sales during the corresponding fiscal quarter of the preceding year of the particular product receiving this allocation bears to the total sales of covered products during the same quarter.

(2) A firm which elects to include such costs in computing its base prices for gasoline, No. 2–D diesel fuel, or No. 2 heating oil may only include that part of those costs which does not exceed the proportion which the sales of that product it sold as a refiner during the most recently completed fiscal quarter bears to total sales of that product during the same quarter. The part of those costs attributable to gasoline, No. 2–D diesel fuel, or No. 2 heating oil which the refiner sells in retail sales may not be included in the ceiling prices of any of those products or the base price of any covered product.

(g) *General limitation.* The amount of increased costs of imports included in computing ceiling prices and base prices of a particular product must be equally applied to each class of purchasers of that product.

§ 150.357 Allocation of refiner's increased costs of domestic crude petroleum.

(a) *Scope.* This section prescribes the requirements governing the inclusion of a refiner's increased costs of domestic crude petroleum in the computation of its base prices for covered products.

(b) *Measuring amount of increased costs.* As used in this section, "increased costs of domestic crude petroleum" is the difference between the cost for the particular domestic crude petroleum and the cost on May 15, 1973, for that same grade of domestic crude petroleum from the same field. If the refiner did not purchase any domestic crude petroleum of that particular grade from that particular field on May 15, 1973, the cost for May 15, 1973, shall be (1) the posted price for that grade of domestic crude petroleum

on May 15, 1973, in the field concerned or (2) if there is no posted price in that field, the related price for that grade of domestic crude petroleum which is most similar in kind and quality at the nearest field for which the price is posted.

(c) *Inclusion of increased costs in base prices of covered products other than gasoline, No. 2–D diesel fuel or No. 2 heating oil.* Subject to the limitation of paragraph (e) of this section, a refiner may, in computing its base prices for covered products (other than gasoline, No. 2–D diesel fuel, or No. 2 heating oil) pursuant to § 150.358(g), include an amount to reflect increased costs of domestic crude petroleum incurred after May 15, 1973, which are attributable to all of its covered products. To the extent that a refiner does not allocate pursuant to this paragraph that portion of its increased costs of domestic crude petroleum which are attributable to gasoline, No. 2–D diesel fuel, or No. 2 heating oil, it may include those costs in its base prices for those products pursuant to paragraph (d) of this section.

(d) *Inclusion of increased costs in base prices of gasoline, No. 2–D diesel fuel, and No. 2 heating oil.*

(1) Subject to the limitation of paragraph (e) of this section, a refiner may, in computing base prices for gasoline, No. 2–D diesel fuel, or No. 2 heating oil which it sells as a refiner pursuant to section 150.358, include an amount to reflect increased costs of domestic crude petroleum incurred after May 15, 1973, which are attributable to that product and which have not been otherwise allocated pursuant to paragraph (c) of this section. A refiner may attribute a part of its increased costs of domestic crude petroleum to gasoline, No. 2–D diesel fuel or No. 2 heating oil only if the domestic crude petroleum is refined by the refiner. In no case may the ratio that the attributed part bears to the total increased costs of domestic crude petroleum exceed the ratio which sales during the corresponding fiscal quarter of the preceding year of the particular product receiving this allocation bear to the total sales of covered products during the same quarter.

(2) A refiner which elects to include such costs in computing its base prices for gasoline, No. 2–D diesel fuel, or No. 2 heating oil may only include that part of those costs which does not exceed the proportion which the sales of that product it sold as a refiner during the most recently completed fiscal quarter bears to total sales of that product during the same quarter. The balance of those costs may not be included in the ceiling prices of any gasoline, No. 2–D diesel fuel, or No. 2 heating oil which the refiner sells in retail sales; and base price of any gasoline, No. 2–D diesel fuel, or No. 2 heating oil; or in the base price of any other covered product.

(e) *General limitation.* The amount of increased costs of domestic crude petroleum included in computing base prices of a particular product must be equally applied to each class of purchasers of that product.

§ 150.358 Price rule: Refiners.

(a) *Applicability.* This section applies to each sale of a covered product refined by a refiner or co-mingled for accounting purposes with a product refined by the refiner except retail sales of gasoline, No. 2–D diesel fuel, and No. 2 heating oil which are subject to § 150.355.

(b) *Rule.* A refiner may not charge a price for an item in excess of the base price of that item except to the extent permitted pursuant to the provisions of paragraphs (c) through (k) of this section.

(c) *Price increases.* (1) A price in excess of the base price of an item in a product line may be charged only to recover on a dollar-for-dollar basis those net increases in allowable costs that have been incurred with respect to that product line since the period for determining base cost and which the refiner continues to incur.

(2) For the purpose of determining whether net allowable costs have been incurred which permit the charging of a price in excess of the base price, base costs shall be compared with current costs. Current costs which exceed base costs may be used to justify a price in excess of the base price.

(d) *Application of price increases.*

(1) A firm which is subject to the prenotification requirements of Subpart H of this part may not increase prices pursuant to this section until it complies with those requirements.

(2) A firm which is authorized to charge a prenotified percentage price increase pursuant to Subpart H of this part, and any other firm which qualifies to charge a percentage price increase with respect to a product line by virtue of cost justification determined in accordance with this section, shall apply that percentage price increase on a weighted average basis (in accordance with instructions which accompany forms issued pursuant to Subpart H of this part) so that, for any fiscal quarter, the weighted average of all price increases and price decreases in that line does not exceed that percentage price increase. However, the maximum price which may be charged for any one item in that line may not exceed 110% of the base price of that item plus the amount which results from multiplying the base price of that item by the percentage of cost justification determined in accordance with this section with respect to that product line.

(e) *Price reductions.* A price charged in excess of the base price may continue to be charged only as long as the net increases in allowable costs which support that price in excess of the base price continue to be incurred. Price reductions shall be made whenever and to the extent necessary to assure that, for any fiscal quarter, the weighted average of all price increases and price decreases in a product line does not exceed the percentage of cost justification for that line.

(f) *Productivity gains.*

(1) Increases in allowable costs shall be reduced to reflect productivity gains. For the purpose of determining whether a price may be increased under any provision of this section, productivity gains shall be calculated on the basis of the average percentage gain in the applicable industrial category, as set forth in the table in the Appendix to Subpart E. To the extent provided in the table in the Appendix, productivity gains shall be taken into account in the calculation of all price increases during any fiscal year but only until the full productivity offset, derived from the Appendix and calculated under subparagraph (2) of this paragraph, has been used within that fiscal year.

(2) For the purpose of determining the extent to which a price increase is justified, each refiner shall calculate the sum of all of its labor costs (of the type required to be included as costs in reporting and prenotification forms issued pursuant to Subpart H of this part, whether or not such forms are required to be filed) as a percentage of sales for the product line concerned, and shall multiply that percentage by the average annual rate of productivity gain for the applicable industrial category, as set forth in the table in the Appendix to Subpart E. The result is the productivity gain, stated as a percentage, by which the total cost increase must be reduced in order to be an allowable cost for the purposes of a price increase under this section.

(3) If the product line concerned extends to more than one industrial category, the average percentage gain in productivity in each category must be weighted in proportion to the ratio which its estimated sales in each industrial category for the most recently completed fiscal quarter bears to the total sales of that product line for that quarter.

(g) *Base price.* The base price for sales of an item by a refiner is the weighted average price at which that item was lawfully priced in transactions on May 15, 1973, or, if none occurred on that date, in the transaction next preceding May 15, 1973, plus increased costs of imports incured after May 15, 1973, and measured pursuant to § 150.356(b) and increased costs of domestic crude petroleum incurred after May 15, 1973, and measured pursuant to § 150.357(b).

(h) *Base cost.* (1) *Base costs.* Base costs are the net allowable costs incurred with respect to the product line concerned and are calculated as follows:

(i) *Input costs.* The base cost with respect to costs of labor, crude petroleum and other input costs is the rate at which those costs were being incurred on May 15, 1973. If no input costs were incurred on that day, the base cost is the rate at which those costs were being incurred on the next day preceding May 15, 1973, on which input costs were incurred.

(ii) *All other costs.* The base cost with respect to all costs other than input costs is the rate at which those costs were

V 38-162 AUG 22 73 XUM

being incurred on May 15, 1973. However, if the base cost with respect to any costs other than an input cost cannot reasonably be determined by the method prescribed in the preceding sentence, that base cost is the average cost incurred throughout the last fiscal quarter which ended before May 15, 1973, in which costs were incurred with respect to the product line concerned as calculated in accordance with forms and instructions issued by the Cost of Living Council.

(2) *New items.* The base cost with respect to input costs for each new item, as defined in accordance with § 150.361, is calculated as of the date on which the new item concerned was first sold or leased in arms-length trading between unrelated persons. The base cost with respect to all other costs which cannot be calculated on the first day of sale is the average cost incurred throughout the fiscal quarter in which the new item concerned was first sold or leased in arms-length trading between unrelated persons.

(j) *Current cost.* (1) *Current costs.* Current costs are the net allowable costs incurred during the current cost period with respect to the item concerned excluding increased costs of imports incurred after May 15, 1973, and measured pursuant to § 150.356(b) and increased costs of domestic crude petroleum incurred after May 15, 1973, and measured pursuant to § 150.357(b).

(2) *Input costs.* The current cost with respect to costs of labor, crude petroleum, and other input costs is the rate at which those costs were being incurred on the last full day of business in the current cost period.

(3) *All other costs.* The current cost with respect to all costs other than input costs is the rate at which those costs were being incurred on the last full day of business in the current cost period. However, if the current cost with respect to all costs other than input costs cannot reasonably be determined by the method prescribed in the preceding sentence, that current cost is the average cost incurred throughout the current cost period with respect to those costs as calculated in accordance with forms and instructions issued by the Cost of Living Council.

(4) *Current cost period.* For quarterly reporting purposes, the current cost period is the last accounting month in the current fiscal quarter for which a quarterly report is required to be filed pursuant to Subpart H of this part. The current cost period for price category III firms is the last accounting month in the current fiscal quarter for which compliance is being measured. For prenotification purposes, the current cost period is the last accounting month preceding the date of signature of the prenotification document submitted in accordance with Subpart H of this part except that with respect to input and other costs which may be calculated as of a date certain, the rate at which these costs are incurred on the day which is the date of signature of the prenotification document may be considered the rate on the last full day of the current cost period.

(j) *Profit margin limitation.* A refiner which charges a price for any item in excess of the base price for that item in any fiscal year may not for the fiscal year in which the price increase is charged, exceed its base period profit margin as defined in § 150.31 of this part.

(k) *Certification.* Each refiner of gasoline must with respect to each sale of gasoline certify in writing to the purchaser the octane number of the gasoline sold and, with respect to each sale of No. 2 heating oil the refiner must certify any increase above the May 15, 1973 selling price of the No. 2 heating oil which reflects the increased costs of imported No. 2 heating oil over the May 15, 1973 cost of heating oil from the same origin which has been commingled for accounting purposes with the No. 2 heating oil refined by the firm.

§ 150.359 Price rule: Resellers and retailers.

(a) *Applicability.* This section applies to each sale of a covered product other than a retail sale of gasoline, No. 2–D diesel fuel, or No. 2 heating oil which is subject to § 150.355 and other than a sale by a refiner which is subject to § 150.358. Sellers subject to this section are refiner-resellers, resellers, reseller-retailers and retailers.

(b) *Definitions.*

As used in this section—

"Actual cost" means the weighted average unit cost of the sellers inventory of a particular product.

"Actual markup" means the difference between the weighted average unit price at which the item was lawfully priced in transactions on January 10, 1973, and the weighted average unit cost of the seller's inventory of that item on January 10, 1073. If no transaction occurred on that date with respect to that item, then the date for the purpose of determining actual markup is the next preceding day in which a transaction occurred with respect to that item. If a seller first offered an item for sale after January 10, 1973, and prior to 11:59 p.m., e.s.t., August 19, 1973, the date for purposes of determining actual markup is the first day on which a transaction occurred with respect to that item. If a seller first offered an item for sale after August 19, 1973, the actual markup is computed as the difference between the average price received for the same or most similar item sold by other sellers in transactions occurring on the same day at the nearest comparable outlet when the seller first offered the item for sale, and the actual cost of the item when first offered for sale.

(c) *Rule.* A price may not be charged for any item to which this section applies which is in excess of the seller's actual cost of that item plus the seller's actual markup for that item.

(d) *Certification.* Each seller with respect to each sale of gasoline other than a retail sale must certify in writing to the purchaser the octane number of the gasoline sold. For each sale of No. 2 heating oil other than a retail sale the seller must certify to the purchaser the amount of increased costs of imports certified to him by a refiner, refiner-reseller, or reseller; and for each sale of No. 2 heating oil imported by the seller, the amount of the increased costs of imports of No. 2 heating oil incurred after August 19, 1973.

§ 150.360 Price rule: Leases.

(a) *Applicability.* This section applies to each leased real property used in the retailing of gasoline.

(b) *Base rent.* The base rent with respect to a lease or real property used in the retailing of gasoline is the rent charged for that station pursuant to the contractual terms prevailing on May 15, 1973.

(c) *Rule.* A lessor or lessee of real property used in retailing gasoline may not—

(1) Increase, offer to increase, or give notice of intent to increase the rent for that real property to an amount in excess of the base rent as defined in paragraph (b) of this section.

(2) Increase the retailer's obligation to sell covered products to a level above that which prevailed for that retailer pursuant to the lease provisions which prevailed on May 15, 1973; or

(3) Impose any operating requirements on the retailer which would be unreasonably inconsistent with the standards of goals of the Economic Stabilization Program, including but not limited to a requirement that the retailer extend his hours of operation beyond his customary hours of operation.

§ 150.361 New item and lease rule.

(a) *General—new item.*

(1) An item is a new item if—

(i) The firm concerned did not produce, sell or lease it in the same or substantially similar form at any time during the 1 year period immediately preceding the day on which the firm offers it for sale or lease. (A change in appearance, arrangement, or combination including a change in octane number does not create a new item. Ordinarily, a change in fashion, style, form, or packaging does not create a new item;) and

(ii) It is substantially different in purpose, function, quality, or technology, or its use or service effects a substantially different result from any other item which the firm concerned currently sells or leases or sold or leased at any time during the 1-year period immediately preceding the first date on which the firm offers it for sale or lease.

(2) *New market.* An item which the firm concerned has previously sold is a new item with respect to its offer for sale or lease to any market to which it did not sell or lease it at any time during the 1-year period immediately preceding the first date on which the firm offers it for sale or lease. For the purposes of this section, a "market" is one or more members of any one of the following groups: resellers; retailers; consumers; manufacturers; or service organizations.

(b) *Base price determination*—(1) *Refiners.* A refiner offering a new item shall determine the base price for that item pursuant to the base price provisions of § 150.358(g). However, for purposes of determining the price at which the item was lawfully priced in transactions on May 15, 1973, it shall use the average price received on May 15, 1973, for the same or most nearly similar item sold to the same market by other refiners selling the same or most nearly comparable item in the same marketing area.

(2) *Lessors.* A firm offering a lease in a new real property used in the retailing of gasoline shall determine the base rent for that real property as the average rent charged on May 15, 1973, for the most nearly similar real property used in the retailing of gasoline leased to the same market by other firms leasing real property used in the retailing of gasoline in the same geographic area.

(c) *Base prices and base production control levels upon acquisition.* (1) If a legal entity or a component of a legal entity determines a base price, ceiling price, an actual markup, or an actual cost pursuant to this subpart for a covered product which it sells to a particular market and the entity, or component is subsequently acquired by another firm, that covered product does not become a new item with respect to the same market. The base price, ceiling price, actual markup, or actual cost of the covered product with respect to that market remains the base price, ceiling price, actual markup, or actual cost determined for it by the acquired entity or component.

(2) If a legal entity or component of a legal entity determines pursuant to this subpart a base production control level for a property which produces domestic crude petroleum and the entity or component is subsequently acquired by another firm the domestic crude petroleum produced from that property does not become new crude petroleum. The base production control level for that property remains the base production control level determined for it by the acquired entity or component.

(d) *Quarterly reporting of new items.* A firm subject to the quarterly reporting requirements of Subpart H of this part and which has projected sales and revenues for its current fiscal year of $10 million or more derived from the sale or lease of new items shall, in accordance with instructions which accompany forms issued pursuant to Subpart H of this part, provide information which demonstrates that, with respect to each new item with projected annual sales of $1 million or more which is offered for sale or lease for the first time during the quarter concerned, the item qualifies as a new item as defined in this section and the base price of that item has been determined in accordance with this section.

§ 150.362 Price information.

Each seller of covered products shall maintain records of its base prices, base production control levels, and ceiling prices and shall make available upon request by a customer, the base price, base production control levels or ceiling price of any item being offered for sale to that customer.

§ 150.363 Reports and recordkeeping.

(a) *Reports.*—(1) *Producers.* (i) Each firm which produces as an operator domestic crude petroleum and which derives $50 million or more in annual sales or revenues from sales of covered products shall prepare and file with the Cost of Living Council periodic reports in accordance with forms and instructions issued by the Council.

(ii) Each firm which produces as an operator domestic crude petroleum from a property and which sells the domestic crude petroleum above the ceiling price calculated pursuant to § 150.353 shall prepare and file with the Cost of Living Council periodic reports in accordance with the forms and instructions issued by the Council.

(2) *Refiners, retailers, and resellers.* Each firm which refines covered products and each firm which derives $50 million or more in annual sales or revenues from the retailing or reselling of covered products shall prepare and file with the Cost of Living Council, periodic reports in accordance with forms and instructions issued by the Council.

(b) *Recordkeeping.* Each firm which derives less than $50 million but more than $1 million in annual sales or revenues from the retailing or reselling of covered products shall prepare and maintain at its principal place of business, periodic reports in accordance with forms and instructions issued by the Council.

(c) *Records.*—(1) *General.* Each firm subject to this subpart shall keep such records as are sufficient to demonstrate that the prices charged by the firm are in compliance with the requirements of this subpart.

(2) *Inspection.* Records required to be kept under subparagraph (1) of this paragraph shall be made available for inspection at any time upon the request of a representative of the Economic Stabilization Program.

(3) *Justification.* Upon the request of a representative of the Economic Stabilization Program any firm which has filed a notice of a proposed price increase or increases a price pursuant to this subpart, shall:

(i) Specify the records that it is maintaining to comply with this paragraph; and

(ii) Justify that proposed price increase or increased price.

(4) *Period for keeping records.* Each firm required to keep a record under this paragraph shall maintain and preserve that record for at least 4 years after the last day of the calendar year in which the transactions or other events recorded in that record occurred or the property was acquired by that firm whichever is later.

[CCC Grain Price Support Regs., 1973 Crop Wheat Supplement]

PART 1421—GRAINS AND SIMILARLY HANDLED COMMODITIES

Subpart—1973 Crop Wheat Loan and Purchase Program

Correction

In FR Doc. 73-14907 appearing at page 20237 in the issue of Monday, July 30, 1973, make the following changes in the table to § 1421.489, the entries for the State of Texas: Immediately below "DeWitt ----- 1.39", add "Dickens ----- 1.28"; and "Donley ------ 1.28" and "Eastland ----- 1.32" should be reversed.

PART 1427—COTTON

Subpart—Procedures and Factors for Determining Three-Year Average Price for Middling 1-Inch American Upland Cotton in World Markets

The Agriculture and Consumer Protection Act of 1973, P.L. 93–86, approved August 10, 1973, requires the Secretary to determine the three-year average price of American cotton in world markets annually pursuant to a published regulation specifying the procedures and factors to be used in making the determination. The act also requires the Secretary to determine and announce the loan level for the 1974 crop by November 1, 1973. The average price determination is a prerequisite to the loan level determination. Thus, it is essential that this regulation be published as soon as possible. For this reason, it is found and determined that compliance with the notice of proposed rulemaking procedure is impracticable and contrary to the public interest. Therefore, this regulation shall be effective August 21, 1973.

Sec.
1427.1101 Legislative directive.
1427.1102 General statement.
1427.1103 Procedures and factors.

AUTHORITY: Secs. 4, 5, 62 Stat. 1070, as amended, secs. 101, 103, 401, 63 Stat. 1051, as amended; 15 U.S.C. 714 b and c; 7 U.S.C. 1441, 1444, 1421.

§ 1427.1101 Legislative directive.

Section 602 of the Agricultural Act of 1970 as amended by the Agriculture and Consumer Protection Act of 1973, further amended section 103 of the Agricultural Act of 1949, as amended, effective beginning with the 1974 crop of upland cotton, by amending subsection (e) to read in part as follows:

(e)(1) The Secretary shall • • • make available for the 1971 through 1977 crops of upland cotton to cooperators nonrecourse loans • • • at such level as will reflect for Middling one-inch upland cotton (micronaire 3.5 through 4.9) at average location in the United States 90 per centum of the average

V 38-162 AUG 22 73 XUM

price of American cotton in world markets for such cotton for the three-year period ending July 31 in the year in which the loan level is announced, except that if the loan rate so calculated is higher than the then current level of average world prices for American cotton of such quality, the Secretary is authorized to adjust the current calculated loan rate for cotton to 90 per centum of the then current average world price. The average world price for such cotton for such preceding three-year period shall be determined by the Secretary annually pursuant to a published regulation which shall specify the procedures and the factors to be used by the Secretary in making the world price determination. The loan level for any crop of upland cotton shall be determined and announced not later than November 1 of the calendar year preceding the marketing year for which such loan is to be effective. • • •

The Senate-House Conference Report on the Agriculture and Consumer Protection Act of 1973 states that "The Conferees intend that the Secretary shall obtain quotations in world markets for American cotton, supplemented by any other relevant price information available, for use in the determination of average price and in the establishment of the loan level at ninety percent of the three-year average."

§ 1127.1102 **General statement.**

It is generally recognized that prices in world markets for identical grades and staple lengths of American cotton vary because of factors such as the locality where grown, Pressley strength, micronaire reading, storage area and estimated weight gain during ocean shipment. Less than one-half of one percent of the American crop in recent years has been Middling 1-inch cotton, consequently, such quality is not universally quoted in foreign markets. Most foreign market quotations are basis Strict Middling one and one-sixteenth inch cotton. Further, reliable price quotations based on U.S. quality standards are notably meager in all foreign markets. It is generally conceded that quality determinations made in most world markets are more tolerant than those made under evaluations in the United States. The complexity of this situation makes a determination of a precise average price of Middling 1-inch American cotton in world markets extremely difficult.

§ 1127.1103 **Procedures and factors.**

The following procedures and factors shall be used in determining the average price of American cotton in world markets basis Middling 1-inch (micronaire 3.5 through 4.9) at average location in the United States for the three-year period ending July 31 in the year in which the loan level for the following crop of upland cotton is announced.

(a) Monthly average market price quotations per pound of American upland cotton quoted in foreign markets shall be obtained for the principal markets of the world for the applicable three-year period. In selecting the qualities and markets to be examined, there shall be taken into account to the extent that information is available, reliability of quotations, volume of sales, and any other relevant information that may be available.

(b) Monthly average price quotations obtained under paragraph (a) of this section shall be averaged for the applicable three-year period.

(c) The three-year average price of American cotton in world markets determined under paragraph (b) of this section shall be adjusted to a U.S. Middling 1-inch (micronaire 3.5 through 4.9) net weight basis to compensate for any lack of comparability, or for differences in quality evaluation or designation relative to U.S. quality standards.

(d) The average cost per pound of appropriate charges and costs related to marketing, handling, and transporting upland cotton from average U.S. location to world markets shall be determined for the applicable three-year period on the basis of the latest information available at the time.

(e) Such average cost per pound determined under paragraph (d) of this section shall be deducted from the three-year average world price, adjusted as provided under paragraph (c) of this section, to adjust such price to average location in the United States.

Signed at Washington, D.C., on August 17, 1973.

EARL L. BUTZ,
Secretary.

CHAPTER XVIII—FARMERS HOME ADMINISTRATION, DEPARTMENT OF AGRICULTURE

SUBCHAPTER F—SECURITY SERVICING AND LIQUIDATION

[FHA Instruction 465.2]

PART 1872—REAL ESTATE SECURITY

Management and Sale of Acquired Real Estate

Subpart C of Part 1872, Title 7, Code of Federal Regulations, (38 FR 19210) is amended by adding a new § 1872.65(j), to provide that in exceptional situations on a case by case basis with the approval and assistance of the National Office, arrangements may be made with other agencies of Government, such as the General Services Administration, for disposal of association surplus property.

Section 1872.65(j) as added will read as follows:

§ 1872.65 **Method of sale of property that was security for a loan made under the Consolidated Farm and Rural Development Act.**

• • • • • •

(j) *Other disposition of association property.* In exceptional situations on a case by case basis with approval and assistance of the National Office, arrangements may be made with other agencies of Government such as General Services Administration for disposal of association surplus property.

(7 U.S.C. 1989; 42 U.S.C. 1480; 40 U.S.C. 442; 42 U.S.C. 2942; 5 U.S.C. 301; delegation of authority by the Sec. of Agri., 38 FR 14944, 14948, 7 CFR 2.23; delegation of authority by the Asst. Sec. for Rural Development, 38 FR 14944, 14982, 7 CFR 2.70; delegations of authority by Dir., OEO, 29 FR 14764, 33 FR 9850.)

Effective date. This amendment shall become effective August 22, 1973.

Dated: August 9, 1973.

J. R. HANSON,
Acting Deputy Administrator,
Farmers Home Administration.

Title 12—Banks and Banking

CHAPTER III—FEDERAL DEPOSIT INSURANCE CORPORATION

SUBCHAPTER B—REGULATIONS AND STATEMENTS OF GENERAL POLICY

PART 329—INTEREST ON DEPOSITS

Payment of Time Deposits Before Maturity

1. On July 24, 1973 the Board of Directors of the Federal Deposit Insurance Corporation proposed a number of amendments to Part 329 of the FDIC's rules and regulations (12 CFR Part 329). One of the proposed amendments has to do with the imposition of withdrawal penalties in the event of a change in the interest rate or maturity of a time deposit. This proposal was published along with the other proposed amendments in the FEDERAL REGISTER on July 30, 1973 (38 FR 20279-81) and the public was given until August 13, 1973 to submit its comments on the amendments.

After reviewing the comments on this proposal, the Board of Directors has concluded that its adoption—in modified form—is both desirable and in the public interest. The principal purpose and effect of adoption will be to require a distinction, on the part of depositors and insured nonmember banks, between regular savings accounts and time deposits. The former are easily withdrawable, pay a lesser rate of interest than the latter, and are subject to both increases and decreases in the applicable rate of interest. The latter pay a higher rate of interest in return for a definite commitment of funds by the depositor for a specified period of time ranging from 90 days to four years or more. The rate of interest is generally fixed for the entire period to which the depositor's funds are committed. Adoption of the proposed amendments, in conjunction with similar action by the Board of Governors of the Federal Reserve System with respect to member banks, will also have the desirable effect of eliminating differences in the way in which the penalty provisions are applied to time deposits in federally insured banks as opposed to time accounts in Federally insured savings and loan associations. The Board of Directors has accordingly decided to require the imposition of a penalty for all rate increases made on time deposits on or after September 10, 1973, unless the increase is required by the terms of the original deposit contract.

Effective September 10, 1973, § 329.4 of the FDIC's rules and regulations is amended so as to prevent an insured nonmember bank from increasing the rate of interest paid on an existing time deposit or converting that deposit to one having a longer maturity—if it bears a higher rate of interest after conversion—unless the depositor pays the appropriate penalty for withdrawal prior to maturity. The one exception to this requirement permits increases in the rate of interest paid on a time deposit without penalty where the increase is explicitly authorized by the terms of the original deposit contract and the bank does not retain the option to grant or deny such an increase.

The above amendment represents a change in the traditional FDIC position of allowing an insured nonmember bank to raise the interest rate paid on an existing time deposit without penalizing the depositor. For this reason, among others, the Board of Directors deems it vital that all insured nonmember banks make adequate disclosure of the withdrawal penalties to their customers. The Board has accordingly decided to adopt the proposed amendments regarding disclosure which were published for comment in the FEDERAL REGISTER on July 30, 1973 (38 FR 20280-81).

Effective September 10, 1973, §§ 329.4 and 329.8 of the FDIC's rules and regulations are amended so as to require that all advertisements, announcements, or solicitations by insured nonmember banks which relate to the interest paid on time deposits include a clear and conspicuous statement that a "substantial penalty" will be imposed where a depositor is permitted to withdraw all or part of his time deposit before maturity. In addition, each depositor must be given a separate disclosure statement at the time he enters into a time deposit contract with the bank. Among other things, this statement must clearly describe the penalty for early withdrawal. This penalty may be the minimum penalty prescribed by § 329.4(d), as amended, or a more severe penalty chosen by the bank.

In addition to the above amendments, the Board of Directors has decided to adopt the proposed amendment to § 329.4 which relates to loans secured by time deposits. This amendment was also published for comment in the FEDERAL REGISTER on July 30, 1973 (38 FR 20280). Loans secured by time deposits must currently bear an interest rate which is at least 2 percent per annum in excess of the interest rate paid on the time deposit. The amendment makes it clear that the 2 percent rate differential may, if necessary, be obtained by reducing the interest rate paid on the time deposit. The amendment does not change the substantive requirements of the regulation. However, it will enable banks in some states to make loans secured by time deposits at interest rates which do not exceed the maximum rates established by state usury law for consumer loans. Moreover, the amendment provides that the requirement for a 2 percent rate differential—which is a penalty established by Federal regulation—shall be deemed to be a part of every time deposit contract. This amendment is also effective September 10, 1973.

On July 26, 1973 the Board of Directors of the Federal Deposit Insurance Corporation amended §§ 329.6 and 329.7 of the FDIC's rules and regulations (12 CFR 329.6, 329.7). The amendments became effective August 1, 1973, the date of their publication in the FEDERAL REGISTER (38 FR 20442). They limit the total amount of time deposits of $1,000 or more with maturities of 4 years or more that may be held by any one insured nonmember bank to 5 percent of the bank's total domestic time and savings deposits. Deposits in this category received on or after August 1, 1973 may not bear a rate of interest in excess of the maximum rate for time deposits of 30 months or more 6½% for insured nonmember commercial banks and 6¾ percent for insured nonmember mutual savings banks) if their receipt would cause the total of all such deposits to exceed the 5 percent limitation.

Prior to August 1, 1973, insured nonmember banks were not generally aware that the Board of Directors was considering a change in the traditional FDIC position of allowing them to change the interest rates paid on their existing time deposits without penalizing their depositors nor were such banks aware of the impending 5 percent limitation on time deposits of $1,000 or more with maturities of 4 years or more. Following the introduction on July 5, 1973 of this new category of four-year, $1,000 minimum denomination time deposits with no maximum rate ceilings, a number of insured nonmember banks offered their depositors the opportunity to convert their preexisting time deposits bearing lower interest rates to deposits in this category without penalty. However, some insured nonmember banks which made such offers before the new regulations were issued have been unable to convert the time deposits of those preexisting customers who failed to notify the bank before August 1 that they wanted the new four-year deposits.

The Board of Directors has concluded that it is inequitable to prevent insured nonmember banks from paying higher interest rates on the new four-year deposits to some of their preexisting customers simply because those customers failed to notify the bank before the August 1 deadline. The Board of Directors has accordingly decided to further amend §§ 329.6 and 329.7 of the FDIC's rules and regulations (12 CFR 329.6 and 329.7) to allow any insured nonmember bank which made such an offer to its customers before August 1, to now proceed to transfer or convert their time deposits to time deposits of $1,000 or more with maturities of 4 years or more without regard to the interest rates paid on the new deposits. However, in order to take advantage of this amendment, three conditions must be met:

1. The funds must have been in a time deposit in the same bank prior to July 5, 1973.

2. The bank must have made the offer on or before July 31, 1973.

3. The transfer or conversion must take place on or before September 8, 1973.

The above amendment does not effect the calculation of the 5 percent limitation. Thus, in calculating the percentage of a bank's total domestic time and savings deposits which is represented by time deposits of $1,000 or more with maturities of 4 years or more, all time deposits in this latter category must be counted except those whose interest rates do not exceed the maximum rate prescribed for time deposits of 30 months or more.

The Board of Directors has also concluded that small insured nonmember banks should have more latitude to compete for time deposits of $1,000 or more with maturities of 4 years or more. The Board of Directors has therefore decided to amend sections 329.6 and 329.7 so as to allow an insured nonmember bank to accept time deposits of $1,000 or more with maturities of 4 years or more at negotiated interest rates so long as the total amount of such deposits does not exceed 5 percent of the bank's total domestic time and savings deposits, or $500,000, whichever is greater.

2. Section 329.4 is amended by revising paragraph (e) and adding new paragraphs (f), (g), and (h) as follows:

§ 329.4 **Payment of time deposits before maturity.**

• • • • • •

(e) *Application of penalty to changes in interest rates or maturities.*—(1) *Increases in interest rates on existing time deposits.* Where there is an increase in the rate of interest paid on any time deposit, the deposit will be treated as having been withdrawn by the depositor, prior to maturity, on the date on which the deposit begins to earn interest at the higher rate.

(2) *Conversion of existing time deposits to new deposits with longer maturities.* Where an existing time deposit is converted to one having a longer maturity, the deposit will be treated as having been withdrawn by the depositor, prior to maturity, on the date of conversion if the rate of interest paid on the new deposit exceeds the rate paid on the original deposit.

(3) *Exceptions.* The provisions of this paragraph (e) do not apply to an increase in the rate of interest paid on a time deposit where such increase is explicitly authorized by the terms of the original deposit contract and may not be granted or withheld at the option of the bank.

(f) *Disclosure of penalty.* At the time an insured nonmember bank enters into a new time deposit contract with any depositor, it shall provide the depositor with a separate written statement which clearly states that the depositor may not withdraw all or any part of his deposit prior to maturity except with the consent of the bank which may be given only at the time such request for withdrawal is made, and that if the bank gives its consent at that time, a penalty will be assessed on the amount withdrawn. In

V 38-162 AUG 22 73 XUM

addition, the statement shall clearly describe the penalty, which shall, at a minimum, be the penalty prescribed in paragraph (d) of this section.[11e]

(g) *Determination of "date of deposit" for multiple maturity time deposits.* As used in paragraph (d) of this section, the words "date of deposit" have the following meanings as applied to multiple maturity time deposits: (1) in the case of automatically renewable mutiple maturity time deposits (or those payable on more than one date), the last maturity date on which the deposit could have been withdrawn, and (2) in the case of multiple maturity time deposits which may only be withdrawn upon written notice to be given prior to the date of withdrawal, the last date on which notice could have been given in order to withdraw the deposit on the date on which it is treated as having been withdrawn (i.e., the date as of which a higher interest rate is paid or the date on which the deposit is converted to one having a longer maturity).

(h) *Loans upon security of time deposits.* An insured nonmember bank may make a loan to a depositor upon the security of his time deposit. However, the rate of interest paid by the bank on such deposit for the period of time it secures the loan shall not be in excess of 2 percent per annum less than the rate of interest charged on the loan. The provisions of this paragraph (h) shall be deemed to be a part of every time deposit contract entered into by any insured nonmember bank whether or not such provisions are expressly set forth therein.

3. Section 329.6 is amended to read as follows:

§ 329.6 Maximum rates of interest payable on time and savings deposits by insured nonmember banks other than insured nonmember mutual savings banks.[12]

* * * * *

(b) *Deposits of less than $100,000.* * * *

(2) *Deposits of $1,000 or more with maturities of 4 years or more.* There is no maximum rate of interest presently prescribed on any time deposit of $1,000 or more with a maturity of 4 years or more, *provided, however,* That the total amount of such deposits in an insured nonmember bank at the time the deposit is made does not exceed 5 percent of its total time and savings deposits subject to this Part 329, or $500,000, whichever is greater. With respect to any such deposit that is received on or after August 1, 1973 during any period when the outstanding amount of all such deposits is at or above the 5 percent level, or $500,000, whichever is greater, the bank shall not pay interest thereon at a rate in excess of 6½ percent per annum.[13a]

* * * * *

4. Section 329.7 is amended to read as follows:

§ 329.7 Maximum rate of interest or dividends payable on deposits by insured nonmember mutual savings banks.

* * * * *

(b) *Maximum rates payable.* * * *

(4) *Time deposits of $1,000 or more with maturities of 4 years or more.* There is no maximum rate of interest presently prescribed on any time deposit of $1,000 or more with a maturity of 4 years or more, *provided, however,* That the total amount of such deposits in an insured nonmember mutual savings bank at the time the deposit is made does not exceed 5 percent of its total time and savings deposits subject to this Part 329, or $500,000, whichever is greater. With respect to any such deposit that is received on or after August 1, 1973 during any period when the outstanding amount of all such deposits is at or above the 5 percent level, or $500,000, whichever is greater, the bank shall not pay interest thereon at a rate in excess of 6¾ percent per annum.[14a]

* * * * *

5. Section 329.8 is amended by adding a new paragraph (h) to read as follows:

§ 329.8 Advertising of interest on deposits.

* * * * *

(h) *Time deposits.* Every advertisement, announcement, or solicitation relating to the interest paid on time deposits shall include a clear and conspicuous statement that in the event the depositor is allowed to withdraw all or part of his deposit before maturity, a "substantial penalty" will be imposed.

(Sec. 9, 18(g); 64 Stat. 881–82, Pub. L. No. 93–100, § 1 (August 16, 1973); 12 U.S.C. 1819, 1828(g))

6. The requirements of sections 553 (b) and (d) of Title 5, United States Code, and §§ 302.1, and 302.2, and 302.5 of the rules and regulations of the Federal Deposit Insurance Corporation, with respect to notice, public participation, and deferred effective date were not followed in connection with the amendments to §§ 329.6 and 329.7 because the Board of Directors found that notice and public procedure thereon would be unnecessary and contrary to the public interest and because the amendments relieve an existing restriction.

The requirements of section 553(d) of Title 5, United States Code, and § 302.5 of the rules and regulations of the Federal Deposit Insurance Corporation, with respect to the publication of a substantive rule not less than 30 days before its effective date were not followed in connection with the amendments to §§ 329.4 and 329.8 because the Board of Directors found that the public interest compelled it to make the action effective no later than September 10, 1973.

7. *Effective dates.* The amendments to §§ 329.6 and 329.7 are effective August 17, 1973.

The amendments to §§ 329.4 and 329.8 are effective September 10, 1973.

By order of the Board of Directors, August 14, 1973.

FEDERAL DEPOSIT INSURANCE CORPORATION,
[SEAL] ALAN R. MILLER,
Executive Secretary.

[FR Doc.73–17815 Filed 8–21–73;8:45 am]

[11e] This paragraph (f) does not apply to any extensions or renewals of existing contracts except where the depositor has not previously been notified of the penalty provisions in paragraph (d). This paragraph also does not apply to "obligations other than deposits" that are otherwise subject to the provisions of this Part 329 (see 12 CFR 329.10(a)).

[12] * * *

[13a] Notwithstanding the 5 percent or $500,000 limitation established by this subparagraph (b)(2), an insured nonmember bank may accept any time deposit of $1,000 or more with a maturity of 4 years or more without regard to the interest rate paid thereon if the deposit consists of funds that were in a time deposit in the same bank prior to July 5, 1973, and if such funds were subsequently transferred or converted to a time deposit of 4 years or more on or before September 8, 1973, provided that the bank made an offer on or before July 31, 1973, to effect such transfers or conversions.

[14] * * *

[14a] Notwithstanding the 5 percent or $500,000 limitation established by this subparagraph (b)(4), an insured nonmember mutual savings bank may accept any time deposit of $1,000 or more with a maturity of 4 years or more without regard to the interest rate paid thereon if the deposit consists of funds that were in a time deposit in the same bank prior to July 5, 1973, and if such funds were subsequently transferred or converted to a time deposit of 4 years or more on or before September 8, 1973, provided that the bank made an offer on or before July 31, 1973 to effect such transfers or conversions.

Title 14—Aeronautics and Space

CHAPTER II—CIVIL AERONAUTICS BOARD

SUBCHAPTER E—ORGANIZATION REGULATIONS

[Reg. OR–77]

PART 385—DELEGATIONS AND REVIEW OF ACTIONS UNDER DELEGATION; NONHEARING MATTERS

Revisions of Delegations of Authority

Adopted by the Civil Aeronautics Board at its office in Washington, D.C.

The Board's Bureau of Accounts and Statistics recently has been reorganized resulting in abolition of the Statistical Division and transfer of the Audit Division to the Bureau of Enforcement. As a result of this reorganization, the Board is reassigning delegations of authority previously assigned to the Chief, Statistical Division, under § 385.18a to the Chief of the new Statistical Data Division.[1] In addition, an editorial amendment is included to reflect the name change of the Accounting Regulation Division to the Accounting and Statistical Regulation Division.

[1] It should be noted that the transfer of the Audit Division to the Bureau of Enforcement does not affect the authority of the Director, Bureau of Accounts and Statistics, under § 385.17(b) to resolve any disputes on accounting matters which may arise between the Board's auditors and the carriers.

Since the amendments provided for herein are rules of agency organization, the Board finds that notice and public procedure are not necessary, and that the amendments may be made effective immediately.

Accordingly, the Civil Aeronautics Board hereby amends §§ 385.18 and 385.18a of Part 385 of its Organization Regulations (14 CFR Part 385) effective August 16, 1973, as follows:

1. Amend the Table of Contents of Subpart B of Part 385 by changing the heading of §§ 385.18 and 385.18a, the table as amended to read as follows:

Sec.
385.18 Delegation to the Chief, Accounting and Statistical Regulation Division, Bureau of Accounts and Statistics.
385.18a Delegation to the Chief, Statistical Data Division, Bureau of Accounts and Statistics.

2. Amend the title and introductory paragraph of § 385.18 to read as follows:

§ 385.18 Delegation to the Chief, Accounting and Statistical Regulation Division, Bureau of Accounts and Statistics.

The Board hereby delegates to the Chief, Accounting and Statistical Regulation Division, Bureau of Accounts and Statistics, the authority to:

* * * * * *

3. Amend the title and introductory paragraph of § 385.18a to read as follows:

§ 385.18a Delegation to the Chief, Statistical Data Division, Bureau of Accounts and Statistics.

The Board hereby delegates to the Chief, Statistical Data Division, Bureau of Accounts and Statistics, authority to:

* * * * * *

(Sec. 204(a) of the Federal Aviation Act of 1958, as amended, 72 Stat. 743; 49 U.S.C. 1324. Reorganization Plan No. 3 of 1961, 75 Stat. 837, 26 FR 5989; 49 U.S.C. 1324 (note).)

Adopted: August 16, 1973.

Effective: August 16, 1973.

By the Civil Aeronautics Board.

[SEAL] EDWIN Z. HOLLAND,
Secretary.

CHAPTER III—NATIONAL TRANSPORTATION SAFETY BOARD

[NTSB Reg. PR–3; NTSB Reg. PR–6]

PART 431—RULES OF PRACTICE IN AIRCRAFT ACCIDENT INQUIRIES

PART 440—RULES OF PRACTICE IN SURFACE TRANSPORTATION ACCIDENT HEARINGS

Determination To Hold Hearings

The purpose of these amendments is to make it clear that the authority to order hearings as part of an accident inquiry and to assign a Member to serve as Chairman of the Board of Inquiry are decisions of the National Transportation Safety Board.

Since these regulations are rules of agency practice and procedure, notice and public procedure thereon are not required.

These amendments were approved by the Board of the National Transportation Safety Board on February 7, 1973, and become effective on publication in the FEDERAL REGISTER.

Accordingly, the National Transportation Safety Board hereby amends the provisions of its regulations covering rules or practice in aircraft accident inquiries (Part 431) and its rules of practice in surface transportation accident hearings (Part 440) as follows:

1. Section 431.21 is revised to read as follows:

§ 431.21 Determination to hold hearing.

The National Transportation Safety Board may order a hearing as part of an accident inquiry whenever the Board deems it necessary in the public interest; provided that should a quorum of the Board not be immediately available in the event of a catastrophic accident, then the determination to hold a public hearing may be made by the Chairman.

2. Section 431.22 is revised to read as follows:

§ 431.22 Board of inquiry.

The Board of Inquiry shall consist of a Member of the Board who, when present, will be Chairman of the Board of Inquiry, the Hearing Officer, the Director of the Bureau of Aviation Safety or his designee, and the General Counsel or his designee. Assignments of Members to serve as Chairmen of Boards of Inquiry shall be determined by the National Transportation Safety Board. In the absence of the Chairman, a member of the Board of Inquiry designated by him shall act as chairman. It shall be the duty of the Board of Inquiry to secure in the form of a public record all known facts pertaining to the accident and surrounding circumstances and conditions from which probable cause may be determined and recommendations of corrective action formulated.

3. Section 440.10 is revised to read as follows:

§ 440.10 Determination to hold hearing.

The National Transportation Safety Board may order a hearing as part of an accident hearing whenever the Board deems it necessary in the public interest; provided that should a quorum of the Board not be immediately available in the event of a catastrophic accident, then the determination to hold a public hearing may be made by the Chairman.

4. Section 440.11 is revised to read as follows:

§ 440.11 Board of inquiry.

The Board of Inquiry shall consist of a Member of the Board who shall be Chairman of the Board of Inquiry, a Hearing Officer when assigned, the Director of the Bureau of Surface Transportation Safety or his designee, and, where appropriate, the General Counsel or his designee. Assignments of Members to serve as Chairman of Boards of Inquiry shall be determined by the National Transportation Safety Board. It shall be the duty of the Board of Inquiry to examine witnesses and to secure, in the form of a public record, all known facts pertaining to the accident and surrounding circumstances and conditions from which cause may be determined and recommendations for corrective action may be formulated.

Adopted: February 7, 1973.

Effective: August 22, 1973.

By the National Transportation Safety Board.

JOHN H. REED,
Chairman.

AUGUST 16, 1973.

[FR Doc.73–17746 Filed 8–21–73;8:45 am]

Title 19—Customs Duties

CHAPTER I—UNITED STATES CUSTOMS SERVICE, DEPARTMENT OF THE TREASURY

[T. D. 73–228]

PART 1—GENERAL PROVISIONS

Customs Regions, Districts and Ports

AUGUST 13, 1973.

On May 18, 1973, notice of a proposal to extend the limits of the port of Omaha, Nebraska, in the Chicago, Illinois, Customs district (Region IX), was published in the FEDERAL REGISTER (38 FR 13027). No comments were received regarding this proposed extension.

Accordingly, by virtue of the authority vested in the President by section 1 of the Act of August 1, 1914, 38 Stat. 623, as amended (19 U.S.C. 2), and delegated to the Secretary of the Treasury by Executive Order No. 10289, September 17, 1951 (3 CFR Ch. II), and pursuant to authority provided by Treasury Department Order No. 190, Rev. 9 (38 FR 17517), the port limits of Omaha, Nebraska, in the Chicago, Illinois, Customs district (Region IX), are hereby extended to include all of Douglas County and all of Sarpy County in the State of Nebraska, and all of Pottawattamie County west of Iowa Highway 59 in the State of Iowa.

To reflect this change, the table in § 1.2(c) of the Customs regulations is amended by substituting "Omaha, Nebraska (including the territory described in T.D. 73–228)" for "Omaha, Nebr. (including territory described in E.O. 9297, Feb. 1, 1943; 8 FR 1479)." in the column headed "Ports of Entry" in the Chicago, Illinois, district (Region IX).

(Sec. 1, 37 Stat. 434, sec. 1, 38 Stat. 623, as amended; 19 U.S.C. 1, 2)

It is desirable to make the extended port of entry available to the public as soon as possible. Therefore, good cause is found for dispensing with the delayed

V 38-162 AUG 22 73 XUM

effective date under the provision of 5 U.S.C. 553(d).

Effective date. This amendment shall be effective August 22, 1973.

[SEAL] EDWARD L. MORGAN,
Assistant Secretary of the Treasury.

AUGUST 13, 1973.

[FR Doc.73-17813 Filed 8-21-73;8:45 am]

[T.D. 73-227]

FOREIGN MILITARY PERSONNEL

Free Entry Privileges

AUGUST 13, 1973.

On April 19, 1973, notice of proposed rule making to amend Part 148 of the Customs regulations by adding to subpart I of Part 148 a new § 148.90 entitled "Foreign military personnel," was published in the FEDERAL REGISTER (38 FR 9670). No comments were received in response to this notice.

Section 148.90 is part of the general revision of the Customs Regulations and replaces present § 10.30c. Changes or additions in language are made to clarify the provisions, eliminate inconsistencies, and conform the Customs Regulations to current administrative practices.

The principal changes in the requirements and procedures in § 148.90 from those set forth in § 10.30c relate to the entry or withdrawal of alcoholic beverages under item 822.20, Tariff Schedules of the United States (19 U.S.C. 1202), for personal or family use. These changes are as follows:

1. The present regulations state that for normal consumption the entry or withdrawal of alcoholic beverages under item 822.20, Tariff Schedules of the United States (19 U.S.C. 1202), is limited to one case per month. In practice, this limitation does not apply to malt beverages. Therefore, the words "(other than malt beverages)" are added to § 148.90(d)(1)(i), to clearly point out that malt beverages are an exception to the limitation.

2. Advance entry or withdrawal of cases of alcoholic beverages under the one case per month limitation, mentioned above, is permitted under the present regulations, but the number of cases advanced is left to the discretion of the district director. This policy has resulted in a lack of uniformity as to the number of cases that can be entered or withdrawn at one time. To establish a uniform policy, § 148.90(d)(1)(ii) permits three cases (the initial one plus two cases in advance) to be entered or withdrawn at any one time. The second sentence of § 148.90(d)(1)(ii) is added to explicitly point out that this advance entry or withdrawal does not broaden the one case per month limitation.

3. Section 148.90(d)(3) sets forth the requirement that the warehouse proprietor must retain the necessary records concerning the entry and withdrawal of alcoholic beverages under item 822.20, Tariff Schedules of the United States (19 U.S.C. 1202), for at least 3 years from the date of such entry or withdrawal. This section also indicates that the district director may have the warehouse proprietor's records verified.

4. Since the requirement that the member of the armed forces be an alien is explicitly set forth in § 148.81, it is omited from § 148.90.

The amendment also sets forth the limitations that the term "articles entered for the personal or family use" does not include articles imported as an accommodation to others or for sale or other commercial use. These limitations are contained in headnote 3 of schedule 8, part 2C, Tariff Schedules of the United States (19 U.S.C. 1202).

Cross-references made by other sections of the Customs Regulations to § 10.30c have been changed to reflect the replacement of that section by § 148.90.

There is included as part of the amendment a parallel reference table which shows the relationship of § 148.90 to superseded § 10.30c of the Customs regulations.

Accordingly, new § 148.90, and conforming changes in Parts 10, 11, 145, and 148 of the Customs Regulations, Chapter I, title 19 of the Code of Federal Regulations, are hereby adopted as set forth below.

Effective date. This amendment shall become effective on September 21, 1973.

[SEAL] VERNON D. ACREE,
Commissioner of Customs.

Approved: August 13, 1973.

EDWARD L. MORGAN,
Assistant Secretary of the Treasury.

PART 10—ARTICLES CONDITIONALLY FREE, SUBJECT TO A REDUCED RATE, ETC.

Part 10 is amended by deleting § 10.30c and footnotes 33e and 33f appended thereto.

(R.S. 251, as amended, 77A Stat. 14, sec. 624, 46 Stat. 759; 19 U.S.C. 66, 1202 (Gen. Hdnte. 11), 1624)

PART 11—PACKING AND STAMPING; MARKING

Section 11.3 is amended by deleting "10.30c,".

(R.S. 251, as amended, sec. 624, 46 Stat. 759; 19 U.S.C. 66, 1624)

PART 145—MAIL IMPORTATIONS

Section 145.39 is amended by deleting "and § 10.30c".

(R.S. 251, as amended, 77A Stat. 14, sec. 624, 46 Stat. 759; 19 U.S.C. 66, 1202 (Gen. Hdnte. 11), 1624)

PART 148—PERSONAL DECLARATIONS AND EXEMPTIONS

Section 148.81 is amended to correct its cross-reference to foreign military personnel as follows:

In paragraph (a) substitute "§ 148.90" for "§ 10.30c of this chapter".

In paragraphs (b), (c), and (d) delete "and § 10.30c of this chapter".

Part 148 is amended by adding a new § 148.90 entitled "Foreign military personnel" to subpart I, to read as follows:

§ 148.90 Foreign military personnel.

(a) *Exemptions allowed.*—District directors shall in accordance with the provisions of this section admit the following free of duty and internal revenue tax imposed upon or by reason of importation:

(1) The baggage and effects of persons on duty in the United States as members of the armed forces of any foreign country, and of their immediate families under item 820.40, Tariff Schedules of the United States (19 U.S.C. 1202);

(2) Articles entered or withdrawn from warehouse for consumption by a member of the armed forces of any foreign country on duty in the United States, for his personal use or that of any member of his immediate family but not as an accommodation to others or for sale or other commercial use, under item 822.20, Tariff Schedules of the United States (19 U.S.C. 1202); and

(3) Articles entered or withdrawn from warehouse for consumption for the official use of members of the armed forces of any foreign country on duty in the United States, under item 841.20, Tariff Schedules of the United States (19 U.S.C. 1202).

(b) *Reciprocity limitation.*—When district directors have been advised officially of a finding by the Secretary of the Treasury that a foreign country does not reciprocate to members of the armed forces of the United States on duty in its country and members of their immediate families the privileges accorded its members and their families in the United States, the district directors shall accord to the personnel of such foreign government privileges under the law only to the extent to which the foreign government accords similar treatment to members of the armed forces of the United States and members of their immediate families.

(c) *Status of importer questioned.*—If any question arises as to the status of the importer under item 820.40, 822.20, or 841.20, Tariff Schedules of the United States (19 U.S.C. 1202), or whether articles entered thereunder are for official use or for personal or family use, but not as an accommodation to others or for sale or other commercial use, the district director shall report the available facts to the Commissioner of Customs for instructions.

(d) *Alcoholic beverages for personal or family use.*—(1) *General rule.*—(i) *Limitation stated.*—Except in the case of exceptional circumstances set forth in paragraph (d)(2) of this section, entry of alcoholic beverages (other than malt beverages) for personal or family use but not as an accommodation to others or for sale or other commercial use under item 822.20, Tariff Schedules of the United States (19 U.S.C. 1202), is limited to one case each month.

(ii) *Advance entry or withdrawal.*—A maximum of three cases (the initial one plus two cases in advance) may be entered or withdrawn at any one time in a given 3-month period if the district director is satisfied they are for personal or family use but not as an accommodation to others or for sale or other commercial use. Such advance entry or withdrawal shall not be deemed to broaden the one case per month limitation.

(iii) *Certification.*—At the time of each entry or withdrawal, the member of the Armed Forces must certify that since his last entry or withdrawal there have expired a number of months equal to the numbers of cases last entered or withdrawn.

(2) *Exceptional circumstances.*—In exceptonal circumstances an additional quantity of alcoholic beverages for personal or family use but not as an accommodation to others or for sale or other commercial use, in excess of the one case per month limitation may be allowed under the following procedure:

(i) A statement signed by the member of the Armed Forces and attached to his declaration for free entry will be submitted to the district director, setting forth the reason for requesting the additional quantity;

(ii) The statement of request must be approved by the officer or person in charge of the Armed Forces involved, or a person specifically authorized by such officer or person to approve such requests; and

(iii) The district director must be satisfied that the need for the additional quantity is justified. Questionable cases shall be referred to the Commissioner of Customs for instructions.

(3) *Retention and verification of the warehouse proprietors' records.*—The warehouse proprietor shall retain all records relating to the entry and withdrawal of alcoholic beverages under item 822.20, Tariff Schedules of the United States (19 U.S.C. 1202), for at least 3 years from the date of entry or withdrawal of such beverages. Verification of the warehouse proprietors' records shall be at the discretion of the district director.

(e) *Entry requirements.*—The entry requirements prescribed in the Tariff Act of 1930, as amended (Title 19, United States Code), and the regulations thereunder are applicable to articles for which free entry is claimed under item 820.40, 822.20, or 841.20, Tariff Schedules of the United States (19 U.S.C. 1202). No invoices shall be required.

(R.S. 251, as amended, 77A Stat. 14, secs. 498, 624, 46 Stat. 728, as amended, 756; 19 U.S.C. 66, 1202 (Gen. Hdnte. 11), 1498, 1624)

Title 22—Foreign Relations

CHAPTER II—AGENCY FOR INTERNATIONAL DEVELOPMENT, DEPARTMENT OF STATE

[AID Reg. 5]

PART 205—PER DIEM PAYMENTS TO PARTICIPANTS IN NONMILITARY ECONOMIC DEVELOPMENT TRAINING PROGRAMS

Per Diem Payments

The regulation governing per diem payments to participants in non-military economic development training programs is revised to provide increased per diem payments to such participants. This change is based on the amendment to 22 CFR 61.3 set forth at 38 FR 15965 (June 19, 1973) wherein an increased per diem is provided to participants who come to the United States to observe, consult, demonstrate special skills, or engage in specialized programs.

Part 205 of Chapter II of Title 22 of the Code of Federal Regulations (AID Reg. 5), is revised to read as follows:

§ 205.1 Per diem rates.

Participants in any training program under the Foreign Assistance Act of 1961 other than Part II may receive a per diem allowance in accordance with the following rates:

(a) For participants in programs of training in the United States, a per diem allowance not to exceed $35, or, in exceptional circumstances such other rate not to exceed $45, as the Administrator of the Agency for International Development or his designee may prescribe and such designee may be authorized to redelegate such authority.

(b) For participants in programs of training in countries other than the United States, a per diem allowance not to exceed those prescribed by the Standardized regulations (Government Civilian, Foreign Areas).

This revision shall become effective on August 22, 1973.

JAMES F. CAMPBELL,
Assistant Administrator, Bureau for Program and Management Services.

Title 43—Public Lands: Interior

CHAPTER II—BUREAU OF LAND MANAGEMENT

APPENDIX—PUBLIC LAND ORDERS

[Public Land Order 5375]

[New Mexico 12723]

NEW MEXICO

Withdrawal for National Forest Recreation Areas and Administrative Sites

By virtue of the authority vested in the President and pursuant to Executive Order No. 10355 of May 26, 1952 (17 FR 4831), it is ordered as follows:

1. Subject to valid existing rights, the following described national forest lands are hereby withdrawn from appropriation under the mining laws, 30 U.S.C., Ch. 2, but not from leasing under the mineral leasing laws, in aid of programs of the Department of Agriculture:

CARSON NATIONAL FOREST

NEW MEXICO PRINCIPAL MERIDIAN

Lagunitas Administrative Site and Campground

T. 31 N., R. 6 E., (unsurveyed)
Sec. 28, S½S½SW¼;
Sec. 33, W½NE¼, NW¼, N½SW¼, NW¼SE¼.

Potrero Box

T. 25 N., R. 7 E.,
Sec. 8, SE¼SE¼SE¼, E½SW¼SE¼SE¼;
Sec. 9, SW¼SW¼SW¼, W½SE¼SW¼SW¼;
Sec. 16, W½NW¼NW¼, W½E½NW¼NW¼, W½NE¼SW¼NW¼, NW¼SW¼NW¼;
Sec. 17, E½NE¼NE¼, E½W½NE¼NE¼.

Laguna Larga Campground

T. 31 N., R. 8 E.,
Sec. 28, S½S½SW¼;
Sec. 33, N½NW¼, N½S½NW¼.

Tres Piedras Administrative Site

T. 28 N., R. 9 E.,
Sec. 15, S½SW¼SE¼, SW¼SE¼SE¼, W½SE¼SE¼SE¼;
Sec. 22, lots 3, 8, 9, 10, 11 and NW¼NE¼.

The areas described aggregate approximately 765 acres in Rio Arriba and Taos Counties.

2. The withdrawal made by this order does not alter the applicability of those public land laws governing the use of the national forest lands under lease, license, or permit, or governing the disposal of their mineral or vegetative resources other than under the mining laws.

JACK O. HORTON,
Assistant Secretary of the Interior.

Final Revocation of Withdrawal for Air Navigation Site No. 27

By virtue of the authority contained in section 4 of the Act of May 24, 1928, 49 U.S.C. 214 (1970), it is ordered as follows:

The Secretary's Order of April 4, 1929, withdrawing land for Air Navigation Site No. 27, is hereby revoked as to the remaining lands embraced therein, described as follows:

GILA AND SALT RIVER MERIDIAN

T. 11 S., R. 6 W.,
Sec. 25, NE¼, E½NW¼, S½.

The area described aggregates 560 acres in Pima County.

All of the lands have been patented to Pima County under the Recreation and Public Purposes Act of June 14, 1926, as amended, 43 U.S.C. 869; 869-4 (1970).

Partial Revocation of Withdrawals for National Forest Administrative Sites

By virtue of the authority vested in the President and pursuant to Executive Order No. 10355 of May 26, 1952 (17 FR 4831), it is ordered as follows:

1. The Secretarial Order of November 10, 1908, and Public Land Order No. 3965 of March 30, 1966, withdrawing national forest lands as administrative sites, are hereby revoked so far as they affect the following described lands:

TONTO NATIONAL FOREST

GILA AND SALT RIVER MERIDIAN

Ashdale Administrative Site

T. 8 N., R. 5 E.,
sec. 31 (unsurveyed tract of land located in central part of section).
Containing approximately 76.60 acres.

Top of the World Administrative Site

T. 1 S., R. 14 E.,
sec. 8, W½SW¼, excluding patented Mineral Survey No. 2337.
Containing approximately 57.00 acres.

The areas described total approximately 133.60 acres in Gila and Maricopa Counties.

2. At 10 a.m. on September 19, 1973, the lands shall be open to such forms of disposition as may by law be made of national forest lands.

JACK O. HORTON,
Assistant Secretary of the Interior.

[Public Land Order 5378]

[New Mexico 13046]

NEW MEXICO

Partial Revocation of National Forest Reserve; Transfer of Administrative Jurisdiction Over Land in the Rio Grande National Wild and Scenic Rivers Area

By virtue of the authority vested in the President by the Act of June 4, 1897, 16 U.S.C. 473 (1970), and pursuant to Executive Order No. 10355 of May 26, 1952 (17 FR 4831), and the authority contained in section 6(c) of the Act of October 2, 1968, 16 U.S.C. 1277 (1970), it is ordered as follows:

1. The Presidential Proclamation No. 863 of March 2, 1909, withdrawing lands for the Carson National Forest, is hereby revoked so far as it affects the following described lands:

NEW MEXICO PRINCIPAL MERIDIAN

T. 27 N., R. 12 E., secs. 5 and 8, that portion lying west of the Rio Grande River.

The areas described aggregate 280.70 acres in Taos County.

2. The jurisdiction over the land described above is hereby transferred to the Secretary of the Interior to be administered by the Bureau of Land Management as part of the Rio Grande National Wild and Scenic Rivers Area, as provided for by section 3(a)(4) of the National Wild and Scenic Rivers Act of October 2, 1968, supra.

3. At 10 a.m. on September 19, 1973, the land shall be open to such forms of disposition as may by law be made of National Wild and Scenic Rivers lands as provided by sections 8 and 9 of the Act of October 2, 1968, supra, and subject to the provisions of Waterpower Designation No. 1, New Mexico No. 1 of August 7, 1916, and the withdrawals made by Powersite Reserve No. 548 of September 30, 1916, and Powersite Reserve No. 740 of May 21, 1920.

JACK O. HORTON,
Assistant Secretary of the Interior.

NEW MEXICO

Withdrawal for National Forest Recreation Areas

By virtue of the authority vested in the President and pursuant to Executive Order No. 10355 of May 26, 1952 (17 FR 4831), it is ordered as follows:

1. Subject to valid existing rights, the following described national forest lands are hereby withdrawn from appropriation under the mining laws, 30 U.S.C. Ch. 2, but not from leasing under the mineral leasing laws, in aid of programs of the Department of Agriculture:

CARSON NATIONAL FOREST

NEW MEXICO PRINCIPAL MERIDIAN

Angostura Recreation Area

T. 22 N., R. 14 E.,
Sec. 29, that portion of lot 9 south and west of State Highway No. 3;
Sec. 30, those portions of lots 3, 4 and 5, (excluding HES 312) south and west of State Highway No. 3, W½SE¼SE¼, E½SW¼SE¼;
Sec. 31, lots 5, 6, 9, 10, E½NW¼NE¼NE¼, SW¼NE¼NE¼, NW¼SE¼NE¼, N½SW¼SE¼NE¼, E½SE¼NW¼NE¼, E½SW¼NE¼, E½SW¼SW¼NE¼.

Rio La Junta Recreation Area

T. 22 N., R. 13 E.,
Sec. 24, S½SE¼NE¼, partially unsurveyed.
T. 22 N., R. 14 E.,
Sec. 9, W½SW¼NE¼, E½SE¼NW¼, NE¼NE¼SW¼, N½NW¼SE¼, E½SW¼NW¼SE¼, SE¼NW¼SE¼, E½SW¼SE¼, E½W½SW¼SE¼, unsurveyed;
Sec. 16, E½NW¼NE¼, E½W½NW¼NE¼, NW¼SW¼NE¼, W½NE¼SW¼NE¼, N½SW¼SW¼NE¼, S½NE¼SE¼NW¼, S½SE¼NW¼, S½S½SW¼NW¼, N½NW¼NE¼SW¼, N½N½NW¼SW¼, unsurveyed;
Sec. 17, S½N½SW¼NE¼, S½SW¼NE¼, S½SE¼NE¼, E½SE¼SE¼NW¼, E½NE¼SE¼SW¼, E½SW¼SE¼SW¼, SE¼SE¼SW¼, N½NE¼NE¼SE¼, W½NW¼SE¼, W½W½SW¼SE¼, partially unsurveyed;
Sec. 19, S½NE¼NE¼, SE¼NE¼NE¼NE¼, SE¼SE¼NW¼NE¼, N½SW¼NE¼, W½SW¼SW¼NE¼, NW¼NW¼SE¼NE¼, S½S½NW¼;
Sec. 20, N½ of lot 1, N½ and N½S½ of lot 2, NW¼NW¼NE¼, N½NE¼NW¼.

Tres Ritos Recreation Area

T. 22 N., R. 13 E.,
Sec. 24, those portions of lots 3, 4, W½SW¼NE¼, W½NW¼SE¼, N½NE¼SE¼NW¼, SE¼NE¼SE¼NW¼, SW¼SW¼SE¼SE¼, E½SW¼SE¼, NE¼NW¼SW¼SE¼, lying south and/or south and west of State Highway No. 3, excluding that part of PLO 725 in lot 3 and that part of S½SE¼NE¼NW¼ (excluding HES 316) lying south and west of State Highway No. 3, partially unsurveyed;
Sec. 25, those portions of lot 1 lying south and west of State Highway No. 3, E½NE¼NW¼NE¼, S½NW¼NE¼NE¼, NE¼SW¼NE¼NE¼, SE¼NE¼NE¼, partially unsurveyed.
T. 22 N., R. 14 E.,
Sec. 30, that portion of lot 1 lying south and west of State Highway No. 3 and S½NW¼NW¼ (excluding HES 312), partially unsurveyed.

Sipapu Ski Area

T. 22 N., R. 13 E.,
Sec. 9, S½SE¼, partially unsurveyed;
Sec. 10, SW¼ (excluding approximately 10 acres in Patent No. 883043), partially unsurveyed;
Sec. 15, N½NW¼, SW¼NW¼, partially unsurveyed;
Sec. 16, NE¼, SE¼NW¼, E½SW¼, W½SE¼, NE¼SE¼, unsurveyed.

The areas described aggregate 1,507.48 acres in Taos County.

2. The withdrawal made by this order does not alter the applicability of those public land laws governing the use of the national forest lands under lease, license, or permit, or governing the disposal of their mineral or vegetative resources other than under the mining laws.

JACK O. HORTON,
Assistant Secretary of the Interior.

[Oregon 8646]

OREGON

Partial Revocation of Reclamation Project Withdrawal

By virtue of the authority contained in section 3 of the Act of June 17, 1902, as amended and supplemented, 43 U.S.C. 416 (1970), it is ordered as follows:

1. The order of the Bureau of Reclamation of October 25, 1954, concurred in by the Bureau of Land Management on January 24, 1956, withdrawing lands for the Rogue River Project, is hereby revoked so far as it affects the following described lands:

WILLAMETTE MERIDIAN

T. 36 S., R. 7 W.,
Sec. 2, lots 8, 9, 10;
Sec. 3, lots 9 and 16;
Sec. 10 SE¼NW¼.

The areas described aggregate 195.89 acres in Josephine County.

Of these lands, those described as lots 8, 9, and 10, sec. 2, and lot 9, sec. 3, are withdrawn from all forms of appropriation under the public land laws, with certain exceptions, and from location and entry under the United States mining laws, but not from leasing under the mineral leasing laws, by Public Land Order No. 1726 of September 3, 1958. The lands described in section 2 are also included within the boundaries of the withdrawal made for the Rogue River Wild and Scenic Rivers System established by section 3 of the Act of October 2, 1968, 82 Stat. 907. All of these lands will remain so withdrawn.

2. The remaining unreserved, unappropriated public lands described as lot 16, section 3, and the SE¼NW¼, section 10, shall at 10 a.m. on September 19, 1973, be open to operation of the public land laws generally, including the United States mining laws, subject to valid existing rights, the provisions of existing withdrawals and classifications, and the requirements received on or before 10 a.m. on September 19, 1973, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

V 38-162 AUG 22 73 XUM

All of the lands described in paragraph 1 of this order have been and will continue to be open to the filing of applications and offers under the mineral leasing laws, except that the leasing of the lands described in section 2 will be subject to the provisions of section 9(a) of the Act of October 2, 1968, supra.

Inquiries concerning the lands should be addressed to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, Portland, Oregon 97208.

JACK O. HORTON,
Assistant Secretary of the Interior.

[Arizona 6898]

ARIZONA

Withdrawal for National Forest Recreational and Administrative Sites

By virtue of the authority vested in the President and pursuant to Executive Order No. 10355 of May 26, 1952 (17 FR 4831), it is ordered as follows:

1. Subject to valid existing rights, the following described national forest lands are hereby withdrawn from appropriation under the mining laws, 30 U.S.C. Ch. 2, but not from leasing under the mineral leasing laws in aid of programs of the Department of Agriculture:

SITGREAVES NATIONAL FOREST

GILA AND SALT RIVER MERIDIAN

O'Haco Lookout Administrative Site

T. 12 N., R. 12 E.,
Sec. 10, SE¼SE¼NW¼.

Bear Canyon Lake Recreation Area

T. 12 N., R. 13 E.,
Sec. 20, S½SW¼, SW¼SE¼, W½SE¼SE¼;
Sec. 29, W½E½E½, W½NE¼, NW¼, N½SW¼, SE¼SW¼, W½SE¼;
Sec. 32, NW¼NE¼, NE¼NW¼.

Chevelon Canyon Lake Recreation Area

T. 13 N., R. 14 E.,
Sec. 14, W½NW¼SW¼, S½S½, E½NW¼SE¼, NE¼SE¼;
Sec. 15, E½E½SE¼;
Sec. 23, lots 1 and 2, NE¼, N½NW¼, E½SE¼NW¼, E½NE¼SW¼, W½SE¼, 14.44 acres of HES 197 in E½E½SE¼;
Sec. 24, lots 1 and 2, S½SW¼NE¼, NW¼, E½SW¼, SW¼SE¼, 14.91 acres of HES 197 in W½W½SW¼;
Sec. 25, 3.07 acres of HES 197 in NW¼NW¼NW¼;
Sec. 26, E½.

Heber Job Corps Conservation Center Administrative Site

T. 12 N., R. 16 E.
Sec. 20, N½SE¼, SW¼SE¼, N½SE¼SE¼, SW¼SE¼SE¼.

The areas described aggregate 2,323.07 acres in Coconino and Navajo Counties.

2. The withdrawal made by this order does not alter the applicability of those public land laws governing the use of the national forest lands under lease, license or permit, or governing the disposal of their mineral or vegetative resources other than under the mining laws.

1. In § 173.302(f) the reference to "1,000 p.s.i." in the eighth line should read "1000 p.s.i.g."

2. § 173.304(a)(2) table of gases, the DOT container corresponding to "Carbon dioxide-nitrous oxide mixture" reading "DOT-3ET2000" should read "DOT-3HT2000."

3. In § 178.45-15(a)(4), the reference to "165,000 p.s.i. (Rc 36)" should read "165,000 p.s.i. (Rc 36)."

CHAPTER X—INTERSTATE COMMERCE COMMISSION

SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[S.O. 1148]

PART 1033—CAR SERVICE

Graham County Railroad Co.

At a session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 15th day of August 1973.

It appearing, that the Graham County Railroad Company has filed an application with the Interstate Commerce Commission in Finance Docket No. 27463 for a certificate of public convenience and necessity authorizing the operation over approximately 12.5 miles of existing line of track, not now operated by a common carrier, between a point of connection with the Southern Railway Company at Topton Junction, North Carolina, located approximately 11.5 miles east of Robbinsville, North Carolina, and a point approximately 1 mile west of Robbinsville, North Carolina, together with approximately 9,500 feet of existing yard, team, and interchange tracks; that this track is the only source of rail service between the aforementioned points; that the Commission is of the opinion that there is immediate need for service over this line pending decision by the Commission in Finance Docket No. 27463, and that the operation of this line by the Graham County Railroad Company is necessary in the interests of the public and the commerce of the people; and that notice and public procedure herein are impracticable and contrary to the public interest, and that good cause exists, for making this order effective upon less than thirty days' notice.

It is ordered, That:

§ 1033.1148 **Service Order No. 1148.**

(a) *Graham County Railroad Company authorized to operate over trackage in Graham County, North Carolina.* (a) The Graham County Railroad Company be, and it is hereby, authorized to operate over approximately 12.5 miles of existing line of track in Graham County, North Carolina, not now operated by a common carrier, between a point of connection with the Southern Railway Company at Topton Junction, North Carolina, located approximately 11.5 miles east of Robbinsville, North Carolina, and a point approximately 1 mile west of Robbinsville, North Carolina, together with approximately 9,500 feet of existing yard, team, and interchange tracks.

(b) *Application.* The provisions of this order shall apply to intrastate, interstate, and foreign traffic.

(c) *Effective date.* This order shall become effective at 12:01 a.m., August 21, 1973.

(d) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., December 31, 1973, unless otherwise modified, changed, or suspended by order of this Commission.

(Secs. 1, 12, 15, and 17(2), 24 Stat. 379, 383, 384, as amended; 49 U.S.C. 1, 12, 15, and 17(2). Interprets or applies Secs. 1(10-17), 15(4), and 17(2), 40 Stat. 101, as amended, 54 Stat. 911; 49 U.S.C. 1(10-17), 15(4), and 17(2).)

It is further ordered, That copies of this order shall be served upon the Association of American Railroads, Car Service Division, as agent of the railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that notice of this order shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board.

[SEAL] ROBERT L. OSWALD,
Secretary.

Title 50—Wildlife and Fisheries

CHAPTER I—BUREAU OF SPORT FISHERIES AND WILDLIFE, FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 32—HUNTING

San Andres National Wildlife Refuge, N. Mex.

The following special regulation is issued and is effective on August 22, 1973.

§ 32.32 **Special regulations; big game; for individual wildlife refuge areas.**

NEW MEXICO

SAN ANDRES NATIONAL WILDLIFE REFUGE

Public hunting of deer (either sex) on the San Andres National Wildlife Refuge, New Mexico, is permitted from December 1 through December 2, 1973, inclusive, only on the area designated by signs as open to hunting. This area, comprising 57,215 acres, is delineated on maps available at refuge headquarters, Las Cruces, New Mexico, and from the Regional Director, Bureau of Sport Fisheries and Wildlife, P.O. Box 1306, Albuquerque, New Mexico 87103. Hunting shall be in accordance with all applicable State, Federal, and military regulations, subject to the following special conditions.

(1) Hunters must check in and out in person at the check station located on the Jornada road near U.S. 70. The check station will be open 24 hours a day. Hunters may check in during the afternoon of November 30, 1973. Time of entry to the hunting area will be at the discretion of the officers in charge. Any entry permits required by the military authorities will be available at the check station. All hunters must check out no later than 10:00 p.m. December 2, 1973.

(2) No entry into the hunting area from the west will be permitted north of the Rope Springs road. Hunters will not be permitted to enter the hunting area from the east side of the San Andres Range except at the discretion of the officers in charge.

(3) The officers in charge may restrict the number of hunters entering any one area. If required by the firing schedule, hunters will be cleared from all areas where their safety is endangered.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through December 2, 1973.

JOHN H. KIGER,
Refuge Manager, San Andres National Wildlife Refuge Las Cruces, New Mexico.

AUGUST 14, 1973.

Proposed Rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rulemaking prior to the adoption of the final rules.

DEPARTMENT OF THE TREASURY

U.S. Customs Service

[19 CFR Part 19]

CUSTOMS WAREHOUSES, CONTAINER STATIONS, AND CONTROL OF MERCHANDISE THEREIN

Transfer of Merchandise to a Container Station by a Container Station Operator

AUGUST 13, 1973.

Notice is hereby given that under the authority of Revised Statute 251, as amended (19 U.S.C. 66), and sections 551, 565, and 624 of the Tariff Act of 1930, as amended (19 U.S.C. 1551, 1565, 1624), it is proposed to amend § 19.45 of the Customs regulations (19 CFR 19.45), to permit container station operators to use their own vehicles to cart merchandise from the place of unlading to their stations. Section 19.45, Customs regulations (19 CFR 19.45), added by T.D. 72-68, 37 FR 4186, provides that merchandise may be transferred to a container station only by a bonded cartman or bonded carrier. However, it would facilitate the movement of cargo to continue the previous practice of permitting container station operators to use their own vehicles to cart merchandise from the place of unlading to their stations. The container station bond would amply protect the revenue in such circumstances.

Accordingly, it is proposed to amend § 19.45 of the Customs regulations (19 CFR 19.45) to read as follows:

§ 19.45 Transfer of merchandise, approval and method.

Approval of the application by the district director shall serve as a permit to transfer the container and its contents to the station. Except when the container station operator is moving the merchandise to his own station by his own vehicle, the merchandise may only be transferred to a container station by a bonded cartman or bonded carrier. The station operator, cartman, or carrier shall receipt for the merchandise on both copies of the application.

Data, views, or arguments with respect to the foregoing proposal may be addressed to the Commissioner of Customs, Attention: Regulations Division, Washington, D.C. 20229. To insure consideration of such communications, they must be received in the Bureau on or before Sept. 21, 1973.

Written material or suggestions submitted will be available for public inspection in accordance with § 103.3(b) of the Customs regulations (19 CFR 103.3(b)), at the Regulations Division, Bureau of Customs, Washington, D.C., during regular business hours.

[SEAL] VERNON D. ACREE,
Commissioner of Customs.

Approved August 13, 1973.

EDWARD L. MORGAN,
Assistant Secretary of the Treasury.

CRANBERRIES GROWN IN THE STATES OF MASSACHUSETTS, RHODE ISLAND, CONNECTICUT, NEW JERSEY, WISCONSIN, MICHIGAN, MINNESOTA, OREGON, WASHINGTON, AND LONG ISLAND IN THE STATE OF NEW YORK

Decision and Referendum Order Regarding Proposed Amendment of the Marketing Agreement and Order

Pursuant to the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and orders (7 CFR Part 900), a public hearing was held at Wareham, Massachusetts, on February 14, 1973, at Wisconsin Rapids, Wisconsin, on February 22, and at Long Beach, Washington, on February 27, after notice thereof published in the FEDERAL REGISTER (38 FR 3985) on proposals to amend the marketing agreement, as amended, and Order No. 929, as amended (7 CFR Part 929), regulating the handling of cranberries grown in the states of Massachusetts, Rhode Island, Connecticut, New Jersey, Wisconsin, Michigan, Minnesota, Oregon, Washington, and Long Island in the State of New York, to be made effective pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (48 Stat. 31, as amended; 7 U.S.C. 601-674).

On the basis of the evidence adduced at the hearing, and the record thereof, the recommended decision in this proceeding was filed on May 25, 1973, with the Hearing Clerk, United States Department of Agriculture. The notice of the filing of such recommended decision, affording opportunity to file written exceptions thereto through June 15, 1973, was published in the FEDERAL REGISTER (FR Doc. 73-10852; 38 FR 14290). A notice of extension of time for filing such exceptions, through July 31, 1973, was filed with said Hearing Clerk on June 22, 1973, and published in the FEDERAL REGISTER (FR Doc.73-13023; 38 FR 17016). No exceptions were filed.

The material issues, findings and conclusions, and rulings of the recommended decision set forth in the FEDERAL REGISTER (FR Doc. 73-10852; 38 FR 14290) are hereby approved and adopted as the material issues, findings and conclusions, and rulings of this decision as published in full herein.

Material issues.—The material issues presented on the record of the hearing involved amendatory action relating to:

1. Changing the beginning date of the 2-year term of office for the committee from September 1 to August 1; and authorizing the committee to meet earlier than now permitted to formulate its marketing policy, consider the need for regulations and submit its recommendation with respect thereto when it deems the production and marketing situation warrants;

2. Changing the requirements with respect to submission of the names of nominees from two to one or more for each committee position to be filled; and authorizing the Secretary to consider other qualified persons;

3. Providing representation on the committee for all growers in District 4 (Oregon and Washington) who are not affiliated with the major cooperative, and allow them to participate in nomination proceedings;

4. Providing authority for the committee, with the approval of the Secretary, to levy a late-payment charge and an interest charge on assessments that are not paid within the time specified;

5. Clarifying the withholding provisions so that each handler and the committee can more easily and accurately determine the withholding obligation;

6. Liberalizing the provisions dealing with interhandler transfers to permit handlers to transfer cranberries freely to other handlers, and require each handler to report such transfers to the committee twice each year;

7. Elimination of the requirement for inspection of withheld (restricted from marketing) cranberries, when such cranberries are released to the handler in accordance with the special provisions of the order relating to withheld cranberries; and

8. Making conforming changes.

Findings and conclusions.—The findings and conclusions on the material issues, all of which are based upon the evidence adduced at the hearing and the record thereof, are as follows:

1. The order should be amended to change the beginning date of the 2-year term of office of committee members from September 1 to August 1. The Crop Reporting Board issues its report of estimated production during the 3d week in August. It is desirable for the committee to meet as soon as practicable after this report is available to formulate its marketing policy and consider the need for regulation of the oncoming crop. Since the term of office begins on September 1, it is not possible for the committee to meet before that date.

The committee whose term of office expires on August 31 of every other year could meet prior to September 1. However, it was testified at the hearing that the committee that will supervise the program during the crop-year should formulate the marketing policy and be responsible for any recommendation for regulation. The language in the order states "Each crop-year prior to making any recommendation • • •; the committee shall submit to the Secretary a report setting forth its marketing policy for the crop-year." This infers that the committee meeting should be held within the crop-year. Since it is desirable for the committee to meet earlier than September 1, the order should be changed to permit the committee to meet as soon as practicable after August 1. Fixing the beginning date of the term of office as August 1 would add the needed flexibility. Accordingly, the order should be amended as hereinafter set forth.

2. The provisions of the order which require the industry to submit two nominees for each position to be filled on the committee should be changed to require the submission of one or more nominees for each position. The order provides that the large cooperative marketing organization may obtain its nominations by means of grower meetings or by resolution of the Board of Directors. The order directs that all other growers will obtain nominees through meetings held in each district. Requiring the submission of two nominees for each position has caused problems in the operation of the order. Attendance at nomination meetings has sometimes been low. In order to comply with the two nominees for each position requirement of the order it has been necessary to nominate growers who are not in attendance. It is not always known whether such nominees are eligible to serve or if they would serve. Usually the industry desires that the person with the most votes be appointed as a member and the person with the next highest votes be the alternate. Presently, the person with the second highest number of votes for member may not be considered for the alternate position as he must be considered for appointment as member and he should not be considered for two positions at the same time. Similar objections exist to requiring the major cooperative to submit two names of nominees for each position it is to fill on the committee.

Amending the order to require submission of the names of one or more nominees for each committee position to be filled should result in greater flexibility in selecting the best qualified individuals for member and alternate positions respectively. The extension of authority to permit the Secretary to consider other eligible persons, in addition to the nominees, would provide sufficient latitude for him to make a choice. The order should therefore be amended as hereinafter set forth.

3. Some growers in District 4 are not affiliated with the major cooperative marketing organization. The order does not currently provide sufficient committee representation for these growers as is the case for growers not so affiliated in other districts. It would be desirable and the order should be amended to specifically provide representation on the committee for these District 4 growers. Such amendment should permit such growers to participate in the selection of nominees as well as make them eligible to serve on the committee. This could be accomplished by treating Districts 3 and 4 growers as one unit for purposes of committee representation for such growers. Hence, the order would provide that all such growers in Districts 3 and 4 may participate together in the selection of nominees to fill positions representing growers not affiliated with the major cooperative. It should provide that each grower in either district would be eligible to serve in such a position on a committee. It should also provide that the member who represents growers in District 3 who are not so affiliated shall also represent such growers in District 4. Because of the distance between Districts 3 and 4 it would not be feasible to require the growers from these two districts to meet in one place to select nominees. In the past it has been the practice to hold a nomination meeting in District 3 and it is desirable to continue to hold meetings in that district. However, District 4 growers should not be required to be present in order to participate in the nominations. A procedure should be provided to permit participation by District 4 growers. Development of an appropriate procedure should be the responsibility of the Cranberry Marketing Committee. Such could be patterned after the following procedure which was outlined at the hearing: Growers in District 4 would be notified by mail of the time and place of the nomination meeting in District 3. District 4 growers would be asked to indicate whether they would attend the meeting. Those indicating that they would not attend the meeting would submit the names of candidates to the Department or the committee. At the nomination meeting in District 3, the names of any candidates submitted by mail would be placed in nomination. This could be done by the Department of Agriculture's representative or by the person conducting the meeting. Growers in attendance could then nominate other eligible persons. All eligible growers present would be permitted to vote. District 4 growers would be provided an opportunity to vote by mail. The combined vote of District 3 and 4 growers would determine the nominee for member and alternate member.

4. The order should be amended, as hereinafter set forth, to permit the committee, with the approval of the Secretary, to levy a late payment charge and interest on overdue assessments. The only source of funds to pay the expenses of the committee is from assessments on handlers. Each handler pays a pro rata share of the committee's expenses in proportion to the volume of cranberries handled. The failure of handlers to pay assessment obligations promptly results in added expense and operational problems for the committee. The committee has frequently encountered difficulty in collecting assessments from some handlers. To attempt to collect, the committee must incur the added expense of sending out additional billings and contacting each delinquent handler by phone, in person, or through one of its field offices. Nonpayment of assessments hampers the operation of the committee and may require it to borrow money and to pay interest to continue operation. Authority for the committee to levy a late payment charge and to add interest to the outstanding delinquent obligation would encourage handlers to pay assessment obligations promptly. By paying the obligation when due, handlers would not be subject to either the late payment charge or interest. It would not be desirable to specify the rate of interest in the order. The rate of interest changes as the availability of money fluctuates. If the interest rate was specified in the order, it would be necessary to amend the order each time the interest rate should be changed. Amending the order involves a considerable amount of time and expense. Therefore, the order should permit the committee to establish the late payment charge, and fix the rate of interest, with the approval of the Secretary, so as to provide the flexibility needed to make such adjustments as are found to be necessary.

5. Handlers acquire cranberries which have been "screened" to remove the extraneous material which is picked up with the berries as they are harvested, and "unscreened" berries from which the extraneous material, including cull berries, has not been removed. Cranberries from which the extraneous material has been removed are referred to as "screened cranberries", and cranberries from which such material has not been removed are referred to as "unscreened cranberries" or "cranberries in the chaff". All cranberries are screened before they are handled.

Under the order, there have been no problems in the application of the withholding percentage to cranberries which were screened before the handler received them. The handler merely applied the percentage to the total quantity so received to ascertain the amount required to be withheld. Likewise, few problems have been experienced in the case of cranberries received in the chaff and

V 38-162 AUG 22 73 XUM

screened shortly thereafter. The percentage was applied to the quantity of marketable berries screened out of the lot to ascertain the quantity that was required to be withheld.

However, substantial quantities of cranberries are acquired in the chaff and stored for a considerable length of time before they are screened. Such berries deteriorate and diminish (shrink) in quantity in storage so that the quantity of useable berries screened out is less than if the berries had been screened when they were first acquired by the handler. Since some handlers handle berries for growers under a "pool" arrangement, they apply an upward adjustment "shrink factor" to the screened quantity to compensate for the shrink that occurred in storage. Application of the shrink factor is designed to give the grower credit in the pool for the quantity of useable berries in the lot at the time he delivered it to the handler regardless of the length of time the handler kept his berries in storage before screening them. This puts all growers who participate in the pool on an equal footing.

Because of the upward adjustment that is made for pool purposes to compensate for shrinkage in storage, there has been confusion among handlers as to whether or not this same upward adjustment should be made in the screened quantity resulting from the screening of stored cranberries so as to reflect a quantity of screened berries that could have been obtained by screening the berries when they were first received before the withholding percentage is applied.

No such upward adjustment should be made. Since the berries that represent the withholding percentage are contained in the unseparated stored lot, along with the free-market percentage berries, both shrink at the same rate. Therefore, application of the withholding percentage to the screened quantity as determined by actual screening or from a representative sample, regardless of when the determination is made, is fair and equitable. It would not be equitable to require handlers to make an upward adjustment in the screened quantity before the withholding computation is made. This would require the handler to dispose of a quantity of marketable berries equal to that which would result if the percentage were applied to the useable berries contained in the lot before it suffered shrink, and would cause handlers who store berries to withhold a larger proportion of their berries than handlers who do not.

It is true, of course, that a handler which screens its berries at the time of acquisition will derive a larger total for disposition than it would if it stored the same berries for any appreciable length of time prior to screening. This is the necessary result of the fact that stored cranberries shrink in volume over time. However, the time of screening by each handler is a business decision which must be presumed to take into account the various possibilities as to the quantity of berries which will be available for disposition dependent upon when they are screened. That a handler chooses to screen its acquired cranberries after storing them should not alter the basic principle that the quantity of berries which must be withheld is to be determined at the time of screening.

Therefore the order should be amended, as hereinafter set forth, to make it clear that the withholding percentage shall be applied to the quantity of screened cranberries regardless of the time the screening occurs.

Testimony was offered at the hearing contending that the withholding obligation should be based on the quantity of cranberries handled rather than on the quantity acquired by handlers. "Handle" is defined to mean can, freeze, or dehydrate cranberries within the production area or to sell, consign, deliver, or transport cranberries. The order requires restricted percentage cranberries to be withheld from handling. It would, therefore, not be practicable to base the withholding on the volume handled. On this basis, the proposed modification is rejected.

6. The order should be amended so that handlers need report the transfer of cranberries from one handler to another only twice each year. The dates for filing such reports should be specified by the committee. The purpose of the interhandler transfer report, simply stated, is to provide information so the committee can prepare accurate reports with respect to acquisition and disposition of cranberries and levy assessments on each lot of cranberries only once. Thus, the interhandler transfer report provides the committee with the information necessary to make adjustments so that acquisition of any given lot of cranberries will be counted only once regardless of the number of times the lot changes hands among handlers.

The provisions in the order which requires handlers to give notice to the committee prior to such transfer has proved impractical. Cranberries are harvested and handled within a relatively short period of time. Many transactions, including interhandler transfers, are made by telephone. Such rapid transactions are hampered by the requirement that such transactions shall be subject to prior notification to the committee. Experience has shown that such prior notification is not necessary for effective committee operations. Handlers should be permitted to transfer cranberries to any other handler freely. The filing of two interhandler transfer reports each year on dates specified by the committee, probably as January 1 and July 1, of each fiscal period, will enable the committee to function properly and compile statistical data that will meet the needs of the industry and the order should be amended to so provide, as hereinafter set forth.

7. The order should be amended, as hereinafter set forth, to provide that withheld cranberries released to a handler need not be inspected. The inspection requirement is to assure that handlers will meet the withholding obligation with cranberries possessing satisfactory market quality. Such requirements prevent a handler from meeting his withholding obligation with cull or other low quality cranberries which would normally be discarded. The order provides a procedure whereby a handler may obtain release of his withheld cranberries. Upon release such berries may be marketed as free percentage cranberries. Under this procedure, the committee assumes the responsibility of purchasing a like quantity to replace those released. The cranberries purchased by the committee must be inspected and meet the requirements for withheld cranberries because it is the intent of the order that all cranberries withheld from normal marketing channels be of marketable quality. To ascertain that this requirement is met, inspection of the cranberries by the Federal or Federal-State Inspection Service is required. Suppose for example, the quantity of cranberries available is determined by the Secretary to exceed market demands, including a desirable carryover, by 10 percent. He fixes the free and restricted percentage at 90 and 10 percent, respectively. Let us assume that 1,650,000 barrels of cranberries were acquired by all handlers. On that basis 165,000 barrels should be withheld from handling. Inspection of 165,000 barrels should be made. Let us now assume that a particular handler acquired 1,000 barrels of screened cranberries. The restricted percentage is 10 percent. The handler's withholding obligation is 100 barrels. This handler makes application to the committee for the release of 100 barrels, including with the application the required payment which will permit the committee to purchase an equivalent quantity of free percentage berries from other handlers to replace those released. The handler is relieved from any further withholding obligation for the released quantity. The cranberries purchased by the committee replaced those released to the handler and become withheld cranberries. They must be inspected and meet the requirements established for withheld cranberries. Such cranberries may be disposed of only in outlets prescribed for withheld cranberries. The cranberries purchased by the committee fulfill the handlers obligation and no constructive purpose would be served by inspection of the 100 barrels of cranberries that the committee released to the handler. Such cranberries upon release became free percentage cranberries which are not required to be inspected. They are eligible for disposal in any outlet available to free percentage cranberries. They should be subject only to the limitation applicable to free percentage cranberries and the order should be amended accordingly, as hereinafter set forth.

8. The amendments heretofore recommended will make necessary conforming changes in § 929.22(b). Growers are required to be present at nomination meetings and may participate only in the

nomination of members and alternate members to represent the district in which they produce cranberries. Combining Districts 3 and 4 for purposes of representation on the committee and permitting all growers from District 4 not affiliated with the major cooperative to vote for nominees and to serve on the committee to represent such growers makes necessary an exception to such requirements. Such exception has been included in the amendment as hereinafter set forth.

Ruling on proposed findings and conclusions.—March 30, 1973, was fixed as the latest date for interested parties to file proposed findings and conclusions, and written arguments or briefs with respect to the facts presented in evidence at the hearing. No brief was filed.

Further Amendment of the amended marketing agreement and order.—Annexed hereto and made a part hereof are two documents entitled, respectively, "Marketing Agreement, as Amended, Regulating the Handling of Cranberries Grown in the States of Massachusetts, Rhode Island, Connecticut, New Jersey, Wisconsin, Michigan, Minnesota, Oregon, Washington, and Long Island in the State of New York" and "Order Amending the Order, as Amended, Regulating the Handling of Cranberries Grown in the States of Massachusetts, Rhode Island, Connecticut, New Jersey, Wisconsin, Michigan, Minnesota, Oregon, Washington, and Long Island in the State of New York" which have been decided upon as the appropriate and detailed means of effecting the foregoing conclusions. These documents shall not become effective unless and until the requirements of § 900.14 of the aforesaid rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders have been met.

Referendum order.—Pursuant to the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), it is hereby directed that a referendum be conducted:

(1) Among the producers who, during the period September 1, 1972, through July 31, 1973 (which period is hereby determined to be a representative period for the purpose of such referendum), were engaged, in the States of Massachusetts, Rhode Island, Connecticut, New Jersey, Wisconsin, Michigan, Minnesota, Oregon, Washington, and Long Island in the State of New York, in the production of cranberries for market; and

(2) Among processors who, during the aforesaid representative period, canned or froze within the production area cranberries for market, to ascertain whether such producers and processors favor the issuance of said annexed order amending the order, as amended, regulating the handling of cranberries grown in the aforesaid production area.

George B. Dever, Jr. and Robert W. Forney, Fruit and Vegetable Division, Agricultural Marketing Service, United States Department of Agriculture, are hereby designated agents of the Secretary of Agriculture to conduct said referendum severally or jointly.

The procedure applicable to this referendum shall be the "Procedure for the Conduct of Referenda in Connection with Marketing Orders for Fruits, Vegetables, and Nuts Pursuant to the Agricultural Marketing Agreement Act of 1937, as Amended" (7 CFR 900.400 et seq.).

The ballots used in the referendum shall contain a summary describing the terms and conditions of the proposed amendatory order.

Copies of the aforesaid annexed order, of the aforesaid referendum procedure, and of this order may be examined in the Office of the Hearing Clerk, United States Department of Agriculture, Room 112A, Washington, D.C. 20250.

Ballots to be cast in the referendum and other necessary forms and instructions may be obtained from any referendum agent or appointee.

It is hereby ordered, That all of this decision and referendum order, except the annexed marketing agreement, be published in the FEDERAL REGISTER. The regulatory provisions of the said marketing agreement are identical with those contained in the said order, as amended, and as further amended by the annexed order which will be published with this decision.

Dated August 17, 1973.

JAMES H. LAKE,
Deputy Assistant Secretary.

ORDER[1] AMENDING THE ORDER, AS AMENDED, REGULATING THE HANDLING OF CRANBERRIES GROWN IN THE STATES OF MASSACHUSETTS, RHODE ISLAND, CONNECTICUT, NEW JERSEY, WISCONSIN, MICHIGAN, MINNESOTA, OREGON, WASHINGTON, AND LONG ISLAND IN THE STATE OF NEW YORK

§ 929.0 Fundings and determination.

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations made in connection with the issuance of the order; and all of said previous findings and determinations are hereby ratified and affirmed except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.*—Pursuant to the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and the applicable rules of practice and procedure effective thereunder (7 CFR Part 900), a public hearing was held in Wareham, Massachusetts, on February 14, in Wisconsin Rapids, Wisconsin, on February 22, and in Long Beach, Washington, on February 27, 1973, upon proposed amendment of the amended marketing agreement and Order No. 929 (7 CFR Part 929) regulating the handling of cranberries grown in the States of Massachusetts, Rhode Island, Connecticut, New Jersey, Wisconsin, Michigan, Minnesota, Oregon, Washington, and Long Island in the State of New York. Upon the basis of the evidence adduced at such hearing and the record thereof, it is found that:

(1) The said order, as amended and as hereby further amended, and all of the terms and condition thereof, will tend to effectuate the declared policy of the act;

(2) The said order, as amended and as hereby further amended, regulates the handling of cranberries grown in the production area in the same manner as, and is applicable only to persons in the respective classes of commercial or industrial activity specified in, the marketing agreement and order upon which hearings have been held;

(3) The said order, as amended and as hereby further amended, is limited in its application to the smallest regional production area that is practicable, consistent with carrying out the declared policy of the act; and the issuance of several orders applicable to subdivisions of the production areas would not effectively carry out the declared policy of the act;

(4) There are no differences in the production and marketing of cranberries grown in the production area which make necessary different terms and provisions applicable to different parts of such area; and

(5) All handling of cranberries grown in the production area, as defined in the order, as amended and as hereby further amended, is in the current of interstate or foreign commerce or directly burdens, obstructs, or affects such commerce.

It is therefore ordered, That, on and after the effective date hereof, all handling of cranberries grown in the production area shall be in conformity to, and in compliance with, the terms and conditions of the said order, as amended and as hereby further amended, as follows:

1. Section 929.21 *Term of office* is revised to read as follows:

§ 929.21 Term of office.

The term of office of each member and alternate member of the committee shall be for 2 years beginning August 1 and ending on the second succeeding July 31. Members and alternate members shall serve in such capacity for the portion of the term of office for which they are selected and have qualified and until their respective successors are selected and have qualified.

2. Section 929.22 *Nominations* is amended by revising subparagraphs (1), (2), and (3) of paragraph (b) thereof. As amended paragraph (b) reads as follows:

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure governing proceedings to formulate marketing agreement and orders have been met.

V 38-162 AUG 22 73 XUM

§ 929.22 Nominations.

. . . . . .

(b) *Successor members.*—(1) Any cooperative marketing organization that handled more than two-thirds of the total volume of cranberries produced during the fiscal period during which nominations for membership on the committee are made, or the growers affiliated therewith, shall nominate four or more qualified persons for members and four or more qualified persons for alternate members of the committee. At least one such nominee for member and one such nominee for an alternate member shall represent growers in the State of Oregon and the State of Washington. The names and addresses of such nominees shall be submitted to the Secretary not later than July 1 of each even-numbered year.

(2) The committee shall hold or cause to be held, not later than July 1, of each even-numbered year, meetings of growers in Districts 1, 2, and 3, other than those affiliated with the cooperative marketing organization designated in paragraph (b)(1) of this section, to elect nominees for member and alternate member positions on the committee.

(i) With respect to such meeting in District 3, eligible growers in District 4 shall be permitted to attend the meeting and participate in the selection of nominees. Such growers shall be eligible to be nominated for and serve as member or alternate member. Eligible growers in District 4 who do not attend the nomination meeting shall be afforded an opportunity to participate in the selection of nominees by mail. Selection of the nominee for member and the nominee for alternate member from Districts 3 and 4 shall be on the basis of the total vote of the eligible growers who attended the meeting plus any mail ballots cast by District 4 growers.

(ii) Except as hereinbefore provided, the growers in each such district who are present at the meeting, including District 4 growers who are present at the District 3 meeting, shall nominate one or more qualified persons for member and one or more qualified persons for alternate member of the committee. The names and addresses of such nominees shall be submitted to the Secretary not later than July 1 of each even-numbered year. The committee shall prescribe such procedure for the conduct of nomination meetings and for the submission of names of candidates and voting by mail by District 4 growers as shall be fair and equitable to all persons concerned.

(3) Except as set forth in subparagraph (2) of this paragraph, growers shall only participate in the nomination of members and alternate members to represent the district in which they produced cranberries.

(4) When voting for nominees, each grower shall be entitled to cast only one vote on behalf of himself, his agents, subsidiaries, affiliates, and representatives for each position to be filled.

3. Section 929.23 *Selection* is amended by revising paragraph (b) thereof to read as follows:

§ 929.23 Selection.

. . . . . .

(b) *Successor members.*—From the nominations made pursuant to § 929.22(b)(1), or from other qualified persons, the Secretary shall select four members of the committee and an alternate for each such member. From the nomination made pursuant to § 929.22(b)(2), or from other qualified persons, the Secretary shall select three members of the committee and an alternate for each such member.

4. Section 929.41 *Assessments* is amended by adding a new paragraph (c) reading as follows:

§ 929.41 Assessments.

. . . . . .

(c) If a handler does not pay his assessment within the period of time prescribed by the committee, the assessment may be increased by either or both a late payment charge and an interest charge at rates prescribed by the committee, with the approval of the Secretary.

5. Section 929.46 *Marketing policy* is amended by revising paragraph (b) thereof to read as follows:

§ 929.46 Marketing policy.

. . . . . .

(b) As soon as practicable after August 1 of each crop-year and prior to making any recommendations pursuant to paragraphs (b) (7) and (8) of this section or to § 929.51, the committee shall submit to the Secretary a report setting forth its marketing policy for the crop-year. Such marketing policy shall contain the basis therefor and information relating to:

(1) The estimated total production of cranberries;

(2) The expected general quality of such cranberry production;

(3) The estimated carryover, as of September 1, of frozen cranberries and other cranberry products;

(4) The expected demand conditions for cranberries in different market outlets;

(5) Supplies of competing commodities;

(6) Trend and level of consumer income;

(7) The recommended desirable total marketable quantity of cranberries including a recommended adequate carryover into the following crop year of frozen cranberries and other cranberry products;

(8) Regulation pursuant to § 929.52 expected to be recommended by the committee during the crop year together with its recommendation of the free and restricted percentages and beginning with 1974–75 crop year, the recommended allotment percentages, if any, for the crop year; and

(9) Other factors having a bearing on the marketing of cranberries.

6. Section 929.54 *Withholding* is amended by revising paragraph (a) thereof to read as follows:

§ 929.54 Withholding.

(a) Whenever the Secretary has fixed the free and restricted percentages for any fiscal period, as provided for in § 929.52(a), each handler shall withhold from handling a portion of the cranberries he acquires during such period: *Provided*, That such withholding requirements shall not apply to any lot of cranberries for which such withholding requirement previously has been met by another handler in accordance with § 929.55. The withheld portion shall be equal to the sum of the products obtained by multiplying each of the following quantities, as applicable, by the restricted percentage:

(1) The quantity of screened cranberries acquired:

(2) The quantity of screened cranberries obtained at the time unscreened lots of cranberries are screened: *Provided*, That, if the cranberries have not been screened by a date specified by the committee, with the approval of the Secretary, as the date by which each handler shall have met the withholding requirement, the quantity of screened cranberries shall be determined as set forth in paragraph (a)(3) of this section; and

(3) The quantity of screened cranberries contained in unscreened lots of cranberries acquired (i) which are destined for disposition without screening, or (ii) but which have not been screened prior to the date referred to in paragraph (a)(2) of this section. The committee, with the approval of the Secretary, shall prescribe uniform rules to be followed in determining the quantity of screened cranberries in each lot of unscreened cranberries.

. . . . . .

(7) Section 929.55 *Interhandler transfer* is revised to read as follows:

§ 929.55 Interhandler transfer.

(a) Transfer of cranberries from one handler to another may be made without prior notice to the committee. If such transfer is made between handlers who have packing or processing facilities located within the production area, the assessment and withholding obligations provided under this part shall be assumed by the handler who agrees to meet such obligation. If such transfer is to a handler whose packing or processing facilities are outside the production area, such assessment and withholding obligations shall be met by the handler within the production area.

(b) All handlers shall report all such transfers to the committee, on a form provided by the committee, twice a year each at a time specified by the committee.

(8) Section 929.56 *Special provisions relating to withheld (restricted) cranberries* is amended by adding new paragraphs (e) and (f) reading as follows:

§ 929.56 Special provisions relating to withheld (restricted) cranberries.

. . . . . .

(e) Cranberries purchased by the committee to replace released cranberries shall be inspected and shall meet such standards as are prescribed for withheld cranberries.

(f) Inspection of withheld cranberries released to a handler is not required.

[FR Doc.73-17825 Filed 8-21-73;8:45 am]

[7 CFR Part 1002]

[Docket No. AO–71–A65]

MILK IN THE NEW YORK-NEW JERSEY MARKETING AREA

Decision and Order To Terminate Proceeding on Proposed Amendments to Marketing Agreement and to Order

A public hearing was held upon proposed amendments to the marketing agreement and the order regulating the handling of milk in the New York-New Jersey marketing area. The hearing was held, pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice (7 CFR Part 900), at New York City and Syracuse, New York, on November 16–17 and November 20–21, 1972, respectively, pursuant to the notice thereof which was issued on October 12, 1972, and November 14, 1972 (37 FR 22000, 37 FR 24357), and was reconvened in Syracuse, New York, on December 19, 1972, pursuant to the notice thereof which was issued on December 4, 1972 (37 FR 26116).

Upon the basis of the evidence introduced at the hearing and the record thereof, the Deputy Administrator, Regulatory Programs, on July 2, 1973 (38 FR 18033), filed with the Hearing Clerk, United States Department of Agriculture, his recommended decision containing notice of the opportunity to file written exceptions thereto.

The material issues, findings and conclusions, and rulings of the recommended decision are hereby approved and adopted and are set forth in full herein.

The material issue on the record relates to:

1. Whether increased hauling costs from farm to plant of first receipt justify an increased allowance to processors of Class II milk to cover such increased costs and, if so, how such increased allowances shall be implemented under the order.

Specifically, Northeast Dairy Cooperative Federation, Inc., and Dairylea Cooperative, Inc., proposed that to offset increased transportation costs: (1) the Class II transportation credit provided in § 1002.55 of the order be increased from "10 cents" to "15 cents," (2) the provision in § 1002.80 allowing a negotiable tank truck service charge of up to 10 cents per hundredweight be deleted, and (3) provision be made whereby a farm stop-charge of not more than one dollar and fifty cents ($1.50) for each stop of a tank truck at a producer's farm could be assessed against the producer.

FINDINGS AND CONCLUSIONS

The following findings and conclusions on the material issue are based on evidence presented at the hearing and the record thereof.

No change should be made in the order on the basis of this record.

The order presently provides for a recovery of hauling costs up to 20 cents per hundredweight on Class II bulk milk and 10 cents per hundredweight on Class I bulk milk. This is accommodated through (1) a pool transportation credit to the responsible handler of 10 cents per hundredweight on bulk milk picked up at the farm and disposed of for Class II use, and (2) a permissive (when authorized) hauling deduction from producer payments not to exceed 10 cents per hundredweight.

In their hearing petition proponents alleged that farm-to-plant hauling costs had increased about 5 cents per hundredweight since the hearing of April 1970, the record of which showed such costs then to be about 20 cents per hundredweight. The proposed amendments, they indicated, are needed to "update the application of the order to the increased costs of providing bulk tank milk transportation service to producers and the impact of such costs on variable production and marketing characteristics."

A Professor of Marketing at Cornell University presented the results of a hauling cost survey he had conducted at the request of proponent cooperatives. He stated that the principal purpose of his testimony was "to provide current information on farm-to-plant hauling costs incurred by handlers for Class II milk under the New York-New Jersey milk marketing order." His survey covered hauling costs for the month of July 1972 for more than 322 million pounds of direct delivery bulk milk at 35 major manufacturing plants. This represented more than 90 percent of the total Class II direct delivery bulk milk received at such plants. In addition, hauling cost data were collected for direct delivery bulk milk for seven smaller manufacturing plants and for 18 transfer plants or fluid processing plants. In total, the data collected covered more than 397 million pounds of direct delivery bulk milk, equivalent to 78 percent of the total Class II milk volume in July and nearly 85 percent of the Class II volume receiving the transportation credit. The volumes of milk reported by handlers in the survey were verified by the market administrator.

The hauling costs for the seven smaller manufacturing plants and 18 transfer plants were not included in the summary data. However, the witness reported that the additional hauling cost data for the nearly 25 million pounds of direct delivery Class II milk to these plants would not have changed the average hauling cost figure in his survey by as much as 0.1 cent per hundredweight.

The hauling costs for direct delivered bulk milk at the 35 major plants varied from an average of 15.3 cents per hundredweight for the nine plants having the least hauling cost to an average of 27.3 cents per hundredweight for the nine plants having the highest hauling cost. The average cost for all 35 plants was 21.1 cents per hundredweight, an increase of 0.8 cents from the 20.3-cent average reported in 1970, on which data the existing 10-cent Class II transportation credit provision was adopted in conjunction with the already existing 10-cent permissive deduction from the individual producer.

Witnesses for the proponent cooperatives did not support the proposal for an allowable farm stop-charge of up to $1.50 per pickup as set forth in the hearing notice. Instead, they supported imposition of a mandatory $1.50 stop-charge for each pickup. They testified that their proposal to increase the transportation credit (applicable only on Class II milk) from 10 to 15 cents in conjunction with the application of a mandatory $1.50 farm stop-charge and deletion of the 10-cent permissive hauling deduction provisions, would provide a transportation cost recovery of 20.74 cents per hundredweight on Class II bulk milk. They held that such provisions would be effective in insuring recovery of average transportation costs on Class II milk and hence would better accommodate the market than the existing order provisions.

Competition in the market for milk supplies seemingly has limited the use of the 10-cent permissive hauling deduction provision by both cooperatives and proprietary handlers. Consequently, their cost for milk has been more than the minimum prices required by the order. However, use of the permissive hauling deduction provision has been increasing. In August 1969, only 357 producers had authorized a hauling deduction, whereas in January 1972, there were 920 active authorizations.

Since 1961, when the township pricing provisions were initially adopted, producers several times have asked reconsideration of the level of Class II milk pricing in the New York-New Jersey market. In his 1970 decision (35 FR 15927) on the matter of Class II price level in the then six northeastern markets, the Assistant Secretary reviewed and restated the Department's position with respect to the matter of hauling cost between farm and plant of first receipt, as expressed in previous decisions. His findings and conclusions in this regard as set forth in that decision are hereby reaffirmed and adopted as a part of this decision as if set forth in full herein.

The conditions of pickup of farm bulk tank milk vary greatly. Consequently, there must be means for adjusting handlers' obligations to compensate for these variations. The deduction of an authorized hauling charge, if used as now permitted, could provide the needed flexibility to this end and result in greater parity of costs for milk among New York-New Jersey order handlers. On the other hand, the modifications proposed would leave the order inflexible to accommodate the varying conditions and costs of bulk tank pickup.

While proponents' current position reflects an abandonment of their previously held "free hauling" concept in the handling of Class II milk, there has been no change in this concept with respect

V 38-162 AUG 22 73 XUM

to Class I milk. They continue to maintain that producers should not bear any of the cost of transporting Class I milk from farm to plant, pointing out that handlers generally have borne such cost since adoption of the township pricing provisions. They suggest that Class I handlers generally compete in a local market unencumbered by intermarket competition and, therefore, are not faced with the equity problem faced by Class II milk handlers who necessarily compete in a national market. For this reason, they believe that appropriately handlers can recover their hauling costs on Class I milk in the marketplace.

Proponents' proposals are directed toward amendment of the order in a manner that would assure for handlers of Class II milk a recovery of farm-to-plant hauling costs to essentially the same degree envisioned by the existing order (i.e., 20.74 vs. 20.0 cents) while, at the same time, reducing the degree of hauling cost recovery possible by handlers on Class I milk.

Notwithstanding proponents' position, there are today no clear-cut boundaries with respect to the marketing of milk. Modern transportation and processing facilities and applicable health regulations encourage milk movements whenever price differences exceed transportation costs. There is, therefore, an urgency for intermarket Class I price alignment in the interest of continuing orderly marketing. This has long been recognized in the pricing structure of the Federal orders.

The Order 2 Class I price has been established in accordance with the pricing standards of the Act and has been found by the Secretary to be appropriately aligned with prices in the adjacent New England markets with which Order 2 handlers compete in substantial measure for Class I sales. To the extent that handlers have not used the permissive hauling deduction provision, they have paid in excess of the amount required under the order minimum price provisions. It would be inappropriate to incorporate any of such amount in the Class I price, which would be the result of deletion of the permissive deduction provision and adoption of the proposed stop-charge.

The order modifications that proponents support would provide at best only "average equity" for Order 2 handlers in relation to other northeastern handlers in their costs for Class II milk, but no greater equity than that that results from the existing provisions. Such modifications would not reduce the existing differences among Order 2 handlers in their relative costs of Class II milk under the order since some would recover full transportation costs while others would receive only partial compensation.

In any event, the prices prescribed by the order are minimum prices, and we may not appropriately require handlers to make deductions from producer pay prices. There is therefore no basis for invoking a mandatory stop-charge. As to the proposed increased pool credit, the record fails to demonstrate any significant increase in hauling cost since the 1970 hearing on the record of which the present 10-cent per hundredweight pool credit on Class II milk was adopted. Since proponents failed to substantiate the increase in hauling cost which was the basis for the hearing call, there is no justification for increasing the pool credit for Class II milk from 10 to 15 cents, and the proposal to do so also is denied.

RULINGS ON PROPOSED FINDINGS AND CONCLUSIONS

Briefs and proposed findings and conclusions were filed on behalf of certain interested parties. These briefs, proposed findings and conclusions and the evidence in the record were considered in making the findings and conclusions set forth above. To the extent that the suggested findings and conclusions filed by interested parties are inconsistent with the findings and conclusions set forth herein, the requests to make such findings or reach such conclusions are denied for the reasons previously stated in this decision.

On the record of the hearing, an offer of proof was made with respect to a ruling of the presiding officer that the statements of individual producers had become unduly repetitious and he would receive no further statements therefrom except that, if those producers present who were unrepresented desired to select one spokesman, he would hear that spokesman.

Counsel for one proponent, as an offer of proof, read into the record the names of three dairy farmers supporting the proposal, which offer of proof the Administrative Law Judge ruled was redundant. The transcript of the hearing discloses that the offer of proof was included in the record notwithstanding.

We hold that the Administrative Law Judge's decision was correct. Section 900.8(d)(1) allows the presiding officer at a promulgation hearing to "exclude evidence which is * * * unduly repetitious * * *." The testimony which counsel presented as an offer of proof was simply a further listing of producers supporting proponents' position. As the Administrative Law Judge pointed out, the hearing was being conducted to receive evidence relevant to the economic and marketing conditions affecting the proposal and was not a forum for conducting a referendum. The notice of reconvened hearing stated that evidence already received in previous sessions of the hearing would not be repeated or duplicated.

RULINGS ON EXCEPTIONS

In arriving at the findings and conclusion and the regulatory provisions of this decision, each of the exceptions received was carefully and fully considered in conjunction with the record evidence. To the extent that the findings and conclusions, and the regulatory provisions of his decision are at variance with any of the exceptions, such exceptions are hereby overruled for the reasons previously stated in this decision.

TERMINATION ORDER

In view of the foregoing, it is hereby determined that the proceeding with respect to proposed amendments to the tentative marketing agreement and to the order should be and is hereby terminated.

Signed at Washington, D.C., on August 17, 1973.

JAMES H. LAKE,
Deputy Assistant Secretary.

UPLAND COTTON

Proposed Determinations Regarding 1974 Crop

The Secretary of Agriculture is preparing to make the following determinations with respect to the 1974 crop of upland cotton (referred to as "cotton"):

a. Amount of the national production goal.

b. Amount of the national base acreage allotment.

c. Apportionment of the national base acreage allotment to States and counties.

d. Unrestricted use sales policy.

The first three determinations listed above are to be made pursuant to the Agricultural Adjustment Act of 1938, as amended (52 Stat. 31, as amended; 7 U.S.C. 1281 et seq.):

(a) *National production goal.*—Section 342a of the act requires the Secretary to proclaim a national production goal for the 1974 crop by November 15, 1973. Such production goal (in terms of standard bales of 480 pounds net weight) shall be the number of bales of cotton equal to the estimated domestic consumption and estimated exports for the 1974–75 marketing year, which begins August 1, 1974, plus an allowance of not less than five percent of such estimated consumption and estimated exports for market expansion. Section 342a further provides that the Secretary shall make such adjustments in the amount of the production goal as he determines necessary after taking into consideration the estimated stocks of cotton in the United States (including the qualities of such stocks) and stocks in foreign countries, which would be available for the 1974–75 marketing year, to assure the maintenance of adequate but not excessive carryover stocks in the United States (not less than 50 percent of the average offtake for the three preceding marketing years) to provide a continuous and stable supply of the different qualities of cotton needed in the United States and in foreign cotton-consuming countries and, in addition, to provide an adequate reserve for purposes of national security.

(b) *National base acreage allotment.*—Section 350(a) requires the Secretary to establish and announce a national base acreage allotment for the 1974 crop of cotton by November 15, 1973. Section 350(a) provides that the national base acreage allotment for any crop of cotton shall be the number of acres which the Secretary determines on the basis of the expected national yield will produce an amount of cotton equal to the estimated domestic consumption of cotton (standard bales of four hundred and eighty pounds net weight) for the marketing year beginning in the year in which the crop is to be produced, plus not to exceed 25 per centum thereof if the Secretary, taking into consideration other actions he may take under the Agricultural Act of 1970, as amended, determines that such additional amount is necessary to provide for a production which will equal the national cotton production goal except that the national base acreage allotment for the 1974 through 1977 crops shall be in such amount as the Secretary determines necessary to maintain adequate supplies. The national base acreage allotment for the 1974 through 1977 crops shall not be less than eleven million acres.

(c) *Apportionment of the national base acreage allotment to States and counties.*—Sections 350 (b) and (c) provide that the national base acreage allotment for 1974 shall be apportioned to States and counties on the basis of the acreage planted (including acreage regarded as having been planted) to cotton within the farm acreage allotment during 1968, 1969, and 1970, and the farm base acreage allotment during 1971 and 1972, adjusted for abnormal weather conditions or other natural disasters during such period. Section 350(c) further provides that the State committee may reserve not to exceed two percent of its State allotment to adjust county allotments for trends in acreage, for counties adversely affected by abnormal conditions affecting plantings or for small or new farms, or to correct inequities in farm allotments and to prevent hardships.

The following determination will be made pursuant to the Agricultural Act of 1949, as amended (63 Stat. 1051, as amended; 7 U.S.C. 1421 *et seq.*):

(d) *Unrestricted use sales policy.*—Section 407 provides that the sales price cannot be less than 110 percent of the loan rate for Middling 1-inch cotton (micronaire 3.5 through 4.9), adjusted for such current market differentials reflecting grade, quality, location, and other value factors determined appropriate, plus reasonable carrying charges, except that a quantity of cotton equal to any "shortfall" (amount by which 1974 production is less than estimated requirements for domestic use and for export for the 1974–75 marketing year) must be made available at current market prices.

Prior to making any of the foregoing determinations, consideration will be given to any data, views, and recommendations which are submitted in writing to the Director, Cotton, Rice, and Oilseeds Division, Agricultural Stabilization and Conservation Service, United States Department of Agriculture, Washington, D.C. 20250. In order to be sure of consideration, all submissions must be received not later than August 28, 1973. All written submissions made pursuant to this notice will be made available for public inspection from 8:15 a.m. to 4:45 p.m., Monday through Friday in Room 4091, South Building, 14th and Independence Avenue SW., Washington, D.C.

Signed at Washington, D.C., on August 17, 1973.

GLENN A. WEIR,
Acting Administrator, Agricultural Stabilization and Conservation Service.

NATIONAL TRANSPORTATION SAFETY BOARD

[14 CFR Part 421]

AIR SAFETY ENFORCEMENT PROCEEDINGS

Extension of Comment Period

This notice extends the period for comments to the notice published on July 18, 1973 (38 FR 19133), proposing a revision to the Board's rules of practice in Air Safety Enforcement Proceedings. The proposal provided for consideration of comments received within 30 days from the day of publication of the proposal in the FEDERAL REGISTER. Requests for an extension of time have been submitted and considered. Accordingly, it has been decided that as a result of the comprehensive nature of the revision affecting Board practice, an additional 30 days' time within which to receive comments, or until September 18, 1973, has been granted.

Adopted by the National Transportation Safety Board on August 15, 1973.

Dated August 16, 1973.

[SEAL] JOHN H. REID,
Chairman.

SMALL BUSINESS ADMINISTRATION

[13 CFR Part 121]

SMALL BUSINESS SIZE STANDARDS

Proposed Definition of Small Business Special Trade Contractor (Construction); Extension of Comment Period

On July 5, 1973, the Small Business Administration published in the FEDERAL REGISTER (38 FR 17850) a notice that it proposed to establish separate definitions of small business for special trade contractors for the purpose of bidding on Government procurement. In effect, the proposal would lower the size standards for these industries from average annual receipts not exceeding $7½ million to average annual receipts not exceeding $1 million or $2 million, depending on the special trade industry involved.

Interested parties were given until August 6, 1973, to submit written comments.

An association representing a large number of special trade contractors has indicated that in order to provide meaningful data, it will need more time to prepare comments.

We believe it is in the public interest to base our decision on the best available information. Accordingly, we are extending the deadline for submitting comments until September 4, 1973.

(Catalogue of Federal Domestic Assistance Program No. 59.009, Procurement Assistance to Small Business)

Dated: August 13, 1973.

THOMAS S. KLEPPE,
Administrator.

VETERANS ADMINISTRATION

[38 CFR Part 3]

SERVICE-CONNECTED BURIAL BENEFIT

Plot or Interment Allowance

Public Law 93–43, enacted June 18, 1973, established a National Cemetery System within the Veterans Administration. This system will have jurisdiction over cemeteries under jurisdiction of the Veterans Administration on date of enactment, certain cemeteries to be transferred from the Department of the Army, and such additional cemeteries as the Administrator determines are required to be established to provide interment space for eligible veterans.

Section 5 of Public Law 93–43 amended section 903 of title 38, United States Code, to provide for payment of an amount not exceeding $150 as a plot or interment allowance when a veteran eligible for the statutory burial allowance provided by sections 902 and 903 of title 38, United States Code, is not buried in a national cemetery or other cemetery under the jurisdiction of the United States. This allowance is payable as reimbursement for the costs of a burial plot or other costs of interment and is in addition to the $250 statutory allowance for funeral and burial expenses. The $250 statutory burial allowance is payable regardless of whether an eligible veteran is buried in a national cemetery. Section 5 also added section 907 to title 38, United States Code, which provides a larger burial allowance when the veteran's death is service-connected. Under this section, burial and funeral expenses may be paid in an amount not exceeding that provided in 5 U.S.C. 8134(a) where the death of a Federal employee is the result of injury incurred in the course of his employment. The current limitation is $800.

Section 8 of Public Law 93–43 amended section 3505 of title 38, United States Code, to specify the right to burial in a national cemetery as a benefit which will be forfeited upon conviction of subversive activities enumerated in that section.

To implement the provisions of the act relating to the plot or interment allowance, the service-connected death burial benefit and forfeiture of rights, it is proposed to amend Part 3, Title 38, Code of Federal Regulations, as set forth below.

FEDERAL REGISTER, VOL. 38, NO. 162—WEDNESDAY, AUGUST 22, 1973

V 38-162 AUG 22 73 XUM

Interested persons are invited to submit written comments, suggestions, or objections regarding the proposal to the Administrator of Veterans Affairs (232H), Veterans Administration, Central Office, 810 Vermont Avenue NW., Washington, D.C. 20420. All relevant material received before Sept. 21, 1973, will be considered. All written comments received will be available for public inspection at the above address only between the hours of 8 a.m. and 4:30 p.m., Monday through Friday (except holidays), during the mentioned 30-day period and for 10 days thereafter. Any person visiting Central Office for the purpose of inspecting any such comments will be received by the Central Office Veterans Assistance Unit in room 132. Such visitors to any VA field station will be informed that the records are available for inspection only in Central Office and will be furnished the address and the above room number.

The changes pertaining to plot or interment allowance will be effective August 1, 1973, those pertaining to the service-connected burial benefit will be effective September 1, 1973, and the change pertaining to forfeiture will be effective June 18, 1973, to conform with the effective dates of the related provisions of Public Law 93–43.

1. In § 3.903, paragraph (b)(1) would be amended to read as follows:

§ 3.903 Subversive activities.

* * * * *

(b) *Effect on claim.*—(1) Any person who is convicted after September 1, 1959, of subversive activities shall from and after the date of commission of such offense have no right to gratuitous benefits (including the right to burial in a national cemetery) under laws administered by the Veterans Administration based on periods of military, naval, or air service commencing before the date of the commission of such offense and no other person shall be entitled to such benefits on account of such person.

* * * * *

2. In § 3.904, paragraph (b) and (c) would be amended to read as follows:

§ 3.904 Effect of forfeiture after veteran's death.

* * * * *

(b) *Treasonable acts.*—Death benefits may be authorized as provided in paragraph (a) of this section where forfeiture by reason of a treasonable act was declared before September 2, 1959. Otherwise, no award of gratuitous benefits (including the right to burial in a national cemetery) may be made to any person based on any period of service commencing before the date of commission of the offense which resulted in the forfeiture unless the veteran had been granted a pardon of the offense by the President of the United States. If pardoned, his surviving dependents upon proper application may be paid pension, compensation or dependency and indemnity compensation, if otherwise eligible, and be restored to a right to burial in a national cemetery (38 U.S.C. 3505(a)).

3. In § 3.1600, paragraphs (a) and (b)(4) would be amended and paragraph (f) would be added to read as follows:

§ 3.1600 Payment of burial expenses of deceased veterans.

* * * * *

(a) *Wartime veterans.*—When a veteran of any war dies, an amount not to exceed $250 ($800 if he dies of a service-connected disability) (where entitlement is based on § 3.8 (c) or (d), at a rate in Philippine pesos equivalent to $125 or $400 if death is service-connected) is payable on the burial and funeral expenses and transportation of the body to the place of burial, if otherwise entitled within the further provisions of §§ 3.1600 through 3.1611. For this purpose the period of any war is as defined in § 3.2, except that World War I extends only from April 6, 1917, through November 11, 1918, or if the veteran served with the United States military forces in Russia, through April 1, 1920 (38 U.S.C. 902; 907; 107(a); Public Law 93–43, 87 Stat. 75).

(b) *Peacetime veterans.*—The statutory burial allowance authorized by paragraph (a) of this section is payable based on service of a veteran rendered during other than a war period:

* * * * *

(4) If he dies of a service-connected disability (38 U.S.C. 902).

* * * * *

(f) *Plot or interment allowance.*—Where a veteran dies for whom eligibility for the burial allowance under this section is warranted and is not buried in a national cemetery or other cemetery under the jurisdiction of the United States (except where the higher rate of burial allowance is payable because of service-connected death), there may be paid an additional amount not to exceed $150 (where entitlement is based on § 3.8 (c) or (d), at a rate in Philippine pesos equivalent to $75), as a plot or interment allowance for expenses actually incurred. The allowance will be payable to the person or entity who incurred the expenses (38 U.S.C. 903(b); Public Law 93–43, 87 Stat. 75).

4. Section 3.1601 would be revised to read as follows:

§ 3.1601 Claims and evidence.

(a) *Claims.*—Claims for reimbursement or direct payment of burial and funeral expense, transportation of the body, and plot or interment allowance, must be received by the Veterans Administration within 2 years after the permanent burial or cremation of the body. Where the burial allowance was not payable at the death of the veteran because of the nature of his discharge from service, but after his death his discharge has been corrected by competent authority so as to reflect a discharge under conditions other than dishonorable, claim may be filed within 2 years from date of correction of the discharge. (38 U.S.C. 904; Public Law 93–43, 87 Stat. 75).

(1) Claims for burial allowance may be executed by:

(i) The funeral director, if entire bill or any balance is unpaid (if unpaid bill is under $250 only amount of unpaid balance will be payable to the funeral director); or

(ii) The individual whose personal funds were used to pay burial, funeral, and transportation expenses; or

(iii) The executor or administrator of the estate of the veteran or the estate of the person who paid the expenses of the veteran's burial or provided such services. If no executor or administrator has been appointed then by some person acting for such estate who will make distribution of the burial allowance to the person or persons entitled under the laws governing the distribution of intestate estates in the State of the decedent's personal domicile.

(2) Claims for the plot or interment allowance may be executed by:

(i) The funeral director, if he provided the plot or interment services, or advanced funds to pay for them, and if the entire bill for such or any balance thereof is unpaid (If unpaid balance is less than $150 only the amount of the unpaid balance thereof will be payable to the funeral director); or

(ii) The person(s) whose personal funds were used to defray the cost of the plot or interment expenses; or

(iii) The person or entity from whom the plot was purchased or who provided interment services if the bill for such is unpaid in whole or in part. An unpaid bill for a plot will take precedence in payment of the plot or interment allowance over an unpaid bill for other interment expenses or a claim for reimbursement for such expenses. Any remaining balance of the $150 allowance may then be applied to interment expenses; or

(iv) The executor or administrator of the estate of the veteran or the estate of the person who bore the expense of the plot or interment expenses. If no executor or administrator has been appointed, claim for the plot or interment allowance may be filed as provided in paragraph (a)(1)(iii) of this section for the burial allowance.

(3) For the purposes of the plot and interment allowance "plot" or "burial plot" means the final disposal site of the remains, whether it is a grave, mausoleum vault, columbarium niche, or other similar place. Interment expenses are those costs associated with the final disposition of the remains and are not confined to the acts done within the burial grounds but may include the removal of bodies for burial or interment.

(b) *Supporting evidence.*—Evidence required to complete a claim for the burial allowance and the plot or interment allowance, when payable (including a reopened claim filed within the 2-year period), must be submitted within 1 year from date of the Veterans Administration's request for such evidence. In addition to the proper claim form, the claimant is required to submit:

(1) *Statement of account.*—Preferably on funeral director's or cemetery owner's billhead showing name of the deceased veteran, the plot or interment costs, and the nature and cost of services rendered, and unpaid balance.

(2) *Receipted bills.*—Must show by whom payment was made and show receipt by a person acting for the funeral director or cemetery owner.

(3) *Proof of death.*—In accordance with § 3.211.

(4) *Waivers from all other distributees.*—Where expenses of a veteran's burial, funeral, plot, interment and transportation were paid from funds of the veteran's estate or some other deceased person's estate and the identity and right of all persons to share in that estate have been established, payment may be made to one heir upon unconditional written consent of all other heirs.

5. In § 3.1602, paragraphs (a), (b), and (d) would be amended to read as follows:

§ 3.1602 Special conditions governing payments.

(a) *Two or more persons expended funds.*—If two or more persons have paid from their personal funds toward the burial, funeral, plot, interment and transportation expenses, the burial and plot or interment allowance will be divided among such persons in accordance with the proportionate share paid by each, unless waiver is executed in favor of one of such persons by the other person or persons involved. The person in whose favor payment is waived will not be allowed a sum greater than that which was paid by him. (See § 3.1601(a)(3).)

(b) *Person who performed services.*—A person who performed burial, funeral, and transportation services or furnished the burial plot will have priority over claims of persons whose personal funds were expended.

* * * * *

(d) *Escheat.*—No payment of burial allowance or plot or interment allowance will be made where it would escheat.

6. Section 3.1603 would be revised to read as follows:

§ 3.1603 Unclaimed bodies.

If the body of a deceased veteran is unclaimed, there being no relatives or friends to claim the body, the amount provided for burial and plot or interment allowance will be available for the burial upon receipt of a claim accompanied by a statement showing what efforts were made to locate relatives or friends. The question of escheat of any part of such deceased veteran's estate is not a factor in such a claim. Burial allowance may be authorized for cost of disinterment and reburial of unclaimed remains originally accorded pauper burial but not for initial expenses of a burial in a potter's field. Burial in a prison cemetery is not considered a pauper burial.

7. In § 3.1604, paragraph (c) would be added to read as follows:

§ 3.1604 Payments from non-Veterans Administration sources.

* * * * *

(c) *Payment of plot or interment allowance by public or private organization.*—Where any part of the plot or interment expenses have been paid or assumed by a State, any agency or political subdivision of a State, or the employer of the deceased veteran, only the difference between the total amount of such expenses and the amount paid or assumed by any of these agencies or organizations, not to exceed $150, will be authorized.

8. In § 3.1605, the introductory portion preceding paragraph (a), paragraph (a), and the introductory portion of paragraph (b) would be amended to read as follows:

§ 3.1605 Death while traveling under prior authorization or while hospitalized by the Veterans Administration.

An amount may be paid not to exceed the amount payable under § 3.1600 for the funeral, burial, plot, or interment expenses of a person who dies while in a hospital, domiciliary, or nursing home to which he was properly admitted under authority of the Veterans Administration. In addition, the cost of transporting the body to the place of burial may be authorized. The amount payable under this section is subject to the limitations set forth in paragraph (b) of this section, and §§ 3.1604 and 3.1606.

(a) *Death enroute.*—When a veteran while traveling under proper prior authorization and at Veterans Administration expense to or from a specified place for the purpose of:

(1) Examination; or

(2) Treatment; or

(3) Care

dies enroute, burial, funeral, plot, interment, and transportation expenses will be allowed as though death occurred while properly hospitalized by the Veterans Administration. Hospitalization in the Philippines under 38 U.S.C. 631, 632, and 633 does not meet the requirements of this section.

(b) *Transportation.*—Except for retired persons hospitalized under section 5 of Executive Order 10122 (15 FR 2173; 3 CFR 1950 Supp.) issued pursuant to Public Law 351, 81st Congress, and not as Veterans Administration beneficiaries, the cost of transportation of the body to the place of burial in addition to the burial and plot or interment allowance will be provided by the Veterans Administration where death occurs:

* * * * *

9. Section 3.1609 would be revised to read as follows:

§ 3.1609 Forfeiture.

(a) Forfeiture of benefits for fraud by a veteran during his lifetime will not preclude payment of burial and plot or interment allowance if otherwise in order. No benefits will be paid to a claimant who participated in the fraud which caused the forfeiture by the veteran (38 U.S.C. 3503(c)).

(b) Burial and plot or interment allowance is not payable based on a period of service commencing prior to the date of commission of the offense where either the veteran or claimant has forfeited the right to gratuitous benefits under § 3.902 or § 3.903 by reason of a treasonable act or subversive activities, unless the offense was pardoned by the President of the United States prior to the date of the veteran's death (38 U.S.C. 3504(c)(2), 3505(a)).

By direction of the Administrator.

Approved August 10, 1973.

[SEAL] FRED B. RHODES,
Deputy Administrator.

Notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF STATE

Agency for International Development

[Contracting Function 99.1.4]

JOHN F. KEYES

Redelegation of Authority

Pursuant to the authority delegated to me by Redelegation of Authority No. 99.1 (38 FR 12836), dated May 1, 1973 from the Assistant Administrator for Program and Management Services, I hereby redelegate:

A. To John F. Keyes, Overhead and Special Cost Branch, Support Division, Office of Contract Management, authority to sign or approve:

(1) U.S. Government contracts financed in whole or in part by A.I.D.

(2) Grants (other than grants to foreign governments or agencies of foreign governments) for Technical Assistance Activities.

B. Nothing herein shall be construed to derogate from the authority of the Chief, Overhead and Special Cost Branch, or Support Division or the Director, Office of Contract Management, in their discretion, at any time to exercise any of the functions herein delegated.

The authority herein redelegated may not be further redelegated.

The authority redelegated herein is to be exercised in accordance with regulations, procedures and policies now or hereafter established or modified and promulgated with the Agency for International Development.

This redelegation of authority shall be effective immediately, and shall remain in effect as long as John F. Keyes is assigned to the Overhead and Special Costs Branch, unless earlier revoked.

Dated: July 19, 1973.

JOHN F. OWENS,
Director,
Office of Contract Management.

DEPARTMENT OF THE INTERIOR

Bureau of Reclamation

[INT-DES 73-51]

TRANSMISSION DIVISION, COLORADO RIVER STORAGE PROJECT; PROPOSED CURECANTI-SHIPROCK TRANSMISSION LINE

Availability of Draft Environmental Statement

Pursuant to section 102(2)(c) of the National Environmental Policy Act of 1969, the Department of the Interior has prepared a draft environmental statement on the proposed Curecanti-Shiprock No. 2, 230-kv transmission line. This line would essentially parallel an existing 230-kv line between the Curecanti Unit powerplants in west-central Colorado and the Shiprock Substation in northwestern New Mexico. It would provide for delivery of an additional 200 mw of power to expanding markets in southwestern Colorado and Arizona.

Written comments may be submitted to the Regional Director (address below) on or before Oct. 9, 1973. Copies are available for inspection at the following locations:

Office of Communications, Room 7220, Department of the Interior, Washington, D.C. 20240, Telephone 202-343-9247.
Office of Assistant to the Commissioner—Ecology, Room 7620, Bureau of Reclamation, Department of the Interior, Washington, D.C. 20240, Telephone 202-343-4991.
Division of Engineering Support, Technical Services Branch, E. & R. Center, Denver Federal Center, Denver, Colorado 80225, Telephone 303-234-3007.
Office of the Regional Director, Bureau of Reclamation, Room 7203, Federal Bldg., 125 South State Street (Mailing address: P.O. Box 11568, Salt Lake City, Utah 84111, Telephone 801-524-5409.
CRSP Power Operations Office, Bureau of Reclamation, 1200 South Rio Grande (Mailing address: P.O. Box 1069), Montrose, Colorado 81401, Telephone 303-249-4551.

Single copies of the draft statement may be obtained by request to the Commissioner of Reclamation or the Regional Director. In addition, copies may be purchased from the National Technical Information Service, Department of Commerce, Springfield, Virginia 22151. Please refer to the statement number above.

Dated August 15, 1973.

JOHN M. SEIDL,
Deputy Assistant Secretary of the Interior.

PROPOSED CHASSAHOWITZKA WILDERNESS AREA, FLA.

Availability of Final Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, Public Law 91-190, the Department of the Interior has prepared a final environmental statement recommending that 16,900 acres of the Chassahowitzka National Wildlife Refuge, located in Citrus and Hernando Counties, Florida, be designated as wilderness within the National Wilderness Preservation System. The proposed wilderness area is located entirely within Citrus County.

Copies of the final statement are available for inspection at the following locations:

Bureau of Sport Fisheries and Wildlife, 17 Executive Park Drive NE., Room 411, Atlanta, Georgia 30329.
Headquarters, Chassahowitzka National Wildlife Refuge, Route 1, Box 153, Homosassa, Florida 32646.
Bureau of Sport Fisheries and Wildlife, Office of Environmental Quality, Department of the Interior, 18th and C Streets NW., Room 2246, Washington, D.C. 20240.

Single copies may be obtained by writing the Chief, Office of Environmental Quality, Bureau of Sport Fisheries and Wildlife, Department of the Interior, Washington, D.C. 20240. Please refer to the statement number.

Dated August 15, 1973.

JOHN M. SEIDL,
Deputy Assistant Secretary,
Program Development and Budget.

[INT FES 73-48]

PROPOSED OREGON ISLANDS WILDERNESS AREA, OREG.

Availability of Final Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, Public Law 91-190, the Department of the Interior has prepared a final environmental statement recommending that 28 undisturbed Oregon coastal islands and island groups, located in Clatsop, Tillamook, Lincoln, Lane, Coose, and Curry Counties, Oregon, be designated wilderness within the National Wilderness Preservation System. The statement further recommends that 27 additional islands, 25 in the public domain and two withdrawn as sea lion refuges, be made wilderness when withdrawal as part of the Oregon Islands National Wildlife Refuge is completed. The additional islands are located in the above listed counties, Oregon, and contain approximately 108 acres.

Copies of the final statement are available for inspection at the following locations:

Bureau of Sport Fisheries and Wildlife, 1500 Plaza Building, Room 288, 1500 N.E. Irving Street, P.O. Box 3737, Portland, Oregon 97208.
Lane Council of Governments, 135 6th Avenue East, Eugene, Oregon 97401.
Headquarters, Oregon Islands National Wildlife Refuge, Box 208, Route 2, Corvallis, Oregon 97330.
Bureau of Sport Fisheries and Wildlife, Office of Environmental Quality, Department of the Interior, 18th and C Streets NW., Room 2246, Washington, D.C. 20240.

Single copies may be obtained by writing the Chief, Office of Environmental Quality, Bureau of Sport Fisheries and Wildlife, Department of the Interior, Washington, D.C. 20240. Please refer to the statement number.

Dated August 15, 1973.

JOHN M. SEIDL,
Deputy Assistant Secretary,
Program Development and Budget.

DEPARTMENT OF AGRICULTURE

Forest Service

BOUNDARY WATERS CANOE AREA PLAN SUPERIOR NATIONAL FOREST

Availability of Draft Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 and Title 8400 of the Forest Service Manual, the Forest Service, Department of Agriculture, has prepared a draft environmental statement for the Boundary Waters Canoe Area Plan USDA-FS-DES (Adm) 73-97.

The environmental statement concerns a proposed Land Use Management Plan containing management objectives, direction, and policies for the administration of the 1,030,000 acre Boundary Waters Canoe Area within the Superior National Forest in Northern Minnesota.

This draft environmental statement was filed with CEQ on August 15, 1973.

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service, South Agriculture Bldg., Room 3230, 12th St. & Independence Ave. SW., Washington, D.C. 20250.
USDA, Forest Service, Eastern Region, 633 West Wisconsin Avenue, Milwaukee, Wisconsin 53203.
USDA, Forest Service, Superior National Forest, Federal Building, Duluth, Minnesota 55801.
USDA, Forest Service, North Central Forest Experiment Station, Folwell Avenue, St. Paul, Minnesota 55101.
USDA, Forest Service, Northeastern Area State and Private Forestry, Federal Building, 316 Roberts Street, St. Paul, Minnesota 55101.
USDA, Forest Service, Aurora Ranger District, Aurora, Minnesota 55705.
USDA, Forest Service, Gunflint Ranger District, Grand Marais, Minnesota, 55604.
USDA, Forest Service, Halfway and Kawishiwi Ranger Districts, Ely, Minnesota 55731.
USDA, Forest Service, Isabella Ranger District, Isabella, Minnesota 55607.
USDA, Forest Service, Tofte Ranger District, Tofte, Minnesota 55615.
USDA, Forest Service, Two Harbors Ranger District, Two Harbors, Minnesota 55616.
USDA, Forest Service, LaCroix Ranger District, Cook, Minnesota 55723.
USDA, Forest Service, Virginia Ranger District, Virginia, Minnesota 55792.

A limited number of single copies are available upon request to the Forest Supervisor, Superior National Forest, P.O. Box 338, Duluth, Minnesota 55801.

Copies are also available from the National Technical Information Service, U.S. Department of Commerce, Springfield, Virginia 22151. Please refer to the name and number of the environmental statement above when ordering.

Copies of the environmental statement have been sent to various Federal, State, and local agencies as outlined in the CEQ guidelines.

Written comments are invited from the public, and from State and local agencies which are authorized to develop and enforce environmental standards, and from Federal agencies having jurisdiction by law or special expertise with respect to any environmental impact involved for which comments have not been requested specifically.

Written comments concerning the proposed action and requests for additional information should be addressed to the Forest Supervisor, Superior National Forest, P.O. Box 338, Duluth, Minnesota 55801. Written comments must be received on or before October 15, 1973, in order to be considered in the preparation of the final environmental statement.

PHILIP L. THORNTON,
Deputy Chief, Forest Service.

FREEZEOUT ROAD N-38, OREGON

Availability of Final Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a final environmental statement for the Freezeout Road, N-38, Oregon USDA-FS-FES-(Adm) 73-16.

The environmental statement concerns the proposed construction of a modern standard road from the Imnaha River Road to the Hat Point area in Wallowa County, Oregon.

This final environmental statement was filed with CEQ on August 15, 1973.

Copies are available for inspection during regular working hours at the following locations:

USDA Forest Service, So. Agriculture Bldg., Room 3230, 12th St. & Independence Ave. SW., Washington, DC 20250.
Wallowa-Whitman National Forest, Federal Building, Baker, Oregon 97814.
USDA, Forest Service, Pacific Northwest Region, 319 SW Pine Street, Portland, Oregon 97204.

A limited number of single copies are available upon request to Regional Forester T. A. Schlapfer, Pacific Northwest Region, P.O. Box 3623, Portland, Oregon 97208.

Copies are also available from the National Technical Information Service, U.S. Department of Commerce, Springfield, VA. 22151. Please refer to the name and number of the environmental statement above when ordering.

Copies of the environmental statement have been sent to various Federal, State, and local agencies as outlined in the CEQ guidelines.

PHILIP L. THORNTON,
Deputy Chief, Forest Service.

Notice of Applications for Duty-Free Entry of Scientific Articles

The following are notices of receipt of applications for duty-free entry of scientific articles pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89-651; 80 Stat. 897). Interested persons may present their views with respect to the question of whether an instrument or apparatus of equivalent scientific value for the purposes for which the article is intended to be used is being manufactured in the United States. Such comments must be filed in triplicate with the Director, Special Import Programs Division, Office of Import Programs, Washington, D.C. 20230, on or before Sept. 11, 1973.

Amended regulations issued under cited Act, as published in the February 24, 1972, issue of the FEDERAL REGISTER, prescribe the requirements applicable to comments.

A copy of each application is on file, and may be examined during ordinary

V 38-162 AUG 22 73 XUM

Commerce Department business hours at the Special Import Programs Division, Department of Commerce, Washington, D.C. 20230.

Docket number: 74–00028–98–77065. Applicant: Fordham University, Physics Department, Bronx, New York 10458. Article: Mossbauer Spectrometer, Model AME–30. Manufacturer: Elscint, Ltd., Israel. Intended use of article: The article will be used to study the magnetic fields, electric field gradients, isomer shifts, curie temperatures, and phase transitions of materials containing iron, tin, and other Mossbauer isotopes by means of high resolution Mossbauer transmission and scattering experiments. Application received by Commissioner of Customs July 9, 1973.

Docket number: 74–00044–33–46040. Applicant: The Ohio State University, College of Medicine, Columbus, Ohio 43210. Article: Electron Microscope, Model EM 301. Manufacturer: Philips Electronic Instruments NVD, The Netherlands. Intended use of article: The article will be used as part of an interdisciplinary program concerned with the study of the effect of traumatic and metabolic injuries on the ultrastructure of the spinal cord. Such factors as changes which occur that determine whether or not function of the cord can recover, nature and explanation of cellular ultrastructural changes in the cord following injury, and the role of impairment of the endothelial junctions in increased permeability and edema of the cord will be investigated. Following study of the many factors in spinal cord injury, the effect of various therapeutic procedures will be investigated. The ultimate goal will be to determine which ultrastructure alterations are preventable or at least reversible in order to restore function to the spinal cord and forestall severe and permanent paralysis. Application received by Commissioner of Customs July 26, 1973.

Docket number: 74–00045–00–46040. Applicant: Northwestern University, Purchasing Department, B605 Morton Bldg., 303 East Chicago Avenue, Chicago, Illinois 60611. Article: Universal Camera for Elmiskop I Electron Microscope. Manufacturer: Siemens AG, West Germany. Intended use of article: The article is an accessory to an existing electron microscope to be used primarily to make permanent photographic records of research findings resulting from such studies as the etiology of cataract, development of various parts of the nervous system, protein synthesis in developing systems, etc. Application received by Commissioner of Customs July 24, 1973.

Docket number: 74–00046–33–54500. Applicant: Yale University, Purchasing Department, 260 Whitney Avenue, New Haven, Connecticut 06520. Article: Goldman Perimeter, Model 950. Manufacturer: Haag-Streit AG, Switzerland. Intended use of article: The article will be used to observe visual fields in patients with suspected glaucoma in a study aimed at the earliest possible detection of the disease. Application received by Commissioner of Customs July 24, 1973.

Docket number: 74–00047–33–46040. Applicant: William Paterson College of New Jersey, 300 Pompton Road, Wayne, New Jersey 07470. Article: Electron Microscope, Model EM 9S–2. Manufacturer: Carl Zeiss, West Germany. Intended use of article: The article is to be used primarily for teaching undergraduate students in a course entitled Cell Ultrastructure to familiarize the uninitiated with the practical application of electron microscope in the routine of a research biologist. Application received by Commissioner of Customs July 24, 1973.

A. H. STUART,
Director,
Special Import Programs Division.

National Oceanic and Atmospheric Administration

IMPORTERS OF HALIBUT FROM JAPAN

Undersized Fillets

Notice is hereby given to importers of halibut from Japan that inspections of several samples of recent imports contained fillets which were determined to be from undersized halibut. The National Marine Fisheries Service has reason to believe that the halibut, from which some fillets were obtained, were caught in contravention of Japanese domestic law including regulations. United States law prohibits the importation of such fillets from undersized halibut which were taken in violation of the laws or regulations of Japan.

The Japanese Government has a (66 cm) 26-inch minimum size limit on halibut caught in the North Pacific Ocean, Bering Sea, and Okhotsk Sea, inclusive, throughout the year. This minimum size limit is identical with size limits established in the eastern Bering Sea pursuant to the International Convention for the High Seas Fisheries of the North Pacific Ocean.

The results of random samples taken of recent imports from Japan have shown that some fillets have come from halibut smaller than the minimum length.

Under the provisions of 16 U.S.C. 851–856, inter alia, it is unlawful for any person to deliver or receive for transportation, or to transport, by any means whatsoever, in interstate or foreign commerce, any fish, if such person knows or in the exercise of due care should know that (1) such delivery or transportation is contrary to the law of any foreign country from which such fish is found or transported, or (2) such fish has been either caught, killed, taken, sold, purchased, possessed, or transported, at any time, contrary to the law of the foreign country, in which it was caught, killed, taken, sold, purchased, or possessed, or from which it was transported. In addition, it is unlawful to purchase or receive any fish, if such person knows, or in the exercise of due care should know, that such fish had been transported in violation of the above.

The National Marine Fisheries Service is now in the process of establishing procedures under which imports will be examined and tests conducted to determine if fillets from illegal fish are contained in the shipment.

In order to avoid a violation of this law, importers of halibut or halibut fillets are accordingly advised to notify their vendors and consignors of this Notice and to take such other measures as may be necessary to prevent the importation of undersized halibut or fillets from undersized halibut from Japan.

Issued at Washington, D.C., and dated August 17, 1973.

ROBERT M. WHITE,
Administrator.

National Highway Traffic Safety Administration

[Docket No. 73–13; Notice 2]

AIR BRAKE SYSTEMS

Notice of Public Meeting

On November 7 and 8, 1973, the National Highway Traffic Safety Administration will conduct a public evaluation of the performance of vehicles conforming to the requirements of Motor Vehicle Safety Standard No. 121, *Air Brake Systems*, especially as used in combination with older vehicles that do not conform to the standard. The evaluation will be conducted between the hours of 9:00 a.m. and 4:00 p.m. at the Transportation Research Center of Ohio, U.S. Highway 33, East Liberty, Ohio.

The evaluation is being conducted in response to a petition by the American Trucking Association for the purpose of detecting any unusual performance characteristics resulting from the intermixing of new and old equipment. The evaluation will consist of a series of braking tests, including straight-line stops and lane-changing stops, on both wet and dry surfaces. The vehicle combinations to be tested will include new vehicles combined with new vehicles, as well as new combined with old. Particular emphasis will be placed on tests involving the secondary braking systems.

The test drivers and a representative group of older vehicles will be provided by ATA. Any person who has equipped a vehicle so that it conforms to the requirements of Standard No. 121 is invited to submit his vehicle for evaluation.

Persons who intend to submit vehicles for evaluation or who plan to attend the evaluation should advise the agency of their intent not later than September 14, 1973. All communications should be addressed to the Associate Administrator for Motor Vehicle Programs, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, D.C. 20590.

Comments are requested as to specific tests that should be included. Comments received by the Associate Administrator before September 14, 1973, will be considered in the preparation of a test agenda. The agenda will be made available to interested persons on or before October 24, 1973.

(Sec. 103, 119, Pub. L. 89–563, 80 Stat. 718, 15 U.S.C. 1392, 1407; delegations of authority at 49 CFR 1.51 and 49 CFR 501.8.)

Issued on August 16, 1973.

ROBERT L. CARTER,
Associate Administrator,
Motor Vehicle Programs.

ATOMIC ENERGY COMMISSION

ADVISORY COMMITTEE ON REACTORS SAFEGUARDS

Notice of Meeting

AUGUST 21, 1973.

In accordance with the purposes of sections 29 and 182 b. of the Atomic Energy Act (42 U.S.C. 2039, 2232 b.), the Advisory Committee on Reactor Safeguards will hold a meeting on September 6–8, 1973, in Room 1046, at 1717 H Street NW., Washington, D.C.

The following constitutes that portion of the Committee's agenda for the above meeting which will be open to the public:

(1) *Thursday, September 6, 1973.*—9:30 a.m.–1:00 p.m.—Rancho Seco Nuclear Generating Station Unit No. 1 (located in Sacramento County about 25 miles southeast of Sacramento, California)—Review application for an operating license. The Committee will hear presentations by representatives and consultants of the AEC Regulatory Staff and the Sacramento Municipal District and will hold discussions with these groups.

The Committee will hold closed sessions during this period, if required, under the authority of subsection 10(d) of Public Law 92–463 (the Federal Advisory Committee Act) to discuss security plans for this facility and privileged information related to fuel element design, fabrication, performance, and loss of coolant accident analysis.

(2) *Friday, September 7, 1973.*—10:30 a.m.–12:30 p.m. and 1:30 p.m.–3:30 p.m.—Atlantic Nuclear Generating Station (proposed location approximately 3 miles offshore of the southeast coast of New Jersey, approximately 11 miles northeast of Atlantic City, New Jersey.)—Preapplication site review. The Committee will hear presentations by representatives and consultants of the AEC Regulatory Staff and the Public Service Company of New Jersey and will hold discussions with these groups.

It should be noted that, in addition to the agenda items noted above, the Committee will hold Executive Sessions not open to the public under the authority of section 10(d) of Public Law 92–463 (the Federal Advisory Committee Act), to consider the above applications and other matters. I have determined that it is necessary to close such Executive Sessions of the meeting to protect the free interchange of internal views and to avoid undue interference with agency or Committee operation.

Practical considerations may dictate alterations in the above agenda or schedule.

The Chairman of the Committee is empowered to conduct the meeting in a manner that in his judgment will facilitate the orderly conduct of business.

With respect to public participation in the open portion of the meeting, the following requirements shall apply:

(a) Persons wishing to submit written statements regarding the agenda items may do so by mailing 25 copies thereof, postmarked no later than August 29, 1973, to the Executive Secretary, Advisory Committee on Reactor Safeguards, U.S. Atomic Energy Commission, Washington, D.C. 20545. Such written comments shall be based on materials related to the above agenda items, which materials are contained in the application for an operating license or preliminary site description report and related documents, on file, and available for public inspection in the Atomic Energy Commission's Public Document Room, 1717 H Street NW., Washington, D.C. 20545, and as follows:

Rancho Seco Nuclear Generating Station, Unit No. 1, librarian, Sacramento City County Library, 1930 T Street, Sacramento, California 95814.

Atlantic Nuclear Generating Station, Wallace R. Host Community Library, North School, Lafayette and Evans Avenue, Brigantine, New Jersey 08203.

(b) Those persons submitting a written statement in accordance with paragraph (a) above may request an opportunity to make oral statements concerning the written statement. Such requests shall accompany the written statement and shall set forth reasons jusifying the need for such oral statement and its usefulness to the Committee. To the extent that the time available for the meeting permits, the Committee will receive oral statements during a period of no more than 30 minutes at an appropriate time, chosen by the Chairman of the Committee.

(c) Requests for the opportunity to make oral statements shall be ruled on by the Chairman of the Committee, who is empowered to apportion the time available among those selected by him to make oral statements.

(d) Information as to whether the meeting has been cancelled or rescheduled and in regard to the Chairman's ruling on requests for the opportunity to present oral statements, and the time allotted, can be obtained by a prepaid telephone call on September 5, 1973, to the office of the Executive Secretary of the Committee (telephone: 301–973–5651) between 8:30 a.m. and 5:15 p.m. Eastern Daylight Time.

(e) Questions may be propounded only by members of the Committee and its consultants.

(f) Seating for the public will be available on a first-come, first-served basis.

(g) A copy of the transcript of the open portions of the meeting will be available for inspection during the following workday at the Atomic Energy Commission's Public Document Room, 1717 H Street NW., Washington, D.C. On request, copies of the minutes of the meeting will be made available for inspection at the Atomic Energy Commission's Public Document Room, 1717 H Street NW., Washington, D.C., on or after November 7, 1973. Copies may be obtained upon payment of appropriate charges.

JOHN C. RYAN,
Advisory Committee
Management Officer.

[Docket Nos. 50–416, 50–417]

MISSISSIPPI POWER & LIGHT CO.

Notice of Availability of AEC Final Environmental Statement for the Grand Gulf Nuclear Station Units 1 and 2

Pursuant to the National Environmental Policy Act of 1969 and the United States Atomic Energy Commission's regulations in Appendix D to 10 CFR Part 50, notice is hereby given that the Final Environmental Statement prepared by the Commission's Directorate of Licensing related to the proposed Grand Gulf Nuclear Station, Units 1 and 2, to be constructed by the Mississippi Power & Light Company, in Claiborne County, Mississippi, is available for inspection by the public in the Commission's Public Document Room at 1717 H Street NW., Washington, D.C., and in the Harriet Person Memorial Library, Municipal Building, Port Gibson, Mississippi 39150. The Final Environmental Statement is also being made available at the Office of the Coordinator, Federal State Programs, Office of the Governor, 510 Lamar Life Building, Jackson, Mississippi 39201, and the Southwest Mississippi Planning and Development District, P.O. Box 686, McComb, Mississippi 39648.

V 38-162 AUG 22 73 XUM

The notice of availability of the Draft Environmental Statement for the Grand Gulf Nuclear Station, Units 1 and 2, and requests for comments from interested persons was published in the FEDERAL REGISTER on April 23, 1973 (38 FR 10036). The comments received from Federal, State and local officials, and interested members of the public have been included in an appendix to the Final Environmental Statement.

Single copies of the Final Environmental Statement may be obtained by writing the U.S. Atomic Energy Commission, Washington, D.C. 20545, Attention: Deputy Director for Reactor Projects, Directorate of Licensing.

Dated at Bethesda, Maryland, this 16th day of August 1973.

For the Atomic Energy Commission.

GEORGE W. KNIGHTON,
Chief, Environmental Projects Branch No. 1, Directorate of Licensing.

[Docket Nos. 50-445 and 50-446]

TEXAS UTILITIES GENERATING CO. ET AL.

Notice of Receipt of Application for Construction Permits and Facility Licenses; Availability of Applicants' Environmental Report, etc.

The Texas Utilities Generating Company, Dallas Power and Light Company, Texas Electric Service Company, and Texas Power and Light Company (the applicants), pursuant to Section 103 of the Atomic Energy Act of 1954, as amended, filed an application, which was docketed July 20, 1973, for authorization to construct and operate two generating units utilizing pressurized water reactors. The application was tendered on June 5, 1973. Following a preliminary review for completeness, it was accepted on July 18, 1973, for docketing.

The proposed nuclear facilities, designated by the applicants as the Comanche Peak Steam Electric Station, Units 1 and 2, are located on the applicants' site in Somervell County, Texas, approximately 4½ miles north of Glen Rose, Texas, and approximately 40 miles southwest of Fort Worth in North Central Texas. Each reactor is designated for initial operation at approximately 3411 megawatts (thermal), with a net electrical output of approximately 1159 megawatts.

A Notice of Hearing with opportunity for public participation is being published separately.

Any person who wishes to have his views on the antitrust aspects of the application presented to the Attorney General for consideration shall submit such views to the U.S. Atomic Energy Commission, Washington, D.C. 20545, Attention: Chief, Office of Antitrust and Indemnity, Directorate of Licensing, on or before September 30, 1973. The request should be filed in connection with Docket Nos. 50-445-A and 50-446-A.

A copy of the application is available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. 20545, and at the Somervell County Public Library, On the Square, P.O. Box 417, Glen Rose, Texas 76043.

The applicants have also filed, pursuant to the National Environmental Policy Act of 1969 and the regulations of the Commission in Appendix D to 10 CFR Part 50, an environmental report dated June 5, 1973. The report has been made available for public inspection at the aforementioned locations. The report which discusses environmental considerations related to the proposed construction of the Comanche Peak Steam Electric Station, Units 1 and 2 is also being made available at the North Central Texas Council of Governments, P.O. Box 5888, Arlington, Texas 76011.

After the report has been analyzed by the Commission's Director of Regulation or his designee, a draft environmental statement will be prepared by the Commission. Upon preparation of the draft environmental statement, the Commission will, among other things, cause to be published in the FEDERAL REGISTER a summary notice of availability of the draft statement, requesting comments from interested persons on the draft statement. The summary notice will also contain a statement to the effect that comments of Federal agencies and State and local officials thereon will be made available when received.

Dated at Bethesda, Maryland, this 24th day of July, 1973.

For the Atomic Energy Commission.

D. B. VASSALLO,
Chief, Pressurized Water Reactors, Branch No. 1, Directorate of Licensing.

[FR Doc.73-15673 Filed 7-31-73;8:45 am]

CIVIL AERONAUTICS BOARD

[Docket 23133, 24488; Order 73G8-80]

INTERNATIONAL AIR TRANSPORT ASSOCIATION

Order Relating to Currency Matters

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 16th day of August, 1973.

An agreement has been filed with the Board pursuant to section 412(a) of the Federal Aviation Act of 1958 (the Act) and Part 261 of the Board's Economic Regulations between various air carriers, foreign air carriers and other carriers embodied in the resolutions of the Traffic Conferences of the International Air Transport Association (IATA). The agreement was adopted at Mexico City and has been assigned the above-designated C.A.B. agreement number.

The agreement would revise the IATA-agreed exchange rate for Japanese yen, set forth in Resolution 021b, from 308 yen = 1 U.S. dollar to 296 yen = 1 U.S. dollar.[1] This rate is used for conversion of specified dollar fares rates into local currency selling fares and rates in Japan, as well as for clearinghouse transactions among carriers. The subject change was necessitated by currency fluctuations resulting in undervaluation of the yen in the 021b designated parties, and will effect a reduction of approximately 3.9 percent in published yen fares and rates for transportation originating in Japan.

The Board, acting pursuant to sections 102, 204(a), and 412 of the Act, does not find that the following resolution, incorporated in Agreement C.A.B. 23733 as indicated, is adverse to the public interest or in violation of the Act:

Agreement	*IATA Resolution*
C.A.B. 23733	021b-Rates of Exchange Special Panel Meeting on Japanese Yen rates of exchange—Mexico City—28 May 1973)

Accordingly, it is ordered, That:

Agreement C.A.B. 23733 be and hereby is approved.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

[SEAL] EDWIN Z. HOLLAND,
Secretary.

[FR Doc.73-17818 Filed 8-21-73;8:45 am]

[1] The yen/U.K. pound parity would also be revised, from 802.556 to 771.287=1 U.K. pound.

COMMISSION ON CIVIL RIGHTS

MARYLAND STATE ADVISORY COMMITTEE

Agenda and Notice of Open Meeting

Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights that a planning meeting of the Maryland State Advisory Committee to this Commission will convene at 7:00 p.m. on August 22, 1973, in Room 3R-13 at the Social Security Administration Operations Building, 6401 Security Boulevard, Woodlawn, Maryland 21235.

Persons wishing to attend this meeting should contact the Committee Chairman, or the Mid-Atlantic Regional Office of the Commission, Room 510, 2120 L Street, NW., Washington, D.C. 20425.

The purpose of this meeting shall be to discuss a first draft of the Lumbee Indian Report.

This meeting will be conducted pursuant to the rules and regulations of the Commission.

Dated at Washington, D.C., August 15, 1973.

ISAIAH T. CRESWELL, JR.,
Advisory Committee Management Officer.

[FR Doc.73-17827 Filed 8-21-73;8:45 am]

VIRGINIA STATE ADVISORY COMMITTEE

Agenda and Notice of Open Meeting

Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights that a planning meeting of the Virginia State Advisory Committee to this Commission will convene at 7:00 p.m. on August 23, 1973, in Room 506, at the Sheraton Motor Inn, Belvedere and Franklin Streets, Richmond, Virginia 23220.

Persons wishing to attend this meeting should contact the Committee Chairman, or the Mid-Atlantic Regional Office of the Commission, Room 510, 2120 L Street, NW., Washington, D.C. 20425.

The purpose of this meeting shall be to discuss a first report of the study on the Selection of Judges in Virginia.

This meeting will be conducted pursuant to the rules and regulations of the Commission.

Dated at Washington, D.C., August 15, 1973.

ISAIAH T. CRESWELL, JR.,
Advisory Committee Management Officer.

[FR Doc.73-17828 Filed 8-21-73;8:45 am]

CONSUMER PRODUCT SAFETY COMMISSION

FINDING OF IMMINENT HAZARD

Order Deeming Certain Spray Adhesives To Be Banned Hazardous Substances Due to Finding of Imminent Hazard to the Public Health

Effective May 14, 1973, section 30(a) of the Consumer Product Safety Act (Public Law 92-573, 86 Stat. 1231, 15 U.S.C. 2079(a)) transferred to the Consumer Product Safety Commission the functions of the Secretary of Health, Education, and Welfare under the Federal Hazardous Substances Act (hereinafter referred to as the "act").

Section 2(q)(2) of the Federal Hazardous Substances Act (15 U.S.C. 1261 (q)(2)) provides that where the Commission finds that the distribution for household use of a hazardous substance presents an imminent hazard to the public health, it may by order published in the FEDERAL REGISTER give notice of such finding, and thereupon such substance when intended or offered for household use, or when so packaged as to be suitable for such use, shall be deemed to be a "banned hazardous substance" pending the completion of proceedings relating to the issuance of regulations under section 2(q)(1)(B) of the act. Said section defines the term "banned hazardous substance" to include a hazardous substance which the Commission by regulation classifies as a "banned hazardous substance" on the basis of a finding that, notwithstanding such cautionary labeling as is or may be required under the act for that substance, the degree or nature of the hazard involved in the presence or use of such substance in households is such that the objective of the protection of the public health and safety can be adequately served only by keeping such substance, when so intended or packaged, out of the channels of interstate commerce.

Section 2(f)(1)(A) of the act defines the term "hazardous substance" to mean, among other things, any substance or mixture of substances which is toxic. Section 2(g) of the act provides that the term "toxic" shall apply to any substance (other than a radioactive substance) which has the capacity to produce personal injury or illness to man through ingestion, inhalation, or absorption through any body surface.

Information submitted to the Consumer Product Safety Commission by J. Rodman Seely, M.D., Ph.D., Associate Professor of Pediatrics, Biochemistry, Molecular Biology, and Cytotechnology, of the University of Oklahoma Health Sciences Center, Oklahoma City, Oklahoma, indicates a causal connection between exposure to certain spray adhesives and chromosome damage leading to genetic birth defects. Staff members expert in this area from the Consumer Product Safety Commission, as well as the Food and Drug Administration, have reviewed Dr. Seely's research and agree that his findings strongly suggest such a causal relationship.

Three products are included in Dr. Seely's report. All are intended or packaged in a form suitable for use in the household for art, hobby, craft, and other bonding purposes. These products are:

(1) "Foil Art Adhesive" manufactured by the Minnesota Mining and Manufacturing Company, St. Paul, Minnesota (distributed by Decorator Crafts, Inc., Oklahoma City, Oklahoma).

(2) "Scotch Brand Spra-Ment Adhesive" manufactured by the Minnesota Mining and Manufacturing Company, St. Paul, Minnesota.

(3) "Krylon Spray Adhesive" manufactured by Borden, Inc., Columbus, Ohio, and New York, New York.

A fourth product, "3M Brand Spray Adhesive 77", manufactured by the Minnesota Mining and Manufacturing Company, is packaged in a form suitable for use in the household but was not referred to by Dr. Seely. This product, however, has the same formulation as "Scotch Brand Spra-Ment Adhesive".

The particular chemical component or components, or combination thereof, believed to be responsible for the chromosome damage has not been identified. It is therefore possible that exposure to other similar products may produce like results. However, additional research is necessary and has been instituted to permit the Commission to make these determinations.

Although the connection between the above products and chromosome damage leading to genetic birth defects has not been positively established, the strength of the connection based on the research to date, plus the alarming potential for serious personal injury or illness to children of a parent or parents exposed to these products, leads the Commission to conclude that their distribution for household use presents an imminent hazard to the public health.

The finding by the Commission that the above spray adhesive products present an imminent hazard to the public health results in their being deemed to be "banned hazardous substances" under the Federal Hazardous Substances Act. As such, the act prohibits their introduction or delivery for introduction into interstate commerce and the sale, holding for sale, delivery, or proffered delivery thereof for pay or otherwise. Violation of any of these prohibitions is criminally punishable under section 5 of the act.

Pursuant to 21 CFR 3.73, the Consumer Product Safety Commission finds that the evidence referred to in the preceding discussion is sufficient to show that the above-mentioned spray adhesives pose a significant threat of danger to health and create a public health situation (1) that should be corrected immediately to prevent injury and (2) that should not be permitted to continue while a hearing or other formal proceeding is being held. The Commission considers the number of possible injuries from these products and the nature, severity, and duration of anticipated injuries to be significant.

Accordingly, pursuant to provisions of the Federal Hazardous Substances Act (sec. 2(q)(2), 74 Stat. 374, as amended 80 Stat. 1305; 15 U.S.C. 1261(q)(2)) and under authority vested in the Consumer Product Safety Commission by the Consumer Product Safety Act (sec. 30(a), 86 Stat. 1231; 15 U.S.C. 2079(a)), the Commission hereby finds that the distribution for household use of the following products presents an imminent hazard to the public health and that such products are therefore deemed to be "banned hazardous substances" pending the completion of proceedings relating to the issuance of regulations for such products under section 2(q)(1)(B) of the Federal Hazardous Substances Act:

(1) "Foil Art Adhesive" manufactured by the Minnesota Mining and Manufacturing Company, St. Paul, Minnesota (distributed by Decorator Crafts, Inc., Oklahoma City, Oklahoma).

(2) "Scotch Brand Spra-Ment Adhesive" manufactured by the Minnesota Mining and Manufacturing Company, St. Paul, Minnesota.

(3) "Krylon Spray Adhesive" manufactured by Borden, Inc., Columbus, Ohio, and New York, New York.

(4) "3M Brand Spray Adhesive 77" manufactured by the Minnesota Mining and Manufacturing Company, St. Paul, Minnesota.

Dated: August 20, 1973.

SAMUEL M. HART,
Acting Secretary, Consumer Product Safety Commission.

COST OF LIVING COUNCIL

PROPOSED AUTOMOBILE PRICE INCREASE

Notice of Public Hearing

Notice is hereby given that the Cost of Living Council will hold a public hearing beginning at 9:30 a.m. on Tuesday, August 28, 1973 in the Cost of Living Council Auditorium, Room 2105, 2000 M Street, N.W., Washington, D.C. to receive comments from interested persons on price increase prenotifications filed with

V 38-162 AUG 22 73 XUM

the Cost of Living Council by automobile manufacturers. The hearing will examine the potential impact which the proposed price increases could have on the total economy, and will center on each company's justification for increased prices. The justification which the auto companies have used on each prenotification is based on increased costs to cover government mandated safety and environmental features. These mandated equipment changes include the ignition interlock system for lap and shoulder belts, improved energy absorbing bumpers, and improved emission systems to meet rigid environmental standards.

This public hearing will be conducted under the authority of section 207(c) of the Economic Stabilization Act of 1970, as amended, which requires that to the maximum extent possible, formal hearings be conducted for the purpose of acquiring information bearing on a change or a proposed change in prices which have or may have a significantly large impact upon the national economy.

The Cost of Living Council is inviting public participation in the form of written submissions as well as oral presentations. The Council requests all interested persons to submit written suggestions and comments on the subject for Council consideration not later than August 29, 1973.

All written submissions should be sent to Auto Hearing, Executive Secretariat, Cost of Living Council, 2000 M Street, N.W., Washington, D.C. 20508. All written submissions received before 5:00 p.m. e.s.t., August 29, 1973 will be made part of the official records of the hearing.

Any information or data considered by the person furnishing it to be confidential must be submitted in writing, one copy only, before the person's scheduled appearance, or by August 29, 1973, as applicable. The Cost of Living Council reserves the right to determine the confidential status of the information or data and to treat it accordingly.

Any person who has an interest in the subject of the hearings, or who is a representative of a group or class of persons which has an interest in the subject of the hearings, may request the opportunity to make an oral presentation by telephoning the Executive Secretariat of the Cost of Living Council at (202) 254–8610 before 5:00 p.m. e.s.t., Thursday, August 23, 1973. The person making the request should be prepared to describe the interest concerned; if appropriate to state why he is a proper representative of a group or class of persons which has such an interest; and to give a concise summary of the proposed oral presentation and a phone number where he may be contacted through August 27, 1973. Oral presentations may be supplemented by written submissions filed with the Council not later than August 29, 1973.

The Council reserves the right to select the persons to be heard at the hearings, to schedule their respective presentations, and to establish the procedures governing the conduct of the hearings. Each presentation may be limited, based on the number of persons requesting to be heard.

Each person selected to be heard will be so notified by the Council before 5:00 p.m. e.s.t., August 24, 1973 and must send 50 copies of his statement to the Executive Secretariat before 5:00 p.m. e.s.t., August 27, 1973.

A Cost of Living Council official will be designated to preside at the hearings. They will not be judicial- or evidentiary-type hearings. Questions may be asked only by those conducting the hearings, and there will be no cross-examination of persons presenting statements. Any decision made by the Council with respect to the subject matter of the hearings will be based on all information available to the Council, from whatever source received. At the conclusion of all initial oral statements, each person who has made an oral statement will be given the opportunity if he so desires, to make a rebuttal statement. The rebuttal statements will be given in the order in which the initial statements were made and may not exceed 10 minutes each.

Any interested person may submit questions, to be asked of any person making a statement at the hearings, before 5:00 p.m. e.s.t., August 27, 1973. Any person who makes an oral statement and who wishes to ask a question at the hearings may submit the question, in writing, to the presiding officer. The Council, or the presiding officer if the question is submitted at the hearings, will determine whether the question is relevant, and whether time limitations permit it to be presented for answer.

Any further procedural rules needed for the proper conduct of the hearings will be announced by the presiding officer.

A transcript of the hearings will be made and the entire record of the hearings, including the transcript, will be retained by the Council and made available for inspection at the Public Reference Facility of the Council, Room 2313, 2000 M Street, N.W., Washington, D.C. between the hours of 8:30 a.m. and 5:30 p.m. Monday through Friday. Anyone may buy a copy of the transcript from the reporter.

Issued at Washington, D.C. on August 20, 1973.

JAMES W. MCLANE,
Deputy Director,
Cost of Living Council.

[FR Doc.73-17903 Filed 8-20-73;4:14 pm]

PROPOSED STEEL PRICE INCREASES

Notice of Public Hearings

Notice is hereby given that the Cost of Living Council will hold public hearings beginning at 9:30 a.m. on Thursday, August 30, 1973, and on Friday, August 31, 1973 in the Cost of Living Council Auditorium, Room 2105, 2000 M Street, NW., Washington, D.C. to receive comments from interested persons on price increase prenotifications filed with the Cost of Living Council by steel producers. The hearings will explore facts relating to cost justification, the relationship of prices, profits, capital investment and plant capacity, and the effect of productivity and volume improvement on costs and profits.

These public hearings will be conducted under the authority of section 207(c) of the Economic Stabilization Act of 1970, as amended, which requires that to the maximum extent possible, formal hearings be conducted for the purpose of acquiring information bearing on a change or proposed change in prices which have or may have a significantly large impact upon the national economy.

The Cost of Living Council is inviting public participation in the form of written submissions as well as oral presentations. The Council requests all interested persons to submit written suggestions and comments on the subject for Council consideration not later than September 5, 1973.

All written submissions should be sent to Steel Hearings, Executive Secretariat, Cost of Living Council, 2000 M Street, N.W., Washington, D.C. 20508. All written submissions received before 5:00 p.m., e.s.t., September 5, 1973 will be made part of the official record of the hearings.

Any information or data considered by the person furnishing it to be confidential must be submitted in writing, one copy only, before the person's scheduled appearance, or by September 5, 1973, as applicable. The Cost of Living Council reserves the right to determine the confidential status of the information or data and to treat it accordingly.

Any person who has an interest in the subject of the hearings, or who is a representative of a group or class of persons which has an interest in the subject of the hearings, may request the opportunity to make an oral presentation by telephoning the Executive Secretariat of the Cost of Living Council at (202) 254–8610 before 5:00 p.m., e.s.t., Friday, August 24, 1973. The person making the request should be prepared to describe the interest concerned; if appropriate to state why he is a proper representative of a group or class of persons which has such an interest; and to give a concise summary of the proposed oral presentation and a phone number where he may be contacted through August 27, 1973. Oral presentations may be supplemented by written submissions filed with the Council not later than September 5, 1973.

The Council reserves the right to select the persons to be heard at the hearings, to schedule their respective presentations, and to establish the procedures governing the conduct of the hearings. Each presentation may be limited, based on the number of persons requesting to be heard.

Each person selected to be heard will be so notified by the Council before 5:00 p.m., e.s.t., August 26, 1973 and must send 50 copies of his statement to the Executive Secretariat before 5:00 p.m., e.s.t., August 29, 1973.

A Cost of Living Council official will be designated to preside at the hearings. They will not be judicial- or evidentiary-type hearings. Questions may be asked only by those conducting the hearings, and there will be no cross-examination of persons presenting statements. Any decision made by the Council with respect to the subject matter of the hearings will be based on all information available to the Council, from whatever source received. At the conclusion of all initial oral statements, each person who has made an oral statement will be given the opportunity if he so desires, to make a rebuttal statement. The rebuttal statements will be given in the order in which the initial statements were made and may not exceed 10 minutes each.

Any interested person may submit questions, to be asked of any person making a statement at the hearings, before 5:00 p.m., e.s.t., August 29, 1973. Any person who makes an oral statement and who wishes to ask a question at the hearings may submit the question, in writing, to the presiding officer. The Council, or the presiding officer if the question is submitted at the hearings, will determine whether the question is relevant, and whether time limitations permit it to be presented for answer.

Any further procedural rules needed for the proper conduct of the hearings will be announced by the presiding officer.

A transcript of the hearings will be made and the entire record of the hearings, including the transcript, will be retained by the Council and made available for inspection at the Public Reference Facility of the Council, Room 2313, 2000 M Street, NW., Washington, D.C. between the hours of 8:30 a.m. and 5:30 p.m. Monday through Friday. Anyone may buy a copy of the transcript from the reporter.

Issued at Washington, D.C. on August 20, 1973.

FEDERAL MARITIME COMMISSION

FARRELL LINES, INC., AND DELTA STEAMSHIP LINES, INC.

Notice of Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1405 I Street NW., Room 1015, or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, Louisiana, and San Francisco, California. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, on or before Sept. 11, 1973. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of Agreement Filed by:

Hans Unterwiener, Manager, Freight Documentation and Inward Freight Farrell Lines, Incorporated, One Whitehall Street, New York, New York 10004.

Agreement No. 10069, between Farrell Lines, Incorporated, and Delta Steamship Lines, Incorporated, establishes a through billing arrangement for the transportation of cargo moving in the trade from United States Gulf ports to the Liberian Port of Sinoe, with transshipment at Monrovia or Buchanan, Liberia, or in the roadstead outside the Port of Sinoe, with the actual port or point of transshipment to be determined by mutual agreement under terms and conditions set forth in the agreement.

By Order of the Federal Maritime Commission

Dated August 16, 1973.

FRANCIS C. HURNEY,
Secretary.

[Independent Ocean Freight Forwarder License No. 1270]

TERMINAL OPERATORS INC.

Order of Revocation

By letter dated June 27, 1973, Terminal Operators Incorporated, 50 Terminal Street, Boston, Massachusetts 02129, was advised by the Federal Maritime Commission that Independent Ocean Freight Forwarder License No. 1270 would be automatically revoked or suspended unless a valid surety bond was filed with the Commission on or before July 25, 1973.

Section 44(c), Shipping Act, 1916, provides that no independent ocean freight forwarder license shall remain in force unless a valid bond is in effect and on file with the Commission. Rule 510.9 of Federal Maritime Commission General Order 4, further provides that license will be automatically revoked or suspended for failure of a licensee to maintan a valid bond on file.

Terminal Operators, Incorporated, has failed to furnish a valid surety bond.

By virtue of authority vested in me by the Federal Maritime Commission as set forth in Manual of Orders, Commission Order No. 1 (revised), section 7.04(g) (dated 5/1/72):

It is ordered, That Independent Ocean Freight Forwarder License No. 1270 of Terminal Operators, Incorporated, be returned to the Commission for cancellation.

It is further ordered, That Independent Ocean Freight Forwarder License No.

V 38-162 AUG 22 73 XUM

1270 be and is hereby revoked effective July 25, 1973.

It is further ordered, That a copy of this Order be published in the FEDERAL REGISTER and served upon Terminal Operators, Incorporated.

AARON W. REESE,
Managing Director.

[Nos. 73-28; 73-29]

DISCRIMINATORY RATES IN THE U.S. WEST COAST/JAPAN TRADE AND U.S. ATLANTIC AND GULF/JAPAN TRADE

Revised Publication Procedures

These proceedings were instituted by orders to show cause requiring respondent conferences and carriers to explain by affidavits and memoranda why the Commission should not order elimination of unjust discrimination resulting from disparities in their import/export rate structures.

On June 22, 1973, the Commission indefinitely postponed the date for responding to the show cause order, pending action on request for alternative procedures submitted by respondents.

Respondents and Hearing Counsel have filed various pleadings regarding suggested procedures to be followed in this proceeding, which resulted in their agreement on a course these proceedings should follow.

We are disposed to permit proceedings in these matters to be conducted according to the agreed revised procedures with the exception that the proposed 15 month time period for resolution of the issues be reduced to 12 months.

Accordingly the following procedures are adopted in these proceedings in lieu of the previously ordered show cause procedure.

1. Three months from the date of this order, respondents shall file a report to Hearing Counsel detailing the procedure developed for resolving the issues; ten days after said report, Hearing Counsel shall report to the Commission respecting such procedure;

2. At 90 day intervals after Hearing Counsel's initial report, Hearing Counsel shall file periodic reports to the Commission setting forth their recommendation;

3. Twenty days before each Hearing Counsel report, respondents shall report to Hearing Counsel stating the steps proposed to resolve the issues;

4. All reports required herein of respondents shall be full and complete, shall include all proposals and available supporting economic and statistical data, and upon request of Hearing Counsel, shall be reasonably clarified and/or reasonably enlarged upon;

5. Unless otherwise extended, the procedure adopted herein shall terminate upon the expiration of a 12 month period from the date of this order.

By the Commission.

[SEAL] FRANCIS C. HURNEY,
Secretary.

FEDERAL POWER COMMISSION

[Project 2204]

CITY AND COUNTY OF DENVER

Application for Approval of Exhibit R

AUGUST 14, 1973.

Public notice is hereby given that application was filed on December 18, 1972, and supplemented on May 9, 1973, under the Federal Power Act (16 U.S.C. 791a–825r) by the city and county of Denver (Correspondence to: Board of Water Commissioners, city and county of Denver, 144 West Colfax Avenue, Denver, Colorado 80202) for approval of Exhibit R for constructed Project No. 2204, known as the Williams Fork Project, located on the Williams River (also known as Williams Fork River) a tributary of the Colorado River, and affecting public lands of the United States in Grand County, Colorado, near the villages of Hot Sulphur Springs and Parshall.

The Exhibit R would provide for general outdoor recreation at Williams Fork Reservoir. The major recreational activity would center around fishing. Bird watching, photography, sightseeing, picnicking, boating, and duck hunting would also be available to the public. A lake fishery would be provided and the habitat improved for wildlife through the creation of several small impoundments and small open water areas.

Initially five parking lots with sanitary facilities and a boat ramp are proposed for recreational development.

Any person desiring to be heard or to make protest with reference to said application should on or before October 1, 1973, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to a proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules. The application is on file with the Commission and available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.73-17792 Filed 8-21-73;8:45 am]

[Docket No. CI74-90]

COASTAL STATES GAS PRODUCING CO.

Notice of Application

AUGUST 15, 1973.

Take notice that on August 6, 1973, Coastal States Gas Producing Company (Applicant), P.O. Drawer 521, Corpus Christi, Texas 78403, filed in Docket No. CI74-90 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce to United Gas Pipe Line Company from the Albrecht Field, Goliad County, Texas, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that it commenced the sale of gas on June 13, 1973, within the contemplation of § 157.29 of the regulations under the Natural Gas Act (18 CFR 157.29) and proposes to continue said sale for one year from the end of the sixty-day emergency period within the contemplation of § 2.70 of the Commission's General Policy and Interpretations (18 CFR 2.70). Applicant proposes to sell an average daily quantity of up to 2,500 Mcf of gas at 50.0 cents per Mcf at 14.65 psia. It is stated that Applicant will accept a certificate conditioned to a rate of 45.0 cents per Mcf but reserves the right to file for its full contractual entitlement.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 15 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said application should on or before August 30, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by section 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.73-17794 Filed 8-21-73;8:45 am]

COLORADO INTERSTATE GAS CO.

Proposed Changes in FPC Gas Tariff

AUGUST 15, 1973.

Take notice that Colorado Interstate Gas Company, a division of Colorado Interstate Corporation (CIG), on August 6, 1973, tendered for filing proposed changes in its FPC Gas Tariff, Second Revised Volume No. 2. CIG states that the proposed change will effect Initial Rate Schedule X–42, which is a Gas Sales and Exchange Agreement (Exchange Agreement) between CIG and Panhandle Eastern Pipe Line Company (Panhandle), providing for CIG to receive into its pipeline system certain gas controlled by Panhandle. CIG will purchase a portion of the gas and redeliver the balance, on a thermally equivalent basis, to Panhandle, according to CIG's statement.

CIG further states that the proposed change is required to effectuate the Exchange Agreement between CIG and Panhandle as authorized by the Federal Power Commission's Order issued March 30, 1973, in Docket Nos. CP72–181 and CP73–44, as amended by FPC Order issued July 19, 1973.

CIG maintains that copies of the filing were served upon CIG's jurisdictional customers, the Colorado Public Utilities Commission, the city and county of Denver, and Panhandle.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 30, 1973. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.73-17793 Filed 8-21-73;8:45 am]

[Docket No. RP73-65]

COLUMBIA GAS TRANSMISSION CORP.

Proposed PGA Rate Adjustment

AUGUST 14, 1973.

Take notice that Columbia Gas Transmission Corporation (Columbia), on August 3, 1973 tendered for filing proposed changes in its FPC Gas Tariff, Original Volume No. 1. Columbia states that this filing amends the previous July 16, 1973, filing while preserving the effective date of September 1, 1973, proposed therein. Columbia states that the amended filing will provide a purchased gas adjustment to recover increased cost of gas purchased of $9,487,768 annually, and surcharges to recover deferred gas purchase costs of $5,396,756 which surcharges are to be effective for the six-month period September, 1973, through February, 1974.

Columbia's transmittal letter states the following reasons as support for this filing:

(1) To correct an error in the calculation of the cost of Appalachian purchases in Zone 1 resulting in a reduction in the amount originally filed for as set forth on Sheet 1 under Zone 1 tab of $285,037.

(2) To reflect the balance of $5,396,650 in Account 191 (unrecovered Purchased Gas Cost Account) as of May 31, 1973, rather than $4,244,408 included in the original filing, which represented only the deferred charges for the six-month period December, 1972, through May, 1973.

Columbia requests waiver of the Commission's Rules and Regulations under the Natural Gas Act in order to permit the tariff sheets to become effective September 1, 1973.

Columbia states that copies of the filing were served upon the Company's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 23, 1973. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene.

KENNETH F. PLUMB,
Secretary.

[FR Doc.73-17795 Filed 8-21-73;8:45 am]

[Project 2646]

CONNECTICUT LIGHT AND POWER CO.

Application for License for Constructed Project

AUGUST 14, 1973.

Public notice is hereby given that application for a major license was filed April 28, 1967, and supplemented July 14 and August 10, 1967, June 9, 1969. December 14, 1970, and January 8, May 13, July 19 and August 2, 1971, under the Federal Power Act (16 U.S.C. 791a–825r) by The Connecticut Light and Power Company (Correspondence to: Mr. Edwin L. Johnson, Vice President, The Connecticut Light and Power Company, P.O. Box 2010, Hartford, Connecticut 06101) for Stevenson Project No. 2646, located in the towns of Oxford and Southbury, New Haven County, and the towns of Monroe and Newtown, Fairfield County, Connecticut, on the Housatonic River.

The Stevenson Project, which has an installed capacity of 30,500 kw, consists of: (1) a concrete gravity dam 1,250 feet long and 124 feet high, supporting Connecticut State Highway Route No. 34, with a 630-foot overflow spill way section, topped by flashboards 3 feet high, a gated overflow spillway, a skimming gate section, a power intake section and three non-overflow sections; (2) a reservoir known as Lake Zoar 27 miles in length with a surface area of 1,063 acres, a total storage capacity of 26,900 acre-feet, and a usuable storage capacity of 5,038 acre-feet with a drawdown of five feet below the normal water surface elevation of 101.3 feet, U.S.G.S. datum; (3) an indoor powerhouse integral with the dam containing four generating units with a total capacity of 30,500 kw; and (4) all other facilities and interests appurtenant to the operation of the project.

The recreational features of the Stevenson Project include former Company land on Lake Zoar made available to the towns of Oxford, Southbury, Monroe and Newtown for town parks and to the State for Kettletown State Park, the latter providing picnicking, swimming and camping areas; a boat-launching facility and also a picnic site administered by the State Board of Fisheries and Game; a YMCA camp and privately owned waterfront homes. Applicant proposes to develop and operate a roadside rest area providing picnic sites, open shelters, sanitary facilities, parking and access, and 20 boat picnic sites at several locations along the reservoir shoreline.

Any person desiring to be heard or to make protest with reference to said application should on or before October 19, 1973, file with the Federal Power Commission, Washington, DC 20426, petitions to intervene or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to a proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules. The application is on file with the Commission and available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. CP74-34]

CONSOLIDATED GAS SUPPLY CORP.

Notice of Application

AUGUST 15, 1973.

Take notice that on August 7, 1973, Consolidated Gas Supply Corporation (Applicant), 445 West Main Street, Clarksburg, West Virginia 26301, filed in Docket No. CP74-34 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of natural gas

V 38-162 AUG 22 73 XUM

pipeline and appurtenant facilities, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to construct and operate approximately 2.5 miles of 6-inch transmission line and measuring facilities extending from the newly-discovered East Emporium Oriskany production pool (East Emporium) in Potter County, Pennsylvania, to a proposed sales delivery point at United Natural Gas Company's (United) No. F–M100 pipeline in Potter County.

The total estimated cost of the proposed facilities is $248,534 which will be financed from funds on hand and funds to be obtained from Applicant's parent, Consolidated Natural Gas Company.

The purpose of the proposed construction and operation of facilities is to augment Applicant's ability to fulfill its contract with United to deliver up to 21,500 Mcf of gas per day and up to 16,500 Mcf of gas per day during the periods from November 1 through April 30 and May 1 through October 31, respectively. Applicant estimates that the proposed pipeline will be able to deliver initially 8,500 Mcf of gas per day from East Emporium which is estimated to contain 12 million Mcf of recoverable natural gas.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 10, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Docket No. CI73–751 etc.]

EXXON CORP. ET AL.

Postponement of Hearing

AUGUST 15, 1973.

In the matter of Exxon Corp., Shenandoah Oil Corp., and SOC Gas Systems, Inc. Dockets Nos. CI73–751, CI73–799, CI73–800, CI73–801.

The Commission order issued on July 23, 1973, set the above-designated matter for hearing on August 22, 1973. It now appears that calendar conflicts in the Office of Administrative Law Judges require that the hearing be postponed.

Notice is hereby given that the hearing in the above-designated matter is postponed to September 5, 1973, at 10:00 a.m., e.d.t., in a hearing room of the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426.

KENNETH F. PLUMB,
Secretary.

[FR Doc.73–17798 Filed 8–21–73;8:45 am]

[Docket No. CP74–35]

EXXON PIPELINE CO. OF CALIFORNIA

Notice of Application

AUGUST 14, 1973.

Take notice that on August 7, 1973, Exxon Pipeline Company of California (Applicant), P.O. Box 2220, Houston, Texas 77001, filed in Docket No. CP74–35 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of pipeline and other facilities from the Outer Continental Shelf in the Santa Barbara Channel, offshore California, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to construct and operate approximately 6.7 miles of offshore and approximately 1.3 miles of onshore 12-inch pipeline extending from Exxon Corporation's (Exxon) drilling platform to be constructed in the Santa Ynez Unit; Santa Barbara Area, offshore California to Applicant's proposed onshore natural gas treating and processing plant in Las Flores Canyon approximately 1 mile north of the existing Capitan Oil Field and Marine Terminal in Santa Barbara County. The nominal capacity of the proposed pipeline is 90,000 Mcf of gas per day.

The total estimated cost of the proposed pipeline and gas treating and processing plant is $5,800,000 which will be initially financed by Exxon Pipeline Company through the purchase of Applicant's common stock and short-term notes.

It is stated that Exxon is currently developing certain offshore oil and gas leases in the Hondo Field Area of offshore California. After completion of 32 exploratory wells in said area, Exxon is said to estimate that approximately 170 to 240 million Mcf of recoverable gas reserves are in the area initially proposed to be developed.

The purpose of the proposed construction and operation of facilities is to transport for 30 years the volumes of natural gas, up to 90,000 Mcf per day, made available to Applicant by Exxon from the said leases in the Hondo Field Area. It is estimated that the proposed pipeline will carry an average of 10,100 Mcf of gas per day at the end of the platform, in excess of 26,000 Mcf of gas per day during the second year and upon completion of Exxon's offshore drilling platform, in excess of 26,00 Mcf of gas per day in the third year. Following treatment of the gas and extraction of the liquefiable hydrocarbon at the proposed plant, Applicant will deliver residue gas to Exxon at the plant's tailgate, estimated to be approximately 21,000 to 25,000 Mcf per day in the third year. Applicant is advised that Exxon intends to sell said gas to a California purchaser.

Applicant proposes to charge Exxon a flat annual rate of $575,000 per year upon completion of the pipeline facilities and $1,200,000 per year upon completion of the treating and processing plant herein.

Applicant state that a draft environmental statement concerning, among other things, the proposals in the instant application has been prepared and distributed by the United States Geological Survey of the Department of the Interior. Notice of a public hearing for the purpose of receiving comments relating to the draft statement was published in the FEDERAL REGISTER on July 27, 1973 (38 20112).

Any person desiring to be heard or to make any protest with references to said application should on or before September 10, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.73–17799 Filed 8–21–73;8:45 am]

FLORIDA GAS TRANSMISSION CO.

Proposed Changes in FPC Gas Tariff

AUGUST 15, 1973.

Take notice that on August 6, 1973, Florida Gas Transmission Company (Florida Gas) tendered for filing First Revised Sheet No. 16 to its FPC Gas Tariff, Original Volume No. 1. Florida Gas states that the revision changes the time period for the retention of certain records regarding gas measurement to conform such period of retention to the Commission's Regulations related thereto and that this change applies to section 5 of the General Terms and Conditions of the Tariff. Florida Gas requests that the effective date of the change be made September 5, 1973.

Florida Gas states that a copy of its filing has been served upon all customers purchasing gas under its FPC Gas Tariff, Original Volume No. 1 and the Florida Public Service Commission.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 30, 1973. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.73–17800 Filed 8–21–73;8:45 am]

[Docket No. CI72–832]

MONSANTO CO. (OPERATOR), ET AL.

Petition To Amend

AUGUST 15, 1973.

Take notice that on August 7, 1973, Monsanto Company (Petitioner), 1300 Post Oak Tower, 5051 Westheimer, Houston, Texas 77027, filed in Docket No. CI72–832 a petition to amend the order in said docket pursuant to section 7(c) of the Natural Gas Act so as to authorize the continued sale for resale and delivery of natural gas in interstate commerce to United Gas Pipeline Company (United) from the Bryceland Field, Bienville Parish, Louisiana, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

Petitioner, as successor to Harvey Broyles, was authorized by the order issued August 1, 1972, as amended June 25, 1973, in said docket to sell average daily volumes of 2,500 Mcf of gas at 35.0 cents per Mcf at 15.025 p.s.i.a. for one year ending August 7, 1973, pursuant to § 2.70 of the Commission's general policy and interpretations (18 CFR 2.70). Petitioner now proposes to continue said sale for an additional one year to United at an increased rate of 45.0 cents per Mcf of gas at 15.025 p.s.i.a. within the contemplation of § 2.70.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 15 days for the filing of protest and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said petition to amend should on or before August 31, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or to protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

NATIONAL POWER SURVEY; TECHNICAL ADVISORY COMMITTEE ON RESEARCH AND DEVELOPMENT TASK FORCE ON ENERGY CONVERSION RESEARCH

Notice of Meeting

For a meeting of the Technical Advisory Committee on Research and Development Task Force on Energy Conversion Research, to be held at the Federal Power Commission Offices, 825 North Capitol Street, NE., Washington, D.C., August 28, 1973, 9:30 a.m., Room 5200.

1. Meeting called to order by FPC Coordinating Representative.
2. Approval of minutes of previous meeting.
3. Objectives and Purposes of meeting.
A. Review status of editing reports on energy conversion technologies.
B. Review summary of members' priority assessments of the various technologies.
C. Review draft of Task Force report to the TAC on Research and Development.
D. Assignment of responsibilities for presentation of Task Force results and conclusions at September meeting of the TAC.
E. Other business.
F. Dates for future meetings.
4. Adjournment.

This meeting is open to the public. Any interested person may attend, appear before, or file statements with the committee—which statements, if in written form, may be filed before or after the meeting, or, if oral, at the time and in the manner permitted by the committee.

KENNETH F. PLUMB,
Secretary.

[Docket No. RP72–132]

NATURAL GAS PIPELINE CO. OF AMERICA

Notice of Filing Revised Tariff Sheets To Reflect Reduction in Advance Payment Tracking Filing

AUGUST 14, 1973.

Take notice that on August 6, 1973, Natural Gas Pipeline Company of America (Natural) tendered for filing revised tariff sheets to be effective August 1, 1973, reflecting a reduction in an Advance Payment tracking adjustment filed June 15, 1973, as revised July 27, 1973, to comply with Commission Order of July 18, 1973.

Natural states that the current revision in the advance payment tracking filing reflects receipt on August 3, 1973, of $21,985,000 from Trunkline Gas Company in connection with assignment to Trunkline of the right to acquire a portion of the reserves which may become available as a result of certain advance payments which Natural had previously made and which were reflected in the tracking filing.

Natural requests that the applicable regulations and orders of the Commission be waived to the extent necessary to permit the withdrawal of Second and Third Substitute Ninth Revised Sheets No. 5, effective August 1, and September 1, 1973 respectively, and substitution of the revised sheets reflecting the lower rates.

Natural states that copies of this filing have been mailed to Natural's customers and all interested parties to Docket No. RP72–132.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 29, 1973. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. CI74–89]

PHILLIPS PETROLEUM CO.

Notice of Application

AUGUST 15, 1973.

Take notice that on August 6, 1973, Phillips Petroleum Company (Applicant), Bartlesville, Oklahoma 74004, filed

V 38-162 AUG 22 73 XUM

in Docket No. CI74–89 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale for resale and delivery of residue natural gas in interstate commerce to Panhandle Eastern Pipe Line Company at its Cimarron Plant in Woodward County, Oklahoma, from production in Major County, Oklahoma, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that it commenced the sale of gas on August 1, 1973, within the contemplation of § 157.29 of the regulations under the Natural Gas Act (18 CFR 157.29) and proposes to continue said sale for one year from the end of the sixty-day emergency period within the contemplation of § 2.70 of the Commission's general policy and interpretations (18 CFR 2.70). Applicant proposes to sell approximately 30,000 Mcf of gas per month at 50.0 cents per Mcf at 14.65 p.s.i.a. subject to upward and downward Btu adjustment.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 15 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said application should on or before August 30, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by section 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.73–17756 Filed 8–21–73;8:45 am]

[Docket No. CI73–350]

G. PHIL ROBERTS & GLYNN D. BUIE

Amendment to Application

AUGUST 15, 1973.

Take notice that on July 19, 1973, G. Phil Roberts and Glynn D. Buie (Applicants) (Successors to Anadarko Production Company), 861 The Main Building, Houston, Texas 77002, filed in Docket No. CI73–350 an amendment to their application in said docket filed pursuant to section 7(b) of the Natural Gas Act by requesting authorization to continue sales of natural gas to Texas Eastern Transmission Corporation (Texas Eastern) at a new price pursuant to section 7(c) of the Natural Gas Act and § 2.76 of the Commission's general policy and interpretations (18 CFR 2.76),[1] all as more fully set forth in the application, as amended, which is on file with the Commission and open to public inspection.

Anadarko Production Company (Anadarko) was issued a certificate of public convenience and necessity in Docket No. CI70–624 authorizing the sale of natural gas to Texas Eastern from acreage in the Skull Creek Field, Colorado County, Texas. Applicants purchased these properties from Anadarko and on November 9, 1972, filed their application in this docket for permission and approval to abandon this sale because the subject well was no longer capable of producing gas in commercial quantities.

Applicants now by the instant amendment to their application request authorization to continue the sale of gas to Texas Eastern from the Skull Creek Field at 45.0 cents per Mcf at 14.65 p.s.i.a. in lieu of the original contract rate of 17.8 cents per Mcf. Applicants state that this increase in price above the area rate will provide the funds necessary to produce the gas and a cash flow sufficient to drill for additional volumes of gas while maintaining operational expenses. Applicants assert that if this special relief is not granted, then they will have to abandon the subject acreage with approximately 2 million Mcf of gas reserves lying thereunder.

Any person desiring to be heard or to make any protest with reference to said amendment should on or before September 10, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it on determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

[1] Commission Order No. 481 Docket No. R–458, Policy With Respect to Sales Where Reduced Pressures, Need for Reconditioning: Deeper Drilling Or Other Factors Make Further Production Uneconomical at Existing Prices, order issued April 12, 1973 (49 FPC ——).

KENNETH F. PLUMB,
Secretary.

[Docket No. G–12671]

RESERVE OIL AND GAS CO.

Amendment to Petition To Amend

AUGUST 15, 1973.

Take notice that on July 30, 1973, Reserve Oil and Gas Company (Petitioner), 1806 Fidelity Union Tower, Dallas, Texas 75201, filed in Docket No. G–12671 an amendment to its petition to amend filed on May 15, 1973, pursuant to section 7(c) of the Natural Gas Act to amend the order of December 5, 1963, issuing a certificate of public convenience and necessity in said docket so as to authorize the sale for resale and delivery of additional volumes of gas to Natural Gas Pipeline Company of America (Natural) from the LaGloria Field, Brooks and Jim Wells Counties, Texas, all as more fully set forth in the amendment to the petition which is on file with the Commission and open to public inspection.

In its petition to amend filed on May 15, 1973, Petitioner requests authorization to sell gas formerly dedicated to Transcontinental Gas Pipe Line Corporation (Transco) to Natural at a rate of 19.0 cents per Mcf, subject to downward Btu adjustment. Deliveries are estimated at approximately 65,000 Mcf per month. Concurrently, Petitioner filed in Docket No. CI73–808 an application for permission to abandon sales to Transco from the La Gloria Field.

Petitioner now proposes in its amendment filed on July 30, 1973, to sell approximately 65,000 Mcf of gas per month to Natural from the reserves formerly dedicated to Transco, plus other additional volumes, at a rate of 24.0 cents per Mcf, subject to downward Btu adjustment.

Any person desiring to be heard or to make any protest with reference to said amendment should on or before September 10, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules. Persons who have heretofore filed protests and petitions to intervene need not file again.

KENNETH F. PLUMB,
Secretary.

[Docket No. RP73–47]

SEA ROBIN PIPELINE CO.

Further Extension of Time and Postponement of Prehearing Conference and Hearing

AUGUST 15, 1973.

On August 10, 1973, Sea Robin Pipeline Company filed a motion for a further extension of time to file testimony and to reset the hearing dates as fixed by notice issued July 25, 1973, in the above-designated matter. The motion states that neither staff counsel nor interveners have any objection to the motion.

Upon consideration, notice is hereby given that the procedural dates are further modified as follows:

Prehearing Conference, September 5, 1973.
Sea Robin Rebuttal Evidence, September 7, 1973.
Hearing, September 18, 1973 (10:00 a.m., EDT).

KENNETH F. PLUMB,
Secretary.

[FR Doc.73–17804 Filed 8–21–73;8:45 am]

[Docket Nos. CP73–27, etc.]

STINGRAY PIPELINE CO. ET AL.

Postponement of Prehearing Conference

AUGUST 15, 1973.

In the matter of Stingray Pipeline Co., Sun Oil Co., and Pennzoil Offshore Transmission Co. Dockets Nos. CP73–27, CI73–878, CI73–879, CI73–880, CP72–292.

The Commission order issued on July 13, 1973, set the above-designated matter for hearing, commencing with a prehearing conference on August 28, 1973. It now appears that calendar conflicts in the Office of Administrative Law Judges require that the prehearing conference be postponed.

Notice is hereby given that the prehearing conference in the above-designated matter is postponed to September 4, 1973, at 10:00 a.m., e.d.t., in a hearing room of the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426.

KENNETH F. PLUMB,
Secretary.

[Docket No. CP72–182]

TRANSCONTINENTAL GAS PIPE LINE CORP. AND TEXAS GAS TRANSMISSION CORP.

Petition To Amend

AUGUST 16, 1973.

Take notice that on August 8, 1973, Transcontinental Gas Pipe Line Corporation (Transco), P.O. Box 1396, Houston, Texas 77001, and Texas Gas Transmission Corporation (Texas Gas), 3800 Frederica Street, Owensboro, Kentucky 42301, filed in Docket No. CP72–182 a petition to amend the order in said docket so as to authorize the additional exchange of gas between the applicants, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

By order issued June 27, in said docket (47 FPC 1621), Transco and Texas Gas were authorized, among other things, to exchange up to 15,000 Mcf of gas per day at points of interconnection in the Simon Pass Field, St. Martin Parish, and in the Dog Lake Field, Terrebonne Parish, Louisiana. It is now proposed that, for 20 years, Transco deliver or cause to be delivered up to 20,000 Mcf of gas per day to Texas Gas at the existing delivery point in Simon Pass Field and up to 2,000 Mcf of gas per day at the Church Point Field, Acadia Parish, Louisiana, and that Texas Gas simultaneously redeliver to Transco up to 2,000 Mcf of gas per day at Transco's pipeline in Block 100, Eugene Island Area, offshore Louisiana, and redeliver equivalent volumes of the remainder of the gas delivered to Texas Gas at the Dog Lake Field delivery point. Any imbalances in monthly deliveries will be adjusted in the following month. Transco proposes to charge Texas Gas 1.5 cents per Mcf for transportation of all gas delivered at the Block 100 delivery point.

The stated purpose of the increased exchange of gas is to assist each Applicant to receive additional gas production to which it is entitled but not connected without construction of costly additional facilities.

Any person desiring to be heard or to make any protest with references to said petition to amend should on or before September 10, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

KENNETH F. PLUMB,
Secretary.

[FR Doc.73–17806 Filed 8–21–73;8:45 am]

[Docket No. CP74–33]

TRANSCONTINENTAL GAS PIPE LINE CORP.

Notice of Application

AUGUST 14, 1973.

Take notice that on August 6, 1973, Transcontinental Gas Pipeline Corporation (Applicant), P.O. Box 1396 Houston, Texas 77001, filed in Docket No. CP74–33 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the acquisition and operation of the Cockfield "D" reservoir in Washington Field, St. Landry Parish, Louisiana as a storage reservoir and the construction and operation of certain facilities necessary therefor, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that the Washington Field contains gas producing wells connected to its system and that it has contracted with Sohio Petroleum Company and Gulf Oil Corporation to acquire their leasehold interests in the Cockfield "B" and "D" reservoirs and certain of their facilities. It is estimated that on January 1, 1974, the remaining reserves in the Cockfield "B" reservoir will be 3.2 million Mcf of gas which Applicant will transfer to the Cockfield "D" reservoir which is estimated to contain on that date 22 million Mcf of gas. Applicant proposes to develop the Cockfield "D" reservoir as a storage reservoir so as to contain a total inventory of 120 million Mcf of gas which 60,000 million Mcf will be base gas and the other 60 million Mcf will be top storage gas. The field will have a design deliverability of approximately 667,000 Mcf of gas per day when 80 percent of the top storage gas has been withdrawn.

To develop the Cockfield "D" reservoir Applicant proposes to drill an additional 59 wells and construct and operate additional field pipeline facilities and a 44,000 horsepower compressor station.

The total estimated cost of the proposal is $78,500,000 which will be financed initially from temporary bank loans and company funds, with permanent financing to be arranged as part of an overall financing program.

Applicant states that the proposed storage reservoir will be used to provide protection for high priority markets of its customers in the winter seasons; but as supplemental supplies of gas are received and it has additional mainline capacity, the storage field may be used to offer supplemental storage service to its customers to attach new high winter loads.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 10, 1973, file with the Federal Power Commission, Washington, D.C. 20436, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission wil be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure,

V 38-162 AUG 22 73 XUM

a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.73-17807 Filed 8-21-73;8:45 am]

FEDERAL RESERVE SYSTEM

BANKAMERICA CORP.

Order Granting Request for Reconsideration and Approving Acquisition of GAC Finance, Inc.

BankAmerica Corporation, San Francisco, California, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval, under sections 4 (c) (8) and (13) of the Act and § 225.4 (b) (2) of the Board's Regulation Y, to acquire voting shares of GAC Finance, Inc., Allentown, Pennsylvania. GAC Finance, Inc., through its subsidiaries, engages in the activities of making direct loans to consumers; purchasing sales finance paper; financing inventory of distributors of, and dealers in, various consumer durable goods through agreements with manufacturers in the case of distributors and with distributors in the case of dealers; servicing manufacturer-funded receivables arising from inventory financing by certain manufacturers of consumer durable goods; rediscount financing for non-affiliated consumer sales finance companies; and sale to its direct consumer borrowers of credit life and credit health and accident insurance and of insurance coverage against damage to personal property securing extensions of credit made by the subsidiary to its direct consumer borrowers. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Notice of the application, affording opportunity for interested persons to submit comments and views on the public interest factors, has been duly published (38 FR 6103). The time for filing comments and views has expired, and the Board has considered all comments received, including those of the Department of Justice, in the light of the public interest factors set forth in section 4(c)(8) of the Act (12 U.S.C. 1843(c)(8)).

By Order dated July 27, 1973, the Board denied the application, the statement of reasons therefore to be issued at a later date.[1] On August 3, 1973, Applicant filed a request for reconsideration of the Board's Order of denial, predicated upon more current information with respect to the financial condition of Finance and upon commitments to divest substantially more assets and offices of Finance than originally proposed.

Reconsideration was granted pursuant to § 262.3(f)(6) of the Board's rules of procedure (12 CFR 262.3(f)(6)) and the Board's Order of July 27, 1973, is hereby vacated.

During the course of its initial consideration of this application, the Board received adverse comments and a request for a formal hearing from a member of the public. The request for hearing was denied by the Board, based on its conclusion that Protestant had failed to allege the existence of material factual issues particular to the application and for other reasons communicated to Protestant. An invitation was extended to Protestant to submit further written comments on the application for the Board's consideration, but Protestant failed to respond. Subsequent to the Board's action denying the application, and while Applicant's request for reconsideration was pending, Protestant again wrote to the Board urging that it either reaffirm its denial or grant a formal hearing on the application. This request for hearing, in the Board's view, did not present any relevant facts or considerations not presented in earlier correspondence from this Protestant. Accordingly, the request was denied.

After reconsideration of the entire record in this matter and for the reasons summarized in the Board's Statement of this date, the section 4(c)(8) application is hereby approved on condition that Applicant cause Finance to accomplish the following plan of divestiture at the earliest practicable time and, in any event, within the time periods set forth below:

1. Finance will cause to be liquidated and paid, on the date of consummation of the proposed transaction, all receivables from GAC Corporation and its retained subsidiaries.

2. Finance will sell within one year, as going concerns, all of its consumer loan offices located in the States of California, Oregon, Washington, Arizona, New Mexico, Montana, Wyoming, Idaho, North Dakota, South Dakota, Colorado, and Texas and will not reenter the consumer loan business in any of these States until such withdrawal from all has been fully consummated. Any such reentry would require the Board's prior approval pursuant to section 4(c)(8) of the Bank Holding Company Act.

3. Finance will sell within one year, as a going concern, its business of rediscounting receivables of smaller finance companies.

4. Finance will sell, within one year, the business and receivables of its Albuquerque, New Mexico, sales finance office and will close this office.

5. Finance will, within 18 months, dispose of an additional $25 million in sales finance receivables.

6. Finance will sell or otherwise dispose of, within two years, the business and assets of Trailer Industries, Inc., and all of the receivables of Finance's Business Finance and Lease Division.

7. Finance will segregate on its books as soon as possible after consummation of this proposal all of the receivables subject to disposition in paragraphs 4, 5, and 6.

8. Finance will file a written report with the Board not later than six months following consummation of this proposal and further written reports at not more than six months intervals thereafter, setting forth all dispositions accomplished during the proceeding period and dispositions then under negotiation.

The acquisition shall not be consummated later than three months after the effective date of this Order, unless such period is extended for good cause by the Board. This approval is subject further to the Board's authority to require reports by, and make examinations of, holding companies and their subsidiaries and to require such modification or termination as the Board finds necessary to assure compliance with the provisions and purposes of the Act and the Board's regulations and orders issued thereunder, or to prevent evasion thereof. Applicant's application to acquire the foreign offices of Finance under section 4(c)(13) and § 225.4(f) of Regulation Y is also approved subject to the condition that its subsidiaries shall confine their activities to international or foreign banking and other international or foreign financial operations.

By order of the Board of Governors,[2] effective August 14, 1973.

[SEAL] CHESTER B. FELDBERG,
Secretary of the Board.

STATEMENT[1]

BankAmerica Corporation, San Francisco, California, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval, under sections 4(c) (8) and (13) of the Act and § 225.4(b)(2) of the Board's Regulation Y, to acquire voting shares of GAC Finance, Inc., Allentown, Pennsylvania (Finance). Finance, through its subsidiaries, engages in the activities described in the Board's Order of this date, which activities have been specified by the Board in § 225.4 (a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Notice of the application, affording opportunity for interested persons to submit

[1] Voting for that action: Chairman Burns and Governors Brimmer, Bucher, and Holland. Voting against that action: Governors Mitchell, Daane, and Sheehan.

[2] Voting for this action: Chairman Burns and Governors Mitchell, Daane, Brimmer, Sheehan, Bucher, and Holland.

[1] A Concurring Statement of Governor Sheehan will be issued shortly and will be available upon request to the Board of Governors of the Federal Reserve System, Washington, D.C. 20551, or the Federal Reserve Bank of San Francisco.

comments and views on the public interest factors, has been duly published (38 FR 6103) and the time for filing comments and views has expired.

In its Order of July 27, 1973, the Board denied Applicant's application to acquire Finance and stated that its reasons for the denial would be set forth in a Statement to be issued at a later date. Subsequently, on August 3, 1973, prior to issuance of the Statement, Applicant filed a request for reconsideration by the Board of its application to acquire Finance, proposing a plan of divestiture of certain additional assets and businesses of Finance within stated time periods if the application, on reconsideration, was approved by the Board. On August 8, 1973, the Board granted Applicant's request for reconsideration and vacated its Order of July 27 denying Applicant's proposed acquisition of Finance. The Board has reconsidered this application, all original and supplementary materials received in connection therewith, and all comments received, including those of the Department of Justice, in the light of the public interest factors set forth in section 4(c)(8) of the Act (12 U.S.C. 1843(c)(8)).

Applicant is a one-bank holding company controlling the largest commercial bank in the world, Bank of America N.T. & S.A., San Francisco, California (Bank). As of December 31, 1972, Bank had total domestic deposits of $23.4 billion, representing 36.6 per cent of the total deposits in commercial banks in California, and an additional $12 billion in foreign deposits. Applicant currently has nonbanking subsidiaries engaged principally in computer services, software and leasing activities, investment advisory services, insurance and sale of travelers checks, and mortgage banking. Applicant does not currently have a consumer finance subsidiary. Finance had total assets of more than $719 million as of December 31, 1972, and operates 459 offices in 41 States and four offices in Canada. As measured by total assets, Finance is the eleventh largest independent finance company in the United States.

In connection with its analysis of the original proposal, the Board had taken into account comments received from the United States Department of Justice concerning the proposed transaction. In its comments, Justice concluded that, even considering Finance's proposed divestiture of its California consumer loan offices, discussed below, the transaction would have an adverse effect on existing competition in the State of California. The Justice Department further found that the proposal would have possible adverse effects on potential competition between Finance and Bank in the consumer finance field. Additionally, the Department viewed the proposal with concern as to its effects on concentration of resources. In its analysis, the Department found that these adverse effects were not outweighed by an affirmative showing of positive public benefits.

It appears that Applicant and Finance engage in only a minimal amount of direct competition outside the State of California. With the exception of Applicant's recently established de novo mortgage banking subsidiaries in Colorado and Texas, Applicant does not presently engage, to any significant extent, in consumer oriented financing at locations outside the State of California. Applicant does, however, have five Edge Corporations scattered throughout the country. Within California, Finance operates 36 consumer loan offices and two sales finance offices. In its original proposal, Applicant committed Finance to divest the 36 consumer loan offices to an outside party promptly after consummation of the proposal. Applicant proposed, however, to acquire and retain the two California sales finance offices offering dealer floor plan financing. The Department of Justice, in commenting on the application, stated that in its opinion, the proposal could have an adverse effect on competition in California, even assuming the divestiture, because a sale of such offices to a substantial bank or nonbank competitor could lead to similar competitive problems. Divestiture to a smaller nonbank or banking organization might decrease the competitive presence of Finance's offices in California. The Board concluded that the proposed initial divestiture would eliminate most of the adverse competitive consequences of the initial proposal in the consumer finance product market. The two California "private brands" sales finance offices of Finance compete to a very limited extent with Applicant's banking subsidiary in making floor plan loans to finance household items. This is due to the fact that the private brand contracts entered into by these two offices are generally on a nationwide basis and thus only a very small volume of the California receivables represents direct competition between Applicant and such offices.

The Board next considered the question whether consummation of the original proposal would eliminate any significant competition in the future between Applicant, its subsidiaries, and Finance. As indicated above, Finance is one of the nation's significant competitors in the consumer finance industry, having a competitive presence in 41 States. Applicant has recently established a presence in home mortgage lending outside the State of California in the States of Colorado and Texas. Moreover, Bank has a long tradition of significant innovation in the consumer credit field in California. An analysis of its deposits and loans shows that, among United States banks, it is more heavily consumer oriented than any other bank with over $10 billion in assets. It thus appears quite possible in the light of its traditional service emphasis as well as its size and competitive ability, that Applicant would, absent this proposal, commence an expansion into other States in the consumer lending field, either through establishment of consumer finance offices *de novo* or through means of foothold entry. Moreover, the likelihood would seem to be greatest in the western part of the United States, in those States in close proximity to California. The Board concluded that consummation of the initial proposal would have eliminated a substantial possibility that Applicant, its subsidiaries, and Finance would compete in various markets outside California in the future. The Board further concluded that this constituted a possible adverse effect to be considered under section 4(c)(8). However, with respect to any individual market, the Board cannot determine that such entry is probable or that the market is sufficiently concentrated that the elimination of the possibility of such entry would have substantially adverse effects. Further, the Board does not regard the consumer finance industry as so lacking in competition across the nation that it supports the judgment that any acquisition can be presumed per se to affect competition adversely.

In addition to the above possible adverse effects of the original proposal, the Board was deeply concerned with the question of whether an undue concentration of resources would result from approval of this application. The Conference Report accompanying the 1970 Amendments, in discussing this factor, states:

> The danger of undue concentration of economic resources and power is one of the factors which led to the enactment of this legislation, and constitutes a significant threat to the continued healthy evolution of our free economy. American trade has always operated on the principle that relationships between businessmen, large and small, should be founded on economic merit rather than monopoly power. Our national policies of limited governmental regulation and interference in trade and commerce, however, do make it possible for undue concentrations of resources and economic power to override fundamental fairness and economic merit when responding to the profit motive. This possibility is enhanced when concentrations of power are centered about money, credit and other financial areas, the common denominators of the economy * * *. The dangers of undue concentration of resources include, but are not limited to, specific competitive effects, which are themselves relevant factors under the Act. It should be clear that this legislation directs the Board to consider all reasonable ramifications of the concentration of resources in fulfilling its responsibilities under section 4.[3]

Congress did not provide specific criteria with respect to the size of acquisitions which should be disallowed to avoid an undue resources concentration. Rather, it has pointed to the dangers involved, particularly those involving concentration of power relating to money and credit, and has directed the Board to consider "all reasonable ramifications" in applying the standard of section 4(c)(8). It was the Board's judgment that approval of the original application, involving acquisition by the nation's largest bank holding company of a major consumer finance company with a nationwide network of offices, although a close question, raised issues of concentration in credit-granting resources that were inconsistent with the intent of Congress in enacting the 1970 Amendments. The expression of legislative intent contained in the Conference Report, measured against the facts of record in the case, warranted the conclusion that the concentration of resources in this instance weighed against approval of the original application.

In support of the application, Applicant contended that consummation of the proposal would produce public benefits in the form of significant improvements to Finance's consumer credit services. Among such public benefits would be an overall strengthening and revitalization of Finance as a consumer lending institution resulting in an increase in competition in that market. Because of the financial strength of Applicant, a proposed expansion of Finance's lending services could be expected in such areas as small business loans, loans to municipalities, financial counseling, and loans to professionals and students. Other stated public benefits include possible reduction in certain loan rates, due to Applicant's easier access to funds, probably at lower cost. Information reaching the Board suggested that Finance was in serious financial difficulties, and that its ability to continue operations was in some question if it were not to become affiliated with a financially strong organization. The Board judged that while

[3] H.R. Report No. 91-1747, p. 17.

V38-162 AUG 22 73 XUM

most of the benefits cited would affirmatively serve the public interest, the same benefits should be achieved through a proposal which did not evidence the possible adverse effects inherent in the original proposal. The Board concluded, applying the balancing test of section 4(c)(8), that Applicant's showing of public benefits had not outweighed the possible adverse effects of the proposed acquisition and that, therefore, the application should be denied.

Subsequent to the issuance of the Board's Order and prior to release of the Statement, Applicant petitioned the Board for reconsideration of its original Order. Applicant submitted a plan it believed to be more acceptable to the Board, proposing divestiture of certain assets, offices, and businesses of Finance substantially beyond that in the initial proposal. The plan contemplates a divestiture by Finance within the time periods following consummation as set forth below:

1. Finance will cause to be liquidated and paid, on the date of consummation of the proposed transaction, all receivables from GAC Corporation and its retained subsidiaries.

2. Finance will sell within one year, as going concerns, all of its consumer loan offices located in the States of California, Oregon, Washington, Arizona, New Mexico, Montana, Wyoming, Idaho, North Dakota, and South Dakota and will not reenter the consumer loan business in any of these States until such withdrawal has been fully consummated.

3. Finance will sell within one year, as going concerns, 15 of its 31 consumer loan offices located in the State of Texas and 8 of its 16 consumer loan offices located in the State of Colorado, the offices to be divested in each State to be selected so as to assure that the receivables being divested represent not less than one-half of the receivables of all of Finance's consumer loan offices in each State as of June 30, 1973.

4. Finance will sell within one year, as a going concern, its business of rediscounting receivables of smaller finance companies.

5. Finance will sell within one year the business and receivables of its Albuquerque, New Mexico, sales finance office and will close this office.

6. Finance will, within 18 months, dispose of an additional $25 million in sales finance receivables.

7. Finance will sell or otherwise dispose of within two years the business and assets of Trailer Industries, Inc., and all of the receivables of Finance's Business Finance and Lease Division.

8. Finance will segregate on its books as soon as possible after consummation of this proposal all of the receivables subject to disposition in paragraphs 5, 6, and 7.

9. Finance will file a written report with the Board not later than six months following consummation of this proposal and further written reports at not more than six month intervals thereafter setting forth all dispositions accomplished during the preceding period and dispositions then under negotiation.

Applicant has requested that its petition for reconsideration be taken up by the Board on an emergency basis because of the exigent financial condition of Finance. In responding to the comments of the Department of Justice, Applicant pointed to the fact that Finance's position in the consumer loan industry has seriously eroded in recent years, with the company experiencing substantial declines in assets, net income, and shareholders' equity during the period from 1970 to 1972. More recent data confirm that the trend has continued to the present, as earnings for the first five months of 1973, compared to the same period in 1972, are down sharply. Of greater immediate consequence has been the downgrading of credit ratings on debt issues of Finance by two national credit-rating agencies since the Board's denial of the original application. The credit rating of Finance's senior debentures was lowered by one agency because of inadequate earnings protection for bond holders and lack of financial flexibility, while, in a separate action, a second agency withdrew its "prime" rating for commercial paper issued by Finance. The latter action is of particular significance to the financial condition of Finance since many corporate and municipal investors either cannot or will not purchase commercial paper not carrying a prime rating. Finance's financial condition and its ability to meet its near term obligations is further impaired by excessive lending to its parent organization in an attempt to ameliorate the parent's cash flow problems. This sequence of events, together with other financial information brought to the Board's attention concerning Finance and its parent organization, evidences the fact that Finance must be sold for cash, and sold promptly, to a buyer of considerable financial strength to avoid the collapse of Finance and its parent, and possibly serious financial repercussions of a more general nature. The Board regards these circumstances to be of a sufficiently serious nature as to warrant immediate consideration of Applicant's revised proposal. The Board therefore granted reconsideration under § 262.3(f)(6) of its rules of procedure.

To aid in its analysis and determination on the revised proposal, the Board asked the Department of Justice for its comments. The Department continued to oppose the proposal, submitting that it involves potential adverse competitive and concentration of resources considerations and is lacking in significant public benefits. However, it appears that the Department was not fully aware of the immediate financial emergency confronting Finance and its possible consequences.

Applicant's proposal to sell within one year all consumer loan offices of Finance in nine western States besides California and one-half of Finance's consumer loan offices in the States of Colorado and Texas in large measure eliminates the Board's earlier expressed concern over the question of probable future competition between Applicant, its subsidiaries, and Finance. Applicant must be regarded as a likely entrant into the consumer finance industry and this is particularly true in those States closest to California where the competitive presence of Applicant's banking subsidiary is most keenly felt. While this proposal substantially diminishes the Board's concerns regarding adverse competitive effects, retention of any offices in Colorado or Texas would continue to raise competitive problems due to Applicant's present competitive presence in those States exemplified by Applicant's present mortgage subsidiaries in those States. Divestiture of all consumer loan offices held by Finance in California and in all 11 western States closest to California, including all such offices in Colorado and Texas, would achieve a significant geographic separation between Applicant and the office facilities of the company to be acquired. Therefore, consummation of the proposal on condition that a divestiture of this nature takes place would reduce substantially the possible adverse effect on probable future competition as a factor to be considered under section 4(c)(8). Furthermore, the Board believes that such a divestiture is practical as finance company offices and their assets are more readily marketable than banks, for example.

In its consideration of the original proposal, the Board was also concerned with the question of undue concentration of resources. The initial proposal, if approved, would have permitted affiliation of Applicant's banking subsidiary, which operates more than 1,000 branches in California, with a company retaining 423 consumer loan offices in 40 States from coast to coast. The instant proposal constitutes a substantial reduction in the resources to be acquired by Applicant; it will accomplish significant geographic separation of office facilities and significant reductions in both assets and offices acquired by Applicant. As conditioned by the Board's Order of this date, Applicant must sell, as going concerns, all of Finance's 128 consumer loan offices in 12 western States and must close its sales finance offices in New Mexico. In addition, Applicant will be required to sell, as a going concern, the entire rediscount business of Finance and to divest an additional $25 million in sales finance receivables and approximately $77 million in commercial financing receivables. As a consequence of these actions, Finance's total net receivables, using June 30, 1973, data, will be reduced from $575.7 million to $296 million and its national rank, in terms of total net receivables, among all independent finance companies would drop from eleventh to twentieth position. In light of the extensive divestitures to be accomplished by Applicant in this case, the possible dangers of an undue concentration of resources are significantly lessened and the Board no longer views this factor as warranting the degree of adverse weight initially assigned.

The public benefits reasonably expected to result from approval of the revised proposal remain essentially the same as when first considered by the Board with the exception of those related to the condition of Finance and its parent. Developments in the intervening days have demonstrated the validity of the previously expressed fears as to the fragility of the structure of borrowed funds relied upon by Finance. It is imperative that Finance be sold immediately to avoid possible severe economic consequences and to insure its continuation as a viable competitor. Acquisition and subsequent partial divestiture by Applicant will insure that survival as well as preserve the existing number of possible competitors in the western United States. Additionally, entry of Applicant with its record of innovation in the consumer field should produce public benefits in the eastern United States. The Board concludes that the reasonably expected public benefits from this revised proposal outweigh possible adverse effects.

This statement is published by order of the Board of Governors, August 14, 1973.

[SEAL] CHESTER B. FELDBERG,
Secretary of the Board.

CENTRAL MORTGAGE CO., INC.

Order Granting Determination Under Bank Holding Company Act

In the matter of the request by Central Mortgage Co., Inc. (Central), Springfield, Missouri, for a determination pursuant to section 2(g)(3) of the Bank Holding Company Act of 1956 (12 U.S.C. 1841(g)(3)).

Central, a bank holding company within the meaning of section 2(a) of the Bank Holding Company Act (12 U.S.C. 1841(a)) on the basis of its ownership of voting shares of Citizens Bank of Warrensburg, Warrensburg, Missouri,[1] seeks a determination that Central will not, in fact, be capable of controlling Mr. Adrian Harmon, to whom Central proposes to transfer shares of a subsidiary corporation to be formed, the assets of which will be comprised of the present farming assets of Central. Mr. Harmon is president and a director of Central and will be a director of the farming corporation to be formed.

Notice of an opportunity for hearing with respect to Central's request for a determination pursuant to section 2(g)(3) was published in the FEDERAL REGISTER on April 5, 1973 (38 FR 8692). The time provided for requesting a hearing has expired and no such request has been received by the Board, nor has any evidence been received to show that Central is in fact capable of controlling Mr. Harmon.

It is hereby determined that Central is not, in fact, capable of controlling Mr. Harmon. This determination is based upon the evidence of record in this matter, including (1) the applications of Central Mortgage Co. to acquire 50 per cent or more of the voting shares of Farmers Bank of Stover, Stover, Missouri, and Jackson County State Bank, Kansas City, Missouri, and to merge with Harmon Oil Company, Warrensburg, Missouri, and (2) an affidavit of April 17, 1973, of Mr. Harmon stating that he and his wife, as of that date, own all of the shares of Central, and that Central Mortgage will not be capable of controlling the farming assets which will be solely controlled by Mr. Harmon and his wife.

Accordingly it is ordered, That the request of Central Mortgage Co. for a determination pursuant to section 2(g)(3) be and hereby is granted.

By order of the Board of Governors, acting through its General Counsel, pursuant to delegated authority (12 CFR 265.2), August 14, 1973.

[SEAL] CHESTER B. FELDBERG,
Secretary of the Board.

MARINE BANCORPORATION

Order Approving Acquisition of Certain Assets of Triway Finance Co.

Marine Bancorporation, Seattle, Washington, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval, under section 4(c)(8) of the Act and § 225.4(b)(2) of the Board's Regulation Y, to acquire indirectly certain assets of Triway Finance Co. (Triway), Portland, Oregon, through Applicant's wholly-owned subsidiary, Commerce Credit Company, Seattle, Washington. Applicant's subsidiary would acquire the small loan business of Triway and, operating under the name of Commerce Finance Company, would thereby engage in the activity of making small secured and unsecured loans not in excess of $5,000, subject to the restrictions and limitations specified in the Oregon Consumer Finance Act (Oregon Revised Statutes, Chap. 725). Such activity has been determined by the Board to be closely related to banking (12 CFR 225.4(a)(1)).

Notice of the application, affording opportunity for interested persons to submit comments and views on the public interest factors, has been duly published (38 FR 16677). The time for filing comments and views has expired, and none has been timely received.

Applicant, the largest bank holding company in the State, has one subsidiary bank, The National Bank of Commerce of Seattle, Seattle, Washington, which is the second largest bank in Washington with approximately $1.4 billion in deposits, representing 20.2 per cent of total deposits in commercial banks in the State.[1]

Triway has total assets of $457,000, and operates a small loan and accounts receivable financing business in the Portland, Oregon, area. Applicant proposes to acquire approximately 90 per cent of the portfolio of small loan accounts originated by Triway, together with the furniture and fixtures located at Triway's single office. The accounts receivable financing business will be retained by the present owners of Triway Finance Co.

In its small loan activities, Triway competes with over 30 consumer finance companies, many of which are national corporations, and with other lenders which make consumer-type loans in the Portland area. The overall market for consumer credit in Portland appears to be reasonably competitive, and it is unlikely that the proposed acquisition would have any significant adverse effect on competition or on existing competitors in the market.

Applicant's subsidiary, Commerce Credit Company (CCC), operates two small loan businesses in the State of Washington both of which were recently established de novo. In addition, Applicant has received approval for CCC to establish two de novo offices in the Portland, Oregon, area that will engage in making and acquiring loans and other extensions of credit and in leasing personal property. These offices will not be licensed to engage in the small loan business under the Oregon Consumer Finance Act (ORS Chap. 725), while Triway's business is confined to that of making small loans under the Oregon Consumer Finance Act. Since the de novo offices are not and will not be licensed to engage in the small loan business, the proposed acquisition would not appear to eliminate any existing or future competition. The Board concludes that competitive considerations are consistent with approval of the application.

It is anticipated that by providing access to the greater financial and managerial resources of Applicant, Applicant's acquisition of Triway's small loan business will result in a greater availability of credit than can be provided by the present owners of Triway. There is no evidence in the record indicating that consummation of the proposed acquisition would result in undue concentration of resources, unfair competition, conflicts of interests, unsound banking practices, or other adverse effects.

Based upon the foregoing and other considerations reflected in the record, the Board has determined that the balance of the public interest factors the Board is required to consider under section 4(c)(8) is favorable. Accordingly, the application is hereby approved. This determination is subject to the conditions set forth in § 225.4(c) of Regulation Y and to the Board's authority to require such modification or termination of the activities of a holding company or any of its subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the Act and the Board's regulations and orders issued thereunder, or to prevent evasion thereof.

By order of the Board of Governors,[2] effective August 14, 1973.

[SEAL] CHESTER B. FELDBERG,
Secretary of the Board.

SECURITIES AND EXCHANGE COMMISSION

[70-5372]

DELMARVA POWER & LIGHT CO.

Proposed Issue and Sale of Short-Term Notes

AUGUST 17, 1973.

Notice is hereby given that Delmarva Power & Light Company ("Delmarva"), 800 King Street, Wilmington, Delaware 19899, a registered holding company and a public-utility company, has filed with this Commission a declaration pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating sections 6(a) and 7 of the Act and Rule 50(a)(2) and 50(a)(5)(C) promulgated thereunder as applicable to the proposed transactions. All interested persons are referred to the declaration, which is summarized below, for a complete statement of the proposed transactions.

By order dated December 28, 1971 (Holding Company Act Release No. 17412), the Commission authorized Delmarva to make bank borrowings (on unsecured short-term notes) and to issue and sell commercial paper, through December 31, 1973, in an aggregate principal amount at any one time outstanding not to exceed $40,000,000. This order was later amended on July 24, 1972 (Holding Company Act Release No. 17655), at which time Delmarva was temporarily authorized to increase its sales of commercial paper to an aggregate principal amount at any one time outstanding not to exceed $50,000,000, until such time as the $30,000,000 First Mortgage and Collateral Trust Bonds, 7½ percent Series, due August 1, 2002, were successfully sold and the proceeds thereof made available to Delmarva. The order was further amended on March 20, 1973 (Holding Company Act Release No. 17910), at which time Delmarva was authorized to increase through July 31, 1974 its borrowings on notes up to an aggregate principal amount at any time not to exceed $56,000,000, with the notes issued and sold to banks aggregating not in excess of $16,500,000 outstanding at any one time.

Delmarva states that at its annual meeting of stockholders, held on April 17, 1973, it obtained the required consent of the holders of preferred stock and common stock, each group voting separately as a class, to amend Delmarva's Certificate of Incorporation to liberalize the unsecured debt limitation to permit issuance, without further consent of preferred stockholders, of up to 20 percent of capitalization as long as no more than 10 percent of such indebtedness has maturities of less than ten years. At the same meeting Delmarva obtained the consent of preferred stockholders to waive the 10 percent limitation on indebtedness with maturities of less than ten years, provided the total unsecured debt does not exceed 20 percent of capitalization.

Delmarva now proposes to issue, from time to time until December 31, 1974, short-term securities in an aggregate principal amount not to exceed $75,000,000 outstanding at any one time and to increase the portion of such notes which may be issued to banks and outstanding at any one time from $16,500,000 to $43,000,000. Such securities will be in the form of short-term notes issued to banks, or commercial paper issued to a dealer in such securities or issued directly to investors in commercial paper. Issues of commercial paper will be limited only to the extent that, when added to short-term notes to banks actually outstanding on the date of issuance, the total will not exceed $75,000,000. Delmarva requests that, for the period commencing on September 10, 1973 and ending on December 13, 1974, the exemptions from the provisions of Section 6(a) of the Act afforded to it by the first sentence of Section 6(b) thereof, relating to the sale of short-term notes, be increased from 5 percent to approximately 16.5 percent of the principal amount and par value of the other securities of Delmarva at the time outstanding.

Delmarva expects to borrow from the following banks up to the maximum amounts listed:

Irving Trust Company, New York, N.Y.	$5,000,000
Wilmington Trust Company, Wilmington, Delaware	5,400,000
Bank of Delaware, Wilmington, Delaware	3,500,000
Farmers Bank of the State of Delaware, Wilmington, Delaware	2,000,000
Delaware Trust Company, Wilmington, Delaware	1,800,000
First National Bank of Maryland, Salisbury and Baltimore, Maryland	5,300,000
Total	$23,000,000

Delmarva will maintain average daily operating balances with each of the above banks, in the aggregate averaging approximately $2,000,000. These balances are part of Delmarva's normal operating funds. If such balances were maintained solely to satisfy compensating balance requirements, the effective interest cost on such bank lines of credit when fully utilized, assuming a 9 percent prime rate, would be 9.86 percent per annum. The proposed bank notes will be in the form of unsecured promissory notes bearing interest at the prime rate in effect at the lending bank at the date of issue and adjusted from time to time depending upon the requirements of the lender and subject to prepayment at Delmarva's option without premium or penalty.

Although no firm arrangements have yet been made, Delmarva plans to establish additional bank lines aggregating $20,000,000 with certain major banks in New York, Philadelphia and Chicago (as set forth below), which bank lines will be administered by Wilmington Trust Company for Delmarva. While it is not expected that a problem in refinancing will occur, Delmarva states that establishment of these lines would be evidence of sound financial management and would tend to support the top credit rating presently assigned to Delmarva's commercial paper.

Delmarva is contemplating establishing the following additional bank lines of credit:

Manufacturers Hanover Trust Company, New York, N.Y.	$8,000,000
Bankers Trust Company, New York, N.Y.	3,000,000
Chemical Bank, New York, N.Y.	3,000,000
Philadelphia National Bank, Philadelphia, Pennsylvania	3,000,000
Continental Illinois National Bank and Trust Company of Chicago, Chicago, Illinois	3,000,000
Total	$20,000,000

Since Delmarva will not maintain operating balances in any of the banks referred to above, it will be required to pay a commitment fee of ½ of 1 percent per year on the unused amount of the bank lines per bank. When a bank line is in use, the commitment fee will be discontinued and Delmarva will pay 1 percent over the prime rate in effect at the lending bank. At the time a bank note is issued, Delmarva will not be required to maintain compensating balances with the lending bank. Since Delmarva states it does not anticipate use of these lines of credit, a commitment fee amounting to $100,000 per year will be incurred and charged to the operating expenses of Delmarva. Delmarva feels the additional cost is justified by the flexibility in financing obtained through establishment of this alternative source of credit. In the event the lines are used, the effective interest rate on the borrowings under this arrangement, assuming a 9 percent prime rate, could range from 10 percent when 100 percent of the lines are in use to approximately 11 percent when 25 percent of the lines are in use.

These arrangements with banks, totalling up to $43,000,000 in bank lines of credit, can be used to provide an alternative source of credit for somewhat in excess of 50 percent of Delmarva's total commercial paper at any one time outstanding. All of the bank loans will be evidenced by notes maturing not more than 180 days from the date of issuance and will bear interest at the rates described above in effect as of the dates the notes are executed. The notes may be prepaid at any time without penalty except that Delmarva may not prepay any note in whole or in part from the proceeds of any subsequent bank loan at a lower rate of interest. Repayment of bank loans may also be made out of the proceeds from the issuance and sale of short-term commercial paper.

Delmarva further proposes to issue and sell, from time to time, commercial paper (in the form of short-term promissory notes payable to bearer and to mature not later than December 31, 1974), in the aggregate principal amount not to exceed $75,000,000 outstanding at any one time, to A. G. Becker & Co., Incorporated ("Becker"), a dealer in commercial paper. Such commercial paper will have varying maturities of not more than 270 days after date of issue and will be issued and sold in varying denominations of not less than $50,000 nor more than $1,000,000 directly to Becker, at a discount which will not be in excess of the discount rate per annum prevailing at the date of issuance for commercial paper of comparable quality and like maturities sold to commercial paper dealers. No commercial paper notes will be issued having a maturity of more than 90 days at an effective interest cost which exceeds the effective interest cost at which Delmarva could borrow from banks. No commission or fee will be payable in connection with the issue and sale of such notes. Becker, as principal, will reoffer such notes at a discount not to exceed ⅛ of 1 percent per annum less than the prevailing discount rate available to Delmarva and in such manner as not to constitute a public offering. Such notes will be reoffered to not more than 200 identified and designated customers in a list (non-public) prepared in advance by Becker and furnished to the Commission either by Delmarva or directly by Becker. However, since the list consists initially of less than 200 customers, additions but no deletions may be made to the list upon approval of the Commission so long as the customers designated in the list do not exceed 200 in number. It is anticipated that the commercial paper will be held by customers to maturity. However, if any commercial paper is repurchased by Becker pursuant to a verbal repurchase agreement, such paper will be reoffered only to others in the group of not more than 200 customers. Delmarva desires the flexibility of using commercial paper borrowings to supplement its bank borrowings. In accordance with the customary practices in the commercial paper market, commercial paper issued and sold by Delmarva will not be payable prior to maturity. However, prior to the final retirement of commercial paper borrowings, certain of the notes having maturities earlier than December 31, 1974, the termination date of the effective period requested by this application, may be repaid at maturity through the application of proceeds from the issuance and sale of other commercial paper notes.

Delmarva intends to appoint Irving Trust Company, New York, New York, agent for the purpose of holding in its custody short-term promissory notes of Delmarva, signing such notes and delivering them to Becker in connection with the issuance and sale thereof by Delmarva.

In addition, Delmarva desires the privilege of placing its commercial paper directly with investors in commercial paper, without the assistance of a broker, in order to take advantage of special investment situations which may be available to it due to Delmarva's broadly based activities in the financial community. These "direct placements" could be with the trust departments of large commercial banks or with the investment departments of large insurance companies and would be in accordance with the terms and conditions of a "master note" agreement. Historically, the effective interest cost to the issuer of commercial paper placed directly has been lower than that placed through a dealer. Delmarva is requesting permission to place commercial paper directly not as a replacement of, but as a supplement to, its normal outlets and it feels substantial interest costs could be saved for its customers and stockholders if it were authorized to do so.

It is stated the borrowings on unsecured bank loans and/or commercial paper, aggregating up to $75,000,000, will be used to finance, in part, Delmarva's construction program for the remainder of 1973 and all of 1974 (approximately $213,408,000). Delmarva proposes to repay such borrowings from the net proceeds of the sale of first mortgage bonds and/or equity securities prior to December 31, 1974, a subject of future filings with this Commission.

Delmarva requests exemption from the competitive bidding requirements of Rule 50 for the proposed issue and sale of its commercial paper pursuant to paragraphs (a)(5) and (a)(5)(C) thereof because: (i) The commercial paper to be issued thereunder will consist of short-term maturities of nine months or less; (ii) such commercial paper having a maturity of more than 90 days will not be sold except at effective interest costs which will not exceed the cost of borrowings from commercial banks; (iii) current rates for commercial paper for such prime borrowers as Delmarva are published daily in financial publications; and (iv) it is not practical to invite competitive bids for commercial paper. Delmarva also requests authority to file certificates of notification under Rule 24 with respect to the issue and sale of commercial paper within 30 days after the end of each calendar quarter.

It is stated that no State commission and no Federal commission, other than this Commission, has jurisdiction over the proposed transactions. The fees and expenses to be incurred in connection with the proposed transactions are estimated to be $10,500, including counsel fees of $2,000.

Notice is further given that any interested person may, not later than September 10, 1973, request in writing that

V 38-162 AUG 22 73 XUM

a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said declaration which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon the declarant at the above-stated address, and proof of service (by affidavit or, in case of an attorney-at-law, by certificate) should be filed with the request. At any time after said date, the declaration, as filed or as it may be amended, may be permitted to become effective as provided in Rule 23 of the General Rules and Regulations promulgated under the Act, or the Commission may grant exemption from its rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive notice of further developments in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

[SEAL] RONALD F. HUNT, *Secretary.*

[812-3483]

duPONT-WALSTON INCORPORATED

Filing of Application

AUGUST 17, 1973.

Notice is hereby given that duPont-Walston Incorporated ("Applicant"), 833 Wilshire Boulevard, Los Angeles, California 90017, a registered broker-dealer, in connection with a proposed public offering of shares of Common Stock (the "Shares") of Ameribond Shares, Inc. (the "Company"), a newly registered, closed-end, diversified management investment company has filed an application pursuant to section 6(c) of the Investment Company Act of 1940 ("Act") for an order exempting Applicant and its co-underwriters from section 30(f) of the Act to the extent that such section adopts section 16(b) of the Securities Exchange Act of 1934 ("Exchange Act") with respect to their transactions incidental to the distribution of the Company's shares. All interested persons are referred to the application on file with the Commission for a statement of the representations therein, which are summarized below.

Applicant is the prospective representative ("Representative") of a group of underwriters ("Underwriters") to be formed in connection with the proposed public offering. Applicant contemplates that each underwriter, including the Representative, will execute an Agreement Among Underwriters and that the Representative, acting both for itself and as Representative of the several Underwriters, will execute an Underwriting Agreement with the Company, Financial Programs, Inc., the Company's investment adviser ("Adviser") and The Gates Rubber Company, the Adviser's parent.

The application also states that on July 5, 1973 the Company filed with the Commission a Registration Statement on Form S-4 under the Securities Act of 1933 ("Registration Statement") covering the Shares. The proposed public offering price of the Shares is $25.00 per share with underwriting discounts of $2.00 per share.

Applicant states that it is not possible to determine until just prior to the effective date of the Registration Statement the exact number of Shares to be offered by the underwriting group and by each Underwriter. Although 1,000,000 Shares have been included for registration in the Registration Statement, the actual number of Shares which may be the subject of the proposed public offering may be increased or decreased by the Representative and the Company, because of market conditions or otherwise, shortly before the effective date of the Registration Statement and the proposed public offering, and thereafter depending upon the exercise of an over-allotment option granted to the Underwriters. In addition to purchases of Shares from the Company and sales of Shares to customers, there may be the usual transactions of purchase or sale incident to a distribution such as stabilizing purchases, purchases to cover over-allotments or other short positions created in connection with such distribution, and sales of Shares purchased in stabilization.

Applicant also states that it is possible that the Underwriter Commitment of any one or more of the Underwriters, including the Representative, will exceed 10 percent of the aggregate number of shares of the Company's Common Stock. Since section 30(f) of the Act subjects every person who is directly or indirectly the beneficial owner of more than 10 percent of any class of outstanding securities of the Company to the same duties and liabilities as those imposed by section 16 of the Exchange Act, such Underwriter or Underwriters would become subject to the filing requirements of Section 16(a) of the Exchange Act and, upon resale of the shares purchased by them to their customers, subject to the obligations imposed by section 16(b) of the Exchange Act.

Rule 16b-2 under the Exchange Act exempts certain transactions in connection with a distribution of securities from the operation of section 16(b). Applicant states that the purpose of the purchase of the Shares by the Underwriters will be for resale in connection with the initial distribution of the Shares. Applicant also states that such purchases and sales, therefore, will be transactions effected in connection with a distribution of a substantial block of securities within the purpose and spirit of Rule 16b-2.

Applicant further states that although it is anticipated that the requirements of Rule 16b-2(a)(1) and (2) will be met, one or more of the Underwriters, through their participation in the distribution of the Shares of the Company, may not be entitled to rely upon Rule 16b-2 to exempt them from section 16(b) of the Exchange Act. The requirements in Rule 16b-2(a)(3) that the aggregate participation of Underwriters not within section 16(b) of the Exchange Act be at least equal to the participation of Underwriters exempted therefrom under Rule 16b-2 may not be met because it is possible that one or more of the Underwriters may purchase more than 10 percent of the aggregate number of the Shares of the Company's Common Stock to be outstanding after the closing, as a result of obligations to purchase additional Shares due to defaults by other Underwriters. Moreover, one or more of the Underwriters who are obligated through the Underwriting Agreement to purchase more than 10 percent of the aggregate number of Shares of the Company's Common Stock to be outstanding after the closing, may, as Underwriters and as selected dealers, distribute more than 50 percent of the aggregate number of Shares being offered. Such a distribution would not meet the requirement of Rule 16b-2(a)(3).

Applicant states that there is no inside information in existence since the Company, prior to the initial distribution of the Shares, will have no assets other than cash and certain contract rights described in the preliminary prospectus, or business of any sort, and all material facts with respect to the Company will be set forth in the prospectus pursuant to which the Shares will be offered and sold. No partner, director or officer of Applicant is a director or officer of either the Company or the Adviser or The Gates Rubber Company, and Applicant states that it is not anticipated that any partner, director or officer of any other Underwriter will be a director or officer of the Company, the Adviser or The Gates Rubber Company.

Applicant maintains that the requested exemption from the provisions of section 30(f) of the Act is necessary and appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act. It further asserts that the transactions sought to be exempted cannot lend themselves to the practices to which section 16(b) of the Exchange Act and section 30(f) of the Act were enacted to apply.

Section 6(c) of the Act authorizes the Commission to exempt any person, security or transaction, or any class or classes of persons, securities or transactions, from any provision of the Act and Rules and Regulations promulgated thereunder if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested person may, not later than September 6, 1973, at 5:30 p.m., submit to the Commission in writing a request for a hearing on this matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon Applicant at the address stated above. Proof of such service (by affidavit, or in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. At any time after said date, as provided by Rule O-5 of the Rules and Regulations promulgated under the Act, an order disposing of the application herein may be issued by the Commission upon the basis of the information stated in said application, unless an order for hearing upon said application shall be issued upon request or upon the Commission's own motion. Persons who request a hearing or advice as to whether a hearing is ordered, will receive notice of further developments in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management Regulation, pursuant to delegated authority.

[SEAL] RONALD F. HUNT, *Secretary.*

[FR Doc.73-17810 Filed 8-21-73;8:45 am]

[812-3452]

NATIONAL HOUSING PARTNERSHIP-II ET AL.

Filing of Application

AUGUST 16, 1973.

Notice is hereby given that The National Housing Partnership-II (NHP-II), a District of Columbia limited partnership, and its general partners, National Corporation for Housing Partnerships ("Corporation"), a District of Columbia corporation, and The National Housing Partnership ("NHP-I"), 1133-15th Street, NW., Washington, D.C. 20006, a District of Columbia limited partnership (collectively referred to hereinafter as "Applicants"), have filed an application pursuant to section 6(c) of the Investment Company Act of 1940 ("Act") for an order exempting NHP-II from all provisions of the Act and the Rules and Regulations promulgated thereunder. All interested persons are referred to the application on file with the Commission, as amended, for a statement of the representations therein which are summarized below.

NHP-II's principal activity will be to purchase from NHP-1 a substantial portion of NHP-I's equity interests in governmentally assisted rental housing projects which are being, or are about to be, constructed pursuant to section 221(d)(3), section 221(d)(4), or section 236 of the National Housing Act, and administered by the Federal Housing Administration ("FHA"), or pursuant to comparable state housing programs.

Corporation and NHP-I, which are the general partners of NHP-II, were formed pursuant to Title IX of the Housing and Urban Development Act of 1968 ("Title IX") in order to carry out the purpose of Title IX that private investors be provided a means to acquire equity interests in, and thereby provide equity financing for, governmentally assisted low and moderate income housing projects. Three of the Corporation's fifteen directors are appointed by the President of the United States, and the Corporation is required to report to the President annually.

Investment Units in Corporation and NHP-I have previously been offered at a price of $50,000 per Unit. Each Unit consisted of 250 shares of stock of Corporation (for $2,500) and a $47,000 limited partnership interest in NHP-I. The minimum investment was two Units, and subscriptions were accepted only from corporations and other organizations having substantial assets, but not from individuals. In connection with this offering, NHP-I applied for and was granted complete exemption from the Act. Subscriptions were received from 268 investors for Units aggregating $42,050,000. Of each $100,000 investment, $25,000 was paid in cash upon subscription, the balance to be subject to call. Since that time, two additional installments of $6,250 each per $10,000 minimum subscription have been paid in so that a total of $15,768,750 of the $42,050,000 total commitment has been paid in cash to Corporation and NHP-I. NHP-I investors were originally obligated until December 31, 1974, to contribute the balance, $26,281,250, upon call. After it was determined that NHP-II should be created, this date was extended to December 31, 1979. Unless programs established by the governments of the states and of the United States to stimulate the production of low and moderate income housing are modified so as to virtually eliminate investment incentives, NHP-I will require its investors to contribute the balance of their subscriptions.

Since its formation, NHP-I has committed investment funds to 122 housing projects for families and individuals of low and moderate income. During the summer of 1972, the point was rapidly being reached at which all of NHP-I's available capital would be committed to projects and there would be no capital available to pay for the services of the Corporation in overseeing the projects, or to enable NHP-I to stand ready with cash to assist local partnerships that encounter difficulties during the development stage. NHP-II was created for the purpose of serving as a medium to obtain new capital from individual public investors to be used in the enterprise in which Corporation and NHP-I were engaged.

NHP-II has filed a registration statement under the Securities Act of 1933 covering the sale of up to 6,000 "Units," each consisting of two limited partnership interests ("1973 LPI's") and rights to purchase three additional limited partnership interests ("1974 LPI's"). These interests are to be sold only to qualified investors with a minimum subscription of five Units per investor (ten in Texas and 20 in Michigan and Wisconsin). Units are to be offered at a maximum price of $1,000 per Unit, and rights are to be exercisable at a maximum price of $500 per right. The proceeds to NHP-II of the sale of all the Units registered will be $5,550,000, and the proceeds to NHP-II, if all rights are exercised, will be $8,325,000, for a total of $13,875,000. The minimum investment, assuming exercise of all rights, is $12,500. NHP-I will at all times have a 5% general partnership interest in NHP-II, and NHP-I will acquire its interest for cash at the same price as the public, net of selling commissions. NHP-I will also purchase any 1974 LPI's covered by unexercised rights.

Units will be sold only to a person who represents in writing, among other things that (1) he has a net worth of at least $50,000 ($100,000 in California, Illinois, or Michigan and $200,000 in Pennsylvania) exclusive of the value of homes, furnishings, and personal automobiles, (2) he anticipates that during his current tax year he will have income a portion of which will be subject to federal income taxation at a rate not less than 50 percent (48 percent in the case of a corporation) after taking into account losses from his investments in Units, and (3) he recognizes that he may not be able to sell or dispose of his investment. The prospectus describing the Units states that they are suitable only for persons who have adequate financial means and substantial taxable income and who have no need for liquidity with respect to their investment. The prospectus also states that Units should be purchased only as a long-term investment primarily for tax benefits and not in anticipation of cash distributions or capital appreciation.

NHP-II, like NHP-I, was organized as a limited partnership because applicable legislation limits the cash return to investors in subsidized projects to an amount less than can be had in other investments. The principal advantages to investors, therefore, are operating losses which only a partnership can pass through to investors as an offset against taxable income. A limited partnership structure is necessary in order to provide the centralization of management necessary for a publicly held partnership, and to insure that public investors are protected from personal liability for any obligations of NHP-II.

NHP-II will invest in the housing projects by becoming a limited partner in a subsidiary partnership ("local partnership") in which the sponsor or developer of the project will, along with NHP-I (or,

V 38-162 AUG 22 73 XUM

in one case, Corporation), be general partners. NHP–II will acquire its interests in local partnerships from NHP–I. NHP–II will usually have a majority and frequently 70 percent-80 percent interest in the local partnership. Each local partnership will own the entire equity interest in the project, but neither it nor any partner will be liable for the mortgage loan on the project, which will in each case be a non-recourse loan. The Corporation and NHP–I have agreed to retain their remaining interests in each local partnership in which NHP–II invests for as long as NHP–II retains an interest in such local partnership, and to sell or otherwise dispose of their interests only on terms no more favorable than those on which NHP–II disposes of its interest.

To the extent of its available capital, NHP–II will invest in all of NHP–I's projects, in the order in which they reach the start of construction, except projects that were partially or wholly occupied on February 1, 1973, projects that had not, as of June 1, 1973, received letters of feasibility or similar assurances from FHA or a state agency, and projects in which neither the Corporation nor NHP–I is a general partner. NHP–II may invest only up to 10 percent of its available funds in projects that are not identified in the prospectus of NHP–II if NHP–I acquires additional projects that meet the criteria for NHP–II investment before the projects identified in the prospectus have done so.

In purchasing interests from NHP–I, NHP–II will pay a base price that is either equal to NHP–I's cost for the interest being sold or (where this cost cannot be calculated because NHP–I bears certain risks) a figure (which may be more than cost) established by a formula in lieu of actual cost. In addition, NHP–II will pay a markup equal to 5 percent of the base price.

In addition to the amount payable to NHP–I as the purchase price for interests in local partnerships, NHP–II will pay the following three fees to Corporation: a Development Supervisory Fee, a Management Fee, and a Disposition Fee. For the period from September 1, 1973 through December 31, 1975, NHP–II will pay the Corporation a Development Supervisory Fee of $600,000, payable $240,000 on September 1, 1973, $240,000 on August 1, 1974, and $120,000 on August 1, 1975. For the period from September 1, 1973 through December 31, 1975, NHP–II will pay the Corporation a Management Fee of $900,000. This fee will be paid in three installments: $360,000 on September 1, 1973, $360,000 on August 1, 1974, and $180,000 on August 1, 1975. To the extent that fewer than the 6,000 Units being offered by NHP–II are sold, the Development Supervisory Fee and the Management Fee will be reduced proportionately. Beginning with the year 1976, NHP–II will normally pay the Corporation an annual Management Fee equal to one-half of NHP–II's net cash flow for the year from local partnerships, subject to a maximum of $15 per rental unit and a maximum of 2 percent of NHP–II's allocable share of stated equity in projects.

If the Corporation is able to arrange the sale or refinancing of a project on terms that enable NHP–II to recover cash in addition to the amount needed to permit investors in NHP–II to pay the income taxes they incur on the transaction, NHP–II will pay Corporation a Disposition Fee equal to 30 percent of the net cash proceeds of the sale of refinancing of a project after deducting such taxes.

With respect to each sale by NHP–I to NHP–II of a portion of NHP–I's interest in a project, NHP–I will undertake to assure that the local partnership will receive a certificate from the appropriate authority to the effect that construction is substantially complete and in compliance with applicable regulations, that the project is at least partially occupied by a specified date, and that all of the local partnership's obligations incurred during the two years following the completion of construction are met. Beginning at the end of this two year period, NHP–II may be required, along with NHP–I, to lend funds to the project if it incurs an operating deficit and if Corporation, acting as the general partner of NHP–I, concludes that such funds should be lent. NHP–II will make such loans only out of the operating revenues from its projects, and if NHP–I does not have sufficient funds to make any loan that may be required, NHP–I will advance to NHP–II sufficient funds to make the loan.

Without conceding that NHP–II is an investment company, Applicants request that NHP–II be exempted from the provisions of the Act pursuant to section 6(c) of the Act. Section 6(c) authorizes the Commission to exempt any person, security, or transaction, or any class or classes of persons, securities, or transactions, from the provisions of the Act and Rules promulgated thereunder if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Applicants contend that the exemption of NHP–II from the provisions of the Act is both necessary and appropriate in the public interest because the form of organization of NHP–II, i.e., a limited partnership, which is necessary to provide private investors with certain tax advantages without which investment in subsidized low and moderate income housing would not be attractive, is not compatible with the Act. For example, the Act requires annual approval by investors of investment advisory agreements, election of directors and other action by investors that might, if applicable to investors who are limited partners, cause such partners to incur general liability.

Applicants contend that to defeat the limited partnership arrangement by application of the Act would be to eliminate the only available means of attracting private equity capital into government assisted housing and would frustrate the national policy declared by Congress to encourage the widest possible participation by private enterprise in the provision of housing for low and moderate income families.

Applicants also contend that the exemption would be consistent with the protection of investors and the purposes and policies underlying the Act because interests in NHP–II are being sold only to sophisticated investors and also because the investments in which NHP–II will participate, and the terms under which NHP–II will acquire such investments, are fully stated in the prospectus and are not subject to the discretion of management. Furthermore, Applicants state that NHP–II's investments will be governed by policies which may not be changed except by the vote of the holders of at least a majority of its outstanding interests, and that the limited partner investors in NHP–II will have voting rights with respect to, among other things, the dissolution of NHP–II, amendments to NHP–II's Limited Partnership Agreement and the Management Contract, and, under certain circumstances, the withdrawal of the general partners.

Applicants also state that the Corporation is required, as a general partner of both NHP–I and NHP–II, to act in a fiduciary capacity with respect to both NHP–I and NHP–II, and that while NHP–II or the local partnerships may engage in transactions with persons or entities affiliated with the general partners, or their directors, officers, employees or the limited partners in NHP–I, no significant transaction with any such person or entity is currently contemplated and any such transaction would be made only if the Corporation, as a fiduciary for NHP–II, has determined that the terms are reasonable and fair and consistent with the policies and purposes of NHP–II, do not involve overreaching on the part of any party, and are no less favorable to NHP–II than those offered by others in the same vicinity. NHP–II will have the right to terminate any contract with any such affiliated person or entity without penalty on 60 days' notice.

Notice is hereby given that any interested person may, not later than September 4, 1973 at 5:30 p.m., submit to the Commission in writing a request for a hearing on this matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon Applicants at the address stated above. Proof of such service (by affidavit or in case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. At any time after said date, as provided by Rule 0–5 of the Rules and Regulations promulgated under the Act, an order disposing of the application therein may be issued by the Commission upon the basis of the information stated in said application, unless an order for hearing upon said application shall be issued upon request or upon the Commission's own motion. Persons who request a hearing or advice as to whether a hearing is ordered will receive notice of further developments in this matter, including the date of the hearing (if ordered) and any postponements thereof.

By the Commission.

[SEAL] RONALD F. HUNT, *Secretary.*

[FR Doc.73-17809 Filed 8-21-73;8:45 am]

SMALL BUSINESS ADMINISTRATION

[License No. 06/06–5165]

SOUTHWEST URBAN VENTURES, INC.

Application for License as a Small Business Investment Company

An application for a license to operate as a small business investment company under the provisions of section 301(d) of the Small Business Investment Act of 1958, as amended (15 U.S.C. 661 et seq.), has been filed by Southwest Urban Ventures, Inc. (applicant), with the Small Business Administration (SBA) pursuant to 13 CFR 107.102 (1973).

The officers and directors of the applicant are as follows:

Bernard E. Brooks, President, Director, General Manager, 6666 Chetwood No. 265, Houston, Texas 77036.

James D. Crow, Vice President, Treasurer, Director, 720 Expressway Tower, Dallas, Texas 75206.

Melvin L. Rice, Secretary, Director, 6010 Elm, Apt. 1039, Houston, Texas 77036.

The applicant, a Texas corporation, with its principal place of business located at 4801 Richmond, Houston, Texas 77027, will begin operations with $500,000 of paid-in capital consisting of 2,000 shares of common stock of which 1,700 shares were sold to James D. Crow and 300 shares sold to Bernard E. Brooks, at $250 per share.

Applicant will not concentrate its investments in any particular industry. As an applicant for a license pursuant to section 301(d) of the Small Business Investment Act of 1958, as amended, its investments will be made solely in small business concerns which will contribute to a well-balanced national economy by facilitating ownership in such concerns by persons whose participation in the free enterprise system is hampered because of social or economic disadvantages.

Matters involved in SBA's consideration of the applicant include the general business reputation and character of the proposed owners and management, and the probability of successful operation of the applicant under their management, including adequate profitability and financial soundness, in accordance with the Small Business Investment Act and the SBA Rules and Regulations.

Any person may, on or before, submit to SBA written comments on the proposed licensee. Any such communication should be addressed to the Deputy Associate Administrator for Investment, Small Business Administration, 1441 L Street NW., Washington, D.C. 20416.

A copy of this notice shall be published in a newspaper of general circulation in Houston, Texas.

Dated August 13, 1973.

JAMES THOMAS PHELAN, *Deputy Associate Administrator for Investment.*

INTERSTATE COMMERCE COMMISSION

ATCHISON, TOPEKA AND SANTA FE RAILWAY CO., ET AL.

[Ex Parte No. 241; Seventh Revised Exemption No. 43]

Exemption Under the Mandatory Car Service Rules

AUGUST 16, 1973.

TO: The Atchison, Topeka and Santa Fe Railway Co., Burlington Northern Inc., Chicago and North Western Transportation Co., Chicago, Milwaukee, St. Paul and Pacific Railroad Co., Chicago, Rock Island and Pacific Railroad Co., Illinois Central Gulf Railroad Co., Missouri Pacific Railroad Co., Norfolk and Western Railway Co., Soo Line Railroad Co., Union Pacific Railroad Co.

It appearing, that there are massive movements of grain in progress in the states of Iowa, Kansas, Minnesota, Montana, Nebraska, North Dakota, Oklahoma, South Dakota, Texas, and Wyoming; that present supplies of plain boxcars owned by the railroads serving these states are inadequate to move the newly harvested grain to terminal elevators for safe storage; that use of available plain boxcars owned by other carriers for movements of this grain will substantially augment the car supplies of the railroads named herein.

It is ordered, That pursuant to the authority vested in me by Car Service Rule 19, the railroads named herein, and their short line connections, are hereby authorized to use and to accept from shippers shipments of grain originating at stations located in Iowa, Kansas, Minnesota, Montana, Nebraska, North Dakota, Oklahoma, South Dakota, Texas, and Wyoming, when loaded into plain 40-ft. narrow-door boxcars of various ownerships without regard to the requirements of Car Service Rule 2.

Exception: This exemption shall not apply to plain boxcars subject to Association of American Railroads' Car Relocation Directive No. 44.

Effective 11:59 p.m., August 15, 1973.

Expires 11:59 p.m., August 31, 1973.

Issued at Washington, D.C., August 13, 1973.

[Notice 325]

ASSIGNMENT OF HEARINGS

AUGUST 17, 1973.

Cases assigned for hearing, postponement, cancellation, or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested. No amendments will be entertained after the date of this publication.

MC–C–8073, Piggy-Back Service Co. and C. L. "Bill" Shupe—Investigation of Operations and Practices, now assigned September 24, 1973; MC 113678 Sub 484, Curtis, Inc., now assigned September 25, 1973; MC 125433 Sub 42, F–B Truck Line Company, now assigned September 26, 1973, will be held in Room 504, Post Office Building, 350 S. Main St., Salt Lake City, Utah.

MC 27500 Sub 6, Mishak Truck Line, Inc., now being assigned hearing October 31, 1973 (3 days), at Chicago, Ill., in a hearing room to be later designated.

MC 21455 Sub 31, Gene Mitchell Co., now being assigned hearing October 29, 1973 (2 days), at Chicago, Ill., in a hearing room to be later designated.

MC 119656 Sub 13, North Express, Inc., now being assigned hearing October 26, 1973 (1 day), at Chicago, Ill., in a hearing room to be later designated.

MC 109172 Sub 10, National Transfer, Inc., now assigned September 19, 1973, at Olympia, Washington, will be held in the Highway Licenses Bldg., 6th Floor, 12th and Washington Streets.

FILING OF MOTOR CARRIER INTRASTATE APPLICATIONS

AUGUST 17, 1973.

The following applications for motor common carrier authority to operate in intrastate commerce seek concurrent motor carrier authorization in interstate or foreign commerce within the limits of the intrastate authority sought, pursuant to section 206(a)(6) of the Interstate Commerce Act, as amended October 15, 1962. These applications are governed by Special Rule 1.245 of the Commission's rules of practice, published in the FEDERAL REGISTER, issue of April 11, 1963, page 3533, which provides, among other things, that protests and requests for information concerning the time and place of State Commission hearings or other proceedings, any subsequent changes therein, any other related matters shall be directed to the State Commission with which the application is filed and shall *not* be addressed to or filed with the Interstate Commerce Commission.

California Docket No. 54219, filed August 2, 1973. Applicant: FRANK'S TRUCKING, 2575 Williams Street, San Leandro, Calif. 94577. Applicant's representative: Raymond A. Greene, Jr., 100 Pine Street, Suite 2550, San Francisco, Calif. 94111. Certificate of public convenience and necessity sought to operate a freight service as follows: Transportation of *general commodities*, except the following: (1) Used household goods and personal effects not packed in accordance with the crated property requirements set forth in paragraph (d) of Item No. 10–C of Minimum Rate Tariff No. 4–A; (2) Automobiles, trucks, and buses, viz, new and used, finished or unfinished passenger automobiles (including jeeps), ambulances, hearses, and taxis; freight automobiles, automobile chassis, trucks, truck chassis, truck trailers, trucks and trailers combined, buses and bus chassis; (3) Livestock, viz, bucks, bulls, calves, cattle, cows, dairy cattle, ewes, goats, hogs, horses, kids, lambs, oxen, pigs, sheep, sheep camp outfits, sows, steers, stags, or swine; (4) Liquids, compressed gases, commodities in semi-plastic form and commodities in suspension in liquids in bulk, in tank trucks, tank trailers, tank semi-trailers, or a combination of such highway vehicles; (5) Commodities when transported in bulk in dump trucks or in hopper type trucks; (6) Commodities when transported in motor vehicles equipped for mechanical mixing in transit; (7) Cement; (8) Logs; and (9) Commodities of unusual or extraordinary value. Between all points and places in the San Francisco Territory, as described hereafter, and all points within ten miles of any point therein; Between all points on and within ten miles of the points on the following routes:

(a) Interstate Highway 680, between Mission San Jose and Martinez, inclusive; (b) Interstate Highway 80, between San Francisco and Vallejo, inclusive; (c) State Highway 4, between Pinole and Stockton, inclusive; (d) State Highway 24, between Oakland and Antioch, inclusive; and (e) U.S. Highway 50, between Oakland and Stockton, inclusive. In performing the service herein authorized, applicant may make use of any and all streets, roads, highways, and bridges necessary or convenient for the performance of said service. SAN FRANCISCO TERRITORY includes all the City of San Jose and that area embraced by the following boundary: Beginning at the point the San Francisco-San Mateo County Boundary Line meets the Pacific Ocean; thence easterly along said boundary line to a point 1 mile west of U.S. Highway 101; southerly along an imaginary line 1 mile west of and paralleling U.S. Highway 101 to its intersection with Southern Pacific Company right of way at Arastradero Road; southeasterly along the Southern Pacific Company right of way to Pollard Road, including industries served by the Southern Pacific Company spur line extending approximately 2 miles southwest from Simla to Permanente; easterly along Pollard Road to W. Parr Avenue; easterly along W. Parr Avenue to Capri Drive; southerly along Capri Drive to E. Parr Avenue; easterly along E. Parr Avenue to the Southern Pacific Company right of way; southerly along the Southern Pacific Company right of way to the Campbell-Los Gatos city limits; easterly along said limits and the prolongation thereof to the San Jose-Los Gatos Road; northeasterly along San Jose-Los Gatos Road to Foxworthy Avenue; easterly along Foxworthy Avenue to Almaden Road; southerly along Almaden to Hillsdale Avenue; easterly along Hillsdale Avenue to U.S. Highway 101; northwesterly along U.S. Highway 101 to Tully Road; northeasterly along Tully Road to White Road; northwesterly along White Road to McKee Road; southwesterly along McKee Road to Capitol Avenue; northwesterly along Capitol Avenue to State Highway 17 (Oakland Road); northerly along State Highway 17 to Warm Springs; northerly along the unnumbered highway via Mission San Jose and Niles to Hayward; northerly along Foothill Boulevard to Seminary Avenue; easterly along Seminary Avenue to Mountain Boulevard; northerly along Mountain Boulevard and Moraga Avenue to Estates Drive; westerly along Estates Drive, Harbord Drive, and Broadway Terrace to College Avenue; northerly along College Avenue to Dwight Way; easterly along Dwight Way to the Berkeley-Oakland boundary line; northerly along said boundary line to the campus boundary of the University of California; northerly and westerly along the campus boundary of the University of California to Euclid Avenue; northerly along Euclid Avenue to Marin Avenue; westerly along Marin Avenue to Arlington Avenue; northerly along Arlington Avenue to U.S. Highway 40 (San Pablo Avenue); northerly along U.S. Highway 40 to and including the City of Richmond; southwesterly along the highway extending from the City of Richmond to Point Richmond; southerly along an imaginary line from Point Richmond to the San Francisco Waterfront at the foot of Market Street; westerly along said waterfront and shore line to the Pacific Ocean; southerly along the shore line of the Pacific Ocean to point of beginning. Intrastate, interstate and foreign commerce authority sought.

HEARING: Date, time, and place not shown. Requests for procedural information should be addressed to the California Public Utilities Commission, State Building, Civic Center, 455 Golden Gate Avenue, San Francisco, Calif., 94102, and should *not* be directed to the Interstate Commerce Commission.

Missouri Docket No. T–32,708, filed August 9, 1973. Applicant: DADSON, INC., Anderson, Mo. 64831. Applicant's representative: Richard M. Webster, 112 N. Webb Street, Webb City, Mo. 64870. Certificate of public convenience and necessity sought to operate a freight service as follows: Transportation of *general commodities* except the following, to-wit: Explosives, chemicals in bulk, fertilizer in bulk, motor fuel in bulk, and any other commodity or product in bulk, and household furishings from residential property to residential property. Applicant proposes to serve all points within each of the following counties and all points between each of the following counties, to-wit: Jasper, Newton, McDonald, Barry, Lawrence, Dade, Barton, Stone, and Christian, Mo. Applicant seeks authority to accept property for transportation between points on the routes of

existing regular route common carriers and between points on the routes of any two or more regular route common carriers where through or joint service has been authorized or established. Intrastate, interstate, and foreign commerce authority sought.

HEARING: September 26, 1973, at the Circuit Court Room, McDonald County Court House, Pineville, Mo., at 10:00 A.M. Requests for procedural information should be addressed to the Missouri Public Service Commission, Jefferson City, Mo. 65101, and should *not* be directed to the Interstate Commerce Commission.

Oklahoma Docket No. MC 21834 (Sub-No. 4), filed July 31, 1973. Applicant: MAURICE SMITH AUSLEY II, doing business as AUSLEY MOTOR FREIGHT, 1911 NW. 1st Street, Oklahoma, Okla. Applicant's representative: G. Timothy Armstrong, 280 National Foundation Life Bldg., 3535 Northwest 58th Street, Oklahoma City, Okla. 73112. Certificate of public convenience and necessity sought to operate a freight service as follows: Transportation of *general commodities*, restricted against the transportation of commodities in tank trucks, over the following routes: (1) between Ft. Cobb and Verden, Okla., via State Highway 9, serving no intermediate points not presently authorized to be served by applicant; (2) between Anadarko and Richards Spur, Okla., via State Highway 8, to its intersection with U.S. Highway 277 at Cyril, Okla., thence south on U.S. Highway 277 to Richards Spur, Okla., serving the intermediate points of Cyril, Fletcher and Elgin, and the off-route point of Cement, Okla.; (3) between Richards Spur and Anadarko, Okla., via U.S. Highway 62, serving the intermediate point of Apache, Okla.; (4) between Apache and Cyril, Okla., via State Highway 19; (5) between Gotebo and Snyder, Okla., via State Highway 9 to its intersection with State Highway 30, west of Vinson, Okla., thence south on State Highway 30 to its intersection with U.S. Highway 62, at Hollis, Okla., thence east on U.S. Highway 62 to Snyder, Okla., serving the intermediate points of Lone Wolf, Granite, Hollis, Duke, and Altus, Okla., and the off-route points of Hobart, Mangum, Olustee, and Eldorado, Okla.; (6) between Gotebo and Frederick, Okla., via State Highway 9 to its intersection with U.S. Highway 183, west of Gotebo, thence south on U.S. Highway 183 to Frederick, Okla., serving the intermediate points of Babbs, Roosevelt, Mountain Park, and Snyder, in addition to those points presently authorized to be served; (7) between Mangum and Duke, Okla., via State Highway 34; (8) between Lone Wolf and Altus, Okla., via State Highway 44, serving the intermediate points of Blair and Lugert, Okla.; (9) as an alternate route, for operating convenience only, between Oklahoma City and Elgin, Okla., via U.S. Highway 62 to its intersection with the H. E. Bailey Turnpike, thence south on the H. E. Bailey Turnpike to its intersection with U.S. Highway 277, thence via U.S. Highway 277 to Elgin, Okla., serving no intermediate points; (10) as an alternate route, for operating convenience only, between Oklahoma City and Altus, Okla., via U.S. Highway 62, to its intersection with the H. E. Bailey Turnpike thence south on the H. E. Bailey Turnpike to its intersection with State Highway 36 north of Geronimo, Okla., thence west on State Highway 36 to its intersection with State Highway 5, south of Chattanooga, Okla., thence west on State Highway 5, to its intersection with U.S. Highway 283, south of Altus, thence north on U.S. Highway 283 to Altus, Okla., serving no intermediate points. Applicant requests authority to conduct operations in both intrastate and interstate and foreign commerce over the above routes and to serve the points set forth on the above routes. Applicant requests his entire authority including the above routes be unitized to allow a complete service between the points requested to be served on the above routes, and all points on the routes which applicant is presently authorized to serve. Intrastate, interstate, and foreign commerce authority sought.

HEARING: September 17, 1973, at the Jim Thorpe Office Bldg., Oklahoma City, Okla., at 9:00 A.M. Requests for procedural information including the time for filing protests concerning this application should be addressed to the Oklahoma Corporation Commission, Jim Thorpe Office Building, Oklahoma City, Okla. 73105, and should *not* be directed to the Interstate Commerce Commission.

By the Commission.

[SEAL] ROBERT L. OSWALD,
Secretary.

[FR Doc.73–17764 Filed 8–21–73;8:45 am]

FOURTH SECTION APPLICATION FOR RELIEF

AUGUST 17, 1973.

An application, as summarized below, has been filed requesting relief from the requirements of section 4 of the Interstate Commerce Act to permit common carriers named or described in the application to maintain higher rates and charges at intermediate points than those sought to be established at more distant points.

Protests to the granting of an application must be prepared in accordance with Rule 1100.40 of the General Rules of Practice (49 CFR 1100.40) and filed within 15 days from the date of publication of this notice in the Federal Register.

FSA No. 42734—*Joint Water-Rail Container Rates—Seatrain International, S.A.* Filed by Seatrain International, S.A. (No. WEE–2), for itself and interested rail carriers. Rates on general commodities between rail carriers' terminals in Beaumont and Houston, Texas, and ports in Europe as named in the application.

Grounds for relief—Water competition.

Tariffs—Seatrain tariffs I.C.C. Nos. 9, 10, 11, 12, 13, and 14. Rates are published to become effective on September 16, 1973.

By the Commission.

[SEAL] ROBERT L. OSWALD,
Secretary.

[Notice 29]

MOTOR CARRIER ALTERNATE ROUTE DEVIATION NOTICES

AUGUST 17, 1973.

The following letter-notices of proposals (except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application) to operate over deviation routes for operating convenience only have been filed with the Interstate Commerce Commission under the Commission's Revised Deviation Rules—Motor Carriers of Property, 1969 (49 CFR 1042.4(c)(11)), and notice thereof to all interested persons is hereby given as provided in such rules (49 CFR 1042.4(c)(11).

Protests against the use of any proposed deviation route herein described may be filed with the Interstate Commerce Commission in the manner and form provided in such rules (49 CFR 1042.4(c)(12)) at any time but will not operate to stay commencement of the proposed operations unless filed within 30 days from the date of publication.

Successively filed letter-notices of the same carrier under the Commission's Revised Deviation Rules—Motor Carriers of Property, 1969, will be numbered consecutively for convenience in identification and protests, if any, should refer to such letter-notices by number.

MOTOR CARRIER OF PROPERTY

No. MC–128319 (Deviation No. 1), DOWDA MOTOR FREIGHT, INC., P.O. Box 204, Centre, Alabama 35960, filed June 27, 1973. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over a deviation route as follows: From Centre, Ala., over U.S. Highway 411 to junction approximately 2 miles south of Rome, Ga., with Georgia Highway 344 (U.S. Highway 411—applicant's presently authorized service route), and return over the same route, for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities over a pertinent service route as follows: From Centre, Ala., over Alabama Highway 9 to the Alabama-Georgia State line, thence over Georgia Highway 20 to Rome, Ga., thence over U.S. Highway 411 to junction U.S. Highway 41, thence over U.S. Highway 41 to Marietta, Ga., thence over Interstate Highway 75 to Atlanta, Ga., and return over the same route, serving all intermediate points between Centre, Ala., and Rome, Ga.

By the Commission.

[SEAL] ROBERT L. OSWALD,
Secretary.

[FR Doc.73–17766 Filed 8–21–73;8:45 am]

[Notice 65]

MOTOR CARRIER APPLICATIONS AND CERTAIN OTHER PROCEEDINGS

AUGUST 17, 1973.

The following publications (except as otherwise specifically noted, each

V 38-162 AUG 22 73 XUM

applicant (on applications filed after March 27, 1972) states that there will be no significant effect on the quality of the human environment resulting from approval of its application) are governed by the new Special Rule 1100.247 of the Commission's Rules of Practice published in the Federal Register, issue of December 3, 1963, which became effective January 1, 1964.

The publications hereinafter set forth reflect the scope of the applications *as filed* by applicant, and may include descriptions, restrictions, or limitations which are not in a form acceptable to the Commission. Authority which ultimately may be granted as a result of the applications here noticed will not necessarily reflect the phraseology set forth in the application as filed but also will eliminate any restrictions which are not acceptable by the Commission.

MOTOR CARRIERS OF PROPERTY

NOTICE OF FILING OF PETITIONS

No. MC–C–8133 (NOTICE OF FILING OF PETITION FOR RELIEF FROM THE PROVISIONS OF 49 CFR 1090.5 (a) TO PERMIT PARTICIPATION IN JOINT INTERMODAL TOFC SERVICE), filed August 3, 1973. Petitioner: O.N.C. FREIGHT SYSTEMS, 2800 West Bayshore Road, Palo Alto, Calif. 94303. Petitioner's representative: Eldon E. Bresee (same address as petitioner). Petitioner seeks to participate in joint intermodal TOFC Service which is to be provided in lieu of its line-haul transportation over its authorized service route between Los Angeles, Calif., and Salt Lake City, Utah. If the distance from origin to destination over the route including the TOFC movement is less than 85 percent of the distance between such points over a motor carrier's authorized service route, participation in such intermodal TOFC service is not permitted under the provisions of 49 CFR 1090.5 (a). Petitioner states that the distance of its proposed intermodal TOFC service is less than 85 percent of the distance over its authorized service route and therefore seeks relief from the provisions of 49 CFR 1090.5(a). Any interested person desiring to participate may file an original and six copies of his written representations, views, or arguments in support of or against the petition on or before Aug. 22, 1973.

No. MC 118288 (Sub-No. 30) (NOTICE OF FILING OF PETITION FOR ELIMINATION OF GATEWAYS), filed July 24, 1973. Petitioner: STEPHEN F. FROST, 14750 Boyle Avenue, Fontana, Calif. 92335. Petitioner presently holds a motor *common carrier* certificate in No. MC 118288 (Sub-No. 30), issued August 22, 1972, authorizing transportation, over irregular routes, of (1) *such merchandise* as is dealt in by wholesale, retail, and chain grocery and food business houses (except fertilizer and salt), and *equipment, materials, and supplies* used in the conduct of such business; and (2) *fertilizer and salt*, when moving in mixed loads with the commodities described in (1) above, (A) from Burley, Idaho, Salina, Utah, and points in California and Washington, to points in Carbon and Valley Counties, Mont., and points in Big Horn, Campbell, Fremont, Hot Springs, Johnson, Sheridan Park, Washakie, and Weston Counties, Wyo.; and (B) from points in Idaho (except Burley), Utah (except Salina), and Oregon, to Glasgow, Mont. By tacking the authority described above with the authority contained in its Sub-No. 33 Certificate issued June 8, 1971, authorizing transportation of the same commodities between points in Montana, petitioner can serve all points in Montana, using points in Carbon or Valley Counties, Mont., and Glasgow, Mont., as gateways. By the instant petition, petitioner seeks to eliminate the gateways of Carbon and Valley Counties, Mont., and Glasgow, Mont., in its Sub-No. 30 Certificate and substitute in lieu thereof, all points in Montana. Any interested person or persons desiring to participate may file an original and six copies of his wrtten representations, views, or arguments in support of or against the petition within 30 days from the date of publication in the FEDERAL REGISTER.

APPLICATION FOR CERTIFICATE TO BE PROCESSED CONCURRENTLY WITH THE APPLICATION UNDER SECTION 5 GOVERNED BY SPECIAL RULE 240 TO THE EXTENT APPLICABLE

No. MC 59728 (Sub-No. 25), filed June 27, 1973. Applicant: MORRISON MOTOR FREIGHT, INC., 1100 Jenkins Boulevard, Akron, Ohio 44306. Applicant's representative: John P. McMahon, 100 East Broad Street, Columbus, Ohio 43215. Authority sought to operate as a *common carrier*, by motor vehicle over regular or irregular routes, transporting: *General Commodities* (except those of unusual value, Class A and B explosives, household goods as defined by the Commission, commodities in bulk and those requiring special equipment), serving points in Ohio as off-route points in connection with applicant's regular-route operations, or, in the alternative, applicant requests irregular route authority between Cleveland, Ohio, on the one hand, and, on the other, points in Ohio. NOTE.—The instant application is a matter directly related to MC–F–11919 published in the FR issue of July 11, 1973. Inasmuch as applicant has requested regular or irregular route authority protests should be directed accordingly. Applicant states that the requested authority can be tacked with its existing authority at Cleveland, Ohio, to serve points in Illinois, Indiana, Kansas, Missouri, New York, and Pennsylvania. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

APPLICATIONS UNDER SECTIONS 5 AND 210(a)(b)

The following applications are governed by the Interstate Commerce Commission's Special Rules governing notice of filing of applications by motor carriers of property or passengers under Sections 5(a) and 210a(b) of the Interstate Commerce Act and certain other proceedings with respect thereto (49 C.F.R. 1.240).

MOTOR CARRIERS OF PROPERTY

No. MC–F–11490. (Petition for Modification) (CONSOLIDATED FREIGHTWAYS CORPORATION OF DELAWARE—POOLING—SILVER WHEEL FREIGHTLINES, INC.), published in the March 29, 1972, issue of the FEDERAL REGISTER. By petition filed May 24, 1973, Garrett Freightlines, Inc., seeks modification of the order of February 12, 1973, as modified by order of February 15, 1973, which approved the pooling agreement in the above-entitled proceeding, in order to permit Garrett to join in the pooling arrangement for all points involved therein except the points of Adams, Athena, Baker, Milton-Freewater, Pendleton, and Weston, Oreg., which Garrett would continue to serve direct. Garrett would participate under the same terms and conditions that applies to Consolidated Freightways.

No. MC–F–11882 (Correction) (CLARK TRANSFER, INC.—PURCHASE (PORTION)—ROBERTS CARTAGE COMPANY), published in the May 31, 1973, issue of the FEDERAL REGISTER on page 14324. Prior notice should be modified to include *store, restaurant, and bar fixtures and equipment, when moving as displays and display materials to and from conventions, shows, expositions, exhibitions, and similar gatherings for exhibition purposes*, over irregular routes, between Chicago, Ill., on the one hand, and, on the other, all points in the United States.

No. MC–F–11953. Authority sought for purchase by CAROLINA FREIGHT CARRIERS CORPORATION, P.O. Box 697, Cherryville, N.C. 28021, of the operating rights of DEERFIELD MOTOR EXPRESS, INC., P.O. Box 31, Aurora, IL 60507. Applicant's attorney: Carl L. Steiner, 39 S. La Salle St., Chicago, IL 60603. Operating rights sought to be transferred: Under a certificate of registration, in Docket No. MC–120884 (Sub-No. 1), covering the transportation of general commodities, as a common carrier, in interstate commerce, within the State of Illinois. Vendee is authorized to operate as a *common carrier* in North Carolina, Georgia, South Carolina, Florida, New York, Massachusetts, Connecticut, Rhode Island, New Jersey, Maryland, Virginia, Pennsylvania, Alabama, Ohio, Delaware, Illinois, West Virginia, and the District of Columbia. Application has been filed for temporary authority under section 210a(b).

NOTE.—MC–2253 (Sub-No. 60), is a matter directly related.

No. MC–F–11954. Authority sought for purchase by ALL-AMERICAN, INC., 900 W. Delaware Ave., Sioux Falls, SD 57101, of a portion of the operating rights of MIDWEST COAST TRANSPORT, INC., and for acquisition by ALL-AMERICAN TRANSPORT, INC., both of 900 W. Delaware Ave., Sioux Falls, SD 57101, of control of such rights through the purchase. Applicants' attorney: Carl L. Steiner, 39 S. LaSalle St., Chicago, IL 60603. Operating rights sought to be transferred: *General commodities*, with exceptions, as a *common carrier* over irregular routes, between Lakefield, Minn., and points within 25 miles thereof, on the one hand, and, on the other, Sioux Falls, S. Dak., and points in Iowa and Minnesota, between Sioux Falls, S. Dak., on the one hand, and, on the other, Ocheyedan, Iowa, and points within ten miles thereof, between Ocheyedan, Iowa, and points within ten miles thereof, on the one hand, and, on the other, points in Minnesota within 25 miles of Ocheyedan; *livestock*, between Reading, Minn., and points within ten miles thereof, on the one hand, and, on the other, Sioux City, Iowa, and Sioux Falls, S. Dak., between Ocheyedan, Iowa, and points within ten miles thereof, on the one hand, and, on the other, Sioux Falls, S. Dak.; *farm machinery*, from Sioux Falls, S. Dak., to points in the territory specified above; *farm machinery and hardware*, between Reading, Minn., and points within ten miles thereof, on the one hand, and, on the other, Sioux City, Iowa; *lumber, laths, shingles, fencing material, millwork, brick, cement, plaster, paint, linseed oil, roofing, roofing and building paper, and builders hardware*, between Reading, Minn., on the one hand, and, on the other, Brookings, Howard, and Colman, S. Dak. Vendee is authorized to operate as a *common carrier* in Colorado, Illinois, Indiana, Iowa, Kansas, Kentucky, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, Tennessee, Michigan, and Wisconsin. Application has not been filed for temporary authority under section 210a(b).

No. MC–F–11955. Authority sought for control by O.N.C. FREIGHT SYSTEMS, 2800 W. Bayshore Rd., Palo Alto, CA 94303, of (1) C–B TRUCK LINES, INC., 1401 E. Brady St., P.O. Box 1774, Clovis NM 88101, and (2) C.B. MOTOR FREIGHT COMPANY, 122 Eddie St., P.O. Box 71, Lovington, NM 88260, and for acquisition by ROCOR INTERNATIONAL, and, in turn, by DAVID P. ROUSH, and DIANE G. ROUSH, all of 2800 W. Bayshore Rd., Palo Alto, CA 94303, of control of C–B TRUCK LINES, INC., and C.B. MOTOR FREIGHT COMPANY, through the acquisition by O.N.C. FREIGHT SYSTEMS. Applicants' attorneys: Roland Rice, 111 E St. NW., Suite 618, Washington, DC 20004, and Edwin Piper, 1115 Simms Bldg., Albuquerque, NM 87101. Operating rights sought to be controlled: (1) *Livestock, stock and poultry feed, grain, baled cotton, cotton seed, agricultural machinery and equipment*, and *building materials*, as a *common carrier* over irregular routes, from El Paso, Tex., and points in Gaines, Reeves, Culberson and Dawson Counties, Tex., to points in Eddy, Lea, Chaves, Curry, Roosevelt, and Otero Counties, N. Mex.; *livestock*, from points in Eddy, Lea, Chaves, Curry, Roosevelt, and Otero Counties, N. Mex., to points in Reeves, Culberson and Dawson Counties, Tex.; *malt beverages*, in kegs, bottles and cans, from Golden, Colo., to El Paso, Tex.; *animal feed and feedstuffs*, from El Paso, Tex., to points in Colorado and New Mexico (except points in Eddy, Lea, Chaves, Curry, and Otero Counties, N. Mex.); *manganese ore*, in bulk, from Deming, N. Mex., to El Paso, Tex.; *general commodities*, between points in Grant, Hidalgo, and Catron Counties, N. Mex.; *commodities in bulk*, except in tank or hoppertype vehicle, over regular routes, between Silver City, N. Mex., and El Paso, Tex., serving various intermediate and off-route points, between Silver City, N. Mex., and Santa Rita, N. Mex., serving various intermediate and off-route points; *commodities in bulk*, between Silver City, N. Mex., and Lordsburg, N. Mex.; serving all intermediate points, between Silver City, N. Mex., and Reserve, N. Mex., serving all intermediate points, and the off-route points of Mogollon, N. Mex.; (2) *General commodities*, with exceptions, as a *common carrier* over irregular routes, between points in Lea and Eddy Counties, N. Mex. (except service is not authorized to or from potash mine located approximately 16 miles east of Carlsbad, N. Mex., nor is service authorized between Carlsbad and Hobbs, N. Mex.). O.N.C. FREIGHT SYSTEMS is authorized to operate as a *common carrier* in Arizona, California, Nevada, Oregon, and Washington. Application has been filed for temporary authority under section 210a(b).

No. MC–F–11956. Authority sought for purchase by BEAUFORT TRANSFER COMPANY, P.O. Box 102, Gerald, MO 63037, of the operating rights of ABEL'S TRANSFER SERVICE, INC., P.O. Box W, Belle, MO 65013, and for acquisition by OLIN FLOTTMANN, AND JOHN H. MEYER, also of Gerald, MO 63037, of control of such rights through the purchase. Applicants' attorney: Thomas F. Kilroy, 6914 Conservation Dr., Springfield, VA 22153. Vendee is authorized to operate as a *common carrier* in Missouri, Nebraska, Illinois, Kentucky, Tennessee, Alabama, Mississippi, Lousiana, Texas, Georgia, Wisconsin, Minnesota, Colorado, and Ohio. Application has not been filed for temporary authority under section 210a(b).

No. MC–F–11957. Authority sought for purchase by GATEWAY TRANSPORTATION CO., INC., 455 Park Plaza Drive, P.O. Box 851, LaCrosse, WI 54601, of the operating rights of COURTESY EXPRESS, INC., 1040 Fifth Avenue, P.O. Box 1243, Aurora, IL 60507. Applicant's attorneys and representative: Jack Goodman, 39 S. LaSalle St., Chicago, IL 60603, Joseph E. Ludden, 455 Park Plaza Drive, LaCrosse, WI 54601, and Joseph Zefran, 1040 Fifth Ave., Aurora, IL 60507. Operating rights sought to be transferred: Under a certificate of registration, in Docket No. MC–99026 (Sub-No. 2), covering the transportation in interstate commerce, within the State of Illinois. Vendee is authorized to operate as a *common carrier* in Michigan, Illinois, Missouri, Iowa, Wisconsin, Minnesota, Ohio, Indiana, Pennsylvania, West Virginia, Florida, Georgia, Tennessee, Kentucky, Alabama, New York, New Jersey, Massachusetts, Connecticut, and Rhode Island. Application has been filed for temporary authority under section 210a(b).

No. MC–F–11958. MACHISE INTERSTATE TRANSPORTATION CO., 500 N. Egg Harbor Rd., Hammonton, NJ 08037, of a portion of the operating rights of MACHISE EXPRESS COMPANY, INC., and for acquisition by ANTHONY BUCCI, and JOSEPH INGEMI, all of Hammonton, NJ 08037, of control of such rights through the purchase. Applicants' attorney: Morton E. Kiel, Suite 6193, 5 World Trade Center, New York, NY 10048. Operating rights sought to be transferred: *Petroleum products*, in bulk, in tank vehicles, as a *common carrier* over irregular routes, from Duck Island, N.J., to Pendell, Pa. Vendee is authorized to operate as a *common carrier* in Delaware, New Jersey, and Pennsylvania. Application has not been filed for temporary authority under section 210a(b).

NOTICE

CHICAGO, ROCK ISLAND AND PACIFIC RAILROAD COMPANY, 139 West Van Buren Street, Chicago, Illinois 60605, represented by Mr. James E. Skyes of the above address, on July 23, 1973, filed an application under Section 5(2)(a)(ii) to acquire trackage rights over 45.46 miles of the main line of the Burlington Northern, Inc., between Kansas City and Rushville, Missouri. On the same date, applicant filed

V 38 162 AUG 22 73 XUM

an application under Section 1(18) of the act, to construct a 543 foot connection at Rushville, Buchanan County, Missouri, between the aforementioned main line of the Burlington Northern, Inc., and the applicant's branch line. The trackage rights application has been assigned Finance Docket No. 27453 and the construction application is docketed Finance Docket No. 27454. The trackage rights sought by the applicant are for the purpose of the continuation of its service to St. Joseph, Missouri, in conjunction with the exercise of permission granted to the applicant by the Commission in Finance Docket No. 26593 to abandon its branch line between Jamesport and St. Joseph, Missouri.

In the opinion of applicant, the relief sought herein is not a major federal action significantly affecting the quality of the human environment. In accordance with the Commission's regulations (49 CFR 1100.250) in Ex Parte No. 55 (Sub-No. 4), *Implementation—Nat'l Environmental Policy Act*, 1969, 340, I.C.C. 431 (1972), any protests may include a statement indicating the presence or absence of any effect of the requested Commission action on the quality of the human environment. If any effect is alleged to be present, the statement shall include information relating to the relevant factors set forth in Ex Parte No. 55 (Sub-No. 4), supra, Part (B)(1)(5), 340 I.C.C. 431, 461. The proceeding will be handled without public hearings unless protests are received which contain information indicating a need for such hearings. Any protest submitted shall be filed with the Commission no later than 30 days from the date of first publication in the FEDERAL REGISTER.

NOTICE

LAKE SUPERIOR & ISHPEMING RAILROAD COMPANY, 105 E. Washington Street, Marquette, Michigan 49855, by its attorney, Mr. L. B. Coleman, Lake Superior & Ishpeming Railroad Company, 105 East Washington Street, Marquette, Michigan 49855, hereby gives notice that on the 22nd day of June, 1973, it filed with the Interstate Commerce Commission at Washington, D.C., an application for authority to acquire trackage rights over Soo Line Railroad Company tracks east of Marquette, Michigan, from approximately Mile Post 50.23 to Mile Post 47.83, a distance of approximately 2.40 miles. The line for which the application has been filed includes no stations and the closest agency station is Marquette. This application has been assigned Finance Docket No. 27428. In the opinion of the applicant, the relief sought by this application is not a major Federal action significantly affecting the quality of the human environment. In accordance with the Commission's regulations (49 CFR 1100.250) in Ex Parte No. 55 (Sub-No. 4), Implementation—Nat'l Environmental Policy Act, 1969, 340 I.C.C. 431 (1972), any protests may include a statement indicating the presence or absence of any effect of the requested Commission action on the quality of the human environment. If any such effect is alleged to be present, the statement shall include information relating to the relevant factors set forth in Ex Parte No. 55 (Sub-No. 4), supra, Part (B)(1)-(5), 340 I.C.C. 431, 461. Any person opposed to this application should advise the Commission promptly, with an original and six copies, identifying the docket number, and send a copy to the above-cited attorney. The proceeding will be handled without public hearings unless protests are received which contain information indicating a need for such hearings. All protest submitted shall be filed with the Commission no later than 30 days from the date of first publication in the FEDERAL REGISTER.

LAKE SUPERIOR & ISHPEMING RAILROAD COMPANY

NOTICE

CHICAGO AND NORTH WESTERN TRANSPORTATION COMPANY, 400 West Madison Street, Chicago, Illinois 60606, represented by Mr. George H. Brant of the same address, hereby gives notice that on the 8th day of August 1973, it filed with the Interstate Commerce Commission at Washington, D.C., an application seeking approval and authorizaiton for the CNW to lease all of the property and facilities of the Minneapolis Industrial Railway Company, and, particularly all of the lines of railroad which the MIR now operates upon, that being, rail lines extending approximately 11.7 miles from Minneapolis to Golden Valley, Hennepin County, Minnesota, consisting of approximately 3.1 miles of trackage rights over the Burlington Northern, Inc., 0.7 miles of trackage rights over the Minneapolis, Northfield and Southern Railway Company; and approximately 7.9 miles over the MIR from Milepost 3.1 (beginning of line) to Milepost 11.0 (end of line).

MIR is wholly-owned by CNW and the railroads have common officers and directors. CNW alleges that no shippers or receivers will be adversely affected by the proposed lease. CNW further alleges that the Commission's approval of the lease will not constitute a major federal action and, in any event, will not have any impact upon nor adversely affect the quality of the human environment. This application has been assigned Finance Docket No. 27464. In accordance with the Commission's regulations (49 CFR 1100.250) in Ex Parte No. 55 (Sub-No. 4), *Implementation—Nat'l Environmental Policy Act, 1969*, 340 I.C.C. 431 (1972), any protests may include a statement indicating the presence or absence of any effect of the requested Commission action on the quality of the human environment. If any such effect is alleged to be present, the statement shall include information relating to the relevant factors set forth in Ex Parte No. 55 (Sub-No. 4), supra, Part (B)(1)-(5), 340 I.C.C. 431, 461. The proceeding will be handled without public hearings unless protests are received which contain information indicating a need for such hearings. Any protests submitted shall be filed with the Commission no later than 30 days from the date of first publication in the FEDERAL REGISTER.

CHICAGO AND NORTH WESTERN TRANSPORTATION COMPANY

By the Commission.

[Notice 338]

MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

Synopses of orders entered by the Motor Carrier Board of the Commission pursuant to sections 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act, and rules and regulations prescribed thereunder (49 CFR Part 1132), appear below:

Each application (except as otherwise specifically noted) filed after March 27, 1972, contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application. As provided in the Commission's Special Rules of Practice any interested person may file a petition seeking reconsideration of the following numbered proceedings on or before September 11, 1973. Pursuant to section 17(8) of the Interstate Commerce Act, the filing of such a petition will postpone the effective date of the order in that proceeding pending its disposition. The matters relied upon by petitioners must be specified in their petitions with particularity.

No. MC-FC-74518. By order of August 15, 1973, the Motor Carrier Board approved the transfer to State Moving and Storage, Inc., Fayetteville, N.C., of a portion of the operating rights in Certificate No. MC-134257 (Sub-No. 1) issued to Carroll's Transfer, Inc., Dublin, N.C., authorizing the transportation of: Household goods as defined by the Commission, between Lumberton, N.C., and points in Virginia, North Carolina, and South Carolina, in a radial movement—Vaughan S. Winborne, Attorney, 1108 Capitol Club Bldg., Raleigh, N.C. 27601.

No. MC-FC-74535. By order of August 15, 1973, the Motor Carrier Board approved the transfer to Syracuse Rigging Company, Inc., Syracuse, N.Y., of Certificate No. MC-4426 issued April 16, 1965, to James L. Ryan Machinery Moving Corp., Syracuse, N.Y., authorizing the transportation of: Machinery, telephone and telegraph equipment, and contractors' equipment, between Syracuse, N.Y., on the one hand, and, on the other, points in Connecticut, Massachusetts, New Jersey, Pennsylvania, Rhode Island, and New York—Herbert M. Canter, Attorney, 201 E. Jefferson St., Syracuse, N.Y. 13202.

No. MC-FC-74587. By order of August 15, 1973, the Motor Carrier Board approved the transfer to Guelph Transportation Commission, Guelph, Ontario, Canada, of the operating rights in Certificate No. MC-136333 issued December 1, 1972, to Georgetown Transportation, Limited, Georgetown, Ontario, Canada, authorizing the transportation of passengers and their baggage, in charter and special operations, in sightseeing and pleasure tours, beginning and ending at ports of entry on the United States-Canada Boundary line and extending to points in the United States (including Alaska but excluding Hawaii)—S. Harrison Kahn, Suite 733, Investment Building, Washington, D.C. 20005, Attorney for applicants.

No. MC-FC-74621. By order of August 15, 1973, the Motor Carrier Board approved the transfer to Kramer Trucking Co., Inc., Elizabeth, N.J., of the operating rights in Certificate No. MC-83322 issued August 4, 1970, to Links Trucking, Inc., Brooklyn, N.Y., authorizing the transportation of various commodities between specified points and areas in Alabama, Connecticut, Delaware, Georgia, Illinois, Maryland, Massachusetts, Mississippi, New Hampshire, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Rhode Island, South Carolina, and Vermont—Robert B. Pepper, 168 Woodbridge Ave., Highland Park, N.J. 08904, Representative for applicants.

No. MC-FC-74635. By order entered August 16, 1973, the Motor Carrier Board approved the transfer to Barre Granite Transfer, Inc., Barre, Vt., of the operating rights set forth in Certificate No. MC-2032 issued December 8, 1953, to Lawrence Andrew LaFountain, doing business as Barre Granite Transfer, Barre, Vt., authorizing the transportation of granite from Barre, Vt., and points in Vermont within 22 miles of Barre, to points in New York and New Jersey—John P. Monte, Box 568, Barre, VT 05641, attorney for applicants.

No. MC-FC-74629. By order of August 15, 1973, the Motor Carrier Board approved the transfer to Wee Haul Express, Inc., Van Wert, Ohio, of the operating rights in Permit No. MC-128606 (Sub-No. 3) issued February 12, 1968, to Wilma F. Gehron, doing business as Frosty's Delivery Service, Celina, Ohio, authorizing the transportation of business and accounting records and forms between specified points and areas in Ohio, New Jersey, Illinois, Georgia, Texas, Pennsylvania, Indiana, Kentucky, and Michigan—David L. Pemberton, 50 West Broad St., Columbus, Ohio 43215, attorney for applicants.

[Notice 112]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

AUGUST 15, 1973.

The following are notices of filing of application (except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application) for temporary authority under section 210a(a) of the Interstate Commerce Act provided for under the new rules of Ex Parte No. MC-67 (49 CFR 1131), published in the FEDERAL REGISTER, issue of April 27, 1965, effective July 1, 1965. These rules provide that protests to the granting of an application must be filed with the field official named in the FEDERAL REGISTER publication, on or before Sept. 6, 1973. One copy of such protests must be served on the applicant or its authorized representative, if any, and the protests must certify that such service has been made. The protests must be specific as to the service which such protestant can and will offer, and must consist of a signed original and six (6) copies.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in field office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

No. MC 2253 (Sub-No. 62 TA), filed August 7, 1973. Applicant: CAROLINA FREIGHT CARRIERS CORPORATION, N.C. Highway 150 East, P.O. Box 697, Cherryville, N.C. 28021. Applicant's representative: J. S. McCallie (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Cellulose acetate flake*, in bulk, from Celriver, S.C., to Amcelle, Md., for 180 days. MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

AUGUST 16, 1973.

The following are notices of filing of application, except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application, for temporary authority under section 210a(a) of the Interstate Commerce Act provided for under the new rules of Ex Parte No. MC–67, (49 CFR 1131) published in the FEDERAL REGISTER, issue of April 27, 1965, effective July 1, 1965. These rules provide that protests to the granting of an application must be filed with the field official named in the FEDERAL REGISTER publication, on or before September 6, 1973. One copy of such protests must be served on the applicant, or its authorized representative, if any, and the protests must certify that such service has been made. The protests must be specific as to the service which such protestant can and will offer, and must consist of a signed original and six (6) copies.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in field office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

No. MC 26396 (Sub-No. 87 TA), filed August 8, 1973. Applicant: POPELKA TRUCKING CO., doing business as THE WAGGONERS, 201 West Park, P.O. Box 990, Livingston, Mont. 59047. [Drought Order 69 (Sub. No. 2)]

MONTANA AND IDAHO

Transportation of Hay by Rail

AUGUST 16, 1973.

In the matter of Relief under section 22 of the Interstate Commerce Act.

It appearing, that by reasons of drought conditions existing in certain portions of the States of Montana and Idaho, hereinafter referred to as the disaster area, the Deputy Assistant Secretary of the United States Department of Agriculture has requested the Commission to enter an order under section 22 of the Interstate Commerce Act authorizing railroads subject to the Commission's jurisdiction to transport hay to the disaster area at reduced rates:

It is ordered, That carriers by railroad participating in the transportation of hay to the counties of:

V 38-162 AUG 22 73 XUM

Deer Lodge	Meagher
Flathead	Mineral
Glacier	Missoula
Granite	Pondera
Jefferson	Powell
Lake	Sanders
Lewis and Clark	Silver Bow
Liberty	Teton
Lincoln	Toole
Madison	Wheatland

all located in the State of Montana; and

Idaho

located in the State of Idaho, referred to herein as the disaster area, be, and they are hereby, authorized under section 22 of the Interstate Commerce Act to establish and maintain until October 31, 1973, reduced rates for such transportation, the rates to be published and filed in the manner prescribed in Section 6 of the Interstate Commerce Act except that they may be effective one day after publication and filing instead of thirty.

It is further ordered, That the class of persons entitled to such reduced rates is hereby defined as persons designated as being in distress and in need of relief by the United States Department of Agriculture or by such State agents or agencies as may in turn be designated by the United States Department of Agriculture to assist in relieving the distress caused by the drought.

It is further ordered, That, during the period in which any reduced rates authorized by this order are effective the carriers may, notwithstanding the provisions of section 4 of the Interstate Commerce Act, maintain higher rates to directly intermediate points and maintain through rates in excess of the aggregate of intermediate rates over the same routes if one or more of the factors of such aggregate of intermediate rates is a reduced rate established under the authority of the order.

It is further ordered, That any tariffs or tariff provisions published under the authority of this order shall explicitly so state, making reference to this order by number and date.

And it is further ordered, That, subject to the conditions in the succeeding paragraphs hereof, the use of reduced rates established by authority of this order may be conditioned upon the release by the shipper of the value of the commodity, which released value, in its relation to the invoice value of the property at time of shipment, shall be in the same percentage relation which the reduced rates bear to the rates which otherwise would apply.

And it is further ordered, That, tariffs containing released rates filed under authority of this order shall show in connection with such rates the following notation:

The released value must be entered on shipping order and bill of lading in the following form:

> The agreed or declared value of the property is hereby specifically stated by the shipper to be not in excess of (show percent) of the invoice value of the property herein described.

If the shipper fails or declines to execute the above statement, shipments will not be accepted for transportation at the rates subject hereto. Rates published elsewhere in other tariffs lawfully filed with the Interstate Commerce Commission will apply in such a case. Rates herein published on released value have been authorized by the Interstate Commerce Commission in Drought Order No. 69 of August 8, 1973.

And it is further ordered, That notice to the affected railroads and the general public shall be given by depositing a copy of this order in the Office of the Secretary of the Commission and by filing a copy with the Director, Office of the Federal Register; and that copies be mailed to the Chairman of the Traffic Executive Association-Eastern Railroads, New York, New York; the Chairman of the Southern Freight Association, Atlanta, Georgia; the Chairman of the Executive Committee, Western Railroads Traffic Association, Chicago, Illinois; the Vice President and Director, Economics and Finance Department, Association of American Railroads, Washington, D.C.; and to the President of the American Short Line Railroad Association, Washington, D.C.

Dated at Washington, D.C., this 16th day of August, 1973.

By the Commission, Vice Chairman Brewer.

[SEAL] ROBERT L. OSWALD, *Secretary.*

[Ex Parte No. 299]

FREIGHT RATES AND CHARGES—1973

Increase to Offset Retirement Tax Increases

AUGUST 16, 1973.

Petition by railroads to permit increases to offset retirement taxes effective October 1, 1973, and January 1, 1974. By petition filed on August 15, 1973, the Nation's railroads, in accordance with the amendments to the Interstate Commerce Act effected by the Railroad Rate Adjustment Act of 1973, and the requirements and procedures promulgated thereunder in Ex Parte No. 298 (49 CFR 1107), request the Commission to permit the filing of a proposed tariff and the establishment of interim increases in freight rates and charges to offset increases in taxes under the Railroad Retirement Act, as amended. The increases in taxes become effective on October 1, 1973, and on January 1, 1974. The increases in rates and charges sought to offset those tax increases are 2 percent and 2.7 percent, respectively, to become effective on the same dates, the latter to be applied in lieu of the former beginning January 1, 1974. The petition was accompanied by verified statements intended to provide the data and information required in Ex Parte No. 298.

Rates and charges for services which are generally excluded from proposed general increases would be exempt, except that charges for lighterage and protective services would be increased since employees performing those services are covered by railroad retirement provisions. Certain other specific exceptions are made, generally involving unit-train, trainload, and annual volume rates of a quasi-contractural nature which, the railroads state, will be adjusted to reflect the same increase when renewed.

In accordance with the provisions of section 15a(4)(a) and (b) of the Interstate Commerce Act, added by the recent statute, the order required to be issued within 30 days will be based solely on the Commission's analysis and verification of the data and information submitted by the railroads in accordance with Ex Parte No. 298. However, that order will be published in the FEDERAL REGISTER and will provide for notification to the Commission by all persons who are interested in participating in the subsequent hearings to be held under the provisions of section 15a(4)(c).

[SEAL] ROBERT L. OSWALD, *Secretary.*

EFFLUENT LIMITATION GUIDELINES AND STANDARDS

Insulation Fiberglass Manufacturing, and Beet Sugar Processing Industries

V 38-162 AUG 22 73 XUM

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Parts 401, 426]

GLASS MANUFACTURING POINT SOURCE CATEGORY; INSULATION FIBERGLASS MANUFACTURING SUBCATEGORY

Proposed Effluent Limitations Guidelines for Existing Sources and Standards of Performance and Pretreatment Standards for New Sources

Notice is hereby given that effluent limitations guidelines for existing sources and, standards of performance and pretreatment standards for new sources set forth in tentative form below are proposed by Environmental Protection Agency ("EPA") for the insulation fiberglass manufacturing subcategory pursuant to sections 304(b), 306(b) and 307(c) of the Federal Water Pollution Control Act, as amended (33 U.S.C. 1251, 1314, 1316(b) and 1317(c), 86 Stat. 816 et seq.; P.L. 92-500) (the "Act"). Insulation fiberglass manufacturing is a subcategory of the glass manufacturing category of point sources. In addition to the specific proposed regulations concerning the insulation fiberglass subcategory, proposed regulations are set forth below providing generally applicable definitions and describing the legal authorities for all regulations subsequently to be issued under Parts 402 to 699, 40 CFR concerning effluent limitations guidelines, standards of performance and pretreatment standards for new sources pursuant to sections 304(b), 306 and 307(c) of the Act.

1. *Legal Authority.* a. *Existing point sources.* Section 301(b) of the Act requires the achievement by not later than July 1, 1977, of effluent limitations for point sources, other than publicly owned treatment works, which require the application of the best practicable control technology currently available as defined by the Administrator pursuant to section 304(b) of the Act. Section 301(b) also requires the achievement by not later than July 1, 1983, of effluent limitations for point sources, other than publicly owned treatment works, which require the application of best available technology economically achievable which will result in reasonable further progress toward the national goal of eliminating the discharge of all pollutants, as determined in accordance with regulations issued by the Administrator pursuant to section 304(b) of the Act.

Section 304(b) of the Act requires the Administrator to publish regulations providing guidelines for effluent limitations setting forth the degree of effluent reduction attainable through the application of the best practicable control technology currently available and the degree of effluent reduction attainable through the application of the best control measures and practices achievable including treatment techniques, process and procedure innovations, operating methods and other alternatives. The regulations proposed herein set forth effluent limitations guidelines, pursuant to section 304(b) of the Act, for the insulation fiberglass manufacturing subcategory of the glass manufacturing point source category.

b. *New sources.* Section 306 of the Act requires the achievement by new sources of a Federal standard of performance providing for the control of the discharge of pollutants which reflects the greatest degree of effluent reduction which the Administrator determines to be achievable through application of the best available demonstrated control technology, processes, operating methods, or other alternatives, including, where practicable, a standard permitting no discharge of pollutants.

Section 306(b)(1)(A) of the Act requires the Administrator to propose regulations establishing Federal standards of performances for categories of new sources included in a list published pursuant to section 306(b)(1)(A) of the Act. The Administrator published in the FEDERAL REGISTER of January 16, 1973 (38 FR 1624) a list of 27 source categories, including the glass manufacturing source category. The regulations proposed herein set forth the standards of performance applicable to new sources within the insulation fiberglass manufacturing subcategory of the glass manufacturing source category.

Section 307(c) of the Act requires the Administrator to promulgate pretreatment standards for new sources at the same time that standards of performance for new sources are promulgated pursuant to section 306. Section 426.15 proposed below provides pretreatment standards for new sources within the insulation fiberglass subcategory.

Section 304(c) of the Act requires the Administrator to issue to the States and appropriate water pollution control agencies information on the processes, procedures or operating methods which result in the elimination or reduction of the discharge of pollutants to implement standards of performance under Section 306 of the Act. The report referred to below provides, pursuant to section 304(c) of the Act, preliminary information on such processes, procedures or operating methods.

2. Summary and basis of proposed effluent limitations guidelines, standards of performance and pretreatment standards for new sources.

a. *General methodology.* The effluent limitations guidelines and standards of performance proposed herein were developed in the following manner. The point source category was first studied for the purpose of determining whether separate limitations and standards are appropriate for different segments within the category. This analysis included a determination of whether differences in raw material used, product produced, manufacturing process employed, age, size, waste water constituents and other factors require development of separate limitations and standards for different segments of the point source category. The raw waste characteristics for each such segment were then identified. This included an analysis of (1) the source, flow and volume of water used in the process employed and the sources of waste and waste waters in the plant and (2) the constituents of all waste water. The constituents of the waste waters which should be subject to effluent limitations guidelines and standards of performance were identified.

Next, the control and treatment technologies existing within each segment were identified. This included an identification of each distinct control and treatment technology, including both in-plant and end-of-process technologies, which are existent or capable of being designed for each segment. It also included an identification of, in terms of the amount of constituents and the chemical, physical, and biological characteristics of pollutants, the effluent level resulting from the application of each of the technologies. The problems, limitations and reliability of each treatment and control technology were also identified. In addition, the non-water quality environmental impact was identified, such as the effects of the application of such technologies upon other pollution problems, including air, solid waste, noise and radiation. The energy requirements of each control and treatment technology were determined as well as the cost of the application of such technologies.

The information, as outlined above, was then evaluated in order to determine what levels of technology constitute the "best practicable control technology currently available," the "best available technology economically achievable" and the "best available demonstrated control technology, processes, operating methods, or other alternatives." In identifying such technologies, various factors were considered. These included the total cost of application of technology in relation to the effluent reduction benefits to be achieved from such application, the age of equipment and facilities involved, the process employed, the engineering aspects of the application of various types of control techniques, process changes, non-water quality environmental impact (including energy requirements) and other factors.

The data on which the above analysis was performed included EPA permit applications, EPA sampling and inspections, consultant reports, and industry submissions.

The pretreatment standards proposed herein are intended to be complementary to the pretreatment standard proposed for existing sources under Part 128 of 40 CFR. The basis for such standards are set forth in the FEDERAL REGISTER of July 19, 1973, 38 FR 19236. The provisions of Part 128 are equally applicable to sources which would constitute "new sources," under section 306 if they were to discharge pollutants directly to navigable waters except for section 128.133. That section provides a pretreatment standard for "incompatible pollutants" which requires the application

of the "best practicable control technology currently available," subject to an adjustment for amounts of pollutants removed by the publicly owned treatment works. Since the pretreatment standards proposed herein apply to new sources, Section 426.15 below amends § 128.133 to require application of the standard of performance for new sources rather than the "best practicable" standard applicable to existing sources under sections 301 and 304(b) of the Act.

b. *Summary of conclusions with respect to insulation fiberglass manufacturing subcategory.* A draft report entitled the "Development Document for Proposed Effluent Limitations Guidelines and New Source Performance Standards—Insulation Fiberglass Manufacturing Segment of the Glass Manufacturing Point Source Category" which details the analysis undertaken in support of the regulations being proposed herein is available for inspection in the EPA Information Center, Room 227, West Tower, Waterside Mall, Washington, D.C.; at all EPA regional offices; and at State water pollution control offices. A supplementary analysis prepared for EPA of the possible economic effects of the proposed regulations is also available for inspection at these locations. Copies of both of these documents are being sent to persons or institutions affected by the proposed regulations, or who have placed themselves on a mailing list for this purpose (see EPA's Advance Notice of Public Review Procedures, 38 FR 21202, August 6, 1973). An additional limited number of copies of both reports are available. Persons wishing to obtain a copy may write the EPA Information Center, Environmental Protection Agency, Washington, D.C. 20460, Attention: Mr. Philip B. Wisman.

The following summarizes the principal conclusions of the above listed draft report.

The insulation fiberglass manufacturing segment of the glass manufacturing industry serves as a single subcategory for the purpose of establishing effluent limitations guidelines and standards of performance. Factors such as age, size of plant, process employed, waste water constituents and waste control technologies substantiate this determination.

The known significant pollutants, characteristics or properties of waste waters resulting from the insulation fiberglass manufacturing process include phenols, biochemical oxygen demand, chemical oxygen demand, dissolved solids, suspended solids, oil and grease, ammonia, pH, color, turbidity, and heat.

Because of the large amounts of water required in the manufacturing process, the insulation fiberglass industry has employed recirculation systems. Historically, highly caustic chain wash water, the primary source of pollutants, was difficult to recirculate and treat. Technological changes and improvements allowed the change from a caustic chain wash solution to a high pressure spray chain wash. Waste chain wash waters could then be filtered or similarly treated and reused as chain wash water. Because of the accumulation of solids, however, a blowdown from this system was necessary. Biological treatment of the blowdown from these recirculation systems has at one plant achieved in excess of 90 percent removal of phenol, suspended solids, chemical oxygen demand and biochemical oxygen demand. Despite the high removal efficiencies, however, high concentrations of phenol, chemical oxygen demand and color were still present in the effluent.

Additional tertiary treatment of effluent from the process described above by carbon adsorption was investigated. It was found that the costs of such treatment exceeded that for a total recirculation system in which the process water blowdown is reused in the process as binder dilution water or overspray. The total recirculation system eliminates pollutants in the blowdown by fixing them in the product when the water evaporates in the curing ovens.

The non-water quality environmental impacts from total recirculation systems consist of increased sludges resulting from increased waste water treatment and increased noise levels due to the addition of high energy pumps. Technology exists to properly dispose of the solid wastes, and the small incremental increase in noise due to high energy pumps does not affect the hearing protection measures already practiced in the high level noise areas of an insulation fiberglass plant. The industry will require an additional 38.6 million kilowatt hours of power annually to operate recycling systems. This is less than a 5 percent increase relative to estimated current industry power requirements for furnaces and processing equipment. The solid waste generated by total recirculation is no greater than if alternate waste water treatment technologies were applied.

The total capital investment for the industry to achieve no discharge of process waste water pollutants is estimated to be less than $7,000,000. These costs could increase the capital investment for a given plant by 1.2 to 3.8 percent. Annual operating costs are estimated at $3,700,000 for the industry, increasing the manufacturing costs for a given plant by 0.6 to 3.8 percent relative to selling price. Smaller plants will pay more per unit of production than large plants. However, the economic viability of any plant in the industry is not threatened.

Total recirculation of process waste water is being successfully accomplished at 6 of the total of 19 plants in the industry. The study of the insulation fiberglass subcategory of point sources concluded that the best practicable technology currently available for this category of sources is total recirculation of process waste waters. The degree of effluent reduction attainable through the application of this technology is no discharge of process waste water pollutants to navigable waters.

3. *Summary of Public Participation.* Prior to this publication, the agencies and groups listed below were consulted and given an opportunity to participate in the development of the effluent limitations guidelines and standards of performance for the insulation fiberglass manufacturing subcategory. The draft report on insulation fiberglass manufacturing referred to above includes, as a supplement, a description of consultations and other participation by the public which has taken place and the nature and disposition of the comments received. The following are the principal agencies and groups consulted: Effluent Standards and Water Quality Information Advisory Committee (established under section 515 of the Act); All State and U.S. Territory Pollution Control Agencies; Ohio River Valley Sanitation Commission; New England Interstate Water Pollution Control Commission; Delaware River Basin Commission; Hudson River Sloop Restoration, Inc.; Conservation Foundation; Businessmen for the Public Interest; Environmental Defense Fund, Inc.; Natural Resources Defense Council; The American Society of Civil Engineers; Water Pollution Control Federation; National Wildlife Federation; The American Society of Mechanical Engineers; U.S. Department of Commerce; Water Resources Council; U.S. Department of the Interior; Certain-Teed Products Corporation; Johns-Manville Corporation; and Owens-Corning Fiberglas Corporation.

The primary issues raised in the development of the proposed effluent limitations guidelines and standards of performance and the treatment of these issues herein are as follows:

1. The Effluent Standards and Water Quality Information Advisory Committee questioned whether it is appropriate to establish 1985 standards (no discharge of pollutants national goal) by 1977. EPA has reached the conclusion that in the case of the insulation fiberglass subcategory, the best practicable control technology currently available constitutes total recirculation of process waste waters. In section 101(a)(2) of the Federal Water Pollution Control Act Amendments of 1972, Congress established as a national goal the elimination of the discharge of pollutants into navigable waters by 1985. However, Congress also set requirements for technology based standards in sections 301, 304(b) and 306 which require the maximum degree of reduction of pollutant discharges prior to 1985, which is consistent with the technical and economic factors to be taken into account under sections 304(b) and 306 of the Act (notably, standards are to be set for 1977 and 1983 compliance, but no regulations are to be promulgated for 1985). Currently 6 of 19 plants achieve no discharge of process waste water pollutants. It has been determined that this technology costs less than equivalent or nearly equivalent end-of-process treatment technologies. The Agency will require the effluent reduction attainable

V 38-162 AUG 22 73 XUM

by the best practicable control technology when establishing regulations under section 304(b) of the Act, whether that reduction is down to "no discharge" or to some greater degree of permitted discharge. For the insulation fiberglass subcategory, the degree of effluent reduction attainable through the application of the best practicable control technology currently available is no discharge of process waste waters pollutants.

2. The Effluent Standards and Water Quality Information Advisory Committee also questioned whether disposal of blowdown on the hot fiberglass would increase air emissions because of the presence of volatile matter. The binder solution, which contains orders of magnitude more of the same volatile matter, is applied at the same time as the blowdown. No measurable increase in air emissions has been noted. The blowdown will not affect emission control devices used to control binder volatilization.

3. Industry was concerned that regulations requiring no discharge of process waste water pollutants would be applied to insulation plants where some textile products are also made. Insulation fiberglass is a separate subcategory from textile fiberglass. The regulations proposed herein apply only to the insulation fiberglass manufacturing subcategory.

4. The State of Nebraska expressed concern that ground water contamination could result from infiltration where evaporation ponds are used. The proposed limitations and standards can be achieved without use of evaporation or seepage ponds.

5. Some industry representatives requested that noncontact cooling waters be omitted from the no discharge requirements. The regulations call for no discharge of process waste water pollutants, not waters. If the industry can treat waste waters, such as to remove all process waste water pollutants, a discharge will be permitted. Existing exemplary facilities incorporate noncontact cooling waters into the total recirculation systems, demonstrating its feasibility. Six plants presently achieve no discharge of process waste water pollutants, including noncontact cooling water and in EPA's judgment, elimination of such discharge is within the scope of the best practicable control technology currently available.

6. Industry requested that provisions be allowed for emergency discharges during system upsets. Due to the nature of the waste waters, discharge of untreated waste waters cannot be allowed.

7. Industry requested that boiler blowdown and water softening backwash be omitted from the no discharge of pollutants requirement. It is not technologically feasible to totally recycle these nonprocess waste waters in all cases because of chemical interference problems with the phenolic resin. Therefore, EPA has excluded boiler blowdown and water softening backwash from the requirement of no discharge. Plants in this industy currently discharge these wastes to publicly owned treatment works and no reported treatability problems have been encountered. Boiler blowdown and water softening backwash will be covered under the categories of steam supply and water supply respectively.

Interested persons may participate in this rulemaking by submitting written comments in triplicate to the EPA Information Center, Environmental Protection Agency, Washington, D.C. 20460. Attention: Mr. Philip B. Wisman. Comments on all aspects of the proposed regulations are solicited. All comments received not later than September 21, 1973, will be considered.

Dated August 15, 1973.

JOHN QUARLES,
Acting Administrator.

Part 401 is proposed to read as follows:

PART 401—GENERAL PROVISIONS

Sec.
401.10 Scope and purpose.
401.11 General definition.
401.12 Law authorizing establishment of effluent limitations guidelines, standards of performance and pretreatment standards for new sources.
401.13 Test procedures for measurement.

§ 401.10 Scope and purpose.

Regulations promulgated under Parts 402 to 699 of this subchapter prescribe guidances for effluent limitations, standards of performance for new sources and pretreatment standards for new sources pursuant to sections 301, 304(b), 306 and 307(c) of the Federal Water Pollution Control Act, as amended, ("the Act", 33 U.S.C. 1251, 1311, 1314(b), 1316 and 1317 (c); 86 Stat. 816; Pub. L. 92-500). Point sources of discharges of pollutants are required to comply with these regulations, where applicable, and permits issued by States or the Environmental Protection Agency ("EPA") pursuant to section 402 of the Act must be conditioned upon under the National Pollutant Discharge Elimination System ("NPDES") established pursuant to section 402 of the Act must be conditioned upon compliance with applicable requirements of section 301 and 306 (as well as certain other requirements). This Part 401 sets forth the legal authority and general definitions which will apply to all regulations issued concerning specific classes and categories of point sources under Parts 402 through 699 which follow. In certain instances the regulations applicable to a particular source category will contain more specialized definitions. In the case of any conflict between regulations issued under this Part 401 and regulations issued under Parts 402 through 699, the latter more specific regulations will prevail.

§ 401.11 General definitions.

For the purposes of Parts 402 through 699:

(a) The term "Act" means the Federal Water Pollution Control Act, as amended, 33 U.S.C. 1251 et seq., 86 Stat. 816, P.L. 92-500.

(b) The term "Administrator" means the Administrator of the United States Environmental Protection Agency.

(c) The term "Environmental Protection Agency" means the United States Environmental Protection Agency.

(d) The term "point source" means any discernible, confined and discrete conveyance, including but not limited to any pipe, ditch, channel, tunnel, conduit, well, discrete fissure, container, rolling stock, concentrated animal feeding operation, or vessel or other floating craft, from which pollutants are or may be discharged.

(e) The term "new source" means any building, structure, facility or installation from which there is or may be the discharge of pollutants, the construction of which is commenced after the publication of proposed regulations prescribing a standard of performance under Section 306 of the Act which will be applicable to such source if such standard is thereafter promulgated in accordance with section 306 of the Act.

(f) The term "pollutant" means dredged spoil, solid waste, incinerated residue, sewage, garbage, sewage sludge, munitions, chemical wastes, biological materials, radioactive materials, heat, wrecked or discarded equipment, rock, sand, cellar dirt and industrial, municipal and agricultural waste discharged into water. It does not mean (1) sewage from vessels or (2) water, gas or other material which is injected into a well to facilitate production of oil or gas, or water derived in association with oil or gas production and disposed of in a well, if the well, used either to facilitate production or for disposal purposes, is approved by authority of the State in which the well is located, and if such State determines that such injection or disposal will not result in degradation of ground or surface water resources.

(g) The term "pollution" means the man made or man induced alteration of the chemical, physical, biological and radiological integrity of water.

(h) The term "discharge of a pollutant" and the term "discharge of pollutants" each means (1) any addition of any pollutant to navigable waters from any point source and (2) any addition of any pollutant to the waters of the contiguous zone or the ocean from any point source, other than from a vessel or other floating craft. The term "discharge's includes a discharge of a pollutant and a discharge of pollutants.

(i) The term "effluent limitation" means any restriction established by the Administrator on quantities, rates, and concentrations of chemical, physical, biological and other constituents which are discharged from point sources, other than new sources, into navigable waters, the waters of the contiguous zone, or the ocean. The term "effluent limitations guidelines" means a regulation issued by the Administrator pursuant to section 304(b) of the Act.

(j) The term "standard of performance" means any restriction established by the Administrator pursuant to section 306 of the Act on quantities, rates, and concentrations of chemical, physical, biological and other constituents which are or may be discharged from new sources into navigable waters, the waters of the contiguous zone or the ocean.

(k) The term "navigable waters" includes: all navigable waters of the United States; tributaries of navigable waters of the United States; interstate waters; intrastate lakes, rivers, and streams which are utilized by interstate travelers for recreational or other purposes; intrastate lakes, rivers, and streams from which fish or shellfish are taken and sold in interstate commerce; and intrastate lakes, rivers, and streams which are utilized for industrial purposes by industries in interstate commerce.

(l) The terms "state water pollution control agency", "interstate agency", "State," "municipality," "person," "territorial seas," "contiguous zone," "biological monitoring," "schedule of compliance," and "industrial user," shall be defined in accordance with section 502 of the Act unless the context otherwise requires.

§ 401.12 Law authorizing effluent limitations guidelines, standards of performance and pretreatment standards for new sources.

(a) Section 301(a) of the Act provides that "except as in compliance with this section and sections 302, 306, 307, 318, 402 and 404 of this Act, the discharge of any pollutant by any person shall be unlawful."

(b) Section 301(b) of the Act requires the achievement by not later than July 1, 1977, of effluent limitations for point sources, other than publicly owned treatment works, which require the application of the best practicable control technology currently available as defined by the Administrator pursuant to section 304(b) of the Act. Section 301(b) also requires the achievement by not later than July 1, 1983, of effluent limitations for point sources, other than publicly owned treatment works, which require the application of the best available technology economically achievable which will result in reasonable further progress toward the national goal of eliminating the discharge of all pollutants, as determined in accordance with regulations issued by the Administrator pursuant to section 304(b)(2) of the Act.

(c) Section 306 of the Act requires the achievement by new sources of a Federal standard of performance providing for the control of the discharge of pollutants which reflects the greatest degree of effluent reduction which the Administrator determines to be achievable through application of the best available demonstrated control technology, processes, operating methods, or other alternatives, including, where practicable, a standard permitting no discharge of pollutants.

(d) Section 304(b) of the Act requires the Administrator to publish regulations providing guidelines for effluent limitations setting forth the degree of effluent reduction attainable through the application of the best practicable control technology currently available and the degree of effluent reduction attainable through the application of the best control measures and practices achievable including treatment techniques, process and procedure innovations, operating methods and other alternatives.

(e) Section 306(b)(1)(B) of the Act requires the Administrator, after a category of sources is includes in a list published pursuant to section 306(b)(1)(A) of the Act, to propose regulations establishing Federal standards of performances for new sources within such category. Standards of performance are to provide for the control of the discharge of pollutants which reflect the greatest degree of effluent reduction which the Administrator determines to be achievable through application of the best available demonstrated control technology, processes, operating methods, or other alternatives, including, where practicable a standard permitting no discharge of pollutants.

(f) Section 307(c) of the Act provides that the Administrator shall promulgate pretreatment standards for sources which would be "new sources" under section 306 (if they were to discharge pollutants directly to navigable waters) at the same time standards of performance for the equivalent category of new sources are promulgated.

(g) Section 402(a)(1) of the Act provides that the Administrator may issue permits for the discharge of any pollutant upon condition that such discharge will meet all applicable requirements under sections 301, 302, 306, 307, and 403 of this Act. In addition, section 402(b)(1)(A) of the Act requires that permits issued by States under the National Pollutant Discharge Elimination System ("NPDES") established by the Act must insure compliance with any applicable requirements of sections 301, 302, 306, 307 and 403 of the Act.

§ 401.13 Test procedures for measurement.

The test procedures for measurement which are prescribed in Part 130, 40 CFR shall apply to expressions of pollutant amounts, characteristics or properties in effluent limitations guidelines and standards of performance set forth in Parts 402 through 699, 40 CFR, unless otherwise specifically noted.

Part 426 is proposed to read as follows:

PART 426—EFFLUENT LIMITATIONS GUIDELINES FOR EXISTING SOURCES AND STANDARDS OF PERFORMANCE AND PRETREATMENT STANDARDS FOR NEW SOURCES FOR THE GLASS MANUFACTURING SOURCE CATEGORY

Subpart A—Insulation Fiberglass Subcategory

Sec.
426.10 Applicability; Description of insulation fiberglass manufacturing subcategory.
426.11 Special definitions.
426.12 Effluent limitations guidelines representing the degree of effluent reduction obtainable by the application of the practicable control technology currently available.
426.13 Effluent limitations guidelines representing the degree of effluent reduction obtainable by the application of the best available technology economically achievable.
426.14 Standards of performance for new sources.
426.15 Pretreatment standards for new sources.

Subpart A—Insulation Fiberglass Subcategory

§ 426.10 Applicability; description of insulation fiberglass manufacturing subcategory.

The provisions of this subpart are applicable to discharges resulting from the process in which molten glass is either directly or indirectly made, continuously fiberized and chemically bonded with phenolic resins into a wool-like material.

§ 426.11 Specialized definitions.

For the purposes of this Subpart:

(a) The term "process waste water" shall mean (1) any water which comes into contact with any glass, fiberglass, phenolic binder solution, or any other raw material, intermediate or final material or product used in, or resulting from, the manufacture of insulation fiberglass and (2) non-contact cooling water.

(b) The term "process waste water pollutants" shall mean pollutants contained in process waste waters.

§ 426.12 Effluent limitations guidelines representing the degree of effluent reduction obtainable by the application of the best practicable control technology currently available.

(a) The effluent limitation representing the degree of effluent reduction obtainable by the application of the best practicable control technology currently available is no discharge of process waste water pollutants.

(b) Application of the factors listed in section 304(b)(1)(B) does not require variation from the effluent limitation set forth in this section for any point source subject to such effluent limitation.

§ 426.13 Effluent limitations guidelines representing the degree of effluent reduction obtainable by the application of the best available technology economically achievable.

(a) The effluent limitation representing the degree of effluent reduction obtainable by the application of the best available technology economically achievable is no discharge of process waste water pollutants.

(b) Application of the factors listed in section 304(b)(2)(B) does not require variation from the effluent limitation set forth in this section for any point source subject to such effluent limitation.

V 38-162 AUG 22 73 XUM

§ 426.14 Standards of performance for new sources.

(a) The standard of performance representing the degree of effluent reduction obtainable by the application of the best available demonstrated control technology, processes, operating methods, or other alternatives is no discharge of process waste water pollutants.

(b) Application of the factors listed in Section 306 does not require variation from the standard of performance set forth in this section for any point source subject to such standard of performance.

§ 426.15 Pretreatment standards for new sources.

The pretreatment standards under section 307(c) of the Act, for a source within the insulation fiberglass manufacturing subcategory which is an industrial user of a publicly owned treatment works, (and which would be a new source subject to section 306 of the Act, if it were to discharge pollutants to navigable waters), shall be the standard set forth in Part 128, 40 CFR, except that for the purposes of this section, 128.133, 40 CFR shall be amended to read as follows: "In addition to the prohibitions set forth in section 128.131, the pretreatment standard for incompatible pollutants introduced into a publicly owned treatment works by a major contributing industry shall be the standard of performance for new sources specified in § 426.14, 40 CFR Part 426; provided that, if the publicly owned treatment works which receives the pollutants is committed, in its NPDES permit, to remove a specified percentage of any incompatible pollutant, the pretreatment standard applicable to users of such treatment works shall be correspondingly reduced for that pollutant."

[FR Doc.73-17414 Filed 8-21-73;8:45 am]

[40 CFR Part 409]

SUGAR PROCESSING CATEGORY; BEET SUGAR PROCESSING SUBCATEGORY

Proposed Effluent Limitations Guidelines for Existing Sources and Standards of Performance and Pretreatment Standards for New Sources

Notice is hereby given that effluent limitations guidelines for existing sources and standards of performance and pretreatment standards for new sources set forth in tentative form below are proposed by the Environmental Protection Agency ("EPA") for the beet sugar processing subcategory of the sugar processing category pursuant to sections 304(b), 306(b) and 307(c) of the Federal Water Pollution Control Act, as amended (33 U.S.C. 1251, 1314, 1316(b) and 1317(c), 86 Stat. 816 et seq.; P.L. 92-500) (the "Act").

a. Legal authority. 1. Existing point sources. Section 301(b) of the Act requires the achievement by not later than July 1, 1977, of effluent limitations for point sources, other than publicly owned treatment works, which require the application of the best practicable control technology currently available as defined by the Administrator pursuant to section 304(b) of the Act. Section 301(b) also requires the achievement by not later than July 1, 1983, of effluent limitations for point sources, other than publicly owned treatment works, which require the application of best available technology economically achievable which will result in reasonable further progress toward the national goal of eliminating the discharge of all pollutants, as determined in accordance with regulations issued by the Administrator pursuant to section 304(b) to the Act.

Section 304(b) of the Act requires the Administrator to publish regulations providing guidelines for effluent limitations setting forth the degree of effluent reduction attainable through the application of the best practicable control technology currently available and the degree of effluent reduction attainable through the application of the best control measures and practices achievable including treatment techniques, process and procedure innovations, operating methods and other alternatives. The regulations proposed herein set forth effluent limitations guidelines, pursuant to section 304(b) of the Act, for the beet sugar processing category.

2. *New sources.* Section 306 of the Act requires the achievement by new sources of a Federal standard of performance providing for the control of the discharge of pollutants which reflects the greatest degree of effluent reduction which the Administrator determines to be achievable through application of the best available demonstrated control technology, processes, operating methods, or other alternatives, including, where practicable, a standard permitting no discharge of pollutants.

Section 306(b)(1)(A) of the Act requires the Administrator to propose regulations establishing Federal standards of performances for categories of new sources included in a list published pursuant to section 306(b)(1)(A) of the Act. The Administrator published in the FEDERAL REGISTER of January 16, 1973 (38 FR 1624) a list of 27 source categories, including the sugar processing category. The regulations proposed herein set forth the standards of performance applicable to new sources within the beet sugar processing subcategory of the sugar processing category.

Section 307(c) of the Act requires the Administrator to promulgate pretreatment standards for new sources at the same time that standards of performance for new sources are promulgated pursuant to section 306. Section 409.15 proposed below provides pretreatment standards for new sources within the beet sugar processing subcategory of the sugar processing category.

Section 304(c) of the Act requires the Administrator to issue to the States and appropriate water pollution control agencies information on the processes, procedures or operating methods which result in the elimination or reduction of the discharge of pollutants to implement standards of performance under section 306 of the Act. The report referred to below provides, pursuant to section 304(c) of the Act, preliminary information on such processes, procedures or operating methods.

b. *Summary and Basis of Proposed Effluent Limitations Guidelines, Standards of Performance and Pretreatment Standards for New Sources.* 1. *General methodology.* The effluent limitations guidelines and standards of performance proposed herein were developed in the following manner. The point source category was first studied for the purpose of determining whether separate limitations and standards are appropriate for different segments within the category. This analysis included a determination of whether differences in raw material used, product produced, manufacturing process employed, age, size, waste water constituents and other factors require development of separate limitations and standards for different segments of the point source category. The raw waste characteristics for each such segment were then identified. This included an analysis of (1) the source, flow and volume of water used in the process employed and the sources of waste and waste waters in the plant; and (2) the constituents of all waste water. The constituents of the waste waters which should be subject to effluent limitations guidelines and standards of performance were identified.

Next, the control and treatment technologies existing within each segment were identified. This included an identification of each distinct control and treatment technology, including both in-plant and end-of-process technologies, which are existent or capable of being designed for each segment. It also included an identification of, in terms of the amount of constituents and the chemical, physical, and biological characteristics of pollutants, the effluent level resulting from the application of each of the technologies. The problem, limitations and reliability of each treatment and control technology were also identified. In addition, the nonwater quality environmental impact, such as the effects of the application of such technologies upon other pollution problems, including air, solid waste, noise and radiation were identified. The energy requirements of each control and treatment technology were determined as well as the cost of the application of such technologies.

The information, as outlined above, was then evaluated in order to determine what levels of technology constitute the "best practicable control technology currently available," "best available technology economically achievable" and the "best available demonstrated control technology, processes, operating methods, or other alternatives." In identifying such technologies, various factors were considered. These included the total cost of application of technology in relation to the effluent reduction benefits to be achieved, from such

application, the age of equipment and facilities involved, the process employed, the engineering aspects of the application of various types of control techniques, process changes, non-water quality environmental impact (including energy requirements) and other factors.

The data on which the above analysis was performed included EPA permit applications, EPA sampling and inspections, consultant reports, and industry submissions.

The pretreatment standards proposed herein are intended to be complementary to the pretreatment standard proposed for existing sources under Part 128 of 40 CFR. The basis for such standards are set forth in the FEDERAL REGISTER of July 19, 1973, 38 FR 19236. The provisions of Part 128 are equally applicable to sources which would constitute "new sources" under section 306 if they were to discharge pollutants directly to navigable waters except for section 128.133. That section provides a pretreatment standard for "incompatible pollutants" which requires application of the "best practicable control technology currently available," subject to an adjustment for amounts of pollutants removed by the publicly owned treatment works. Since the pretreatment standards proposed herein apply to new sources, Section 409.15 below amends § 128.133 to require application of the standard of performance for new sources rather than the "best practicable" standard applicable to existing sources under sections 301 and 304(b) of the Act.

(2) Summary of conclusions with respect to beet sugar processing subcategory of the sugar processing category.

The beet sugar processing industry serves as a single subcategory for the purpose of establishing effluent limitations guidelines and standards of performance. Factors such as age, size of plant, process employed, waste water constituents and waste control technologies substantiate this determination.

The known significant pollutant properties or constituents of waste water resulting from beet sugar processing include biochemical oxygen demand, chemical oxygen demand, suspended solids, dissolved solids, coliform bacteria, ammonia, pH and heat.

The control and treatment technologies which are available include in-plant control measures and techniques and end-of-process treatment techniques. In-plant control measures include minimization of the intake of water by reuse of the waste waters in the process. The principal treatment methods include screening to remove solid material, coagulation, and sedimentation with ultimate disposal of excess waste water in holding ponds, waste stabilization lagoons, or by irrigation.

The three major sources of waste water resulting from beet sugar processing plants include lime mud slurry, flume (beet transport) water, and barometric condenser water. Lime mud slurry resulting from the clarification of impure sugar solutions is disposed of without discharge to navigable water by all plants in the beet sugar processing subcategory. A total pollutant reduction of 28.6 kg BOD5/kg refined sugar (28.6 lb BOD5/1000 lb) results. Flume (beet transport) water originates from beet fluming, washing, and miscellaneous plant uses. A total of 44 plants presently employ extensive recycling of flume waters, 6 employ partial recycling, and 2 employ no recycling of flume (beet transport) waters. Thirty-two plants presently accomplish no discharge of flume (beet transport) waters with excess waste water discharged to navigable waters. All beet sugar processing plants presently practice, have planned, or propose extensive recycling of flume (beet transport) waters with land disposal of the excess waste water within several years. Cumulative pollutant reduction by no discharge of lime mud slurry and flume (beet transport) water is 48.48 kg BOD5/kg refined sugar (48.48 lb BOD/5 1000 lb) (a cumulative reduction of 94 percent of BOD5). Barometric condenser water results from the process of evaporation and crystallization of sugar solution at reduced temperature. A total of 16 plants employ recycling and reuse of barometric condenser water, and 19 employ partial recycling and reuse of barometric condenser waters.

Complete land disposal of all excess process waste water without discharge to navigable waters is practiced at 11 beet sugar processing plants. Partial land disposal of condenser water is accomplished by a total of 22 plants with excess waste water discharged to navigable waters. Thirty-two of the 52 plants employ cooling devices for cooling of barometric condenser water either prior to reuse, land disposal, or discharge to navigable waters. Cumulative pollutant reduction by zero discharge of lime mud slury, flume (beet transport) water, and barometric condenser water is 50.6 kg BOD[5] kkg refined sugar (50.6 lbs. BOD[5] 1000 lb). Other treatment methods such as trickling filters and activated sludge processes have been used with limited success. Substantial reductions of pollutants may be achieved through use of these conventional treatment processes (approaching 0.25 kg BOD[5] 1000 lb (0.5 lbs BOD[5] ton of beets sliced)). However, the successful application of these processes has been limited by the seasonal nature of the beet sugar processing industry and the high cost of treating short-term large waste volumes.

The following table sets forth the total estimated capital costs required by an average-sized 3265 kkg of beets sliced/day (3600 tons/day) beet sugar processing plant to achieve from 55 percent to 100 percent reduction of BOD[5] utilizing in the order set forth below, (i) land disposal of lime mud slurry, (ii) extensive recycling of flume water with land disposal of excess waste water and (iii) extensive recycling of barometric condenser water with land disposal of excess waste water.

Cumulative percent Reduction of total waste		Cumulative estimated Source load (BOD5) Capital costs.
Lime mud slurry	55	$50,000.
Flume water (beet transport)	94	$278,000–$360,000.
Condenser water	100	$454,000–$360,000.

The cost figures given above were derived from actual cost data on existing plants and other cost estimates for equipment, facilities, piping, and other related items associated with pollution control measures. The cost figures for the average-sized plant presume no inplace pollution control measures presently existing within the beet sugar processing subcategory. The range of cost results from investigation of alernative measures of pollution control for the identified waste sources. Percent reduction of BOD[5] indicates the cumulative percent of waste load reduction relative to the total potential BOD[5] load from beet sugar processing. Based on existing inplace plant facilities, increased capital cost to achieve zero discharge of beet sugar processing wastes is estimated at 06. to 1.0 percent of present capital investment. The average-sized beet sugar processing plant is estimated to incur an increased capital investment of $176,000 to $298,000. These cost figures are based upon availability of suitable land under ownership of the plant, its representatives or its agents, and adjacent to the plant site. If it is necessary to purchase land, and/or transport waste waters to suitable land not adjacent to the plant site, an average-sized beet sugar processing plant under these circumstances may incur an increased capital cost of up to $460,000. Due to the land based control technology for reaching zero discharge to navigable water, suitable land area must be available for waste water disposal as described by the equation given in § 409.11 in Subpart A of Part 409.

Processing sugar beets to refined sugar normally requires 4320 kilowatts (5800 horsepower) for the average-sized plant with no pollution control practices or about 1.2 kilowatts per kkg (1.61 horsepower per ton) of beets sliced per day. The added power requirements for pollution control without discharge to navigable waters approximate 748 kilowatts (1000 horsepower) which is equally divided between recycle of flume waters and condenser waters. Pollution control thus would consume about 15 percent of the total electrical power usage of a non-polluting beet sugar refining operation.

Removal of solid material from incoming beets in the flume (beet transport) system contributes large amounts of solid waste which must be disposed of at the plant site. The majority of the present beet sugar processing plants retain the solid material in earthen holding ponds with or without periodic removal and

V 3 8 - 1 6 2 A U G 2 2 7 3 XUM

placement on adjacent land. Solids removal and disposal is an integral part of a flume water recycling system.

Air pollution aspects of importance in beet sugar processing include those attributable to suspended particulate matter, sulfur oxide and odor. Odor originates primarily from waste holding ponds. It may be controlled by utilization of shallow pond depths, screening of waste before discharge to solids settling devices, use of aerators on pond surfaces, and bacterial cultures. Odor control in flume water recycling systems can be achieved by maintaining alkaline conditions (pH above 8.0) in the recirculation system. Mechanical devices are available to satisfactorily limit suspended particulate matter resulting from beet sugar processing. Particulate matter results primarily in emissions from pulp driers and steam boilers. Sulfur dioxide emissions may result from burning of high sulfur containing fuel oils and coal in boilers.

The principal nonwater quality environmental impact resulting from proposed water related pollution control technology recommended herein are odors and solids (primarily soil particles) associated with flume (beet transport) water recirculation. Fogging may occur as a result of evaporative water losses in cooling towers and other cooling devices employed in condenser water recirculation systems. Increased requirements for solids removal in flume (beet transport) water recycling systems, and cooling devices in condenser water recycling systems increase the potential impact of solids disposal and fogging.

The degree of effluent reduction attainable through the application of the best practicable control technology currently available for the beet sugar processing subcategory has been determined to be no discharge of process waste water pollutants to navigable waters. It can be accomplished through maximum in-plant water reuse and recycle, and controlled land disposal of excess waste water. At present, 11 of 52 beet sugar processing plants accomplish no discharge of process waste water pollutants to navigable waters through in-plant water reuse and land disposal procedures. In addition, the majority of the industry through treatment, recycling and land disposal presently handles flume (beet transport) water without discharge to navigable waters. The technology is currently available and demonstrated to be reliable and effective in achieving no discharge of process waste water pollutants to navigable waters. The best practicable control technology currently available for the subcategory on which the degree of effluent reduction was determined is: (1) Recycling of flume waters with land retention of excess waste waters including the specific features of screening; suspended solids removal and control in the recycling system; pH control for minimization of odors, bacterial populations, foaming, and corrosive effects; (2) recycling of condenser water using cooling devices for condenser or other in-plant uses; (3) containment of lime mud slurry or reuse in the plant process; (4) reduction of moisture in the lime mud cake conveyance or transport with minimum quantities of water added in slurrying; (5) return of pulp press water to the diffuser; (6) use of continuous diffusers in beet processing; (7) use of pulp driers in beet processing; (8) concentration of Steffen waste for disposal on beet pulp, use for reclamation purposes or spreading of unconcentrated Steffen waste in thin layers on land excluded from surface runoff (such as earthen holding ponds); (9) dry conveyance of beet pulp from diffusers to pulp driers; and, (10) containment of all general wastes, e.g., floor and equipment washes, filter cloth washes, and other miscellaneous waste waters by discharge to flume water systems or containment in earthen holding ponds without discharge to navigable waters.

The effluent limitation of no discharge of process waste water pollutants to navigable waters is based upon the availability of suitable land for controlled filtration of the excess process waste water. If suitable land is not available for controlled filtration, the effluent limitation may be varied to allow the discharge of barometric condenser water derived from sugar concentration. The availability of suitable land is determined by application of the formula given in § 409.11 of Subpart B of Part 409 hereof. The application of the formula considers variable factors such as soil filtration rate, capacity of production plant, and length of production period for determining land availability. Barometric condenser waters are relatively unpolluted, containing only BOD5, pH and heat as significant pollutants. Properties and constituents of such wastes are readily separable from the other two major sources of waste water discharged from a beet sugar processing plant.

The effluent reduction attainable through the application of the best available technology economically achievable is no discharge of process waste water pollutants to navigable waters without variance. Factors by which the effluent limitation may be varied are no longer applicable due to the extended time period available for obtaining the land resources with which to meet the requirement of no discharge of process waste water pollutants to navigable waters.

The standard of performance for new sources representing the degree of effluent reduction obtainable through the application of the best available demonstrated control technology has been determined to be no discharge of process waste water pollutants to navigable waters. An allowance for a variation of the standard is not needed since land availability requirements should be considered in site selection for a new point source.

A report entitled "Development Document for Proposed Effluent Limitations Guidelines and New Source Performance Standards for the beet sugar Processing Segment of the Sugar Processing Point Source Category" which details the analysis undertaken in support of the regulations being proposed herein is available for inspection in the EPA Information Center, Room 227, West Tower, Waterside Mall, Washington, D.C., at all EPA regional offices, and at State water pollution control offices. A supplementary analysis prepared for EPA of the possible economic effects of the proposed regulations is also available for inspection at these locations. Copies of both of these documents are being sent to persons or institutions affected by the proposed regulations, or who have placed themselves on a mailing list for this purpose (see EPA's Advance Notice of Public Review Procedures, 38 FR 21202, August 6, 1973). An additional limited number of copies of both reports are available. Persons wishing to obtain a copy may write EPA Information Center, Environmental Protection Agency, Washington, D.C. 20460, Attention: Mr. Philip B. Wisman.

c. *Summary of public participation.* Prior to this publication, the agencies and groups listed below were consulted and given an opportunity to participate in the development of the effluent limitations guidelines and standards of performance for the beet sugar processing subcategory. The following are the principal agencies and groups consulted: (1) Effluent Standards and Water Quality Information Advisory Committee (established under Section 515 of the Act); (2) all State and U.S. Territory Pollution Control Agencies; (3) Ohio River Valley Sanitation Commission; (4) New England Interstate Water Pollution Control Commission; (5) Delaware River Basin Commission; (6) Hudson River Sloop Restoration, Inc.; (7) Conservation Foundation; (8) American Crystal Sugar Company; (9) American Sugar Company; (10) Beet Sugar Development Foundation; (11) Businessmen for the Public Interest; (12) Environmental Defense Fund, Inc.; (13) Natural Resources Defense Council; (14) The American Society of Civil Engineers; (15) Water Pollution Control Federation; (16) National Wildlife Federation; (17) The American Society of Mechanical Engineers; (18) U.S. Department of Health, Education, and Welfare; (19) U.S. Department of Commerce; (20) U.S. Department of Agriculture; (21) Water Resources Council; (22) U.S. Department of the Interior; (23) Great Western Sugar Company; (24) U.S. Beet Sugar Association; and (25) Utah-Idaho Sugar Company;

The primary issues raised in the development of these proposed effluent limitations guidelines and standards of performance and the treatment of these issues herein are as follows. Public comments on all these suggestions are solicited.

1. Industry, states, other Federal agencies, and the Effluent Standards and Water Quality Information Advisory Committee questioned the ability to accomplish no discharge of process waste water pollutants to navigable waters where soil filtration rates, land availability, climatic conditions, age of facilities, and location are less favorable to controlled land disposal of waste waters. All such factors have been considered in establishment of the proposed levels of technology, effluent limitation guidelines and standards of performance. Land availability is a problem in urban areas, particularly where soil and climatic conditions are less favorable to land disposal of waste waters. EPA has determined that it is not practicable to require no discharge of process waste water pollutants where suitable land is not available adjacent to the point source and presently under the ownership of the point source discharger. Therefore, § 409.12 provides that where suitable land is not available, the best practicable control technology currently available (to be achieved by 1977) results in a maximum discharge of 3.3 kg BOD5/kkg (3.3 lb/1000 lb) of refined sugar, rather than no discharge. The no discharge requirement is, however, to be achieved by all plants by July 1, 1983.

It has been suggested that seepage rates could replace land availability as the criterion for allowing a reduction in the degree of treatment being required. Such a provision would change the economic impact and degree of waste disposal, raising it for those plants without available land in areas of high seepage rates and lowering it for plants in low seepage rate areas. The net effect is likely to be a higher degree of waste disposal at the cost of higher economic impact. In addition, there may also be alternative ways of reducing economic impact in areas with low seepage, through increased use of recycling.

It has also been suggested that the size of plants be used as a criterion for requiring complete elimination of waste, either by itself or in combination with seepage rate or land availability. Since very small plants have not achieved complete elimination of waste it may be more consistent with industry practice not to require them to achieve no discharge. In combination with one of the land criteria, segmentation by size could be used to modify the tradeoffs between economic impact and degree of waste disposal. On the other hand, some small plants have the capability to meet a no discharge requirement while others may already be exempt from doing so because of lack of available land. In considering these alternative criteria, it was concluded that land availability would serve as a reasonable surrogate for reducing economic impact.

2. Industry felt that the cost data for pollution control reduction given in Section VIII of the Report is underestimated and stems from lack of inclusion of land costs and underestimation of required waste water blowdown volume from a recirculating waste water system. The cost data utilized in the cost-effectiveness variations of alternative treatment and control technologies are outlined in Section VIII of the Report and are based on actual data supplied by the industry and verified for specific technological features at operational beet sugar processing plants visited by EPA personnel.

3. Industry, states and the Effluent Standards and Water Quality Information Advisory Committee were concerned that water rights in some Western states may present possible conflicts with the limitation of no discharge of process waste water pollutants to navigable waters. To the extent any conflict is presented with the prior appropriation doctrine by the reduction in discharge of treated waste effluent, such a conflict would appear to be presented by any such reduction whether or not a reduction is to zero discharge or to some greater permitted discharge. Congress has in the Federal Water Pollution Control Act Amendments of 1972 set as a national goal the elimination of the discharge of pollutants. In addition sections 301, 304 (b) and 306 of the Act provide for the application of effluent limitations and standards which will require the reduction of discharges of pollutants to the maximum extent possible (consistent with the technological and economic factors which are to be taken into consideration). A preliminary evaluation by EPA's Office of General Counsel has concluded that to the extent of a conflict with State laws concerning appropriated water rights, the Federal doctrine of preemption nevertheless requires the application of treatment requirements established under the Act.

4. Industry was concerned about odors emanating from prolonged storage of beet sugar processing waste waters with related nuisance problems. Various mechanisms are available and are practiced within the industry for minimizing odor problems. Significant reduction in odors at beet sugar processing plants can be accomplished through dry-lime cake handling and disposal and other measures as described in section VII of the Report.

5. States felt that additional attention needed to be given to prevention of possible ground water pollution from controlled land disposal of waste waters. Contamination of underlying aquifers can best be prevented through proper disposal site selection, waste water management practices, and application of ground water hydrologic and geologic factors. The soil media is in itself an effective and reliable means for reduction of waste water pollutant levels. A detailed discussion of the role of soil as a waste water disposal medium is included within Section VII of the Report. With widespread use of land disposal of beet sugar processing waste waters, no serious ground water pollution problems are known to have resulted from or can be attributed to these land disposal practices. Responsibility for maintaining ground water quality lies primarily with the States. State authority may be used to prevent contamination where it appapers to be a problem by controlling pond location and requiring sealing as necessary.

6. States were concerned that fogging resulting from evaporative cooling of barometric condenser waters may present a visibility problem at some locations. Fogging problems are subject to control. Also, there are only one or two locations in the industry where this problem may occur. A more detailed discussion of possible alternatives for fogging control is given in section VIII of the Report.

7. The Effluent Standards and Water Quality Information Advisory Committee felt that total dissolved solids content in recirculated waste water (flume and barometric condenser water) is of pollutional concern in land disposal of these waste waters. Total dissolved solids pose some largely aesthetic problems for human consumptive purposes, require treatment for removal for some industrial water supply purposes, and present deleterious effects on irrigation of some crops at high concentration levels. No economic method exists for removal of dissolved solids on a large scale basis. A detailed discussion of the origin, effects, and control of total dissolved solids in beet sugar processing waste waters is given in section IX of the Report.

Interested persons may participate in this rulemaking by submitting written comments to the EPA Information Center, Environmental Protection Agency, Washington, D.C. 20460, Attention: Mr. Philip B. Wisman. Comments on all aspects of the proposed regulations are solicited. All comments received not later than September 21, 1973 will be considered.

Dated August 15, 1973.

JOHN QUARLES,
Acting Administrator.

PART 409—EFFLUENT LIMITATIONS GUIDELINES FOR EXISTING SOURCES AND STANDARDS OF PERFORMANCE AND PRETREATMENT STANDARDS FOR NEW SOURCES FOR THE SUGAR PROCESSING CATEGORY

Subpart A—Beet Sugar Processing Subcategory

Sec.
409.10 Applicability; description of beet sugar processing subcategory.
409.11 Special definitions.
409.12 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.
409.13 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best available technology economically achievable.
409.14 Standards of performance for new sources.
409.15 Pretreatment standards for new sources.

Subpart A—Beet Sugar Processing Subcategory

§ 409.10 Applicability; description of beet sugar processing subcategory.

The provisions of this subpart are applicable to any operation existing for the primary purpose of processing of sugar

V 38-162 AUG 22 73 XUM

beets for the production of refined sugar for commercial or domestic use.

§ 409.11 Specialized definitions.

For the purposes of this Subpart:

(a) The term "process waste water" shall mean (1) all water used in or resulting from the processing of sugar beets to refined sugar, including process water, barometric condenser water, beet transport or flume water and (2) all other liquid wastes including cooling waters.

(b) The term "process waste water pollutants" shall mean pollutants contained in process waste waters.

(c) The term "availability of suitable land" shall mean that amount of land which is (1) adjacent to the point source and (2) under the ownership or control of the owner or operator of the point source as determined by the formula set forth below. The amount of land is determined by the application of the following formula:

$A=0.001426(CL/s)+0.0536C$ (for metric system units) where A=land area requirements for controlled waste water disposal expressed in hectares, C=processing rate of capacity of plant in metric tons of refined sugar production per day, L=length of sugar production per campaign of plant (including extended use campaign) expressed in terms of days, s=actual soil filtration rate for waste water to be applied to land expressed in terms of centimeters per day, not to exceed 0.635 centimeters per day.

$A=0.000631(CL/S)+0.0601C$ (for English system units) where A=land area requirements for controlled waste water disposal expressed in terms of acres, C=processing rate or capacity of plants in tons of refined sugar production per day, L=length of sugar production campaign of plant (including extended use campaign) in terms of total number of days, s=actual soil filtration rate for waste water to be disposed of on land expressed in terms of inches per day, not to exceed ¼ inch per day.

(d) For the purposes of this subpart, the following abbreviations shall have the following meaning: (1) kg shall mean kilogram(s); (2) kkg shall mean 1000 kilograms; and, (3) lb shall mean pound(s).

§ 409.12 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.

(a) The effluent limitation representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available is no discharge of process waste water pollutants to navigable waters.

(b) The effluent limitation of no discharge of process waste water pollutants to navigable waters is based upon the availability of suitable land for controlled filtration of the excess process waste waters. If suitable land is not available for controlled filtration, the effluent limitation may be varied to allow the discharge of barometric condenser water derived from sugar evaporation and crystallization within the effluent limitations set forth in the following table:

Effluent Characteristics	*Limitation*
BOD5	Maximum for any one day 3.3 kg/kkg refined sugar (3.3 lb/1000 lb) Maximum average of daily values for any period of 30 consecutive days 2.2 kg/kkg refined sugar (2.2 lb/1000 lb)
Temperature [1]	6.0 to 9.0 units
pH.	

[1] No discharge of heat from waste waters to navigable waters at a temperature greater than the temperature of cooled water returned to the heat producing process.

§ 409.13 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best available technology economically achievable.

(a) The effluent limitation representing the degree of effluent reduction obtainable by the application of the best available technology economically achievable is no discharge of process waste water pollutants to navigable waters.

(b) Application of the factors listed in section 304(b)(2)(b) does not require variation from the effluent limitation set forth in this section for any point source subject to such effluent limitation.

§ 409.14 Standards of performance for new sources.

(a) The standard of performance representing the degree of effluent reduction obtainable by the application of the best available demonstrated control technology, processes, operating methods, or other alternatives is no discharge of process waste water pollutants to navigable waters.

(b) Application of the factors listed in section 306 does not require variation from the standard of performance set forth in this section for any point source subject to such standard of performance.

§ 409.15 Pretreatment standards for new sources.

The pretreatment standards under section 307(c) of the Act, for a source within the beet sugar processing subcategory which is an industrial user of a publicly owned treatment works, (and which would be a new source subject to section 306 of the Act, if it were to discharge pollutants to navigable waters), shall be the standard set forth in Part 128, 40 CFR, except that for the purposes of this section, § 128.131 40 CFR shall read as follows: "In addition to the prohibitions set forth in § 128.131 of this title, the pretreatment standard for incompatible pollutants introduced into a publicly owned treatment works by a major contributing industry shall be the standard of performance for new sources specified in § 409.14, 40 CFR, Part 409; provided that, if the publicly owned treatment works which receives the pollutants is committed, in its NPDES permit, to remove a specified percentage of any incompatible pollutant, the pretreatment standard applicable to users of such treatment works shall be correspondingly reduced for that pollutant."

List of CFR Parts Affected

The following numerical guide is a list of the parts of each title of the Code of Federal Regulations affected by documents published in today's issue. A cumulative list of parts affected, covering the current month to date, appears following the Notices section of each issue beginning with the second issue of the month. In the last issue of the month the cumulative list will appear at the end of the issue.

A cumulative guide is published separately at the end of each month. The guide lists the parts and sections affected by documents published since January 1, 1973, and specifies how they are affected.

Rules and Regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 9—Animals and Animal Products

CHAPTER III—ANIMAL AND PLANT HEALTH INSPECTION SERVICE (MEAT AND POULTRY PRODUCTS INSPECTION), DEPARTMENT OF AGRICULTURE

PART 319—DEFINITIONS AND STANDARDS OF IDENTITY OR COMPOSITION

Standard of Composition for Frankfurters and Certain Other Cooked Sausage Products; Postponement of Effective Date

On June 5, 1973, there were published in the FEDERAL REGISTER (37 FR 14741–14743) amendments to Part 319 of the Federal meat inspection regulations (9 CFR 319.180) establishing new standards for frankfurters and other cooked sausage products, in accordance with the order of the U.S. District Court for the District of Columbia in connection with the case of the Federation of Homemakers v. Earl L. Butz, et al. The reasons for those amendments were set forth in the June 5 notice. The notice provided that the amendments would become effective September 7, 1973, in accordance with the court order.

After publishing the June 5, 1973, amendments, the Department and the court received requests from frankfurter and similar cooked sausage processors to postpone the September 7 effective date on the basis that it would result in considerable economic dislocation. Information and data were made available to the Department to substantiate their request. At the direction of the court, the Department submitted information to the court regarding this matter. On August 8, 1973, the Department received notice of modified judgment from said court which read as follows:

"The Court, having received correspondence from persons not parties to this litigation and being advised that the order of the Court heretofore entered on March 9, 1973, could cause prejudicial economic injury to such persons, does this 8th day of August, 1973,

Order and adjudge that the effective date of the mandate of this Court entered on May 5, 1973, as extended by the JUDGMENT entered on March 9, 1973, is hereby further extended to and including December 31, 1973. After that date the defendants may not permit the movement from any official establishment of any sausage product within the standard in 9 CFR 319.180, as amended, bearing the label designation 'All Meat' or 'All (Species)'. Rather, as mandated by the Court of Appeals (No. 71–1611, decided August 18, 1972), the defendants shall direct the use of labels by such establishments that accurately and without deception distinguish the different types of such sausage products from each other and from competitive meats."

Accordingly, the amendments to the regulations (9 CFR 319.180) establishing new standards for frankfurters and other cooked sausage products (37 FR 14741–14743) shall become effective January 1, 1974.

(Sec. 21, 34 Stat. 1260, as amended, 21 U.S.C. 621; 37 FR 28464, 28477)

This action complies with the modified judgment of the court. Therefore, under the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public rulemaking procedure on this action are impracticable and unnecessary, and good cause is found for making this action effective less than 30 days after publication hereof in the FEDERAL REGISTER.

Done at Washington, D.C., on August 20, 1973.

G. H. WISE,
Acting Administrator, Animal and Plant Health Inspection Service.

[FR Doc.73-17902 Filed 8-22-73;8:45 am]

Title 14—Aeronautics and Space

CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 13132; Amdt. 39-1706]

PART 39—AIRWORTHINESS DIRECTIVES

Hawker Siddeley Aviation Model BH–125 and DH–125 Airplanes

There have been reports that a number of overhauled oxygen cylinders installed on Hawker Siddeley Model BH–125 and DH–125 airplanes have had the overhaul identification markings applied in critical locations. Such a cylinder could burst in flight. Since this condition is likely to exist or develop in other Hawker Siddeley Model BH–125 and DH–125 airplanes with overhauled oxygen cylinders installed, an airworthiness directive is being issued to require inspection of the oxygen cylinders for overhaul stamp impression location, and replacement, if necessary, on Hawker Siddeley Model BH–125 and DH–125 airplanes.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

This amendment is made under the authority of sections 313(a), 601, and 603 of the Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421, and 1423), and of section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

In consideration of the foregoing, and pursuant to the authority delegated to me by the Administrator (14 CFR 11.89), § 39.13 of Part 39 of the Federal Aviation regulations is amended by adding the following new airworthiness directive:

HAWKER SIDDELEY AVIATION, LTD. Applies to to Hawker Siddeley Model BH–125 and DH–125 airplanes equipped with overhauled oxygen cylinders.

Compliance is required within the next 14 days after the effective date of this AD, except as provided in paragraph (c), and thereafter at each replacement of an oxygen cylinder with an overhauled oxygen cylinder.

To prevent the possible burst failure of overhauled oxygen cylinders, P/N WKA 29396/GR14, WKA 29396/GR22, WKA 31393, and WKA 31394, due to the overhaul stamp impression being located on a critical area of the cylinder, accomplish the following:

(a) Visually inspect the surface of the oxygen cylinder for evidence of stamp impressions indicating the date of the overhaul or letters designating the overhaul agency.

(b) If stamp impressions are found during an inspection required by paragraph (a), on the cylinder shoulder, either (1) outboard of a radius of 3 inches from the cylinder center, or (2) inboard of a 3-inch radius and accompanied by local distortion in the hemispherical profile at the stamp impression, before further flight, replace the cylinder with a serviceable part of the same part number, or an FAA-approved equivalent.

(c) If the oxygen system is to be recharged before accomplishment of the inspection provisions of this AD, the oxygen system charge must be limited to not more than 50 percent of normal full quantity, and a placard must be installed adjacent to the oxygen system charging point, stating, "System Contents Must Not Exceed ½ Full At Any Time."

(d) The placard required by paragraph (c) may be removed when it is determined by an inspection in accordance with paragraph (a) that the oxygen cylinders have no stamp impressions on the cylinder shoulder, outboard of a radius of 3 inches from the cylinder center, and if there is a stamp impression inboard of a 3-inch radius, that there is no local distortion in the hemispherical profile at the stamp impression.

This amendment becomes effective August 28, 1973.

Issued in Washington, D.C., on August 15, 1973.

C. R. MELUGIN, Jr.,
Acting Director, Flight Standards Service.

[FR Doc.73-17834 Filed 8-22-73;8:45 am]

V 38-163 AUG 23 73 XUM

[Airspace Docket No. 73-NW-08]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Transition Area

On July 3, 1973 a notice of proposed rule making was published in the FEDERAL REGISTER (38 FR 17734) stating that the Federal Aviation Administration (FAA) was considering an amendment to Part 71 of the Federal Aviation regulations that would alter the description of the Medford, Oregon Transition Area.

Interested persons were given thirty days in which to submit written data, views, or arguments. No objections were received, and the proposed amendment is hereby adopted without change.

Effective date.—This amendment shall be effective 0901 G.m.t., October 11, 1973.

This amendment is issued under the authority of section 307(a) of the Federal Aviation Act of 1958 as amended (49 U.S.C. 1348(a)) and of section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Seattle, Washington, August 15, 1973.

C. B. WALK, Jr.,
Director.

In § 71.181 (38 FR 435) the description of the Medford, Oregon, Transition Area, as amended, (38 FR 13730) is further amended as follows:

MEDFORD, OREGON

That airspace extending upward from 700 feet above the surface within 7-miles northeast and 5-miles southwest of the Medford ILS localizer northwest course extending from 3-miles northwest of the Pumic LOM (Latitude 42°27'03.8" N., Longitude 122° 54'44.1" W.), to 24 miles northwest of the LOM; within 3.5 miles each side of the Medford ILS localizer southeast course extending from the LOM to 24 miles southeast of the LOM; that airspace extending upward from 1200' above the surface, bounded on the east by V-452, on the southeast by the 40 mile-arc centered on Klamath Falls VORTAC, on the south by V-122, on the west by V-23; that airspace southeast of Medford bounded on the north by the south edge of V-122, on the east by the 40 mile-arc centered on Klamath Falls VORTAC, on the south by the 7-mile-radius area centered on the Siskiyou County Airport, on the west by the east edge of V-27E; and that airspace extending upward from 6,200 feet MSL within 5 miles each side of the Medford VORTAC 271° radial extending from the west edge of V23-E to the east edge of V-27.

[FR Doc.73-17835 Filed 8-22-73;8:45 am]

[Docket No. 13129; Amdt. 878]

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

Recent Changes and Additions

This amendment to Part 97 of the Federal Aviation Regulations incorporates by reference therein changes and additions to the Standard Instrument Approach Procedures (SIAP's) that were recently adopted by the Administrator to promote safety at the airports concerned.

The complete SIAP's for the changes and additions covered by this amendment are described in FAA Forms 3139, 8260-3, 8260-4, or 8260-5, and made a part of the public rule making dockets of the FAA in accordance with the procedures set forth in Amendment No. 97-696 (35 FR 5609).

SIAP's are available for examination at the Rules Docket and at the National Flight Data Center, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591. Copies of SIAP's adopted in a particular region are also available for examination at the headquarters of that region. Individual copies of SIAP's may be purchased from the FAA Public Document Inspection Facility, HQ-405, 800 Independence Avenue SW., Washington, D.C. 20591, or from the applicable FAA regional office in accordance with the fee schedule prescribed in 49 CFR 7.85. This fee is payable in advance and may be paid by check, draft or postal money order payable to the Treasurer of the United States. A weekly transmittal of all SIAP changes and additions may be obtained by subscription at an annual rate of $150 per annum from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Additional copies mailed to the same address may be ordered for $30 each.

Since a situation exists that requires immediate adoption of this amendment, I find that further notice and public procedure hereon is impracticable and good cause exists for making it effective in less than 30 days.

In consideration of the foregoing, Part 97 of the Federal Aviation Regulations is amended as follows, effective on the dates specified:

1. Section 97.23 is amended by originating, amending, or canceling the following VOR-VOR/DME SIAP's, *effective October 4, 1973.*

Jamestown, N.D.—Jamestown Municipal Arpt., VOR Rwy 30, Amdt. 3.
Rochester, N.Y.—Rochester-Monroe Co. Arpt., VOR Rwy 22, Orig.

2. Section 97.25 is amended by originating, amending, or canceling the following SDF-LOC-LDA SIAP's, *effective September 6, 1973.*

Jackson, Tenn.—McKellar Field, LOC Rwy 2, Orig., Canceled.
• • • *effective August 30, 1973.*
Kinston, N.C.—Stallings Field, LOC Rwy 4, Orig., Canceled.

3. Section 97.27 is amended by originating, amending, or canceling the following NDB/ADF SIAP's, *effective October 4, 1973.*

Florence, S.C.—Florence Municipal Arpt., NDB Rwy 9, Amdt. 4.
Jamestown, N.D.—Jamestown Municipal Arpt., NDB Rwy 30, Amdt. 1.
• • • *effective August 30, 1973.*
Kinston, N.C.—Stallings Field, NDB Rwy 4, Amdt. 1.
• • • *effective August 9, 1973.*
Kosciusko, Miss.—Kosciusko-Attala County Arpt., NDB Rwy 14, Amdt. 3.

4. Section 97.29 is amended by originating, amending, or canceling the following ILS SIAP's, *effective October 4, 1973.*

Florence, S.C.—Florence Municipal Arpt., ILS Rwy 9, Amdt. 4.
Jamestown, N.D.—Jamestown Municipal Arpt., ILS Rwy 30, Amdt. 1.
• • • *effective September 6, 1973.*
Jackson, Tenn.—McKellar Field, ILS Rwy 2, Orig.
• • • *effective August 30, 1973.*
Kinston, N.C.—Stallings Field, ILS Rwy 4, Orig.

5. Section 97.31 is amended by originating, amending, or canceling the following RADAR SIAP's, *effective September 6, 1973.*

Springfield, Ill.—Capital Arpt., RADAR-1, Orig.

(Secs. 307, 313, 601, 1110, Federal Aviation Act of 1948; 49 U.S.C. 1438, 1354, 1421, 1510, sec. 6(c) Department of Transportation Act, 49 U.S.C. 1655(c) and 5 U.S.C. 552(a)(1).)

Issued in Washington, D.C., on August 17, 1973.

JAMES M. VINES,
Chief,
Aircraft Programs Division.

NOTE.—Incorporation by reference provisions in §§ 97.10 and 97.20 approved by the Director of the FEDERAL REGISTER on May 12, 1969 (35 FR 5610).

[FR Doc.73-17833 Filed 8-22-73;8:45 am]

Title 21—Food and Drugs

CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

SUBCHAPTER C—DRUGS

Gentamicin Sulfate Injection, Veterinary

The Commissioner of Food and Drugs has evaluated a new animal drug application (47-486V) filed by American Scientific Laboratories, A Division of Schering Corp., Bloomfield, N.J. 07003, proposing the safe and effective use of gentamicin sulfate injection, veterinary in 1- to 3-day-old turkey poults as an aid in the prevention of early mortality due to Arizona paracolon infections susceptible to gentamicin sulfate. The application is approved.

The Commissioner further concludes that the new animal drug regulations should be amended to provide for the establishment of a tolerance for negligible residues of gentamicin sulfate in the edible tissues of turkeys.

To facilitate referencing, the firm is being assigned a code number and placed in the list of sponsors in § 135.501 (21 CFR 135.501).

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347; 21 U.S.C. 360b(i)) and under authority delegated to the Commissioner (21 CFR 2.120), Parts 135, 135b, and 135g are amended as follows:

PART 135—NEW ANIMAL DRUGS

Subpart C—Sponsors of Approved Applications

1. Section 135.501 is amended in paragraph (c) by adding a new code number as follows:

§ 135.501 Names, addresses, and code numbers of sponsors of approved applications.

• • • • • •

(c) • • •

Code No.	*Firm name and address*
• • •	• • •
081	American Scientific Laboratories, a Division of Schering Corp., Bloomfield, N.J. 07003.
• • •	• • •

PART 135b—NEW ANIMAL DRUGS FOR IMPLANTATION OR INJECTION

2. Part 135b is amended in § 135b.19 by revising paragraphs (a) and (b), by revising the heading for paragraph (c) from "Conditions of use" to "Conditions of use in dogs and cats", and by adding a new paragraph (d) as follows:

§ 135b.19 Gentamicin sulfate injection, veterinary.

(a) *Specifications.*—Conforms to the standards of identity, strength, quality, and purity prescribed by § 148q.4 of this chapter, except that each milliliter of the drug contains gentamicin sulfate equivalent to 50 milligrams of gentamicin base if intended for use in dogs and cats or gentamicin sulfate equivalent to 5 milligrams of gentamicin base if intended for use in turkeys.

(b) *Sponsor.*—(1) See code No. 032 in § 135.501(c) of this chapter for conditions of use provided for in paragraph (c) of this section.

(2) See code No. 081 in § 135.501(c) of this chapter for conditions of use provided for in paragraph (d) of this section.

(c) *Conditions of use in dogs and cats.*

• • • • • •

(d) *Conditions of use in turkeys.*—(1) It is used in 1- to 3-day-old turkey poults as an aid in the prevention of early mortality due to Arizona paracolon infections susceptible to gentamicin sulfate.

(2) It is administered subcutaneously in the neck of 1- to 3-day-old turkey poults at a rate of 1 milligram per poult.

(3) For use in 1- to 3-day-old turkey poults only. Injected poults must not be slaughtered for food for at least 9 weeks following treatment.

PART 135g—TOLERANCES FOR RESIDUES OF NEW ANIMAL DRUGS IN FOOD

3. Part 135g is amended by adding the following new section:

§ 135g.80 Gentamicin sulfate.

A tolerance of 0.1 part per million is established for negligible residues of gentamicin sulfate in the uncooked edible tissues of turkeys.

Effective date.—This order shall be effective on August 23, 1973.

(Sec. 512(i), 82 Stat. 347; 21 U.S.C. 360b(i).)

Dated August 15, 1973.

FRED J. KINGMA,
Acting Director, Bureau of Veterinary Medicine.

[FR Doc.73-17831 Filed 8-22-73;8:45 am]

PART 135a—NEW ANIMAL DRUGS FOR OPHTHALMIC AND TOPICAL USE

Combination Drug for Treatment of Cats

The Commissioner of Food and Drugs has evaluated a supplemental new animal drug application (12-890V) filed by Schering Corp., 86 Orange St., Bloomfield, N.J. 07003, proposing the safe and effective use of an otic suspension containing various drugs for the treatment of otitis externa in cats. The supplemental application is approved.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347; 21 U.S.C. 360b(i)) and under authority delegated to the Commissioner (21 CFR 2.120), Part 135a is amended by adding a new section thereto as follows:

§ 135a.47 Dexamethasone acetate, nitrofurathiazide, griseofulvin, undecylenic acid, tetracaine hydrochloride otic suspension.

(a) *Specifications.*—Dexamethasone acetate, nitrofurathiazide, griseofulvin, undecylenic acid, tetracaine hydrochloride otic suspension contains in each milliliter 0.25 milligram dexamethasone acetate (equivalent to 0.226 milligram dexamethasone alcohol), 2 milligrams nitrofurathiazide, 15 milligrams griseofulvin, 10 milligrams undecylenic acid, 10 milligrams tetracaine hydrochloride.

(b) *Sponsor.*—See code No. 032 in § 135.501(c) of this chapter.

(c) *Conditions of use.*—(1) The drug is indicated for the treatment of acute otitis externa and as adjunctive therapy in the treatment of chronic otitis externa complicated by organisms sensitive to griseofulvin, undecylenic acid or nitrofurathiazide in cats.

(2) Four to 10 drops of the drug are instilled into the ear canal. Treatment should be repeated 2 or 3 times daily.

(3) The drug should not be used in conditions where corticosteroids are contraindicated. Do not administer parenteral corticosteroids during treatment with the drug.

(4) Federal law restricts this drug to use by or on the order of a licensed veterinarian.

Effective date.—This order shall be effective August 23, 1973.

(Sec. 512(i), 82 Stat. 347; 21 U.S.C. 360(b)(i).)

Dated August 15, 1973.

FRED J. KINGMA,
Acting Director, Bureau of Veterinary Medicine.

[FR Doc.73-17832 Filed 8-22-73;8:45 am]

PART 135e—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

Dichlorvos

The Commissioner of Food and Drugs has evaluated a supplemental new animal drug application (40-848V) filed by Shell Chemical Co., a division of Shell Oil Co., Agricultural Division, 2401 Crow Canyon Rd., San Ramon, CA 94583, proposing that finished swine feeds processed from feed supplements containing up to 0.768 percent dichlorvos not be required to comply with the provisions of section 512(m) of the Federal Food, Drug, and Cosmetic Act. The supplemental application is approved.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347; 21 U.S.C. 360b(i)) and under authority delegated to the Commissioner (21 CFR 2.120), § 135e.54 is amended by revising paragraph (d)(4) to read as follows:

§ 135e.54 Dichlorvos.

• • • • • •

(d) • • •

(4) Finished feeds conforming to the requirements of this section processed from feed supplements containing up to 0.768 percent of dichlorvos are not required to comply with the provisions of section 512(m) of the Federal Food, Drug, and Cosmetic Act.

Title 29—Labor

CHAPTER XVII—OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION, DEPARTMENT OF LABOR

PART 1903—INSPECTIONS, CITATIONS AND PROPOSED PENALTIES

Delegations of Authority; Definitions

Part 1903 of Title 29, Code of Federal Regulations, is amended in the manner indicated below in order to change the definitions of the terms "Area Director" and "Assistant Regional Director".

One purpose of the change is to clarify what are the permissible delegations of authority for the issuance of citations and proposed penalties and for the performance of other duties under Part 1903 in the absence of officers or employees who are regularly or temporarily assigned the duties of an Area Director or Assistant Regional Director. For example, a Compliance Safety and Health Officer may be specifically delegated duties of the Area Director which are to be exercised in the absence of an Area Director.

V 38-163 AUG 23 73 XUM

Also, the changes would permit a Compliance Safety and Health Officer to perform on a regular basis duties of the Area Director at a field station, when the distance of the field station from the office of the Area Director may make it impractical for the Area Director to exercise the duties involved. In addition, the changes would permit a broader authorization of Compliance Safety and Health Officers to exercise the duties of an Area Director either generally or for the limited purpose of issuing citations or notices of de minimis violations. Operating instructions for such authorization are being developed, and will be made available to the public.

The changes also make clear that persons supervising Area Directors or Assistant Regional Directors may exercise concurrent authority with them in the performance of the duties of the Secretary of Labor which are carried out in Part 1903.

The amendments shall be effective August 23, 1973.

Part 1903 is hereby amended by revising paragraphs (e) and (f) of § 1903.21 to read as follows:

§ 1903.21 Definitions.

* * * * *

(e) "Area Director" means the employee or officer regularly or temporarily in charge of an Area Office of the Occupational Safety and Health Administration, U.S. Department of Labor, or any other person or persons who are authorized to act for such employee or officer. The latter authorizations may include general delegations of the authority of an Area Director under this part to a Compliance Safety and Health Officer or delegations to such an officer for more limited purposes, such as the exercise of the Area Director's duties under § 1903.14(a). The term also includes any employee or officer exercising supervisory responsibilities over an Area Director. A supervisory employee or officer is considered to exercise concurrent authority with the Area Director.

(f) "Assistant Regional Director" means the employee or officer regularly or temporarily in charge of a Region of the Occupational Safety and Health Administration, U.S. Department of Labor, or any other person or persons who are specifically designated to act for such employee or officer in his absence. The term also includes any employee or officer in the Occupational Safety and Health Administration exercising supervisory responsibilities over the Assistant Regional Director. Such supervisory employee or officer is considered to exercise concurrent authority with the Assistant Regional Director. No delegation of authority under this paragraph shall adversely affect the procedures for independent informal review of investigative determinations prescribed under § 1903.12 of this part.

* * * * *

(Sec. 8(g)(2), Public Law 91-596, 84 Stat. 1600 (29 U.S.C. 657).)

Signed at Washington, D.C., this 17th day of August 1973.

JOHN STENDER,
Assistant Secretary of Labor.

[FR Doc.73-17914 Filed 8-22-73;8:45 am]

Title 32—National Defense

CHAPTER XX—INTERAGENCY CLASSIFICATION REVIEW COMMITTEE

PART 2000—APPEALS PROCEDURES

Establishment of Appeals Procedures

The Interagency Classification Review Committee was established by the National Security Council Directive Governing Classification, Downgrading, Declassification and Safeguarding of National Security Information (37 FR 10053, May 19, 1972), pursuant to section 7 of Executive Order 11652, Classification and Declassification of National Security Information and Material" (37 FR 5209, March 10, 1972), both of which became effective June 1, 1972. Among the duties assigned to the Committee was the responsibility to "consider and take action on complaints from persons within or without the government with respect to the general administration of the Order including appeals from denials by Departmental Committees or The Archivist of declassification requests." The purpose of this regulation is to establish the conditions and procedures under which the denial of a request for the declassification of classified documents ten (10) or more years old may be appealed to the Interagency Classification Review Committee.

Therefore, a new Chapter XX and Part 2000, as titled above, are added to Title 32 of the Code of Federal Regulations, to read as set forth below.

Effective date.—This regulation is effective August 23, 1973.

Dated August 17, 1973.

JAMES B. RHOADS,
Archivist of the United States, Acting Chairman.

Sec.
2000.1 Purpose.
2000.3 Establishment and jurisdiction of the Committee.
2000.5 Request for declassification.

AUTHORITY.—Executive Order 11652 (37 FR 5209); N.S.C. Directive (37 FR 10053).

§ 2000.1 Purpose.

This regulation establishes the conditions and procedures under which the denial of a request for the declassification of classified documents ten (10) or more years old may be appealed to the Interagency Classification Review Committee, hereinafter referred to as the Committee.

§ 2000.3 Establishment and jurisdiction of the Committee.

(a) *Establishment and composition.*—Pursuant to section 7 of Executive Order 11652, "Classification and Declassification of National Security Information and Material" (37 FR 5209, March 10, 1972), hereinafter referred to as the Order, the Committee has been established by the National Security Council Directive Governing Classification, Downgrading, Declassification and Safeguarding of National Security Information (37 FR 10053, May 19, 1972), hereinafter referred to as the Directive, which both became effective on June 1, 1972. The Committee is composed of a Chairman designated by the President, the Archivist of the United States, and one senior representative from each of the Departments of State, Defense and Justice, the Atomic Energy Commission, the Central Intelligence Agency and the National Security Council staff. Representatives of other Departments in the executive branch may be invited to meet with the Committee on matters of particular interest to those Departments, but shall have no vote. The Committee shall meet regularly at a time and place designated by the Chairman. In the absence or incapacity of the Chairman, an Acting Chairman chosen by the Committee will act as Chairman for all purposes. A quorum of seven members, or their designated alternates, is required to consider or act on appeals to the Committee. Committee decisions in favor of declassification, in whole or in part, of information or material determined by the Departmental Committee to require continued classification shall require a majority vote of the members or their designated alternates present. In the absence of a majority vote, the determination of the Departmental Committee shall stand.

(b) *Jurisdiction.*—The Committee shall have jurisdiction to consider and act upon appeals from a determination by a Departmental Committee or the Archivist of the United States that information or material classified by action taken pursuant to E.O. 11652, or its predecessor Orders, requires continued classification under section 5 of the Order. The Committee shall have no jurisdiction of appeals involving information classified by the Atomic Energy Act of 1954, as amended. Hereafter the terms "Departmental Committee" and "Department" include the Archivist, where appropriate.

§ 2000.5 Request for declassification.

(a) *Notice of an appeal.*—An appeal from a Departmental Committee's denial of a declassification request involving classified documents which are ten (10) or more years old must be submitted to the Executive Director, Interagency Classification Review Committee, Executive Office Building, Washington, D.C. 20506, within sixty (60) days of the date the Departmental Committee's denial of a declassification request is received. The appeal shall include the following information: an identification or description of the document or documents for which declassification was requested and a statement of the Department's action denying the request. Whenever possible, copies of all correspondence to and from the department concerned and a statement of the reasons why the requester's appeal should be granted should also be included.

(b) *Exhaustion of other remedies.*—No appeal will be considered until the requester has exhausted all administrative remedies afforded him by the regulations of the Department concerned; provided however, that if the Departmental Committee has not acted at the expiration of thirty (30) days of the date the request is appealed to the Departmental Committee the requester may apply within sixty (60) days thereafter to this Committee for appropriate relief.

(c) *Acceptance of appeal.*—An appeal of a determination denying a declassification request involving classified documents which are ten (10) or more years old, shall be accepted for review by the Committee if, in the discretion of the Committee, the appeal raises substantive issues. The following indicate, but do not limit, the character of the reasons for accepting an application for review which the Committee will consider: (1) The nature of he documents whose declassification is sought; (2) the relationship of the documents to other classified documents; (3) the likelihood of an early public release as a result of declassification; (4) and disagreement between Departments as to the proper classification of the information involved. To the extent required for this determination, the Chairman may request the Department concerned to furnish copies of the documents, a summary of their contents or other pertinent information. Requests for declassification which have been denied because the document has not been described with sufficient particularity to enable it to be identified, or because the record cannot be obtained with a reasonable amount of effort, will not be accepted by the Committee, as the denial is based on reasons other than its continuing classification.

(d) *Consideration of appeal.*—The requester will be promptly notified whether his appeal has been accepted for review. The Department from whose decision the appeal has been taken and accepted by the Committee shall, upon request of the Chairman, furnish to the Committee ten (10) copies of the following: all correspondence to and from the requester, the decision of the Departmental Committee denying the request, and the classified documents in question.

(e) *Committee review.*—Normally, appeals to the Committee will be considered in the order that they are accepted for appeal. The Committee's review of the record will be in closed session in order to facilitate full inquiry into matters that are still classified. The burden of persuasion is on the Department to show that continued classified is required under the provisions of section 5 of the Order. Upon the Committee's determination that the requested material no longer warrants classification in whole or in part, the Chairman shall, in consultation with the affected Department or Departments, assure that appropriate action is taken.

(f) *Decision.*—The requester whose appeal has been accepted shall be notified in writing as to the Committee's decision. Should the appeal be denied in whole or in part, the notification shall include a statement, in unclassified form, explaining the reason for the decision.

Title 43—Public Lands: Interior

CHAPTER II—BUREAU OF LAND MANAGEMENT

APPENDIX—PUBLIC LAND ORDERS

[Public Land Order 5386; (Colorado 17286)]

COLORADO

Withdrawal for Protection of Scenic and Primitive Values

By virtue of the authority vested in the President and pursuant in Executive Order No. 10355 of May 26, 1952 (17 FR 4831), it is ordered as follows:

1. Subject to valid existing rights, the following described public lands, which are under the jurisdiction of the Secretary of the Interior, are hereby withdrawn from all forms of disposition under the public land laws, including the mining laws, 30 U.S.C., Ch. 2, but not from leasing under the mineral leasing laws, for protection of their scenic and primitive values:

NEW MEXICO PRINCIPAL MERIDIAN

a. Beginning at the northeast corner of Sec. 20, T. 46 N., R. 2 W.,

Thence southerly up the east bank of the East Fork of Powderhorn Creek approximately 6½ miles to its intersection with the north boundary of Sec. 21, T. 45 N., R. 2 W.; thence easterly approximately 2¾ miles to the southwest corner of Sec. 13, T. 45 N., R. 2 W.; thence south ½ mile, west ¾ mile, south ¼ mile, east ½ mile, south ¼ mile, east ¾ mile, south ¼ mile, east ¼ mile, south ¾ mile, and west ¾ mile to the northwest corner of Sec. 36, T. 45 N., R. 2 W., thence south one mile, and east approximately one mile to Cebolla Creek; thence southerly approximately ¼ mile along the west bank of Cebolla Creek; thence west ¼ mile to the southwest ¼ mile to the southwest corner of the NE¼NE¼ of Sec. 1, T. 44 N., R. 2 W.; thence south approximately 1¼ miles; thence northwesterly approximately one-eighth mile to a point where Cebolla Creek crosses the Cathedral Road; thence northwesterly and then southwesterly ½ mile along the north bank of Cebolla Creek; thence approximately ¼ mile west to the west quarter corner of Sec. 12, T. 44 N., R. 2 W.; thence west ¼ mile, south ¼ mile, west ½ mile, south ½ mile, west ¼ mile, south ¼ mile, west ¼ mile, and south ¼ mile, west ¼ mile, south ¼ mile, west ¼ mile, and south ¼ mile to the boundary of the Gunnison National Forest; thence 1½ miles west along said boundary, north three miles along said boundary, west eight miles along said boundary to the southeast corner of Sec. 36, T. 45 N., R. 4 W.; thence north 2½ miles to the west quarter corner of Sec. 19, east ¾ mile, north ¼ mile, west ¼ mile, north ½ mile, west ¼ mile, north ¾ mile, east ½ mile, south ¼ mile, east ¼ mile, south ¼ mile, east ¼ mile, north ¼ mile, east ¼ mile, north 1¼ miles to the north quarter corner of Sec. 8, T. 45 N., R. 3 W.; thence east approximately 2½ miles to the northeast corner of Sec. 10, T. 45 N., R. 3 W.; thence south approximately one-eighth mile to the northwest corner of Sec. 11; thence east approximately 2¼ miles to the West Fork of Powderhorn Creek; thence northerly along the west bank of the West Fork of Powderhorn Creek to the north section line of Sec. 20, T. 46 N., R. 2 W.; thence east approximately ¾ mile to the point of beginning.

The area described aggregates approximately 40,400 acres.

b. The minerals reserved to the United States in the following described patented lands are hereby withdrawn from appropriation under the mining laws, 30 U.S.C., Ch. 2, but not from leasing under the mineral leasing laws:

NEW MEXICO PRINCIPAL MERIDIAN

T. 45 N., R. 3 W.,
Sec. 21, N½NE¼;
Sec. 22, N½N½, SW¼NW¼;
Sec. 34, W½SW¼.
The area described aggregates 360 acres.

The total of the areas described in paragraphs a and b above aggregate approximately 40,760 acres in Gunnison and Hinsdale Counties.

2. Any party having need for lands within this area under the provisions of R.S. 2477, 43 U.S.C. 932 (for road rights-of-way), must file a request with the State Director, Bureau of Land Management, for consideration of an amendment of this order.

3. The withdrawal made by this order does not alter the applicability of the public land laws governing the use of the lands under lease, license, or permit, or governing disposal of the vegetative resources, except under the mining laws, and as to sale or disposal of forest products.

JACK O. HORTON,
Assistant Secretary of the Interior.

AUGUST 17, 1973.

CHAPTER X—INTERSTATE COMMERCE COMMISSION

SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[S.O. 1100, Amdt. 3]

PART 1033—CAR SERVICE

Union Pacific Railroad Co.

At a session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 16th day of August 1973.

Upon further consideration of Service Order No. 1100 (37 FR 12324; 38 FR 878, 14754), and good cause appearing therefor:

It is ordered, That: § 1033.1100 *Service Order No. 1100* (Union Pacific Railroad Company authorized to operate over tracks of Agricultural Products Corporation between Epco, Caribou County, Idaho, and Dry Valley, Caribou County, Idaho) Service Order No. 1100 be, and it is hereby, amended by substituting the following paragraph (d) for paragraph (d) thereof:

(d) *Expiration date.*—This order shall expire at 11:59 p.m., November 30, 1973, unless otherwise modified, changed, or suspended by order of this Commission.

V38-163 AUG 23 73 XUM

Effective date.—This amendment shall become effective at 11:59 p.m., August 31, 1973.

(Secs. 1, 12, 15, and 17(2), 24 Stat. 379, 383, 384, as amended; 49 U.S.C. 1, 12, 15, and 17(2). Interprets or applies secs. 1(10–17), 15(4), and 17(2), 40 Stat. 101, as amended, 54 Stat. 911; 49 U.S.C. 1(10–17), 15(4), and 17(2).)

It is further ordered, That a copy of this amendment shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that notice of this amendment be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board.

[SEAL] ROBERT L. OSWALD,
Secretary.

Title 50—Wildlife and Fisheries

CHAPTER I—BUREAU OF SPORT FISHERIES AND WILDLIFE, FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 20—MIGRATORY BIRD HUNTING

Miscellaneous Amendments

Correction

In FR Doc. 73-16914 appearing at page 22015 in the issue of Wednesday, August 15, 1973, the text of § 20.23 and § 20.24 should read as follows:

§ 20.23 Shooting hours.

No person shall take migratory game birds except during the hours open to shooting as prescribed in Subpart K of this part.

§ 20.24 Daily limit.

No person shall take in any 1 calendar day, more than the daily bag limit or aggregate daily bag limit, whichever applies.

PART 32—HUNTING

Flint Hills National Wildlife Refuge, Kans.

The following special regulation is issued and is effective August 23, 1973.

§ 32.32 Special regulations; deer, bobcat and coyote; for individual wildlife refuge areas.

KANSAS

FLINT HILLS NATIONAL WILDLIFE REFUGE

Public hunting of deer, bobcat, and coyote with bow and arrows on the Flint Hills National Wildlife Refuge, Kans., is permitted October 1 through November 25, inclusive and from December 15 through December 31, inclusive, by special use permit. The open area is delineated on maps provided at the time of permit issuance or otherwise available at refuge headquarters, Burlington, Kansas, and from the Regional Director, Bureau of Sports Fisheries & Wildlife, 10597 W. 6th Avenue, Denver, Colorado 80215. Persons interested in receiving a special use permit should contact: Refuge Manager, Flint Hills National Wildlife Refuge, P.O. Box 213, Burlington, Kans. 66839. Hunting shall be in accordance with all applicable State regulations governing the hunting of deer, bobcat, and coyote to the following special conditions:

(1) Permittee must have permit in his possession at all times while engaged in hunting activities on the refuge.

(2) Entrance to portions of the refuge closed to other activities will be via established roads. Gates will be closed and locked upon entering or leaving.

(3) Permittee will confine his activities to hunting and will refrain from any unnecessary wildlife disturbance.

(4) Permittee will return gate key and completed permit within two weeks following the close of the bow hunting season.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through December 31, 1973.

Dated August 16, 1973.

MICHAEL J. LONG,
Acting Refuge Manager, Flint Hills National Wildlife Refuge, Burlington, Kansas.

[FR Doc.73-17882 Filed 8-22-73;8:45 am]

PART 32—HUNTING

Certain National Wildlife Refuges in Oregon; Correction

In FR Doc. 73-16294, appearing on pages 21414 and 21415 of the issue for Wednesday, August 8, 1973, the last sentence of the last paragraph should read as follows:

"• • • and are effective through June 30, 1974."

L. EDWARD PERRY,
Acting Regional Director, Portland, Oregon.

AUGUST 14, 1973.

[FR Doc.73-17863 Filed 8-22-73;8:45 am]

PART 32—HUNTING

Sequoyah National Wildlife Refuge, Oklahoma

The following special regulation is issued and is effective August 23, 1973.

§ 32.22 Special regulations; upland game, for individual wildlife refuge areas.

OKLAHOMA

SEQUOYAH NATIONAL WILDLIFE REFUGE

Public hunting of quail, rabbit, squirrel, coyote, and bobcat on the Sequoyah National Wildlife Refuge, Oklahoma, is permitted on three areas designated by signs as open to hunting. These open areas, comprising a total of 10,500 acres, are delineated on maps available at refuge headquarters, Sallisaw, Oklahoma, and from the Regional Director, Bureau of Sport Fisheries and Wildlife, P.O. Box 1306, Albuquerque, New Mexico 87103. Hunting seasons are as follows: Quail on Mondays, Tuesdays, Thursdays, Saturdays, and legal holidays, November 20, 1973, through the last day of the regular 1973–74 duck season, inclusive; rabbits, October 6, 1973, through the last day of the regular 1973–74 duck season, inclusive; squirrel, September 1, 1973, through January 1, 1974, inclusive; coyote, bobcat, September 1, 1973, through the last day of the regular 1973–74 duck season, inclusive.

Hunting shall be in accordance with all applicable State and Federal Regulations covering the hunting of quail, squirrel, rabbits, bobcat, and coyote, subject to the following special conditions:

(1) Only shotguns without slug ammunition or longbow and arrow are permitted.

(2) Hunting weapons of any kind are prohibited in areas not posted as open to public hunting, except the Kerr-McClellan Navigation Channel where weapons must be cased or broken down.

(3) Dogs may be used for hunting quail or rabbit, but must be under immediate control or supervision and restrained from pursuit of protected species.

(4) Camping or possession of firearms on the refuge at night is prohibited.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through January 31, 1974.

MORRIS C. LEFEVER,
Refuge Manager, Sequoyah National Wildlife Refuge, Sallisaw, Oklahoma.

Title 33—Navigation and Navigable Waters

CHAPTER IV—SAINT LAWRENCE SEAWAY DEVELOPMENT CORPORATION

PART 401—SEAWAY REGULATIONS AND RULES

Speed Limits

The purpose of this document is to further amend § 401.104–9, Speed, of the Seaway Regulations and Rules by reverting, in part, to the speed limits that were in effect prior to the amendment of this section in 38 FR 9667–9668 on April 19, 1973. Since water levels in Lake Ontario and the Upper St. Lawrence River are now receding to more normal conditions, the speed limits, as temporarily reduced, will be removed in part. However, it is anticipated that levels in Lake St. Louis and Lake St. Francis will continue to be above normal and some temporary limits will remain in effect in these areas.

In view of the fact that reversion is being made to a matter previously offered for comment on February 1, 1973, a period for public comment is deemed unnecessary. Further, because the purpose of this amendment is to provide immediate guidance and information to vessels transiting the Seaway, I find that good cause exists for making this amendment effective in less than 30 days.

Section 401.104–9 is amended as follows:

§ 401.104–9 Speed.

Maximum speed for vessels in excess of 40 feet in overall length shall not exceed that shown for designated areas in the following table and every vessel under way shall proceed at a reasonable speed, so as not to cause undue delay to other vessels.

From	To	Maximum speed over the bottom (m.p.h.)
Lower entrance South Shore Canal	Upper entrance South Shore Canal	7 (6.1 knots).
Upper entrance South Shore Canal	Lake St. Louis Buoy 13A	12 (10.4 knots).
Lake St. Louis Buoy 13A	Lower Beauharnois Lock entrance	18 (15.5 knots).
Upper Beauharnois Buoy 5B	Lake St. Francis Buoy 27F	10 upbound (8.6 knots). 12 downbound (10.4 knots).
Lake St. Francis Buoy 7F	Lake St. Francis Buoy 87F	18 (15.5 knots).
Lake St. Francis Buoy 87F	Snell Lock	9 upbound (7.8 knots). 12 downbound (10.4 knots).
Snell Lock	Eisenhower Lock	7 (6.1 knots).
Eisenhower Lock	Richards Point Light 55	13 (11.3 knots).
Richards Point Light 55	Morrisburg Buoy 84	15 (13 knots).
Morrisburg Buoy 84	Ogden Island Buoy 99	13 (11.3 knots).
Ogden Island Buoy 99.	Blind Bay ½ mile east of Light 162	15 (13 knots).
Blind Bay ½ mile east of Light 162	Deer Island Light 186	13 (11.3 knots).
Deer Island Light 186	Bartlett Point Light 227	10 upbound (8.6 knots). 12 downbound (10.4 knots).
Bartlett Point Light 227	Tibbetts Point	15 (13 knots).
Junction of Canadian Middle Channel and Main Channel abreast of Ironsides Island	Open waters between Wolfe and Howe Islands through the said Middle Channel	13 (11.3 knots).
Lock 1, Welland Canal	Outer Piers, Port Weller Harbor	9 (7.8 knots).
Port Robinson	Ramey's Bend through the Welland By-Pass	9 (7.8 knots).
All other canals		7 (6.1 knots).

(68 Stat. 92–97, 33 U.S.C. 981–990, as amended, and Sec. 104, Pub. L. 92–340, 86 Stat. 424, 49 CFR 1.50a (37 FR 21943).)

Effective date.—August 15, 1973.

ST. LAWRENCE SEAWAY DEVELOPMENT CORPORATION,
D. W. OBERLIN,
Administrator.

Title 7—Agriculture

CHAPTER VIII—AGRICULTURAL STABILIZATION AND CONSERVATION SERVICE (SUGAR), DEPARTMENT OF AGRICULTURE

SUBCHAPTER I—DETERMINATION OF PRICES

[Docket No. SH–315]

PART 876—SUGARCANE; HAWAII

Fair and Reasonable Prices for 1973-Crop

The Sugar Act of 1948, as amended, requires producers who also process sugarcane grown by other producers to pay prices or rates determined by the Secretary of Agriculture to be fair and reasonable as one of the conditions for receiving Sugar Act payments on their own production.

Such determination may not be made until after investigation and opportunity for interested persons to testify on the fair and reasonable prices to be paid under either purchase or toll agreements. A public hearing was held in Hilo, Hawaii, on April 27, 1973.

The determination, which is applicable to the 1973 crop of Hawaiian sugarcane, continues all provisions of the 1972 crop determination including the maximum rates producer-processors may charge under a tolling agreement for processing sugarcane grown by other producers.

Pursuant to the provisions of section 301(c)(2) of the Sugar Act of 1948, as amended (herein referred to as act), after investigation and due consideration of the evidence obtained at the public hearing held in Hilo, Hawaii, on April 27, 1973, the following determination is hereby issued.

The regulations previously appearing in these sections under "Determination of Prices; Sugarcane; Hawaii" remain in full force and effect as to the crops to which they were applicable.

Sec.
876.21 General requirements.
876.22 Toll agreements.
876.23 Purchase agreements.
876.24 Sugarcane weight and quality determination.
876.25 Overhead charges for services furnished to producers.
876.26 Reporting requirements.
876.27 Applicability.
876.28 Subterfuge.
876.29 Procedures for checking compliance.

AUTHORITY.—Secs. 876.21 to 876.29 issued under secs. 301, 403, 61 Stat. 929, as amended, 932; 7 U.S.C. 1131, 1153.

§ 876.21 General requirements.

A producer of sugarcane in Hawaii who is also a processor of sugarcane, to which this part applies as provided in § 876.27 (herein referred to as processor) shall have paid, or contracted to pay, for sugarcane of the 1973 crop grown by other producers and processed by him, or shall have processed sugarcane of other producers under a toll agreement, in accordance with the following requirements.

§ 876.22 Toll agreements.

(a) The rate for processing sugarcane under a toll agreement at Olokele Sugar Company, Ltd., shall be not more than the rate provided in the agreement between the producer and the processor applicable to the prior crop.

(b)(1) The rate for processing sugarcane delivered by a producer under a toll agreement to those processors listed below shall be not more than that established for each such processor.

Processor	Rate for processing (percentage of gross proceeds from sugar and molasses)	Delivery point for sugarcane
Puna Sugar Co., Ltd.	34	Mill.
Kohala Sugar Co.	34	Do.
Laupahoehoe Sugar Co.	49	Loaded in trucks.
Ka'u Sugar Co., Inc.	49	Do.
Honokaa Sugar Co.	49	Do.

(2) The gross proceeds from sugar and molasses shall be determined in accordance with the Standard Sugar Marketing Contract and the Standard Molasses Marketing Contract entered into by the producer, or his agent, with the California and Hawaiian Sugar Company (a cooperative agricultural marketing association herein referred to as C. & H.), except that for purposes of calculating the amount due producers, all items of raw sugar and molasses marketing expenses that were charged to producers under the marketing contracts in effect prior to January 1972, but are now deducted by C. & H. under the revised marketing contracts that became effective January 1, 1972, to obtain proceeds due producers, shall be added back to such proceeds to obtain gross proceeds: *Provided*, That the gross proceeds so determined to be applicable to the sugar and molasses recovered from the sugarcane of the producer shall be converted to dollars per hundredweight of sugar, raw value basis, for the purpose of applying the rates for processing.

(3) The applicable rate for processing established in this section for sugarcane of the producer shall cover (i) all transporting, handling, and processing costs applicable to the producers' sugarcane from the delivery point specified herein until the raw sugar and molasses recovered therefrom leaves the bulk sugar bin or the molasses tank of the processor, except those costs incurred for insuring such raw sugar and molasses while stored therein; (ii) the cost of insuring such sugarcane against loss by fire to the same extent that sugarcane of the processor is insured; (iii) the costs of weighing, sampling, and taring such sugarcane; (iv) the cost of general weed and rodent control other than in sugarcane fields of producers and alongside the roads ad-

V 38 1163 AUG 23 73 XUM

jacent thereto; and (v) the cost of all research and experimental work applicable to the production and processing of such sugarcane.

(4) The sugarcane received from producers shall be handled and processed by the processor in a manner which is no less favorable than the handling and processing of the sugarcane of the processor. The processor, in acting as agent for the producer, shall handle and deliver to C. & H. the raw sugar and molasses recovered from the sugarcane of the producer in a manner which is no less favorable than the handling and delivery to C. & H. of the raw sugar and molasses recovered from the sugarcane of the processor. The processor shall promptly transmit to the producer the amount of the gross proceeds received from the sugar and molasses recovered from the sugarcane of the producer, as defined in subparagraph (2) of this paragraph, less the applicable processing rate, less the shipping and handling expenses added to and made a part of the gross proceeds as provided in subparagraph (2) of this paragraph, and less any expenses, such as inland transportation, paid by the processor, as agent for the producer, pursuant to the toll agreement. Handling and delivery expenses shall be limited to those direct expenses paid by the processor as agent for the producer, but shall not include overhead charges of the processor.

§ 876.23 Purchase agreements.

(a) The price for sugarcane under adherent planter agreements shall be not less than the price determined in accordance with the agreement between the processor and the producer applicable to the prior crop.

(b) The price for the producers' share of sugarcane under cultivation contracts at Laupahoehoe Sugar Company shall be not less than the price determined in accordance with the agreement between the processor and the producer applicable to the prior crop.

(c) The price for sugarcane under independent grower purchase agreements shall be not less than the price determined in accordance with the agreement between the processor and the producer applicable to the prior crop: *Provided*, That the items of expense which may be deducted in computing net returns for the 1973 crop shall be limited to the same items as for the 1972 crop, except that if the processor incurs handling and delivery expenses otherwise allowable under the agreement and which are incurred under abnormal conditions, such expenses also may be deducted subject to written approval from the Hawaii State ASCS Office upon a determination by the Hawaii State ASC Committee that the incurrence of such expenses is justified.

§ 876.24 Sugarcane weight and quality determination.

The determination of the net weight and quality of the sugarcane received from the producer, and the allocation of sugar and molasses recoveries to the producer shall be made in accordance with the methods customarily used by the processor; methods which have been approved by the Experiment Station of the Hawaiian Sugar Planters' Association; or methods agreed upon between the processor and the producer, which will reflect the true weight and quality of sugarcane and the quantities of sugar and molasses recovered from the sugarcane of the producer.

§ 876.25 Overhead charges for services furnished to producers.

If the processor, at the producer's request, furnishes labor, materials, or services used in producing, harvesting, or transporting the producer's sugarcane, or transports the producer's sugar or molasses from the mill to the port in the processor's own equipment, the processor may charge in addition to the direct costs of such labor, materials, or services, the applicable overhead expenses. If equipment is charged at standard or budgeted rates which include repair and maintenance charges, and such rates are applied equally to both the processors' and producers' producing, harvesting, and transporting operation, and if the standard or budgeted rates are adjusted periodically to reflect current conditions, such rates shall be considered as the direct costs for use of equipment. Charges for applicable overhead expenses shall be based on estimated current budgets and adjusted after the end of the calendar year so as not to exceed the actual costs for such year. In addition, the processor may also charge a profit not to exceed 5 percent of the sum of the direct and overhead charges for such labor, materials, or services. Overhead expenses shall be limited to those which are properly apportionable under generally accepted accounting principles as approved by the State Committee.

§ 876.26 Reporting requirements.

The processor shall submit to the State Committee a certified statement of the gross proceeds and handling and delivery expenses paid under (a) purchase agreements providing for payment for sugarcane based upon net returns from sugar and molasses, and (b) toll and agency agreements providing for the deduction of handling and delivery expenses on sugar and molasses from the gross proceeds obtained therefrom.

§ 876.27 Applicability.

The requirements of this part are applicable to all sugarcane grown by a producer and processed under either a purchase or toll agreement by a processor who also produces sugarcane (a processor-producer is defined in § 821.1 of this chapter); and to sugarcane processed by a cooperative processor for nonmembers. The requirements are not applicable to sugarcane processed by a cooperative processor for its members.

§ 876.28 Subterfuge.

The processor shall not reduce returns to the producer below those determined in accordance with the requirements herein through any subterfuge or device whatsoever.

§ 876.29 Procedures for checking compliance.

The procedures to be followed by the State ASCS office in checking compliance with the requirements of this part are set forth under the heading Part 6—Fair Price Determination in Handbook 6–SU, issued by the Deputy Administrator, Programs, Agricultural Stabilization and Conservation Service. Handbook 6–SU may be inspected at the State ASCS office and copies may be obtained from the Hawaii State ASCS Office, 1833 Kalakaua Avenue, Honolulu, HI 96815.

STATEMENT OF BASES AND CONSIDERATIONS

General.—The foregoing determination establishes the fair and reasonable rate requirements which must be met, as one of the conditions for payment under the act, by a producer who processes sugarcane of the 1973 crop grown by other producers.

Requirements of the fact.—Section 301(c)(2) of the act provides, as a condition for payment, that the producer on the farm who is also, directly or indirectly a processor of sugarcane, as may be determined by the Secretary, shall have paid, or contracted to pay under either purchase or toll agreements, for any sugarcane grown by other producers and processed by him at rates not less than those that may be determined by the Secretary to be fair and reasonable after investigation and due notice and opportunity for public hearing.

Public hearing.—A public hearing was held in Hilo, Hawaii, on April 27, 1973, at which interested persons were afforded the opportunity to present testimony relating to all aspects of fair and reasonable prices for 1973-crop sugarcane including processing rates for sugarcane delivered under a toll agreement.

Kohala Corporation.—A representative of this company testified with respect to certain changes in Kohala's position since the last hearing. He stated that they have extended the phase-out of sugar operations through December 1975, and recommended that the processing fee of 34 percent which has been in effect for several crops be continued through December 31, 1975.

Olokele Sugar Company, Ltd., and Ka'u Sugar Company, Inc.—A representative of these companies testified that the tolling agreement between Olokele Sugar and Gay and Robinson was renewed in 1968 for a period of 33 years and no changes have been made in the agreement.

With respect to Ka'u Sugar, the representative testified that Ka'u is the surviving company of the merger on December 29, 1972, of Hawaiian Agricultural Company and Hutchinson Sugar Company, Ltd. He recommended a 50 percent processing fee, based on the old California and Hawaiian Sugar Co. marketing agreement, or a 55 percent fee if the Department should change its determination to a basis consistent with the new marketing agreement. He further recommended that a 10 percent fee for profit be allowed on labor, material, and services provided to growers. In support of this recommendation, he pointed out that the company realizes a return of 2½ percent on the present allowable margin of 5 percent, and this is not adequate compensation for the services provided. In support of the recommended processing fees, the witness submitted actual cost ratios for the 1972 crop which indicated a processing fee of 55.08 percent under the current California and Hawaiian Sugar Co. contract or 50.69 percent under the prior contract.

Puna Sugar Company.—A representative of this company recommended that a 5-year average be used for the development of cost ratios and processing fees to eliminate abnormal results in any one crop year; that the 1973 determination establish a processing fee of 45 percent (the 5-year average for 1968–72), and that existing profit margins on services performed by processors for producers be continued. In support of the recommended processing fee, the witness submitted annual cost ratios based on company data for 1968 through 1972 which indicated a 5-year average processing ratio of 45.56 percent under the new marketing agreement and 42.57 percent if computed on the old agreement.

The representative of independent growers at Puna recommended a processing fee of 32 percent and elimination of the 5 percent profit allowance on services furnished growers by the processor. He also recommended that any agency fee paid to the parent company be considered profit for the processor and reflected as such in calculating the cost ratio. The witness submitted data on costs of producing and processing sugarcane for the 1972 crop which indicated a processing rate of 32.39 percent.

Honokaa Sugar Company and Laupahoehoe Sugar Company.—Representatives of these companies testified that Honokaa purchased Paauhau Sugar Company at the end of 1972, and that independent growers in the former Paauhau area have signed independent grower tolling agreements with Honokaa. They further testified that efforts are being made to make the language of grower tolling agreements identical for Honokaa and Laupahoehoe. The witnesses recommended a 50 percent processing fee based on the prior C&H marketing agreement, or a 55 percent fee if the determination is based on the new agreement; that a profit on services furnished by processors to producers be continued; and that all other applicable provisions of the 1972 determination remain in effect. They presented data relating to the final costs of producing and processing 1972-crop sugarcane. They testified that the data indicate a fair and reasonable processing rate of 51.9 percent for Laupahoehoe, but that since 1973 will be the first year that Honokaa will be processing tolling agreement cane, there are as yet no meaningful cost data with which to develop a cost ratio to reflect the producer-processor relationship at Honokaa.

The representative of independent growers at Laupahoehoe recommended that the processing ratio be decreased from 49 percent to 45 percent; that the processor be ordered to furnish an annual harvesting schedule to producers beginning January 1974; and that the profit allowance on services furnished growers by plantations be allowed on materials but not on labor and services.

Lihue Plantation Company and Oahu Sugar Company.—A representative of these companies testified that each company has one grower agreement and they do not contemplate any change in the coming year. He requested that their agreements be approved for the 1973 crop.

1973 price determination.—This determination continues the provisions of the 1972-crop determination. Tolling fees remain the same.

Consideration has been given to the recommendations and information submitted at the public hearing; to the returns, costs, and profits of producing and processing sugarcane obtained by the Department in a recent field survey and recast in terms of price and production conditions likely to prevail for the 1973 crop; and to other relevant data customarily considered in fair price determinations.

The recommendations of both producers and processors for changes in the applicable processing rates for the respective companies have been thoroughly studied. Analysis of the comparative costs of producing and processing sugarcane indicates that changes occurring in the relationship of producing and processing costs have not been of sufficient magnitude to justify adjustments in the processing rates. It is believed that the processing rates provided in this determination will maintain an equitable sharing between producers and processors of total returns based on their sharing of total costs.

The recommendations by both producers and processors for changes in the rate of profit allowed on services furnished to producers by processors have again been reviewed. The Department continues to believe that the profit charge of five percent is adequate and reasonable, and it is therefore continued in this determination.

A recommendation made by the representative of Puna growers for elimination of agency fees paid by the processor from the computation of the cost ratio has not been adopted. Such fees are compensation to the agency for services, such as technical, legal, accounting, and marketing, performed for the processor.

The recommendation of Laupahoehoe growers that the processor be required to furnish its annual harvesting schedule to the growers association has not been adopted. It is believed that the processor has complied in all respects over the years with the provision of the price determination which requires processors to handle and process the sugarcane received from producers in a manner no less favorable than the handling and processing of their own sugarcane. However, the Department does encourage processors to keep their independent growers fully informed of factors affecting the business relationship between the parties, and suggests that harvesting schedules be made available to growers in order to enhance a harmonious relationship.

On the basis of an examination of all pertinent factors, the provisions of this determination are deemed to be fair and reasonable. Accordingly, I hereby find and conclude that the foregoing determination will effectuate the price provisions of the Sugar Act of 1948, as amended.

Effective date.—This determination shall become effective August 23, 1973, and is applicable to the 1973 crop of Hawaiian sugarcane.

Signed at Washington, D.C., on August 17, 1973.

GLENN A. WEIR,
Acting Administrator, Agricultural Stabilization and Conservation Service.

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Valencia Orange Reg. 446]

PART 908—VALENCIA ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

Limitation of Handling

This regulation fixes the quantity of California-Arizona Valencia oranges that may be shipped to fresh market during the weekly regulation period August 24–30, 1973. It is issued pursuant to the Agricultural Marketing Agreement Act of 1937, as amended, and Marketing Order No. 908. The quantity of Valencia oranges so fixed was arrived at after consideration of the total available supply of Valencia oranges, the quantity of Valencia oranges currently available for market, the fresh market demand for Valencia oranges, Valencia orange prices, and the relationship of season average returns to the parity price for Valencia oranges.

§ 908.746 Valencia Orange Regulation 446.

(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 908, as amended (7 CFR Part 908), regulating the handling of Valencia oranges grown in Arizona and designated part of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and upon the basis of the recommendations and information submitted by the Valencia Orange Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such Valencia oranges as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) The need for this regulation to limit the respective quantities of Valencia oranges that may be marketed from Dis-

V 38-163 AUG 23 73 XUM

trict 1, District 2, and District 3 during the ensuing week stems from the production and marketing situation confronting the Valencia orange industry.

(i) The committee has submitted its recommendation with respect to the quantities of Valencia oranges that should be marketed during the next succeeding week. Such recommendation, designed to provide equity of marketing opportunity to handlers in all districts, resulted from consideration of the factors enumerated in the order. The committee further reports that the fresh market demand for Valencia oranges is slow. Prices f.o.b. averaged $3.41 per carton on a sales volume of 517 carlots during the week ended August 16, 1973, compared with $3.46 per carton on sales of 585 carlots a week earlier.

(ii) Having considered the recommendation and information submitted by the committee, and other available information, the Secretary finds that the respective quantities of Valencia oranges which may be handled should be fixed as hereinafter set forth.

(3) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking procedure, and postpone the effective date of this regulation until 30 days after publication hereof in the FEDERAL REGISTER (5 U.S.C. 553) because the time intervening between the date when information upon which this regulation is based became available and the time when this regulation must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective as hereinafter set forth. The committee held an open meeting during the current week, after giving due notice thereof, to consider supply and market conditions for Valencia oranges and the need for regulation; interested persons were afforded an opportunity to submit information and views at this meeting; the recommendation and supporting information for regulation during the period specified herein were promptly submitted to the Department after such meeting was held; the provisions of this regulation, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such Valencia oranges; it is necessary, in order to effectuate the declared policy of the act, to make this regulation effective during the period herein specified; and compliance with this regulation will not require any special preparation on the part of persons subject hereto which cannot be completed on or before the effective date hereof. Such committee meeting was held on August 21, 1973.

(b) *Order.* (1) The respective quantities of Valencia oranges grown in Arizona and designated part of California which may be handled during the period August 24, 1973, through August 30, 1973, are hereby fixed as follows:

(i) District 1: Unlimited;

(ii) District 2: 475,000 cartons;

(iii) District 3: Unlimited."

(2) As used in this section, "handled", "District 1", "District 2", "District 3", and "carton" have the same meaning as when used in said amended marketing agreement and order.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: August 22, 1973.

CHARLES R. BRADER,
Acting Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.73-18062 Filed 8-22-73;12:19 pm]

CHAPTER XIV—COMMODITY CREDIT CORPORATION, DEPARTMENT OF AGRICULTURE

SUBCHAPTER B—LOANS, PURCHASES, AND OTHER OPERATIONS

[CCC Price Support Regulations—1973-Crop Flaxseed Supplement, Amdt. 1]

PART 1421—GRAIN AND SIMILARLY HANDLED COMMODITIES

Subpart—1973-Crop Flaxseed Loan and Purchase Program

The regulations issued by the Commodity Credit Corporation and published at 38 FR 14960, which contain program provisions for loans and purchases applicable to the 1973-crop of flaxseed are amended by changing the schedule of deductions for storage to reflect similar changes made with respect to other commodities in order to comply with the provisions of Executive Order No. 11723. Inasmuch as loans and purchases are currently being made with respect to 1973-crop flaxseed, it is hereby found and determined that compliance with the notice of proposed rulemaking procedure is impracticable and contrary to the public interest. Therefore, this amendment is being issued without following such proposed rulemaking procedure.

Accordingly, the table in § 1421.176 is amended to read as follows:

§ 1421.176 Warehouse charges.

* * * * *

SCHEDULE OF DEDUCTIONS FOR STORAGE CHARGES BY MATURITY DATES

Maturity date of April 30, 1974	Deduction (cents per bushel)	Maturity date of May 31, 1974
(1)	14	(1).
Prior to May 28, 1973	13	Prior to June 28, 1973.
May 28 to June 21	12	June 28 to July 22.
June 22 to July 16	11	July 23 to Aug. 16.
July 17 to Aug. 10	10	Aug. 17 to Sept. 10.
Aug. 11 to Sept. 4	9	Sept. 11 to Oct. 5.
Sept. 5 to Sept. 29	8	Oct. 6 to Oct. 30.
Sept. 30 to Oct. 24	7	Oct. 31 to Nov. 24.
Oct. 25 to Nov. 18	6	Nov. 25 to Dec. 19.
Nov. 19 to Dec. 13	5	Dec. 20, 1973 to Jan. 13, 1974.
Dec. 14, 1973 to Jan. 7, 1974	4	Jan. 14 to Feb. 7.
Jan. 8 to Feb. 1	3	Feb. 8 to March 4.
Feb. 2 to Feb. 26	2	March 5 to March 29.
Feb. 27 to March 23	1	March 30 to April 23.
March 24 to April 30, 1974		April 24 to May 31, 1974.

(1) Date storage charges start, all dates inclusive.

(Secs. 4 and 5, 62 Stat. 1070, as amended, secs, 301, 303, 401, 63 Stat. 1051, as amended; 15 U.S.C. 714 b and c, 7 U.S.C. 1447, 1449, 1421.)

Effective date.—August 23, 1973.

Signed at Washington, D.C., August 15, 1973.

GLENN A. WEIR,
Acting Executive Vice President, Commodity Credit Corporation.

[FR Doc.73-17443 Filed 8-22-73;8:45 am]

Proposed Rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rulemaking prior to the adoption of the final rules.

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

[29 CFR Part 1910]

[S–73–6]

STANDARD FOR OCCUPATIONAL EXPOSURE TO CARBON MONOXIDE

Advance Notice of Proposed Rulemaking

The National Institute for Occupational Safety and Health (NIOSH), U.S. Department of Health, Education, and Welfare, has submitted to the Secretary of Labor, pursuant to the Williams-Steiger Occupational Safety and Health Act of 1970, criteria for a recommended standard on occupational exposure to carbon monoxide. The Office of Standards, Occupational Safety and Health Administration, U.S. Department of Labor, is studying the criteria and would appreciate public participation on the issues of whether a new standard for carbon monoxide should be issued on the basis of the criteria or any other information, and, if so, what should be the contents of a proposed standard for carbon monoxide. The issues are set forth with greater particularity below.

Accordingly, interested persons are invited to submit written data, views, and arguments concerning a standard on occupational exposure to carbon monoxide. Comments are specifically requested concerning:

(1) Whether a new standard on occupational exposure to carbon monoxide should be issued;

(2) Each section of the standard recommended by NIOSH;

(3) Suitable alternatives to the recommendations of NIOSH;

(4) Work injury and illness experience with carbon monoxide;

(5) Supported cost data of the estimated costs of coming into compliance with the standard recommended by NIOSH;

(6) Supported data on any possible environmental impact of the recommended standard, and specifically (a) any adverse environmental effects which cannot be avoided should the standard be adopted, (b) alternatives to such standard, (c) the relationship between local short-term uses of man's environment and the maintenance and enhancement of long-term productivity, and (d) any irreversible commitments of resources which would be involved if the standard should be implemented; and

(7) Any other related issues.

Communications should be submitted to the Office of Standards, Occupational Safety and Health Administration, U.S. Department of Labor, Room 507 Railway Labor Building, 400 First Street NW., Washington, D.C. 20210, before November 23, 1973. The communications will be available for public inspection and copying at the Office of Standards.

The NIOSH document containing the criteria and the recommended standard on occupational exposure to carbon monoxide will be available for inspection and copying, upon request, at the Office of Standards in Washington, D.C., and at any of the following regional or area offices:

[29 CFR Parts 1915, 1916, 1917, 1918]

[S–73–7]

MARITIME STANDARDS

Proposed Amendments to Regulations Governing Protection From Drowning

Because the U.S. Coast Guard has amended its regulations on the approval of life saving equipment (38 FR 8114), and because the Coast Guard is the approving agency for all such devices required under the Department of Labor Maritime Standards, it is proposed to amend these latter standards to conform with the Coast Guard regulations. Accordingly, pursuant to section 6(b) of the Williams-Steiger Occupational Safety and Health Act of 1970 (29 USC 655), Secretary of Labor's Order No. 12–71 (36 FR 8754), and 29 CFR Part 1911, it is hereby proposed to amend 29 CFR 1915.43(d), 1915.47(d), 1915.84(a), 1916.43(d), 1916.47(d), 1916.84(a), 1917.47, 1917.84(a), and 1918.106 to read as set forth below.

The proposal would change references to "work vests" or "buoyant vests" or "buoyant work vests" to "personal flotation devices" to reflect the change in terminology already adopted by the Coast Guard.

The proposal further provides that any "personal flotation devices" used after November 1, 1973 shall be approved by the Coast Guard as a Type I PFD (personal flotation device), Type II PFD, Type III PFD, or Type V PFD, pursuant to 46 CFR 160, or their equivalent. Equivalent devices are listed in 33 CFR 175.23.

The proposal is less restrictive than the present standards, which refer only to vests. The proposal recognizes that jacket type life preservers and certain special purpose water safety buoyant devices would serve the purposes of protecting maritime workers against drowning as adequately as the vests presently required.

Written data, views, and arguments concerning the proposal may be mailed to the Office of Standards, Room 504, 400 First Street NW., Washington, D.C. 20210. All written submissions received before September 24, 1973, will be considered. The data, views, and arguments will be available for public inspection and copy at the above address.

Pursuant to 29 CFR 1911.11 (b) and (c), interested persons may, in addition to filing written matter as provided above, file objections to the proposal requesting an informal hearing with respect thereto in accordance with the following conditions:

(1) The objections must include the name and address of the objector;
(2) The objections must be postmarked on or before September 24, 1973;
(3) The objections must specify with particularity the provision of the proposed rule to which the objection is taken, and must state the grounds therefore;
(4) Each objection must be separately stated and numbered; and
(5) The objections must be accompanied by a summary of the evidence proposed to be adduced at the requested hearing.

1. In § 1915.43, paragraph (d) is proposed to be revised to read as follows:

§ 1915.43 Guarding of deck openings and edges.

. . . . . .

(d) When employees are working near the unguarded edges of decks of vessels afloat, they shall be protected by personal flotation devices meeting the requirements of § 1915.84(a).

. . . . . .

2. In § 1915.47, paragraph (d) is proposed to be revised to read as follows:

§ 1915.47 Working surfaces.

. . . . . .

(d) When employees are boarding, leaving, or working from small boats or floats, they shall be protected by personal flotation devices meeting the requirements of § 1915.84(a).

3. In § 1915.84, paragraph (a) is proposed to be revised to read as follows:

§ 1915.84 Lifesaving equipment.

(a) *Personal flotation devices.* (1) Any personal flotation device used after November 1, 1973, shall be approved by the United States Coast Guard as a Type I PFD, Type II PFD, Type III PFD, or Type V PFD, or their equivalent, pursuant to 46 CFR 160 (Coast Guard Lifesaving Equipment Specifications) and 33 CFR 175.23 (Coast Guard table of devices equivalent to personal flotation devices).

(2) Prior to each use, personal flotation devices shall be inspected for dry rot, chemical damage, or other defects which may affect their strength and buoyancy. Defective personal flotation devices shall not be used.

. . . . . .

4. In § 1916.43, paragraph (d) is proposed to be revised to read as follows:

§ 1916.43 Guarding of deck openings and edges.

. . . . . .

(d) When employees are working near the unguarded edges of decks of vessels afloat, they shall be protected by personal flotation devices meeting the requirements of § 1916.84(a).

. . . . . .

5. In § 1916.47, paragraph (d) is proposed to be revised to read as follows:

§ 1916.47 Working surfaces.

. . . . . .

(d) When employees are boarding, leaving, or working from small boats or floats, they shall be protected by personal flotation devices meeting the requirements of § 1916.84(a).

6. In § 1916.84, paragraph (a), is proposed to be revised to read as follows:

§ 1916.84 Lifesaving equipment.

(a) *Personal flotation devices.* (1) Any personal flotation device used after November 1, 1973, shall be approved by the United States Coast Guard as a Type I PFD, Type II PFD, Type III PFD, or Type V PFD, or their equivalent, pursuant to 46 CFR 160 (Coast Guard Lifesaving Equipment Specifications) and 33 CFR 175.23 (Coast Guard table of devices equivalent to personal flotation devices).

(2) Prior to each use, personal flotation devices shall be inspected for dry rot, chemical damage, or other defects which may affect their strength and buoyancy. Defective personal flotation devices shall not be used.

. . . . . .

7. Section 1917.47 is proposed to be revised to read as follows:

§ 1917.47 Working surfaces.

When employees are boarding, leaving, or working from small boats or floats, they shall be protected by personal flotation devices meeting the requirements of § 1917.84(a).

8. In § 1917.84, paragraph (a) is proposed to be revised to read as follows:

§ 1917.84 Lifesaving equipment.

(a) *Personal flotation devices.* (1) Any personal flotation device used after November 1, 1973, shall be approved by the United States Coast Guard as a Type I PFD, Type II PFD, Type III PFD, or Type V PFD, or their equivalent, pursuant to 46 CFR 160 (Coast Guard Lifesaving Equipment Specifications) and 33 CFR 175.23 (Coast Guard table of devices equivalent to personal flotation devices).

(2) Prior to each use, personal flotation devices shall be inspected for dry rot, chemical damage, or other defects which may affect their strength and buoyancy. Defective personal flotation devices shall not be used.

. . . . . .

9. Section 1918.106 is proposed to be revised to read as follows:

§ 1918.106 Protection against drowning.

(a) *Personal flotation devices.* Any personal flotation device used after November 1, 1973, shall be approved by the United States Coast Guard as a Type I PFD, Type II PFD, Type III PFD, or Type V PFD, or their equivalent, pursuant to 46 CFR 160 (Coast Guard Lifesaving Equipment Specifications) and 33 CFR 175.23 (Coast Guard table of devices equivalent to personal flotation devices).

(b) Employees working on log booms shall be protected by personal flotation devices meeting the requirements of § 1918.106(a).

(c) Except when engaged in loading or discharging ocean going vessels, employees walking or working on the decks of barges on the Mississippi River System and the Gulf Intracoastal Waterway shall be protected by personal flotation devices meeting the requirements of § 1918.106(a).

(d) Personal flotation devices shall be maintained in good condition and shall be considered unserviceable when damaged so as to affect their buoyant properties or capability of being fastened.

(Sec. 6, Pub. L. 91–596, 84 Stat. 1593 (29 U.S.C. 655), Secretary of Labor's Order No. 12–71, 36 FR 8754.)

Signed at Washington, D.C., this 18th day of August 1973.

JOHN STENDER,
Assistant Secretary of Labor.

DEPARTMENT OF THE INTERIOR

National Park Service

[36 CFR Part 7]

ALCATRAZ ISLAND

Golden Gate National Recreation Area Boat Landings

Notice is hereby given that pursuant to the authority contained in section 4 of the Act of October 27, 1972 (86 Stat. 1299, 16 U.S.C. 460bb–3), section 3 of the Act of August 25, 1916 (39 Stat. 535; 16 U.S.C. 3), as amended, 245 DMI (34 FR 13879), as amended, and National Park Service Order No. 77 (38 FR 7478), it is proposed to amend Part 7 to add a new § 7.97 as set forth below.

The purpose of the amendment is to ensure visitor safety on Alcatraz Island and to restrict visitation to manageable numbers by limiting boat landings on the Island to those holding valid permits for such landings.

It is the policy of the Department of the Interior, whenever practicable, to afford the public an opportunity to participate in the rulemaking process. Accordingly, interested persons may submit written comments, suggestions, or objections regarding the proposed regulation to the Superintendent, Golden Gate National Recreation Area, Fort Mason, San Francisco, California 94123, by August 23, 1973.

The new section reads as follows:

§ 7.97 Golden Gate National Recreation Area.

(a) Boat landings—Alcatraz Island. Except in emergencies, the docking of any privately-owned vessel, as defined in Part 3.1 of this Title, or the landing of any person at Alcatraz Island without a permit or contract is prohibited. The Superintendent may issue a permit upon a determination that the applicant's needs cannot be provided by authorized commercial boat transportation to Alcatraz Island and that the proposed activities of the applicant are compatible with the preservation and protection of Alcatraz Island.

JOSEPH C. RUMBERG, JR.,
Deputy Associate Director.

LAVA BEDS NATIONAL MONUMENT, CALIFORNIA

Wilderness

Notice is hereby given that pursuant to the authority contained in section 3 of the Act of August 25, 1916 (39 Stat. 535, as amended; 16 U.S.C. 3), section 3 of the Act of October 13, 1972 (86 Stat. 811), section 4 of the Act of September 3, 1964 (78 Stat. 892; 16 U.S.C. 1133), 245 DM1 (34 FR 13879) as amended, and National Park Service Order No. 77 (38 FR 7478), it is proposed to amend Part 7 of Title 36 of the Code of Federal Regulations to add § 7.96 as set forth below.

The purpose of the amendment is to establish special regulations for visitor use in that area within the monument which has been set aside for administration as a part of the national wilderness preservation system.

It is the policy of the Department of the Interior whenever practicable, to afford the public an opportunity to participate in the rulemaking process. Accordingly interested persons may submit written comments, suggestions, or objections regarding the proposed amendment to the Superintendent, Lava Beds National Monument, Tulelake, California 96134, on or before September 24, 1973.

Section 7.96 is added as follows:

§ 7.96 Lava Beds National Monument.

(a) *Wilderness.* A map of the park portion designated as wilderness may be inspected at the Office of the Superintendent. Except in emergencies involving the health and safety of persons within the area, the following special regulations apply in the designated wilderness area: (1) The possession or use of a vehicle, motor vehicle, snowmobile, portable motor, or engine-driven equipment or machine is prohibited. (2) The possession or use of any device moved by animal or human power, on one or more wheels, in, upon, or by which any person or property is or may be transported or drawn on land, is prohibited.

PAUL F. HARTEL,
Superintendent, Lava Beds National Monument.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[14 CFR Part 39]

[Airworthiness Docket No. 73-SW-55]

BELL MODEL 206A AND 206B HELICOPTERS

Proposed Airworthiness Directives

The Federal Aviation Administration is considering amending Part 39 of the Federal Aviation Regulations by adding an airworthiness directive applicable to Bell Model 206A and 206B helicopters. There have been reports of fatigue cracks in the vertical fin support forgings, P/N's 206-031-417 and -418, on Bell Models 206A and 206B, that could possibly result in damage to the tail rotor, if allowed to progress beyond certain limits. Since this condition is likely to exist or develop in other helicopters of the same type design, the proposed airworthiness directive would require repetitive inspections of the vertical fin support forging for cracks and thread marks and replacement as necessary on Bell Models 206A and 206B.

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or comments as they may desire. Communications should identify the docket number and be submitted in triplicate to the Regional Counsel, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Tex. 76101. All communications received on or before September 24, 1973 will be considered by the Director before taking action upon the proposed rule. The proposals contained in this notice may be changed in the light of comments received. All comments will be available, both before and after the closing date for comments, in the Office of Regional Counsel, Southwest Region, Federal Aviation Administration, 4400 Blue Mound Road, Forth Worth, Tex.

This amendment is proposed under the authority of sections 313(a), 601, and 603 of the Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421, 1423) and of section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

In consideration of the foregoing, it is proposed to amend § 39.13 of Part 39 of the Federal Aviation Regulations by adding the following new airworthiness directive:

BELL. Applies to Model 206A and 206B helicopters, serial numbers 4 through 1097, certificated in all categories, equipped with vertical fin support forgings, P/N's 206-031-417 and -418.

Compliance required within the next 50 hours' time in service after the effective date of this A.D., unless already accomplished within the last 50 hours' time in service, and thereafter at intervals not to exceed 50 hours' time in service from the last inspection.

To detect possible fatigue cracks in the vertical fin support forgings in the area of the fin attachment nut plates, accomplish the following:

(a) Remove the vertical fin in accordance with paragraph 8-47, Section VIII of the 206A/B Maintenance and Overhaul Instructions.

(b) Remove the paint in the area of the fin attachment nut plates (4 places).

(c) Inspect for cracks, using a dye penetrant or equivalent inspection method.

(d) If cracks are found in either support forging, the cracked forging must be removed and replaced prior to further flight.

(e) If no cracks are found, inspect the four holes for thread marks. Any marks must be removed in accordance with Bell Helicopter Company Service Bulletin No. 206-01-73-5, Part I, paragraph 5, dated June 27, 1973, or later FAA approved revision. Apply a coating of zinc chromate primer or other suitable corrosion protection.

(f) Reinstall the fin in accordance with paragraph 8-49, Section VIII of the 206A/B Maintenance and Overhaul Instructions.

(g) This A.D. is no longer applicable when the vertical fin support forgings are replaced in accordance with Bell Helicopter Company Service Bulletin No. 206-01-73-5, Part II, dated June 27, 1973, or later FAA approved revision.

The manufacturer's specifications and procedures identified and described in this directive are incorporated herein and made a part hereof pursuant to 5 U.S.C. 552(a)(1). All persons affected by this directive who have not already received these documents from the manufacturer may obtain copies upon request to the Service Manager, Bell Helicopter Company, P.O. Box 482, Fort Worth, Tex. 76101. These documents may also be examined at the Office of the Regional Counsel, Southwest Region, FAA, 4400 Blue Mound Road, Fort Worth, Tex., and at FAA Headquarters, 800 Independence Avenue SW, Washington, D.C. A historical file on this A.D. which includes the incorporated material in full is maintained by the FAA at its headquarters in Washington, D.C., and at the Southwest Regional Office in Fort Worth, Tex.

Issued in Fort Worth, Texas on August 13, 1973.

HENRY L. NEWMAN,
Director, Southwest Region.

[FR Doc.73-17836 Filed 8-22-73;8:45 am]

[14 CFR Part 71]

[Airspace Docket No. 73-CE-19]

TRANSITION AREA

Proposed Alteration

The Federal Aviation Administration is considering amending Part 71 of the Federal Aviation Regulations so as to alter the transition area at Spencer, Iowa.

Interested persons may participate in the proposed rule making by submitting such written data, views or arguments as they may desire. Communications should be submitted in triplicate to the Director, Central Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, Federal Building, 601 East 12th Street, Kansas City, Mo. 64106. All communications received by September 24, 1973, will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Regional Air Traffic Division Chief.

Any data, views or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

A public docket will be available for examination by interested persons in the Office of the Regional Counsel, Federal Aviation Administration, Federal Building, 601 East 12th Street, Kansas City, Mo. 64106.

Since designation of controlled airspace at Spencer, Iowa, a new public use instrument approach procedure is being developed for the Spencer Municipal Airport. Accordingly, it is necessary to alter the transition area at Spencer, Iowa, to adequately protect aircraft executing this new approach procedure.

In consideration of the foregoing, the Federal Aviation Administration proposes to amend Part 71 of the Federal Aviation Regulations as hereinafter set forth:

In § 71.181 (38 FR 435), the following transition area is amended to read:

SPENCER, IOWA

That airspace extending upward from 700 feet above the surface within a 5-mile radius of the Spencer, Iowa Municipal Airport (latitude 43°09'45" N., longitude 95°11'30" W.); and within three miles each side of the Spencer VOR 320° radial, extending from the 5-mile radius zone to 8 miles northwest of the VOR; within 3.5 miles each side of the Spencer VOR 129° radial, extending from the 5-mile radius zone to 15 miles southeast of the VOR; and that airspace extending upward from 1,200 feet above the surface within 4.5 miles northeast and 9.5 miles southwest of the Spencer VOR 320° radial, extending from 6.5 miles southeast of the VOR to 18.5 miles northwest of the VOR; and within 5 miles northeast and 9.5 miles southwest of the Spencer VOR 129° radial, extending from 6.5 miles northwest of the VOR to 22.5 miles southeast of the VOR.

This amendment is proposed under the authority of Section 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348), and of Section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Kansas City, Missouri, on August 6, 1973.

JOHN M. CYROCKI,
Director, Central Region.

[FR Doc.73-17837 Filed 8-22-73;8:45 am]

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 39]

ENVIRONMENTAL FINANCING

Loan Assistance From the Environmental Financing Authority

Notice is hereby given that the Environmental Protection Agency proposes to amend Subchapter B of Chapter I of Title 40 to include a new Part 39 to implement section 12 of the Federal Water Pollution Control Amendments of 1972.

Section 12 authorizes the Environmental Financing Authority to purchase State or local public body obligations which finance the non-Federal share of the cost of a project for the construction of waste treatment works.

Under the proposed regulations the Regional Administrators of the Environmental Protection Agency: (1) Will certify to the Environmental Financing Authority that the public body is unable to obtain on reasonable terms sufficient credit to finance its actual needs, (2) will approve the project as eligible for grant support under the FWPCA, and (3) will guarantee the timely payment by the public body of principal and interest on the obligation.

The proposed regulations would require the public body to develop a request for Environmental Financing Authority financing in conjunction with a Step 3 (building and erection of a treatment works) grant application or a Step 2-3 (design/construct) grant application. The request must contain documentation, such as letters from responsible municipal bond brokers, that the public body cannot obtain credit on better terms than the rate and repayment period specified by the Environmental Financing Authority. In addition the public body must agree to conditions which guarantee the loan.

Interested parties are encouraged to submit written comments, views, or data concerning these proposed regulations to the Chief, Water Programs Branch, Office of Planning and Evaluation, Environmental Protection Agency, Washington, D.C. 20460. All such submissions received on or before September 24, 1973, will be considered prior to promulgation of final regulations.

JOHN QUARLES,
Acting Administrator.

AUGUST 17, 1973.

PART 39—ENVIRONMENTAL FINANCING

Sec.
39.100 Purpose.
39.105 Definitions.
39.105-1 The authority.
39.105-2 Federal share.
39.105-3 Non-Federal share.
39.105-4 Public body.
39.105-5 Reasonable terms.
39.110 Application.
39.115 Limitation on assistance.
39.120 Certification.
39.125 Guarantee.

AUTHORITY.—Sec. 12 of the Act.

§ 39.100 Purpose.

This part establishes policies and procedures—(a) to assure that inability to borrow necessary funds on reasonable terms does not prevent the construction of any waste treatment works for which a grant has been awarded in compliance with the Federal Water Pollution Control Act and (b) to assure timely repayment of the principal and interest on the obligation.

§ 39.105 Definitions.

Words and terms used in this part which have been defined in § 35.905 of this chapter shall have the meaning set forth therein. The following words and terms shall have the meaning set forth below.

§ 39.105-1 The authority.

The Environmental Financing Authority established pursuant to section 12 of the Federal Water Pollution Control Act Amendments of 1972 (Public Law 92-500).

§ 39.105-2 Federal share.

The amount of any grant awarded under Subpart E of Part 35 of this chapter for construction of waste treatment works.

§ 39.105-3 Non-Federal share.

The amount remaining after the Federal share is subtracted from the total costs which the Regional Administrator determines are associated with the project and eligible for financing, excluding State or other assistance pursuant to § 39.115.

§ 39.105-4 Public body.

A public body is a municipality, a State, or an interstate agency as defined in § 35.905 of this chapter.

§ 39.105-5 Reasonable terms.

Reasonable terms are an interest rate less than or equal to the lending rate at which the Authority will buy municipal bonds or a repayment period equal to or longer than the repayment period established by the Environmental Financing Authority.

§ 39.110 Application.

(a) A public body which has applied for a grant under section 8 regulations (§ 35.800 of this chapter) or under § 35.930-1(a) (3), (4), or (5) of this chapter, or which has committed itself to finance the non-Federal share of any project(s) awarded such a grant, may apply through the Regional Administrator for a commitment from the Environmental Financing Authority to purchase or participate in any obligation issued by the public body.

(b) Such application must establish and document to the satisfaction of the Regional Administrator—(1) Efforts on the part of the public body to obtain long-term financial aid on reasonable terms for the cost of construction of the project (including projects for Steps 1 or 2), (2) the nature and extent of Environmental Financing Authority financing required by the public body for the project, and (3) such other financial information as may be requested by the Regional Administrator.

(c) Such application will normally be included with the application for a Step 3 or combination Step 2 and Step 3 grant application for a construction project and must contain documentation, such as letters from local or regional brokers, providing evidence that funds are not available from private sources at a reasonable rate. Such application may be submitted at a later date if the public body determines, after attempts to obtain private financing, that it needs EFA funding.

(d) Such application shall be submitted through the Regional Administrator on such forms as may be prescribed by the Board of Directors of the Authority.

§ 39.115 Limitation on assistance.

The amount of any State or other assistance available for the non-Federal share of a project will be deducted from the amount of assistance by the Authority, unless such assistance is not available on reasonable terms.

§ 39.120 Certification.

(a) The Regional Administrator may certify to the Authority that the public body is unable to obtain on reasonable terms sufficient credit to finance the non-Federal share of a project which has been awarded a grant under section

V 38-163 AUG 23 73 XUM

8 regulations or § 35.930–1(a) (3), (4), or (5) of this chapter for the Federal share of the project, provided that no such certification may be made in the case of a project for which the permanent financing occurred prior to October 18, 1972.

(b) The public body receiving certification will be subject to the following conditions:

(1) Agrees to maintain the facilities in good repair and operating condition for the duration of financial assistance by the Authority.

(2) Has legal authority to inspect and maintain the facilities in good repair and operating condition if the operating agency fails to do so.

(3) Has agreed to maintain insurance and bonding adequate to protect the guarantor.

(4) Has agreed to maintain and to preserve for the duration of financial assistance financial records (including annual operating budgets) necessary to reflect receipt of revenues for repayment.

(5) That the repayment period will be over a reasonable term not to exceed 40 years.

(6) Agrees to notify the Environmental Protection Agency Regional Administrator or his successor whenever projected annual revenues are insufficient to meet payments for principal, interest, or operating costs.

(7) That the public body has adopted a capital cost recovery system which will include revenues adequate to assure payment of principal and interest of the Environmental Financing Authority obligations.

(8) Agrees to revise its rates or rate structure in accordance with recommendations of the Environmental Protection Agency Regional Administrator or his successor whenever such revisions are required to assure that annual revenues will be sufficient to meet projected operating costs or required payments of principal and interest.

(c) The Environmental Protection Agency certification or financial assistance from the Authority may be revoked in the event of noncompliance with the foregoing conditions.

§ 39.125 Guarantee.

Certification by the Regional Administrator pursuant to § 39.120 constitutes a guarantee of the timely payment of interest and principal by the public body for a project for which financial assistance is obtained from the Authority.

[40 CFR Part 162]

LABELING CLAIMS FOR RESIDUAL BACTERIOSTATIC AND/OR SELF-SANITIZING ACTIVITY IN LABELING OF PESTICIDE PRODUCTS

Proposed Statement of Policy

Notice is hereby given pursuant to the authority in sections 3 and 25 of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended (86 Stat. 979, 997), that consideration is being given to the issuance of a Statement of Policy with respect to claims for residual bacteriostatic and/or self-sanitizing activity in labeling of pesticides. All persons who desire to submit written data, views, or arguments in connection with this matter should file the same in duplicate within 60 days after the date of publication of this notice in the FEDERAL REGISTER with the Director, Registration Division, Office of Pesticides Programs, Environmental Protection Agency, Room 2134, South Agriculture Building, 12th and Independence Avenue SW., Washington, D.C. 20250. All written submissions filed pursuant to this notice will be made available for public inspection in the above office during working hours Monday through Friday.

It is the intention of this Agency to require that all currently registered products be brought into compliance within 180 days from the date of publication of a final notice in the FEDERAL REGISTER. The Agency further intends to require that new products proposed for registration comply with the provisions of the established policy prior to registration. At the end of the 180-day period allowed for bringing currently registered products into compliance, notices of intent to cancel registration of noncomplying products will be issued.

The rationale for this proposed change in policy and the proposed Statement of Policy follows.

Dated: August 17, 1973.

JOHN QUARLES,
Acting Administrator.

The Environmental Protection Agency in the exercise of its responsibility with regard to protection of public health and the environment must make continuing judgments relative to the safety and efficacy of pesticide products. These judgments must be based on constant reviews of available data and close surveillance of currently registered products to assure that they meet the statutory test relative to effectiveness and safety.

The Agency also recognizes its responsibility to assure that for any introduction of pesticide chemicals into the environment there is a commensurate and clearly demonstrable useful benefit to man and his environment. It is of prime importance that the benefit that can be expected to accrue from such usages be clearly spelled out in pesticide labeling.

The Federal Insecticide, Fungicide, and Rodenticide Act as amended by the Federal Environmental Pesticide Control Act of 1972 (86 Stat. 973 et seq.) provides that a pesticide product is considered misbranded if among other things:

1. Its labeling bears any statement, design, or graphic representation relative thereto or to its ingredients which is false or misleading in any particular (86 Stat. 977).

2. The labeling accompanying it does not contain directions for use which are necessary for effecting the purpose for which the product is intended and if complied with, together with any requirements imposed under section 3(d) of this Act, are adequate to protect health and the environment; (86 Stat. 977).

A number of antimicrobial products currently registered with the Registration Division, Office of Pesticide Programs, of the Environmental Protection Agency bear claims for residual bacteriostatic, fungistatic, and/or self-sanitizing activity against pathogenic bacteria and fungi. Products of this type include both liquid and pressurized spray formulations, and materials (such as various types of fabrics, fibers, coatings, rubber, plastics, resins, and paper) that have been impregnated or treated with antimicrobial pesticides.

Few meaningful, standardized tests exist to assess the efficacy of products, articles, or materials bearing bacteriostatic, fungistatic, or self-sanitizing claims. However, to substantiate current label claims, data have been submitted to show that residual bacteriostatic, fungistatic, and/or self-sanitizing activity occurs under ideal laboratory conditions that are suitable for the growth of bacteria and fungi, and for the activation of chemicals against these microorganisms. These ideal and critical conditions include appropriate nutrients, moisture temperature, pH, and other environmental factors.

The stability or retention of a chemical in or on an inanimate surface varies, depending upon both physical and chemical factors. Abrasion, sunlight, heat, chemical neutralization, or degradation, vaporization, presence of soil, dust, and water, migration, or physical transport of the chemical to another area, all tend to reduce the active concentration of the antimicrobial chemical from the site of original application.

From a practical, or public health view point, insignificant killing of potentially harmful micro-organisms occurs on dry objects or surfaces treated with antimicrobial pesticides when they (a) settle on the object or surface from the air, (b) are transported to the surface by means of some inanimate vehicle, or (c) are deposited either by contact or by fallout from a human or animal source (sputum, exudates, nasal discharge, excrement, etc.). In some instances where micro-organisms from human sources contaminate the treated surface, these micro-organisms generally are in the presence of serum components or other carbohydrate, lipid, or protein complexes present in tissues fluids or body exudates and thus are protected from the normally destructive chemical. The organisms, still viable, are able to grow and multiply when transported at a later time to a suitable environment and are capable of infecting susceptible hosts.

Antimicrobial activity generally is found at four levels of efficacy: sterilizers (the killing of all living organisms), disinfectants (total kill of target infectious organisms), sanitizers (significant reductions of bacterial numbers), and bacteriostats (inhibition of bacterial growth in the presence of moisture without effect on organism viability). Only by the total elimination of a specific species of infectious micro-organism from a surface (sterilization or disinfection) can it be assumed that the likelihood of cross-infection from the surface will not occur. In an unprotected environment, this state of sterility or disinfection is transient.

The practical value of impregnating various materials with antimicrobial chemicals for the purpose of preserving the material itself from microbial deterioration is recognized. Similarly, the treatment of surfaces, materials, or articles with antimicrobial chemicals to prevent the growth of and/or reduce the numbers of bacteria which may cause odors appears to have obvious practical significance. Additionally, a measure of protection is provided to perishable commodities by impregnating or treating papers or cartons with pesticides to prevent the growth of contaminants that might cause deterioration and spoilage. However, it is unlikely that any significant destruction of micro-organisms occurs when relatively dry bacteria or fungi found in the air, dust, or dirt in the environment come in contact with dry impregnated materials or dry treated surfaces in the absence of adequate moisture.

Based on these considerations, test methods currently available to evaluate residual antimicrobial activity against infectious micro-organisms do not adequately simulate conditions of use and fail to assess public health benefits that may be expected.

PROPOSED STATEMENT OF POLICY

§ 162.200 Claims for residual bacteriostatic and/or self-sanitizing activity in labeling of pesticides; statement of policy.

(a) Residual chemicals which are effective against infectious micro-organisms at the mitigating level only ("bacteriostatic," "fungistatic," "self-sanitizing") cannot be represented as providing any measure of public health protection, either stated or implied, and references to any infectious micro-organism in connection with residual antimicrobial activity are, therefore, unwarranted and no longer acceptable. Any such claims shall be removed from the label.

(b) Claims for antimicrobial activity of chemical residues must therefore be restricted to practical values which are likely to be provided and which can be associated with actual in-use situations, assuming adequate data to substantiate such claims are submitted to the Registration Division, Office of Pesticides Programs, Environmental Protection Agency.

(c) Any claims of value for residual effectiveness against infectious micro-organisms or micro-organisms of public health significance whether stated or implied must be supported by adequate clinical evidence developed from actual in-use studies before acceptance on the labeling of a pesticide will be considered. Affidavits or endorsements from users are not acceptable as "clinical evidence" of effectiveness.

[FR Doc.73-17890 Filed 8-22-73;8:45 am]

[41 CFR Part 15–60]

GOVERNMENT PROPERTY

Notice of Proposed Rulemaking

Notice is hereby given in accordance with the administrative procedure provisions in 5 U.S.C. 553 that pursuant to the Federal Property and Administrative Services Act of 1949, as amended, the Environmental Protection Agency is considering an amendment to 41 CFR Chapter 15 by adding a new Part 15–60, Government Property. Part 15–60 enunciates policy and procedures for providing Government owned property to contractors and for allowing contractors to acquire property at Government expense.

Interested parties may submit written comments concerning the proposed amendment to the Contracts Management Division, AMAC, Environmental Protection Agency, Washington, D.C. 20460. Communications received on or before September 21, 1973 will be considered prior to adoption of the final regulation. A copy of each communication received will be placed on file for public inspection in the Contracts Management Division, Room W415–B, Waterside Mall, Washington, D.C. 20460.

Dated: August 17, 1973.

JOHN QUARLES,
Acting Administrator.

PART 15–60—GOVERNMENT PROPERTY

Subpart 15–60.1—General

15–60.000 Scope of part.
15–60.100 Scope of subpart.
15–60.101 Definitions.
15–60.101–1 Property.
15–60.101–2 Government property.
15–60.101–3 Provide.
15–60.101–4 Nonseverable.
15–60.101–5 Dollar value.
15–60.101–6 Procurement contract.
15–60.101–7 Material.
15–60.101–8 Nonprofit organization.
15–60.102 Responsibility and liability for Government property.
15–60.102–1 Prime contractors.
15–60.102–2 Subcontractors.
15–60.103 Use for or by contractors of test facilities owned and operated by the Government.

Subpart 15–60.2—Material

15–60.200 Scope of subpart.
15–60.201 Policy.
15–60.202 Procedure.
15–60.203 Contract changes.
15–60.204 Disposal.

Subpart 15–60.3—Providing Government Property to Contractors

15–60.300 Scope of subpart.
15–60.301 Providing property.
15–60.301–1 General.
15–60.301–2 Justification for providing property.
15–60.301–3 Special and general purpose property.
15–60.301–4 Providing property when disposal is limited.
15–60.301–5 Changing Government property to be provided.
15–60.301–6 Contract schedule articles.

Subpart 15–60.4—Use and Charges

15–60.400 Scope of subpart.
15–60.401 General.
15–60.402 Use without charge.
15–60.403 Rent.

Subpart 15–60.5—Competition

15–60.500 Scope of subpart.
15–60.501 General.
15–60.502 Solicitation documents.
15–60.503 Evaluation of bids and proposals.

Subpart 15–60.6—Administration of Government Property

15–60.600 Scope of subpart.
15–60.601 General.
15–60.602 Property Administrator.
15–60.603 Insurance.
15–60.604 Risk of loss or damage liability.

Subpart 15–60.7—Contract Clauses

15–60.700 Scope of subpart.
15–60.701 Government property clause for fixed-price contracts.
15–60.702 Government property clause for cost-reimbursement contracts.
15–60.703 Government property clause for "no-fee" cost-reimbursement contracts with educational or nonprofit institutions and State and local Governments.

AUTHORITY: 40 U.S.C. 486(c), sec. 205(c), 63 Stat. 377, as amended.

Subpart 15–60.1—General

§ 15–60.000 Scope of part.

This part sets forth policy and procedures with respect to providing property for use by contractors in performance of EPA contracts and prescribes appropriate contract clauses. This part does not apply to the lease of property to contractors or to property to which the Government has acquired a lien or title solely as a result of advance, progress, or partial payments.

§ 15–60.100 Scope of subpart.

This subpart 15–60.1 contains (a) definition of terms used throughout this Part 15–60 and (b) certain statements of general policy.

§ 15–60.101 Definitions.

As used in this subpart, the following terms have the meaning stated below. Additional definitions applicable to property administration are set forth in EPA publication entitled "Guide for Control of Government Property by Contractors."

§ 15–60.101–1 Property.

Property includes all property, both real and personal, severable and nonseverable, and expendable material and nonexpendable equipment.

§ 15–60.101–2 Government property.

Government property means all property owned by or leased to the Government or acquired by the Government under the terms of a contract. Government property includes both Government-furnished property and contractor-acquired property as defined below:

(a) Government-furnished property is property in the possession of, or ac-

V 38 163 AUG 23 73 XUM

quired directly by, the Government and subsequently delivered or otherwise made available to the contractor; and

(b) Contractor-acquired property is property procured or otherwise made available by the contractor for performance of a contract, title to which is vested in the Government.

§ 15–60.101–3 Provide.

Provide means to furnish Government-owned property or to allow a contractor to acquire property at Government expense.

§ 15–60.101–4 Nonseverable.

Nonseverable, when related to Government property, means that such property cannot be removed after erection or installation without substantial loss of value or damage thereto, or to the premises where installed.

§ 15–60.101–5 Dollar value.

This is the amount determined by the Government and recorded in inventory records as the price or cost of an item of Government-owned property.

§ 15–60.101–6 Procurement contract.

Procurement contract means a Government contract for the acquisition of property or services of any description; e.g., research and development, construction, scientific, educational, medical, etc

§ 15–60.101–7 Material.

Material means property which may be consumed or expended in the performance of a contract or which may be incorporated into or attached to an end item to be delivered under a contract. It includes, but is not limited to, raw and processed material, parts, components, assemblies, small tools and supplies which may be consumed in normal use during performance of a contract.

§ 15–60.101–8 Nonprofit organization.

Nonprofit organization means any corporation, foundation, trust, or institution operated for scientific, educational, or medical purposes, not organized for profit, no part of the net earnings of which inures to the benefit of any private shareholder or individual.

§ 15–60.102 Responsibility and liability for Government property.

§ 15–60.102–1 Prime contractors.

Except for the conditions specified in paragraph (g), Risk of Loss, of the Government Property clause set out in § 15–60.702 of this chapter, it is EPA policy not to hold a contractor responsible for loss of or damage to Government property when such property is provided under:

(a) A negotiated, fixed-price type procurement contract for which the price is not based on (1) adequate price competition, (2) established catalog or market prices of commercial items sold in substantial quantities to the general public (see § 1–3.807–1(a)(2)), or (3) prices set by law or regulation; or

(b) Cost-reimbursement type procurement contracts.

§ 15–60.102–2 Subcontractors.

(a) If Government property is provided to a subcontractor directly by the Government § 15–60.102–1 shall apply.

(b) If Government property is provided to a subcontractor by a prime contractor, the latter shall be required to hold the subcontractor liable for any loss of or damage to such property; provided, however, the prime contractor may, with the prior approval of the Contracting Officer:

(1) include in any cost-reimbursement type subcontract thereunder provisions similar to those contained in paragraph (g) of the section in § 15–60.702; and

(2) include in any fixed-price subcontract meeting the criteria set forth in § 15–60.102–1(a) a provision similar to that contained in § 15–60.701(b) of this chapter.

Contracting Officers shall, prior to approving the inclusion of the provisions referred to above in any subcontract, balance the need for the protection and care of Government property against the cost thereof. A prime contractor who provides Government property to a subcontractor shall not be relieved of any responsibility to the Government that he may have under the terms of his contract.

§ 15–60.103 Use for or by contractors of test facilities owned and operated by the Government.

The on-site use for or by contractors of existing Government-owned test facilities located at installations owned and operated by the Government may be authorized in connection with the performance of Government contracts only when:

(a) There is no commercial test capability adequate for the testing needs, or

(b) Substantial cost savings will result from use of the Government-owned test facilities.

Whenever any such use is authorized, adequate consideration comparable to commercial charges, if any, shall be obtained under any affected contract.

Subpart 15–60.2—Material

§ 15–60.200 Scope of subpart.

This subpart prescribes policy and procedure for furnishing material (see § 15–60.101–7) to contractors for performance of EPA formally advertised and negotiated contracts.

§ 15–60.201 Policy.

Contractors normally are expected to furnish all material required for performance of EPA contracts. However, it may be in the Government's interest to furnish such material when justified by reason of economy, to expedite contract performance, to achieve standardization, or under other appropriate conditions.

§ 15–60.202 Procedure.

(a) Solicitation documents shall describe material to be furnished by the Government, in detail sufficient for evaluation by prospective contractors.

(b) Whenever material is to be furnished by the Government the contract shall specify whether the contracting activity or the contractor is to prepare requisitioning documents. If the contractor is to be responsible for preparing requisitioning documents, the EPA Property Administrator will instruct the contractor to prepare such documents in accordance with the Federal Standard Requisitioning and Issue Procedure (FEDSTRIP) system, prescribed by Subpart 101–26.2 of the Federal Property Management Regulations. (See FPR, Subpart 1–5.9 for "Use of GSA Supply Services by Contractors Performing Cost-Reimbursement Type Contracts").

(c) The appropriate Government Property clause prescribed in Subpart 15–60.7 shall be incorporated into all contracts which provide for Government-furnished material.

§ 15–60.203 Contract changes.

(a) Contracts may be modified:

(1) Bilaterally to provide for material to be furnished by the Government and to increase the amount of Government-furnished material; provided, adequate consideration flows to the Government for such modifications; and

(2) Unilaterally to make substitutions or decreases in material to be furnished by the Government, subject to equitable adjustment of the contract in accordance with the Government Property clause.

§ 15–60.204 Disposal.

Residual Government material (including scrap and salvage) shall be disposed of in accordance with instructions of the EPA Property Administrator and as directed by the Contracting Officer. (See FPMR, EPA Property Management Regulations, FPR, Part 1–8, and EPA publication entitled "Guide for Control of Government Property by Contractors").

Subpart 15–60.3—Providing Government Property to Contractors

§ 15–60.300 Scope of subpart.

This subpart enunciates policy to guide the decision making process when property (other than material) is to be provided a contractor for performance of an EPA contract and to insure that such decisions are properly documented.

§ 15–60.301 Providing property.

§ 15–60.301–1 General.

(a) Contractors are expected to provide all resources necessary for performance of EPA contracts. Every effort must be made to locate and select Contractors that demonstrate a willingness and ability to provide their own resources. However, during procurement planning, solicitation of prospective contractors, evaluation of proposals, contract negotiations, or during postaward performance of the contract, EPA may determine that it is in the Government's interest to furnish Government-owned property or to allow the contractor to acquire property at Government expense.

(b) Providing property at Government expense can create an expensive and burdensome inventory that may have to

be disposed of at a fraction of its cost. EPA personnel must insure that (1) providing property is justified, (2) the Government receives adequate consideration, and (3) one contractor or prospective contractor does not receive a competitive advantage over others. A decision to provide property at Government expense must be supported by a comprehensive "determination and findings."

(c) Items of property to be furnished by the Government or acquired by the contractor must be identified as specifically as possible in the original contract Schedule or in a Change Order or Supplemental Agreement, as appropriate. When acquisition of property at Government expense is authorized in a contract Schedule, Change Order, or Supplemental Agreement, purchase orders or subcontracts issued by the contractor for acquisition of individual items of property are subject to the requirements of the Subcontracts clause incorporated into the contract. Authorization to acquire property should not be construed as consent to placement of a subcontract or vice-versa, unless so specified in the contract or in a written determination by the Contracting Officer.

§ 15–60.301–2 Justification for providing property.

(a) The Contracting Officer shall not authorize a contractor to (1) acquire property at Government expense, (2) obtain Government-furnished property, or (3) use Government-owned property in his possession until the Chief Officer, at Division level or above, responsible for management of the program/project involved, submits a written justification of need to provide the property to the Contracting Officer. If the Contracting Officer concurs in the justification of need, he will prepare and sign a separate "determination and findings" which identifies the property to be provided and sets forth the facts and circumstances which support providing the property. The "determination and findings" shall be approved by the Chief Officer responsible for procurement at the contracting activity involved. A similar approved "determination and findings" is required when changes are made in the kind or amount of property provided or acquired. However, a separate "determination and findings" is not mandatory if the justification of need fully supports providing the property and contains the minimum information prescribed by § 15–60.301(b). In such case, concurrences by the Contracting Officer and Chief Officer responsible for procurement may be stated on the justification of need.

(b) As a minimum, the justification of need and/or "the determination and findings" must:

(1) Identify the specific program and project for which the property is required.

(2) Describe the kind, quantity, and estimated cost (including transportation and installation costs) of the individual item of property required to be furnished or acquired.

(3) Explain why the property is essential for contract performance.

(4) Explain why it is in the Government's interest to provide the property; why other alternatives (e.g., renting the property, use of subcontractors, modification of program/project requirements, procurement from another contractor, etc.); are impractical or uneconomical and why providing the requested property is likely to result in lower cost to the Government for products delivered or services rendered, when all costs are considered (e.g., purchase price of the property, transportation, modification, installation, maintenance, and administration costs by the Contractor and the Government.)

(5) Identify, if known, location of the contractor's facility at which the property will be used and the contractor's personnel assigned responsibility for acquisition and management of the property.

(c) A justification of need is required regardless of when the need for the property is determined; thus:

(1) A written justification of need must be transmitted with EPA Form 1900.8, Procurement Request/Requisition, whenever the program/project manager is aware, prior to preparation of EPA Form 1900.8, that it will be necessary to authorize use of Government-owned property in contractor's possession, furnish Government-owned property, or allow contractor to acquire property at Government expense. Known requirements of this kind must be specified in the solicitation document as prescribed in Subpart 15–60.5.

(2) When the need to authorize use of existing Government-owned property or to authorize the furnishing or acquisition of property does not become known until evaluation of contractor's proposals or during contract negotiations, the Contracting Officer shall obtain a justifictaion of need prior to execution of the procurement contract. In order to maintain the integrity of the competitive procurement process, other proposers that have submitted proposals will be offered the opportunity to amend their proposals as contemplated by § 1–3.805 of this title and § 15–3.805 of this chapter.

(3) After award of a contract, the Contracting Officer shall not authorize the use, furnishing, or acquisition of property until a justification of need is furnished by the appropriate program manager. Also, the Contracting Officer must insure that consideration for such authorization flows to the Government in the form of a reduction in contract price/cost, payment of rent for use of property, or other legal consideration determined to be adequate in terms of improved performance, increased quality, faster delivery, etc.

§ 15–60.301–3 Special and general purpose property.

(a) Generally, only special purpose property (i.e., equipment and facilities items whose usefulness, without need for substantial modification, is limited to a particular operation or project) may be provided to a contractor. Standard or general purpose items of administrative equipment (e.g., office furniture and equipment, cafeteria equipment, lockers, shelving, etc.), and technical equipment (e.g., laboratory furniture and fixtures, microscopes, oscilloscopes, gauges, etc.), shall be provided only when justified under the most exceptional circumstances.

(b) Items of property having a unit cost of less than $1,000.00 shall not be provided contractors except as authorized under contracts with:

(1) Nonprofit institutions of higher education or other nonprofit organizations whose primary purpose is the conduct of scientific research;

(2) State and local Government agencies; or

(3) Contractors operating a Government-owned plant or performing on-site at Government installations.

§ 15–60.301–4 Providing property when disposal is limited.

(a) *Nonseverable property.*—Nonseverable property, other than foundation and similar improvements necessary for the installation of equipment, shall not be installed or constructed on land not owned by the Government, in such fashion as to be nonseverable, unless approved by the Director, Contracts Management Division, AMAC, or the Deputy Assistant Administrator for Administration, AMA, in accordance with EPA Order 1960.1. The determination to locate such nonseverable property on land not owned by the Government shall be made only when all of the conditions in paragraphs (a) (1) through (4) of this section have been met:

(1) Consideration has been given to any nonrecoverable costs involved, including transportation and installation.

(2) Consideration has been given to (i) locating the Government property where it can be segregated from existing contractor-owned and Government-owned property and where it is readily accessible from public thoroughfares and (ii) obtaining a written agreement by the contractor on whose land the property is to be placed that either the Government or another Government contractor will have a right to use and operate the property upon termination or completion of the work for which it was provided. (In cases where such an agreement is not obtained, the negotiation effort shall be documented accordingly);

(3) The contractor agrees that the Government (i) will have the right to abandon in place all nonservable Government property provided and (ii) will not have any obligation to disassemble or remove the property or to restore or rehabilitate the premises on which the property is located, unless otherwise provided in the contract and approved by the Director, Contracts Management Division, AMAC, or the Deputy Assistant Administrator for Administration, AMA, as required by EPA Order 1960.1

V 38-163 AUG 23 73 XUM

(this approval authority shall not be delegated); and

(4) One of the circumstances in paragraph (a)(4)(i) through (iv) of this section has been met—

(i) The Government obtains an option to acquire the underlaying land;

(ii) The property is disposable, after the Government's need therefor has ceased, to parties other than the Contractor and the Government acquires from the owner a right to retain title and to dispose of all facilities it has constructed, without regard to the laws of real property in the jurisdiction in which the facility is located. Such right of disposition must be unencumbered, and will be evidenced by written agreement or other legal instrument signed by the Contractor or other owner of the real property;

(iii) The Contractor agrees in writing that he will purchase the property upon the termination or completion of the contract under which the property is provided, or within a specified reasonable time thereafter, at a price to be determined by appraisal, or at a price equal to the acquisition cost of the property less depreciation at the rate or rates specified in the contract (which rate or rates shall take into account the estimated useful life of the property) or for the scrap and salvage value of the property if it is determined that the estimated useful life of the property will not extend beyond the completion of the work for which the property was provided. Any such purchase agreement must permit the Government to credit any amounts due the Contractor under the contract against the purchase price; or

(iv) The Deputy Assistant Administrator, AMA, specifically approves other provisions which he considers adequate to protect the interests of the Government in regard to the property.

(b) Property subject to patent or other proprietary rights. If patent or other proprietary rights of a Contractor may restrict the disposal of Government property, the condition in either paragraph (a)(4)(ii) or (iii) of this section shall be satisfied before such property is provided.

§ 15–60.301–5 Changing Government property to be provided.

Increases in the amount of Government property specified in a contract shall be made under the contract "Changes" clause by issuance of an appropriate Change Order or Supplemental Agreement. Such increases shall be made only when approved in accordance with the policies prescribed in this Subpart 15–60.3 and when the Government receives adequate consideration therefor. Unilateral decreases in or substitutions for the Government property specified in a contract to be provided by the Government may be ordered by the Contracting Officer pursuant to the Government Property clause incorporated into the contract.

§ 15–60.301–6 Contract schedule articles.

(a) *General.* Whenever a Contractor is authorized to acquire property at Government expense, is furnished Government-owned property, or is authorized to use Government-owned property in his possession, such property will be identified, as specifically as possible, in the contract Schedule and the appropriate Government Property clause prescribed in Subpart 15–60.7 will be included in the contract. Also, the Schedule will include the appropriate Article prescribed in § 15–60.301–6(b).

(b) *Contract Schedule Articles.*—(1) When property is to be acquired or fabricated by a contractor, the estimated cost of such property and the following Article will be included in the Contract Schedule:

PROPERTY TO BE ACQUIRED OR FABRICATED (1973)

Subject to the approval of the Contracting Officer, the Contractor may acquire or fabricate (the property listed below) (the property listed in Appendix "A," attached hereto and made a part hereof). The Government will reimburse the contractor for the cost of such property as determined allowable by the Contracting Officer in accordance with Part 1–15 of the Federal Procurement Regulations as in effect on the date of this contract. The contractor shall have no obligation to acquire or fabricate property and the Government shall have no obligation to reimburse any amount for such property in excess of the total estimated cost of such property set forth in this Schedule, unless this contract is amended to increase such amount. All property acquired or fabricated, for which the contractor is reimbursed, shall be subject to the provisions of the Government Property clause of this contract.

(2) If a procurement contract is negotiated on the basis that Government-owned property will be provided the contractor, the following Article will be included in the contract Schedule. If the Government is to pay the cost of transportation and installation of such property the Schedule will so state. The dollar value of each item of property listed will be shown.

GOVERNMENT-FURNISHED PROPERTY (1973)

The terms and conditions of this contract are based on the Government furnishing the property (listed below) (listed in Appendix "A" attached hereto and made a part hereof). Title to property furnished shall remain in the Government and is subject to the provisions of the Government Property clause of this contract. The Contractor is authorized to use the Government-owned property (on a no-charge basis) (at the rental rates specified herein), in performance of this contract.

(3) The following Article will be included in the contract Schedule when a Contractor is authorized to use Government property in his possession. Also, the appropriate Government Property clause prescribed in Subpart 15–60.7 of this part must be incorporated into the procurement contract. The dollar value of each item of property listed will be shown and if the Government is to pay the cost of installing or modifying such property the Schedule will so state.

USE OF GOVERNMENT PROPERTY IN CONTRACTOR'S POSSESSION (1973)

The Contractor is authorized to use in performance of this contract (on a no-charge basis) (at the rental rates specified herein), the Government property (listed below) (listed in Appendix "A" attached hereto and made a part hereof), provided to him under (this contract) (the following contracts):

(4) The following Article will be included in all contracts under which the Contractor must pay rent for use of Government-owned property:

USE AND CHARGE

(a) Subject to the payment of a rental therefor, the Contractor may use in the performance of this contract the property specified in the Schedule or authorized in writing by the Contracting Officer. The amount of rental to be paid for the right to use the property under this paragraph (a) shall be determined in accordance with the following procedures:

(1) The following bases are or shall be established in writing for the rental computation prescribed in subparagraph (2) of this clause in advance of any use of the property under this paragraph:

(i) The rental rates for the right to use the property shall be those set forth in paragraph (e) of this clause.

(ii) The cost of the property shall be the total cost to the Government, as determined by the Contracting Officer of each item of property, including the cost of transportation and installation, if such costs are borne by the Government.

(iii) For the purpose of determining the amount of rental due under subparagraph (2) of this clause, the rental period shall be not less than one (1) month nor more than six (6) months, as may be mutually agreed to.

(iv) For the purpose of computing any credit under subparagraph (2) of this clause, the measurement unit for determining the amount of use of the property by the Contractor shall be hours of actual use, direct labor hours, or any other measurement unit which will result in an equitable apportionment of the rental charge, as may be mutually agreed to.

(2) The Contractor shall compute the amount of rentals to be paid for each rental period, using the bases established pursuant to subparagraph (1) of this clause. The rental rates shall be applied to the cost of such of the property as may have been authorized for use in advance pursuant to paragraph (a) of this clause, for each rental period. The full charge for each rental period, so determined, shall be reduced by a credit in the amount of such rental as would otherwise be properly allocable to work with respect to which the use of the property without charge is authorized. Such credit shall be computed by multiplying the full rental for the rental period by a fraction whose numerator is the amount of use of the property by the Contractor without charge during such period, and whose denominator is the total amount of use of the property by the Contractor during such period.

(3) The Contractor shall submit to the Contracting Officer within ninety (90) days after the close of each rental period a written statement of the use made of the property by the Contractor and the rental due the Government hereunder, and shall make available such records and data as are determined by the Contracting Officer to be necessary to verify the information contained in the statement.

(4) If the Contractor fails to submit the statement within the prescribed ninety (90) day period, the Contractor shall be liable for the full rental for the period in question, subject to the exception stated in subparagraph (5) of this clause.

(5) If the Contractor's failure to submit the statement within the prescribed ninety (90) day period arose out of causes beyond the control and without the fault or negligence of the Contractor, the Contracting Officer shall grant to the Contractor in writing a reasonable extension of time in which to make such submission.

(b) Unless otherwise authorized in writing by the Contracting Officer, the Contractor shall use the property only in performance of contracts and subcontracts of the Environmental Protection Agency.

(c) Concurrently with the submission of the written statement prescribed by paragraph (a)(3) of this clause, the Contractor shall pay the rental due the Government under this clause by check made payable to the Treasurer of the United States. Each check shall be mailed or delivered to the Contracting Officer. Receipt and acceptance by the Government of the Contractor's checks pursuant to this paragraph shall constitute an accord and satisfaction of the final amount due the Government hereunder unless the Contractor is notified in writing within one-hundred-eighty (180) days following such receipt that the amount received is not regarded by the Government as the final amount due.

(d) If the Contractor uses any item of the property without authorization, the Contractor shall be liable for the full monthly rental, without credit, for such item for each month or part thereof in which such unauthorized use occurs: Provided, however, that the Director, Contracts Management Division, AMAC, may, in writing, waive the Contractor's liability for such unauthorized use if he determines that the Contractor exercised reasonable care to prevent such unauthorized use. In this latter event, the Contractor shall be liable only for the rental that would otherwise be due under this clause. The acceptance of any rental by the Government hereunder shall not be construed as a waiver or relinquishment of any rights it may have against the Contractor growing out of the Contractor's unauthorized use of the property or any other failure to perform this contract according to its terms.

(e) The following rental rates shall be used when rent is to be charged, or an evaluation factor (equivalent to rent) is computed:

(1) For land and land preparation, buildings, building installations, and land installations, a fair and reasonable rental based on sound commercial practice;

(2) For personal property (equipment and facilities) not covered in paragraph (1) of this clause; not less than the prevailing commercial rate for like property, if any, or in the absence of such rate, not less than two percent (2%) of the dollar value per month for electronic test equipment and automotive equipment; and not less than one percent (1%) of the dollar value per month for all other property and equipment.

(5) When a contractor is permitted to authorize his subcontractors to use Government property in the subcontractor's possession, on a no-charge basis, the following Article will be included in the contract Schedule:

USE OF GOVERNMENT PROPERTY BY SUBCONTRACTORS (1973)

(a) The following subcontractors having Government-owned property provided under the contracts set forth below, in effect on the date of this contract, are authorized to use such property on a no-charge basis for the subcontract items listed below, and the subcontract shall so provide:

Subcontractor	Contract No.	Subcontract Item

(b) If the Contractor enters into other subcontracts with subcontractors who have Government-owned property provided to them under contracts which provide that no-charge use may be authorized, the Contracting Officer may authorize the use of such property on a no-charge basis: *Provided:*

(1) He determines that such use will not give the subcontractor a favored competitive position; and

(2) This contract is amended to reflect adequate consideration to the Government for the use of such facilities on a no-charge basis. Such subcontracts shall specifically authorize the no-charge use, and require the written approval of the Contracting Officer. No modification to this contract will be required, as provided in (2) of this clause, if the Contracting Officer determines that an elimination of charge for use of such property will, of itself, result in an adequate decreased cost to the Government under this contract.

(c) If the Government-owned property provided to the Contractor or any subcontractor hereunder on a no-charge basis are increased or decreased or do not remain available during the performance of this contract, or if any change is made in the terms and conditions under which they are made available, such equitable adjustments as may be appropriate will be made in the terms of this contract, unless such increase or decrease was contemplated in the establishment of the price of this contract or a subcontract.

(d) The Contractor agrees that he will not directly or indirectly, through overhead charges or otherwise, include in the price of this contract, or seek reimbursement under this contract for any rental charge paid by the Contractor for the use on other contracts of the property referred to herein. Any subcontract hereunder which authorizes the subcontractor to use Government property on a no-charge basis shall contain a provision to the same effect as this paragraph (d) of this clause.

Subpart 15–60.4—Use and Charges

§ 15–60.400 Scope of subpart.

This subpart deals with the authority for a contractor or subcontractor to use Government property and the charge for such use.

§ 15–60.401 General.

Authority for a contractor to use Government property must be granted by the Contracting Officer responsible for the contract under which the property is accountable and the contract file must be documented accordingly. If use without charge is granted, the contract file must be documented with a description of the consideration to the Government for such "no-charge" use and the Article prescribed in § 15–60.301–6(b)(3) must be included in the contract Schedule. The Article prescribed in § 15–60.301–6(b)(3) and the "Use and Charges" Article set out in § 15–60.301(b)(4) will be included in all contracts involving Government property when rent is charged for such use.

§ 15–60.402 Use without charge.

(a) A contractor may use Government property without charge in the performance of:

(1) Prime contracts which specifically authorize use without charge, and

(2) Subcontracts of any tier if the Contracting Officer having cognizance over the prime contract concerned has:

(i) Determined that the Government will receive adequate consideration, and

(ii) Authorized use without charge by:

(*a*) Including such authorization in the prime contract;

(*b*) Approving a subcontract specifically authorizing such use; or

(c) By otherwise approving such use in writing.

(b) A prime contractor may authorize subcontractors to use Government property in the subcontractor's possession, on a no-charge basis, when (1) the price or fee of the prime contract is negotiated with the specific understanding that the use of property by subcontractors on a no-charge basis will be permitted in the performance of specific subcontracts with specific subcontractors and (2) the "Use of Government Property by Subcontractors" clause, prescribed in § 15–60.301–6(5), is included in the prime contract Schedule.

§ 15–60.403 Rent.

(a) The following rental rates shall be used when rent is to be charged or an evaluation factor (equivalent to rent) is computed:

(1) For land and land preparation, buildings, building installations, and land installations, a fair and reasonable rental based on sound commercial practice;

(2) For personal property (equipment and facilities) not covered in paragraph (a)(1) of this section not less than the prevailing commercial rate for like property, if any, or in the absence of such rate, not less than two percent (2%) of the dollar value for electronic test equipment and automotive equipment; and not less than one percent (1%) of the dollar value per month for all other property and equipment.

Subpart 15–60.5—Competition

§ 15–60.500 Scope of subpart.

This subpart sets forth guidance designed to preclude one prospective contractor from receiving a competitive advantage over others when Government property is provided.

§ 15–60.501 General.

It is incumbent upon the Contracting Officer to insure that genuine competi-

V 38-163 AUG 23 73 XUM

tion prevails and that adequate consideration flows to the Government whenever and however Government property is to be provided a contractor for contract performance. Willingness and ability to provide all resources necessary for contract performance should be an important factor in evaluating competitive contractors.

§ 15–60.502 Solicitation documents.

Contracting Officers shall make certain that solicitation documents:

(a) Require prospective contractors to specify additional facilities and equipment which must be acquired for contract performance, the estimated cost of individual items, and whether acquisition of such property will be financed by the prospective contractor or whether the Government will be requested to provide the required items.

(b) Explain whether it is the Government's intention to provide property, when it is known prior to solicitation that contract performance will require additional facilities or equipment.

(c) Require prospective contractors to list items (including dollar value) of Government-owned property in their possession which they propose to use in performance of the prospective contract and identify the contract or other instrument under which the property is accountable. (Written permission from the Contracting Officer having cognizance of the property is a prerequisite to use in performance of the prospective contract.)

(d) Include a statement that the user will assume all costs related to making the property available for use (e.g., transportation, installation, rehabilitation, modification, etc.), unless, the Government is to assume such costs.

(e) Include a statement which explains the consideration to be given Government property during evaluation of bids and proposals. This is to insure that all prospective bidders and offerors understand that Government property will be an important consideration in evaluating their bids and proposals.

§ 15–60.503 Evaluation of bids and proposals.

The following policy shall be considered during evaluation of bids and proposals:

(a) In a competitive procurement, a prospective contractor provided Government property or authorized to use Government-owned property in his possession receives some degree of competitive advantage. When evaluating bids and proposals, such an advantage must be precluded through use of an equalizing factor in establishing the competitive range for negotiation and in arriving at the lowest bid. Any equitable equalizing factor may be used; e.g., rent equivalent, value of property, depreciation, etc.

(b) Government property to be furnished or acquired need not be assigned a weighted factor or criterion for evaluating bids and proposals. However, the evaluation narrative shall explain the importance that was placed upon Government property in rating and ranking bids and proposals.

(c) If a contractor is to be allowed to retain Government property at contract completion, the bid or proposal price shall be increased by an evaluation factor equivalent to:

(1) the cost to be reimbursed by the Government for property acquired at Government expense; and

(2) the current dollar value (cost less depreciation) of Government-furnished property.

Subpart 15–60.6—Administration of Government Property

§ 15–60.300 Scope of subpart.

This subpart sets forth policy and procedures governing administration of Government-furnished property and property acquired by contractors at Government expense for performance of EPA contracts.

§ 15–60.601 General.

(a) Responsibility within EPA for administering Government property in a contractor's possession rests primarily with EPA Property Administrators and is defined in an "Agreement of Understand Covering Contract Property Administration" executed by the Directors of the Contracts Management Division, AMAC, Facilities and Support Services Division, AMAF, and Financial Management Division, AMRF.

(b) The contractor's responsibility regarding the management and use of Government property is delineated in an EPA publication entitled "Guide for Control of Government Property By Contractors," instructions from EPA Property Administrators, and as specified in the contract.

(c) The Contracting Officer shall furnish the Property Administrator a copy of each contract, contract modification, or other written authorization to a contract which involves Government property in any manner. Also, the Contracting Officer shall furnish the Property Administrator a copy of all determinations and findings which support a decision to authorize permanent improvements to private property as contemplated in EPA Order 1960.1A.

§ 15–60.602 Property Administrator.

(a) The Property Administrator is the EPA "Accountable Officer" for Government property in a contractor's possession and maintains the official records of such property.

(b) EPA Property Administrators are appointed and assigned by the Director, Facilities and Support Services Division, AMAF.

(c) A Property Administrator shall be designated as Representative of the Contracting Officer for property administration for every cost-reimbursement type contract and for each fixed-price type contract under which Government property is involved. Contracting Officers shall designate the Property Administrator in the contract Schedule or by a letter of designation and furnish a copy to the Property Administrator.

(d) As the Representative of the Contracting Officer the Property Administrator performs all transactions and handles all matters concerning Government property in the contractor's possession. However, the Contracting Officer must execute sales contracts and determinations of liability for lost, damaged, or destroyed Government property and will resolve disputes with contractors that cannot be settled by the Property Administrator.

(e) The Property Administrator will review and determine the adequacy of contractor's property policy and procedures concerning:

(1) Receiving and inspection;

(2) Accounting, control, and reports;

(3) Utilization, including reporting excess property;

(4) Maintenance, i.e., protection, preservation, service, repair, warranties and guaranties, etc.

(5) Scrap and salvage of material, parts, etc.; and

(6) Disposal, including preparation for shipment and shipping procedures.

§ 15–60.603 Insurance.

Consideration will be given to requiring a contractor to procure and maintain insurance against loss of or damage to Government property in his possession whenever less than 75% of the total use of such property is for Government work.

§ 15–60.604 Risk of loss or damage liability.

When justified by the circumstances of a particular procurement, the contract may require the contractor to assume greater risks than those enumerated in the applicable "Government Property" clause set forth in Subpart 15–60.7 of this part. (See § 15–60.102.)

Subpart 15–60.7—Contract Clauses

§ 15–60.700 Scope of subpart.

(a) This subpart prescribes Government Property clauses to be used in EPA contracts.

(b) As used throughout this subpart, the term "fixed-price contract" shall include any advertised or negotiated fixed-price type contract and any letter conclude any advertised or negotiated fixed-price type definitive contract, but shall exclude small purchases made under Subparts 1–3.6 and 15–1.6 of this title.

(c) As used throughout this subpart, the term "cost-reimbursement contract" shall include any cost-reimbursement type contract and any letter contract which wil be converted to a cost-reimbursement type definitive contract.

§ 15–60.701 Government Property Clause for Fixed-Price Contracts.

(a) The following clause shall be used in fixed-price contracts under which the Government is to furnish or the Contractor is to acquire Government property:

GOVERNMENT PROPERTY (FIXED-PRICE) (1973)

(a) *Government-Furnished Property.* The Government shall deliver to the Contractor, for use in connection with and under the terms of this contract, the property described as Government-furnished property in the Schedule or specifications, together with such related data and information as the Contractor may request and as may reasonably be required for the intended use of such property (hereinafter referred to as "Government-furnished property"). The delivery or performance dates for the supplies or services to be furnished by the Contractor under this contract are based upon the expectation that Government-furnished property suitable for use will be delivered to the Contractor at the times stated in the Schedule or, if not so stated, in sufficient time to enable the Contractor to meet such delivery or performance dates. In the event that Government-furnished property is not delivered to the Contractor by such time or times, the Contracting Officer shall, upon timely written request made by the Contractor, make a determination of the delay, if any, occasioned the Contractor, and shall equitably adjust the contract price or delivery or performance dates or any other contractual provisions affected by any such delay, in accordance with the procedures provided for in the clause of this contract entitled "Changes." In the event that Government-furnished property is received by the Contractor in a condition not suitable for the intended use, the Contractor shall, upon receipt thereof, notify the Contracting Officer of such fact and, as directed by the Contracting Officer, either (1) return such property at the Government's expense or otherwise dispose of the property or (2) effect repairs or modifications. Upon completion of paragraphs (a) (1) and (2) of this clause, the Contracting Officer upon written request of the Contractor shall equitably adjust the contract price, or delivery or performance dates, or both, and any other contractual provision effected by the return or disposition, or the repair or modification in accordance with the procedures provided for in the clause of this contract entitled "Changes." The foregoing provisions for adjustment are exclusive and the Government shall not be liable to suit for breach of contract by reason of any delay in delivery of Government-furnished property or delivery of such property in a condition not suitable for its intended use.

(b) *Changes in Government-Furnished Property.* (1) By notice in writing, the Contracting Officer may (i) decrease the property furnished or to be furnished by the Government under this contract, and/or (ii) substitute other Government-owned property for property to be furnished by the Government, or to be acquired by the Contractor for the Government, under this contract. The Contractor shall promptly take such action as the Contracting Officer may direct with respect to the removal and shipping of property covered by such notice.

(2) In the event of any decrease in or substitution of property pursuant to paragraph (b) (1) of this clause, or any withdrawal of authority to use property provided under any other contract or lease, which property the Government had agreed in the Schedule to make available for the performance of this contract, the Contracting Officer, upon the written request of the Contractor (or, if the substitution of property causes a decrease in the cost of performance, on his own initiative), shall equitably adjust such contractual provisions as may be affected by the decrease, substitution or withdrawal, in accordance with the procedures provided for in the "Changes" clause of this contract.

(c) *Title.* Title to all property furnished by the Government shall remain in the Government. In order to define the obligations of the parties under this clause, title to each item of property acquired by the Contractor for the Government pursuant to this contract shall pass to and vest in the Government when its use in the performance of contract commences, or upon payment therefor by the Government whichever is earlier, whether or not title previously vested. All Government-furnished property, together with all property acquired by the Contractor, title to which vests in the Government under this paragraph, is subject to the provisions of this clause and is hereinafter collectively referred to as "Government Property." Title to the Government property shall not be affected by the incorporation or attachment thereof to any property not owned by the Government, nor shall such Government property, or any part thereof, be or become a fixture or lose its identity as personalty by reason of affixation to any realty.

(The following paragraph shall be substituted for paragraph (c) above when the contract is with an educational institution.)

(c) *Title.* Title to all property furnished by the Government shall remain in the Government. Title to all property purchased by the Contractor with the prior approval of the Contracting Officer shall be vested in the Contractor without further obligation to the Government except as provided below, unless it is determined by the Contracting Officer that such vesting is not in furtherance of the objectives of the Government or unless there is not proper authority to vest title in the Contractor. Such title shall be vested in the Contractor upon acquisition of the property or as soon as feasible thereafter provided that:

(1) The Contractor shall not under any Government contract, or subcontract thereunder, charge for any depreciation, amortization, or use of such property.

(2) At any time prior to twelve (12) months after completion or termination of the contract, the Contracting Officer reserves the right to require the Contractor to transfer title to property costing $1,000.00 or more per unit to the Government or to a third party named by the Contracting Officer.

(3) The Contractor shall, at the end of the calendar year, and within thirty (30) days after completion of the contract, furnish the Contracting Officer a list of all property where title is vested in the Contractor. If no such property has vested, the report shall so state.

All Government furnished property, together with all property title to which vests in the Government under this clause, is subject to the provisions of this clause and is hereinafter collectively referred to as "Government Property." Title to the Government property shall not be affected by the incorporation or attachment thereof to any property not owned by the Government, nor shall such Government property, or any part thereof, be or become a fixture or lose its identity as personalty by reasons of affixation to any realty.

(d) *Property administration.* The Contractor agrees to maintain and administer a property control system in accordance with EPA publication "Guide for Control of Government Property by Contractors," in effect as of the date of this contract, supplied by the Government. While the Contractor is responsible for the Government property (Government furnished and Contractor acquired), the Government will maintain the official accountability records.

(e) *Use of government property.* The Government property shall, unless otherwise provided herein or approved by the Contracting Officer, be used only for the performance of this contract.

(f) *Maintenance and repair of government property.* The Contractor shall maintain and administer, in accordance with sound industrial practice, a program for the maintenance, protection, and preservation of Government property until disposed of by the Contractor in accordance with this clause. In the event that any damage occurs to Government property the risk of which has been assumed by the Government under this contract, the Government shall replace such items or the Contractor shall make such repair of the property as the Government directs: *Provided*, However, that if the Contractor cannot effect such repair within the time required, the Contractor shall dispose of such property in the manner directed by the Contracting Officer. The contract price includes no compensation to the Contractor for the performance of any repair or replacement for which the Government is responsible, and an equitable adjustment will be made in any contractual provisions affected by such repair or replacement of Government property made at the direction of the Government, in accordance with the procedures provided for in the "Changes" clause of this contract. Any repair or replacement for which the Contractor is responsible under the provisions of this contract shall be accomplished by the Contractor at his own expense.

(g) *Risk of loss.* Unless otherwise provided in this contract, the Contractor assumes the risk of, and shall be responsible for, any loss of or damage to Government property provided under this contract upon its delivery to him or upon passage of title thereto to the Government as provided in paragraph (c) of this clause, except for reasonable wear and tear and except to the extent that such property is consumed in the performance of this contract.

(h) *Access.* The Contractor agrees to make available to the Contracting Officer, at all reasonable times, at the office of the Contractor, all its property records under this contract, and the Government shall at all reasonable times have access to the premises where any of the Government property is located for the purpose of inspecting the Government property.

(i) *Final accounting and disposition of government property.* Upon the completion of this contract, or at such earlier dates as may be fixed by the Contracting Officer, the Contractor shall submit to the Contracting Officer in a form acceptable to him, inventory schedules covering all items of the Government property not consumed in the performance of this contract, or not theretofore delivered to the Government, and shall deliver or make such other disposal of such Government property as may be directed or authorized by the Contracting Officer. The net proceeds of any such disposal shall be credited to the cost of the work covered by the contract or shall be paid in such manner as the Contracting Officer may direct. The foregoing provisions shall apply to scrap from Government property; provided, however, that the Contracting Officer may authorize or direct the Contractor to omit from such inventory schedules any scrap consisting of faulty castings or forgings, or cutting and processing waste, such as chips, cuttings, borings, turnings, short ends, circles, trimmings, clippings, and remnants, and to dispose of such scrap in accordance with the Contractor's normal practice and account therefor as a part of general overhead or other reimbursable cost in accordance with the Contractor's established accounting procedures.

V 38-163 AUG 23 73 XUM

(j) *Restoration of Contractor's premises and abandonment.* Unless otherwise provided herein, the Government:

(1) may abandon any Government property in place, and thereupon all obligations of the Government regarding such abandoned property shall cease; and

(2) has no obligation to the Contractor with regard to the disassembly or removal of the property or to the restoration or rehabilitation of the Contractor's premises, neither in case of abandonment (paragraph (j) (1) of this clause), disposition on completion of need or of the contract (paragraph (1) of this clause), nor otherwise, except for restoration or rehabilitation costs caused by removal of Government property pursuant to paragraph (b) of this clause.

(k) *Communications.* All communications issued pursuant to this clause shall be in writing.

(b) *Contracts requiring cost and pricing data.* In negotiated fixed-price contracts for which the price is not based on (1) adequate price competition, (2) established catalog or market prices of commercial items sold in substantial quantities to the general public, or (3) prices set by law or regulation, substitute the following for paragraph (g) of the clause in paragraph (a) of this section:

(g) *Risk of Loss.* (1) The Contractor shall not be liable for any loss of or damage to the Government property, or for expenses incidental to such loss or damage, except that the Contractor shall be responsible for any such loss or damage (including expenses incidental thereto):

(i) which results from willful misconduct or lack of good faith on the part of any one of the Contractor's directors or officers, or on the part of any of his managers, superintendents, or other equivalent representatives, who has supervision or direction of—

(A) all or substantially all of the Contractor's business; or

(B) all or substantially all of the Contractor's operations at any one plant or separate location, in which this contract is being performed; or

(C) a separate and complete major industrial operation in connection with the performance of this contract;

(ii) which results from a failure on the part of the contractor, due to the willful misconduct or lack of good faith on the part of any of his directors, officers, or other representatives mentioned in paragraph (g) (1) (i) of this clause.

(A) to maintain and administer, in accordance with sound industrial practice, the program for utilization, maintenance, repair, protection, and preservation of Government property as required by paragraph (f) of this clause, or to take all reasonable steps to comply with any appropriate written direction of the Contracting Officer under paragraph (f) clause; or

(B) to establish, maintain, and administer, in accordance with paragraph (d) of this clause, a system for control of Government property;

(iii) for which the Contractor is otherwise responsible under the express terms of the clause or clauses designated in the Schedule;

(iv) which results from a risk expressly required to be insured under this contract, but only to the extent of the insurance so required to be procured and maintained, or to the extent of insurance actually procured and maintained, whichever is greater; or

(v) which results from a risk which is in fact covered by insurance or for which the Contractor is otherwise reimbursed, but only to the extent of such insurance or reimbursement.

(2) If more than one of the above exceptions shall be applicable in any case, the Contractor's liability under any one exception shall not be limited by any other exception. The Contractor shall obtain the approval of the Contracting Officer prior to transferring any Government property to a subcontractor. If the Contractor transfers Government property to the possession and control of a subcontractor, the transfer shall not affect the liability of the Contractor for loss or destruction of or damage to the property as set forth above. However, the Contractor shall require the subcontractor to assume the risk of, and be responsible for, any loss or destruction of or damage to the property while in the latter's possession or control, except to the extent that the subcontract, with the prior approval of the Contracting Officer, provides for the relief of the subcontractor from such liability. In the absence of such approval, the subcontract shall contain appropriate provisions requiring the return of all Government property in as good condition as when received, except for reasonable wear and tear or for the utilization of the property in accordance with the provisions of the prime contract.

(3) The Contractor shall not be reimbursed for, and shall not include as an item of overhead, the cost of insurance, or any provision for a reserve, covering the risk of loss of or damage to the Government property, except to the extent that the Government may have required the Contractor to carry such insurance under any other provisions of this contract.

(4) Upon the happening of loss or destruction of or damage to the Government property, the Contractor shall notify the Contracting Officer thereof, take all reasonable steps to protect the Government property from further damage, separate the damaged and undamaged Government property, put all the Government property in the best possible order and furnish to the Contracting Officer a statement of—

(i) The lost, destroyed, and damaged Government property;

(ii) The time and origin of the loss, destruction, or damage;

(iii) All known interests in commingled property of which the Government property is a part; and

(iv) The insurance, if any, covering any part of or interest in such commingled property.

The contractor shall make repairs and renovations of the damaged Government property or take such other action, as the Contracting Officer directs.

(5) In the event the Contractor is indemnified, reimbursed, or otherwise compensated for any loss or destruction of or damage to the Government property, he shall use the proceeds to repair, renovate, or replace the Government property involved, or shall credit such proceeds against the cost of the work covered by the contract, or shall otherwise reimburse the Government, as directed by the Contracting Officer. The Contractor shall do nothing to prejudice the Government's right to recover against third parties for any such loss, destruction, or damage and, upon the request of the Contracting Officer, shall, at the Government's expense, furnish to the Government all reasonable assistance and cooperation (including the prosecution of suit and the execution of instruments of assignment in favor of the Government) in obtaining recovery. In addition, where the subcontractor has not been relieved from liability for any loss or destruction of or damage to Government property, the Contractor shall enforce the liability of the subcontractor for such loss or destruction of or damage to the Government property for the benefit of the Government.

§ 15–60.702 Government Property Clause for Cost-Reimbursement Contracts.

The following clause shall be used in cost-reimbursement contracts (except those with educational or other nonprofit institutions and State and local Governments when no payment of fee is contemplated) under which the Government is to furnish or the Contractor is to acquire Government property:

GOVERNMENT PROPERTY (COST-REIMBURSEMENT) (1973)

(a) *Government-furnished property.*— The Government shall deliver to the Contractor, for use in connection with and under the terms of this contract, the property described as Government-furnished property in the Schedule or specifications, together with such related data and information as the Contractor may request and as may reasonably be required for the intended use of such property (hereinafter referred to as "Government-furnished property"). The delivery or performance dates for the supplies or services to be furnished by the Contractor under this contract are based upon the expectation that Government-furnished property suitable for use will be delivered to the Contractor at the times stated in the Schedule or, if not so stated, in sufficient time to enable the Contractor to meet such delivery or performance dates. In the event that Government-furnished property is not delivered to the Contractor by such time or times, the Contracting Officer shall, upon timely written request made by the Contractor, make a determination of the delay, if any, occasioned the Contractor and shall equitably adjust the estimated cost, fixed fee, or delivery or performance dates, or all of them, and any other contractual provisions affected by any such delay, in accordance with the procedures provided for in the clause of this contract entitled "Changes." In the event that Government-furnished property is received by the Contractor in a condition not suitable for the intended use, the Contractor shall, upon receipt thereof notify the Contracting Officer of such fact and, as directed by the Contracting Officer, either (1) return such property at the Government's expense or otherwise dispose of the property or (2) effect repairs or modifications. Upon completion of paragraphs (a) (1) or (2) of this clause, the Contracting Officer upon written request of the Contractor shall equitably adjust the contract price, or delivery or performance dates, or all of them, and any other contractual provision effected by the return or disposition, or the repair or modification in accordance with the procedures provided for in the clause of this contract entitled "Changes." The foregoing provisions for adjustment are exclusive and the Government shall not be liable to suit for breach of contract by reason of any delay in delivery of Government-furnished property or delivery of such property in a condition not suitable for its intended use.

(b) *Changes in government-furnished property.*—(1) By notice in writing, the Contracting Officer may (i) decrease the property furnished or to be furnished by the Government under this contract, and/or (ii) substitute other Government-owned property for property to be furnished by the Government, or to be acquired by the Contractor for the Government, under this contract. The Contractor shall promptly take such action as the Contracting Officer may direct with respect to the removal and shipping of property covered by such notice.

(2) In the event of any decrease in or substitution of property pursuant to paragraph (b) (1) of this clause, or any withdrawal of authority to use property provided under any other contract or lease, which property the Government had agreed in the Schedule to make available for the performance of this contract, the Contracting Officer, upon the written request of the Contractor (or, if the substitution of property causes a decrease in the cost of performance, on his own initiative), shall equitably adjust such contractual provisions as may be affected by the decrease, substitution or withdrawal, in accordance with the procedures provided for in the "Changes" clause of this contract.

(c) *Title.*—Title to all property furnished by the Government shall remain in the Government. Title to all property purchased by the Contractor, for the cost of which the Contractor is entitled to be reimbursed as a direct item of cost under this contract, shall pass to and vest in the Government upon delivery of such property by the vendor. Title to other property, the cost of which is reimbursable to the Contractor under the contract, shall pass to and vest in the Government upon (1) issuance for use of such property in the performance on this contract, or (2) commencement of processing or use of such property in the performance of this contract, or (3) reimbursement of the cost thereof by the Government in whole or in part, whichever first occurs. All Government-furnished property, together with all property acquired by the Contractor, title to which vests in the Government under this paragraph, is subject to the provisions of this clause and is hereinafter collectively referred to as "Government property." Title to the Government property shall not be affected by the incorporation or attachment thereof to any property not owned by the Government, nor shall such Government property, or any part thereof, be or become a fixture or lose its identity as personalty by reason of affixation to any realty.

(The following paragraph shall be substituted for (c) above when the contract is with an educational institution.)

(c) *Title.*—Title to all property furnished by the Government shall remain in the Government. Title to all property purchased by the Contractor with the prior approval of the Contracting Officer shall be vested in the Contractor without further obligation to the Government except as provided below, unless it is determined by the Contracting Officer that such vesting is not in furtherance of the objectives of the Government or unless there is not proper authority to vest title in the Contractor. Such title shall be vested in the Contractor upon acquisition of the property or as soon as feasible thereafter provided that:

(1) The Contractor shall not under any Government contract, or subcontract thereunder, charge for any depreciation, amortization, or use of such property.

(2) At any time prior to twelve (12) months after completion or termination of the contract, the Contracting Officer reserves the right to require the Contractor to transfer title to propery costing $1,000 or more per unit to the Government or to a third party named by the Contracting Officer.

(3) The Contractor shall, at the end of the calendar year, and within 30 days after completion of the contract, furnish the Contracting Officer a list of all property where title is vested in the Contractor. If no such property has vested, the report shall so state.

All Government furnished property, together with all property title to which vests in the Government under this clause, is subject to the provisions of this clause and is hereinafter collectively referred to as "Government Property." Title to the Government property shall not be affected by the incorporation or attachment thereof to any property not owned by the Government, nor shall such Government property, or any part thereof, be or become a fixture or lose its identity as personalty by reason of affixation to any realty.

(d) *Property administration.*—The Contractor agrees to maintain and administer a property control system in accordance with EPA publication "Guide for Control of Government Property by Contractors," in effect as of the date of this contract, supplied by the Government. While the Contractor is responsible for the Government Property (Government furnished and Contractor acquired), the Government will maintain the official accountability records. For Government furnished property and Contractor acquired property to which the Government takes title.

(e) *Use of government property.*—The Government property shall, unless otherwise provided herein or approved by the Contracting Officer, be used only for the performance of this contract.

(f) *Maintenance and repair of government property.*—The Contractor shall maintain and administer, in accordance with sound business practice, a program for the maintenance, repair, protection, and preservation of Government property so as to assure its full availability and usefulness for the performance of this contract. The Contractor shall take all reasonable steps to comply with all appropriate directions or instructions which the Contracting Officer may prescribe as reasonably necessary for the protection and disposition of Government property.

(g) *Risk of loss.*—(1) The Contractor shall not be liable for any loss of or damage to the Government property, or for expenses incidental to such loss or damage, except that the Contractor shall be responsible for any such loss or damage (including expenses incidental thereto):

(i) Which results from willful misconduct or lack of good faith on the part of any one of the Contractor's directors or officers, or on the part of any of his managers, superintendents, or other equivalent representatives, who has supervision or direction of—

(A) All or substantially all of the Contractor's business; or

(B) All or substantially all of the Contractor's operations at any one plant or separate location, in which this contract is being performed; or

(C) A separate and complete major industrial operation in connection with the performance of this contract;

(ii) Which results from a failure on the part of the Contractor, due to the willful misconduct or lack of good faith on the part of any of his directors, officers, or other representatives mentioned in paragraph (g) (1) (i) of this clause—

(A) To maintain and administer, in accordance with sound industrial practice, the program for utilization, maintenance, repair protection, and preservation of Government property as required by paragraph (f) of this clause, or to take all reasonable steps to comply with any appropriate written direction of the Contracting Officer under paragraph (f) of this clause; or

(B) To establish, maintain, and administer, in accordance with paragraph (d) of this clause, a system for control of Government property;

(iii) For which the Contractor is otherwise responsible under the express terms of the clause or clauses designated in the Schedule;

(iv) Which results from a risk expressly required to be insured under this contract, but only to the extent of the insurance so required to be procured and maintained, or to the extent of insurance actually procured and maintained, whichever is greater; or

(v) Which results from a risk which is in fact covered by insurance or for which the Contractor is otherwise reimbursed, but only to the extent of such insurance or reimbursement.

(2) If more than one of the above exceptions shall be applicable in any case, the Contractor's liability under any one exception shall not be limited by any other exception. The Contractor shall obtain the approval of the Contracting Officer prior to transferring any Government property to a subcontractor. If the Contractor transfers Government property to the possession and control of a subcontractor, the transfer shall not affect the liability of the Contractor for loss or destruction of or damage to the property as set forth above. However, the Contractor shall require the subcontractor to assume the risk of, and be responsible for, any loss or destruction of or damage to the property while in the latter's possession or control, except to the extent that the subcontract, with the prior approval of the Contracting Officer, provides for the relief of the subcontractor from such liability. In the absence of such approval, the subcontract shall contain appropriate provisions requiring the return of all Government property in as good condition as when received, except for reasonable wear and tear or for the utilization of the property in accordance with the provisions of the prime contract.

(3) The Contractor shall not be reimbursed for, and shall not include as an item of overhead, the cost of insurance, or any provision for a reserve, covering the risk of loss of or damage to the Government property, except to the extent that the Government may have required the Contractor to carry such insurance under any other provisions of this contract.

(4) Upon the happening of loss or destruction of or damage to the Government property, the Contractor shall notify the Contracting Officer thereof, take all reasonable steps to protect the Government property from further damage, separate the damaged and undamaged Government property, put all the Government property in the best possible order and furnish to the Contracting Officer a statement of—

(i) The lost, destroyed, and damaged Government property;

(ii) The time and origin of the loss, destruction, or damage;

(iii) All known interests in commingled property of which the Government property is a part; and

(iv) The insurance, if any, covering any part of or interest in such commingled property.

The Contractor shall make repairs and renovations of the damaged Government property or take such other action, as the Contracting Officer directs.

(5) In the event the Contractor is indemnified, reimbursed, or otherwise compensated for any loss or destruction of or damage to the Government property, he shall use the proceeds to repair, renovate, or replace the Government property involved, or shall credit such proceeds against the cost of the work covered by the contract, or shall otherwise reimburse the Government, as directed by the Contracting Officer. The Contractor shall do nothing to prejudice the Government's right to recover against third parties for any such loss, destruction, or damage and, upon the request of the Contracting Officer, shall, at the Government's expense, furnish to the Government all reasonable assistance and cooperation (including the prosecution of suit and the execution of instruments of assignment in favor of the Government) in obtaining

V 38-163 AUG 23 73 XUM

recovery. In addition, where the subcontractor has not been relieved from liability for any loss or destruction of or damage to Government property, the Contractor shall enforce the liability of the subcontractor for such loss or destruction of or damage to the Government property for the benefit of the Government.

(h) *Access.*—The Contractor agrees to make available to the Contracting Officer, at all reasonable times, at the office of the Contractor, all its property records under this contract, and the Government shall at all reasonable times have access to the premises where any of the Government property is located.

(i) *Final accounting and disposition of Government Property.*—Upon the completion of this contract, or at such earlier dates as may be fixed by the Contracting Officer, the Contractor shall submit to the Contracting Officer in a form acceptable to him, inventory schedules covering all items of the Government property not consumed in the performance of this contract, or not theretofore delivered to the Government, and shall deliver or make such other disposal of such Government property as may be directed or authorized by the Contracting Officer. The net proceeds of any such disposal shall be credited to the cost of the work covered by the contract or shall be paid in such manner as the Contracting Officer may direct. The foregoing provisions shall apply to scrap from Government property; provided, however, that the Contracting Officer may authorize or direct the Contractor to omit from such inventory schedules any scrap consisting of faulty castings or forgings, or cutting and processing waste, such as chips, cuttings, borings, turnings, short ends, circles, trimmings, clippings, and remnants, and to dispose of such scrap in accordance with the Contractor's normal practice and account therefor as a part of general overhead or other reimbursable cost in accordance with the Contractor's established accounting procedures.

(j) *Restoration of contractor's premises and abandonment.*—Unless otherwise provided herein, the Government:

(1) May abandon any Government property in place, and thereupon all obligations of the Government regarding such abandoned property shall cease; and

(2) Has no obligation to the Contractor with regard to restoration or rehabilitation of the Contractor's premises, neither in case of abandonment (paragraph) (j)(1) of this clause), disposition on completion of need or of the contract (paragraph (1) of this clause), nor otherwise, except for restoration of rehabilitation costs caused by removal of Government property pursuant to paragraph (b) of this clause.

(k) *Communications.*—All communications issued pursuant to this clause shall be in writing. .

As provided in paragraph (1) of the above clause, the Contracting Officer may authorize or approve use of the Contractor's established scrap disposal and accounting procedures whenever the amount and recoverable value of scrap from Government property are relatively minor and the Contractor's established procedures for accumulating and disposing of scrap and crediting the proceeds thereof to general overhead or other general cost will permit the Government to to share equitably in such scrap recovery through a reduction of overhead or other cost factor affecting reimbursement under the contract.

§ 15-60.703 Government Property Clause for "No-Fee" Cost-Reimbursement Contracts with Educational or Nonprofit Institutions and State and Local Governments.

Cost-reimbursement contracts which provide only for reimbursement of cost to educational or nonprofit institutions and State and local Governments shall incorporate the "Government Property" clause prescribed in § 15-60.702, modified to delete all reference to fee.

FARM CREDIT ADMINISTRATION

[12 CFR Parts 611, 612, 613, 614, 615 and 618]

FARM CREDIT SYSTEM

Notice of Proposed Rule Making

Notice is hereby given that the Farm Credit Administration, by its Federal Farm Credit Board, has under consideration proposed amendments of its regulations as set forth below in tentative form. These amendments would (1) clarify the provision for compensation of district board members, (2) clarify that special assignments of district board members may be requested by the Farm Credit Administration, (3) provide for the exclusion of certain special assignments of district board members from the 30-day limitation thereon, (4) provide for the establishment by the district board of policies regarding the compensation of association directors and members, (5) provide for the reemployment of annuitants under certain circumstances, (6) specify the circumstances under which certain bank or association facilities and resources may be used in the interest of candidates for certain offices, (7) substitute the designation "finance committee or subcommittee" for the former "bond or debenture committee," (8) authorize the supervisory bank in place of the bank board to act in possible conflict of interest cases where the employee interest is trivial, (9) broaden the authority for first lien determinations, (10) substitute the designation "consolidated obligations" for "bond and debenture" as a change in terminology, (11) provide for approval by the supervising bank in place of the bank board of the purchase, construction, or sale of association buildings, with a report to the board and within board guidelines, (12) require annual review by the supervising bank of association investment portfolios instead of the annual listing by the association, (13) authorize associations also to deposit current funds with savings institutions insured by the Federal Deposit Insurance Corporation, (14) authorize a bank for cooperatives to retire equities in accordance with bank board policy in places of board action, (15) revise the land bank provision for losses, (16) provide for approval by the land bank of Federal land bank association declaration of dividends, (17) include the premium rate for the shipment of valuables by registered airmail, (18) provide for mailing of negotiable securities by registered insured mail, (19) provide for the development and adoption by an association board of travel regulations subject to approval by the supervising bank, (20) clarify the circumstances under which access to association borrower records by certain agency representatives will be authorized, (21) authorize the supervising bank to approve association records disposal schedules, (22) delegate to the district bank authority to make prior determinations of eligibility of subsidiaries of certain legal entities subject to post review by the Farm Credit Administration, (23) omit the provision dealing with the financing of other requirements of eligible borrowers and incorporate guidelines therefor in a revised section dealing with lending objectives, (24) require bank board to adopt policies subject to the approval of the Farm Credit Administration to achieve System lending objectives, (25) provide for making special intermediate term loans to producers and harvesters of aquatic products, (26) remove the present expiration date of the provision for production credit association lending limits, (27) restate loan approval requirements. Prior to final adoption of such amendments, consideration will be given to any comments or suggestions pertaining thereto which are submitted in writing (10 copies) no later than September 21, 1973, to E. A. Jaenke, Governor, Farm Credit Administration, Washington, D.C. 20578. Copies of all communications received will be available for examination by interested persons in the Office of the Director of Information, Farm Credit Administration.

Chapter VI of Title 12 of the Code of Federal Regulations is amended by revising §§ 611.1020, 611.1030, 611.1031, 611.1080, 612.2050, paragraph (b) of § 612.2130, paragraph (i) of § 612.2160, § 612.2170, revising paragraph (d) and deleting paragraph (g) of § 613.3020, revising §§ 614.4160, paragraph (c) of § 614.4200, 614.4353, 614.4450, deleting § 614.4490, adding §§ 614.4460, 614.4470, deleting § 614.4501, revising paragraph (a) of § 615.5060, paragraph (o) and the unlettered last paragraph of § 615.5140, §§ 615.5150 (a) and (b), 615.5180, 615.5190, 615.5260, 615.5340, 615.5410, 615.5500, 615.5530, 618.8270, paragraph (b)(2) of 618.8320, and 618.8370. These amendments are as follows:

PART 611—ORGANIZATION

§ 611.1020 Compensation of district board members.

Directors may be compensated for attendance at board meetings and special assignments, including reasonable travel time from and to their residences. Such compensation shall not exceed $75 per day plus reasonable travel, subsistence,

and other related expenses incurred in connection with such meetings and assignments.

§ 611.1030 Special assignments of district board members.

Special assignments requiring the services of a director shall be authorized under a policy established by either the district board or the board of one of the banks, whichever is appropriate. Special assignments also may be requested by the Farm Credit Administration.

§ 611.1031 Limitation on special assignments.

Special assignments requiring service in one calendar year totaling more than 30 days (not counting time needed for attendance at board meetings) must have the prior approval of the Farm Credit Administration. Prior approval is hereby given for the following and they may be excluded from the 30 day limitation: Attendance at the National Farm Credit Directors Conferences; meetings of the Fiscal Agency Committee; meetings of the District Directors Policy Coordinating Committee; and attendance at a particular time or place requested by the Farm Credit Administration.

§ 611.1080 Association establishment, election of directors, and compensation of members.

As used throughout these regulations, the term "association" is restricted to Federal land bank associations and production credit associations. Section 1.13 of the Act provides for the establishment of Federal land bank associations and section 1.14 provides for the election of their boards of directors. Section 2.10 of the Act provides for the establishment of the production credit associations and section 2.11 provides for the election of their boards of directors. The district board shall establish policies regarding the compensation of association directors and members performing special services for the association which include the amount and number of honoraria which may be paid to one individual for service on one day and the manner in which reasonable travel, subsistence and other related expenses will be paid. Additional provisions are contained in the bylaws for both.

PART 612—PERSONNEL ADMINISTRATION

§ 612.2050 Reemployment of annuitants.

As a general policy, plans should be made in advance by banks and associations to recruit and train qualified replacements for prospective vacancies because of approaching retirements or other reasons which can be anticipated. When definite recruiting efforts have failed to produce other qualified applicants for the positions, an annuitant may be reemployed as follows:

(a) An annuitant may be reemployed on a temporary basis to any position, including a position in which he will assume the full range of duties and responsibilities that he had prior to retirement. A temporary appointment is defined as an appointment not to exceed one year.

(b) An annuitant may be reemployed on a permanent basis, provided he does not assume the full range of duties and responsibilities that he had prior to retirement.

(c) A former senior officer may not be reemployed in a position having senior officer responsibilities.

(d) If the annuitant has retired under the Civil Service Retirement Act, he may be appointed as provided in (a) and (b) above, only after a break in service of more than three consecutive calendar days.

(e) Other cases require prior approval of the Farm Credit Administration.

§ 612.2130 Soliciting support in polls for district or Federal Farm Credit Board membership.

* * * * *

(b) No bank or association property, transportation, communications and official stationery shall be used in the interest of any candidate, unless the same facilities and resources are simultaneously made known to and are available for use by all candidates.

* * * * *

§ 612.2160 Prohibited acts for salaried employees.

* * * * *

(i) Shall, while he serves on a finance committee or subcommittee thereof, purchase or acquire, directly or indirectly, ownership of or any interest in any such obligations of the bank of which he is such an officer; or

* * * * *

§ 612.2170 Cases involving trivial interest or relationship.

If the degree of interest, relationship or benefit in any case, as determined by the supervisory bank, is so trival as to create little probability that officer's or employee's impartiality of judgment and action has been affected, no question under section 2160 shall be deemed involved. Each case shall be determined on its own facts, proper weight being given to the nature, amount and importance of the benefit involved. The degree or kind of relationship in question, and the character of the person concerned. Each determination made by the bank shall be reported to the bank board at its next meeting for consideration.

PART 613—ELIGIBILITY AND SCOPE OF FINANCING

§ 613.3020 Farmers and ranchers.

* * * * *

(d) In addition, any loan to a legal entity in which at least 50 percent of ownership or the control is vested in another legal entity that does not meet at least one of the preceding three requirements shall be subject to prior approval of the appropriate bank and submitted to the Farm Credit Administration for post review. Unless it can be found that such owned or controlled legal entity can operate its business as a counterpart to the normal farm businesses eligible to borrow without jeopardy to such normal farm businesses or the general agricultural economy, approval will not be granted. Submissions shall fully document the ownership structure, the business affiliations of those owning or controlling the applicant, and the compatibility of the applicant's farming business to the normal farm business operating in the area or to the general agricultural economy.

* * * * *

(g) [Deleted]

PART 614—LOAN POLICIES AND OPERATIONS

§ 614.4160 Lending objective.

It is the objective of the Farm Credit System to ensure the availability of:

(1) Full credit, to the extent of credit worthiness, to the full-time bona fide farmer (farming is his primary business and vocation) and

(2) Conservative credit to less than full-time farmers for agricultural enterprises, and more restricted credit for other credit requirements as needed to ensure a sound credit package or to accommodate a borrower's needs as long as the total credit results in being primarily an agricultural loan.

Loans to farmers shall be on an increasingly conservative basis as the emphasis moves away from the full-time bona fide farmer, to the point where agricultural needs only will be financed for the applicant whose business is essentially other than farming. Credit shall not be extended where investment in agricultural assets for speculative appreciation is a primary factor.

It is also the objective of the Farm Credit System to provide a full range of credit services to farmer cooperatives to assist them in increasing the income of their members as patrons. The type of farmer cooperative operation, quality of management, and basic financial factors shall be carefully evaluated as to their effect upon the long-range benefit to members. Bank boards shall establish policies and banks for cooperatives, develop procedures for administration of quality standards that fully consider the needs of, support by, and service performed for members, and risk protection afforded the lender.

Each bank board shall adopt policies adequate to provide the direction it desires management to follow in administering credit and lending standards to ensure attainment of the System's objective. Bank management shall prescribe operating procedures to effectively administer board policies including provision that proper weight be given the infinite combination of person, property, and purpose which can exist. Guidelines shall be included which provide for identification of that portion of mixed value (agricultural and nonagricultural) assets

V 38-163 AUG 23 73 XUM

which may be considered agricultural for lending purposes.

§ 617.4200 Production credit associations.

• • • • •

(c) Special intermediate-term loans, exclusive of loans to nonfarm rural residents, and farm-related businesses, may be made with maximum maturity not to exceed 7 years realizing, however, when establishing repayment that forbearance or extension may be necessary under the following circumstances.

(1) When specific capital items are being financed, such as new equipment, new or remodeled buildings, or facilities with a useful life and value, after normal depreciation and obsolescence, which exceeds the term of the loan at all times.

(2) When real estate mortgage credit is unavailable, not acceptable to the applicant, or impractical for reasons such as cost or delay in availability.

(3) When earnings' history, repayment record and net earnings projections satisfactorily support the loan and provide assurance for final repayment within three additional years if forbearance or extension is granted.

(4) Before any special intermediate-term loans shall be made, the district board shall adopt a policy, and the Federal intermediate credit bank and the Federal land bank of the district shall develop procedures regulating the making of such loans, all of which shall be subject to approval of the Farm Credit Administration. Such policies and procedures shall include but are not limited to the following:

(i) Provisions for cooperation between production credit association and Federal land bank associations in the consideration of any loans bordering on the long-term mortgage category.

(ii) Procedures to be followed in credit reviews and credit examinations whereby loans of this type, made during the period covered by the examination, will be reviewed and commented upon as to compliance with policy and procedures.

(iii) Provisions for adequate reporting on loans of this type to enable timely supervision by the bank.

§ 614.4353 Production credit associations.

Production credit associations shall have a lending limit (including participations) of 50 percent of the capital and surplus of the lending association. A lending limit of 100 percent of the capital and surplus of the lending association shall apply whenever an approved loss-sharing agreement is in force.

§ 614.4450 General requirements.

Authority for loan approval is primarily vested in the Farm Credit banks and associations. However, to provide proper supervision of the System's lending functions, the Act vests in the Farm Credit Administration the authority to prescribe the loans which can be made only with the prior approval of the Farm Credit Administration or the respective banks. Prior loan approval limits shall be established on an individual bank basis according to the adequacy and administration of policies and procedures relating to credit extension. Consideration shall also be given to performance in making proper credit analysis and decisions and compliance with Farm Credit law and regulations. For the Federal land banks and Federal intermediate credit banks particular consideration shall be given to policies and procedures and bank performance relating to delegation of loan-making authority to associations, credit reviews and association supervision.

§ 614.4460 Approval of the following loans is the responsibility of each district board of directors.

The responsibility may be discharged by prior approval of such loans by the appropriate bank board, or establishment of a policy under which such loans are to be submitted to the Farm Credit Administration for prior approval. If a board chooses to discharge its responsibility by approving these loans as a matter of normal practice, it may authorize the submission of such loans to the Farm Credit Administration for prior approval to meet emergency situations and avoid harmful delays in credit service.

(a) Loans to a member of the Federal Farm Credit Board.

(b) Loans to a member of the district board.

(c) Loans to a cooperative of which a member of the district bank or Central Bank board of directors or a member of the Federal Farm Credit Board is a member of the board of directors, an officer, or employee.

(d) Loans to the President of a Farm Credit bank.

(e) Loans to employees of the Farm Credit Administration.

(f) Loans where directors, officers, or employees designated above (i) are to receive proceeds of the loan in excess of an amount prescribed by an appropriate bank board and approved by the Farm Credit Administration or (ii) are stockholders or owners of equity in a legal entity to which the loan is to be made wherein they have significant personal or beneficial interest in the loan proceeds thereof or the security.

§ 614.4470 The following loans shall be subject to prior approval of the district bank.

(a) Loans to a member of an association board.

(b) Loans to an officer or employee of a Farm Credit bank or an employee of an association.

(c) Loans to any borrower where the directors or employees designated above (i) are to receive proceeds of the loan in excess of amount prescribed by the appropriate bank board and approved by the Farm Credit Administration or (ii) are stockholders or owners of equity in a legal entity to which a loan is to be made wherein they have significant personal or beneficial interest in the loan, the proceeds thereof or the security.

(d) Any loan which will result in any one borrower being obligated, as defined in section 4360, in excess of an amount established by the district bank under its policies for delegation of authority to associations.

§ 614.4501 [Deleted].

PART 615—FUNDING AND FISCAL AFFAIRS

§ 615.5060 Federal land bank loans eligible as collateral.

(a) Net asset value of notes and other obligations representing loans, purchase money mortgages, or sales contracts made or acquired under these regulations is eligible as collateral for long-term notes, bonds, debentures, or similar obligations. When the bank attorney, or another attorney designated to act for the bank, determines that the bank procedures for appraisal, loan approval, title examination, and loan closing provide sufficient safeguards to assure (1) in the case of the bank attorney, that a loan made by the bank will be secured by a first lien or equivalent from a security standpoint on the real estate which is the primary security for the loan; or (2) in the case of the designated attorney, that a loan made thereunder will be secured by a first lien except for liens of irrigation, water and grazing districts, public utility easements, or other liens specified by the bank; the bank attorney or the designated attorney, as the case may be, or a title examiner acting under the supervision of either the bank or designated attorney and deemed qualified by the bank attorney, may so certify. Security for which such certification is made may be accepted as collateral. However, with regard to security for which a certification has been made by a title examiner, either the bank attorney shall, within one year from the date of certification, certify that the interest of the bank therein is a first lien or equivalent, or it shall be withdrawn as collateral.

• • • • •

§ 615.5140 Investment eligibility.

• • • • •

(o) Other types of obligations authorized by the Farm Credit Administration.

Any eligible investment with a maturity of 12 months or less from the date of pledge shall be valued at face value for collateral purposes supporting consolidated obligations issues. Any eligible investment with a maturity of over 12 months from the date of pledge shall be value at market value for collateral purposes supporting consolidated obligations issues.

§ 615.5150 Real and personal property.

(a) Real estate and personal property may be acquired, held or disposed of by any Farm Credit institution for the necessary and normal operations of its business. The purchase or construction of office quarters shall be limited to facilities reasonably necessary to meet the foreseeable requirements of the institution. Property shall not be acquired if it involves, or appears to involve, to a substantial degree, a bank or association in the real estate or other unrelated business.

(b) The purchase, construction, or sale of Farm Credit bank buildings and appurtenances shall have approval of the Farm Credit Administration. Likewise, purchase, construction, or sale of Federal land bank association or production credit association buildings and appurtenances shall have the approval of the appropriate supervising bank which shall keep the bank board currently advised of such actions. In the case of joint association office buildings, these actions shall be approved jointly by the supervising banks. It shall be the responsibility of the district board to approve guidelines for all associations in the district to follow regarding the purchase, construction, or sale of office space. Within the framework of said guidelines, the Federal land banks and Federal intermediate credit banks may prescribe criteria which can include giving limited prior approval to an association board of directors for office facilities actions.

• • • • •

§ 615.5180 Association investment portfolios.

The Federal land banks and the Federal intermediate credit banks shall review annually as of June 30 or December 31 the investment portfolio and investment objectives of each association. Associations shall own such securities selected from approved investments in section 5140 as the supervising bank shall require. The banks shall assist the associations in the management of their investment portfolios.

§ 615.5190 General.

All institutions of the Farm Credit System may deposit securities and current funds with and receive interest from any member bank of the Federal Reserve System, or any savings institution insured by the Federal Savings and Loan Insurance Corporation. Associations may deposit funds with their supervising bank, any commercial bank insured by the Federal Deposit Insurance Corporation, or any savings institution insured by the Federal Savings and Loan Insurance Corporation.

§ 615.5260 Retirement of capital stock and allocated equities of banks for cooperatives.

(a) In case of liquidation or dissolution of a present or former borrower, the bank may, but shall not be required to, retire and cancel at book value, not exceeding par, all or a part of the capital stock or any allocated equity in the bank owned by or allocated to such borrower. Before any such retirement shall be made, the banks shall have reasonable assurance that the liquidation or dissolution is or soon will be completed and the business of the borrower is not being continued under circumstances in which it would be appropriate and feasible for any successor to acquire and hold the investment interests of the present or former borrowers in the bank. Retirements under this provision shall be authorized in accordance with bank board policy.

§ 615.5340 Land bank system provision for losses.

(a) Each bank shall establish and maintain a provision for losses account on loans, participations purchased, real estate sales contracts, advances, accrued interest on loans, acquired property, and loans in the process of liquidation or foreclosure, and judgments.

(b) Each association shall establish and maintain a provision for losses to the extent that it shows assets of the above type on its books of account or has a contingent liability to restore losses on such assets by reason of its endorsement, loss sharing agreement(s), or pledge. The amount of the association's indemnity account credits may be used to meet an equal amount of its provisions for losses requirement.

(c) The provision for losses shall be in such reasonable amounts as, in the judgment of the bank and association, are considered adequate to meet such losses, subject to the following minimum fiscal year end requirements:

(1) The total of each association's provision for losses and indemnity account shall equal at least one percent of the amount of its contingent liability on the unmatured balance of loans outstanding.

(2) Each bank's provision for losses shall include:

(i) The amount of any association indemnity account credits used by associations to meet their provision for losses requirements, plus

(ii) One percent of that portion, not guaranteed by the endorsement liability, of the unmatured balance of its loans outstanding, plus

(iii) The aggregate amount that each association's provision for losses and indemnity account credits are less than the minimum amounts required by this section.

An association's provision for losses program and changes therein shall be approved by the association board of directors and the bank. The bank's provision for losses program and changes therein shall be approved by the bank board of directors and the Farm Credit Administration.

§ 615.5410 Federal land bank system.

(a) Noncumulative dividends may be paid out of earnings or from earned surplus on stock and participation certificates at varying rates on different classes and issues on a basis of the compartive contribution of the holders to the capital or earnings, but otherwise dividends shall be paid without preference.

(b) Dividends as in (a) above may be paid in accordance with the provisions of the bylaws after the establishment and maintenance of the provisions for losses required in section 5340 of these regulations, the reserve described in section 1.17(a) and 1.18(a) and (b) of the Act and after the payment of its franchise tax to the U.S. Government, if any.

(c) Declarations of Federal land bank dividends are subject to the approval of the Farm Credit Administration.

(d) Declarations of Federal land bank association dividends are subject to the approval of the bank.

§ 615.5500 Shipment of valuables.

Shipments of valuables by the Federal land banks, Federal land bank associations, Federal intermediate credit banks, banks for cooperatives, and production credit associations, when made to or by other for the account of the assured, shall be covered by an insurance policy issued in the name of five companies, through John L. Swan & Co., Inc., broker, copies of which have been furnished the land banks, credit banks, and banks for cooperatives. Premium rates per $1,000 on general shipments of securities and other valuables shall be $0.04 by registered mail or registered airmail, and on shipments of canceled coupons and canceled securities shall be $0.01 by registered mail or express ($0.02 by registered airmail).

§ 615.5530 Mail shipments.

Negotiable securities shall be declared at their market value on the date of mailing and shipped by registered insured mail. Nonnegotiable or canceled securities, warehouse receipts, and valuable papers such as checks, drafts, deeds, abstracts and similar documents may be declared at no value and sent by registered mail. If it is determined that no indemnity from the post office will be required should such papers be lost or destroyed, the shipper may send them by certified mail or first class mail in his discretion.

PART 618—GENERAL PROVISIONS

§ 618.8270 Travel.

Travel and subsistence expenses of officials and employees of the banks shall be allowed in accordance with travel regulations adopted by the district board. Similar travel regulations shall be prescribed for associations by the supervising bank under policy established by the district board or shall be developed and adopted by the board of directors of the associations and approved by the bank. The regulations shall contain a statement of policy on the use of official cars for private use and will take into consideration regulations issued by the Internal Revenue Service which are applicable to the employer.

§ 618.8320 Data regarding borrowers and loan applicants.

• • • • •

(b) • • •

(2) Accredited representatives of the offices named in section 7080 may, upon presentation of official identification and a written request identifying the individual case on which information is sought, the particular information desired and a certification that such information is pertinent to the official in-

VETERANS ADMINISTRATION

[38 CFR, Part 3]

PENSION, COMPENSATION, AND DEPENDENCY AND INDEMNITY COMPENSATION INCOME AND NET WORTH

Failure To Return Questionnaire

The Administrator of Veterans' Affairs proposes regulatory changes relating to discontinuance of awards of pension or dependency and indemnity compensation because of the claimant's failure to complete and return the annual income questionnaire. Currently provision is made for retroactive termination of the award as of the first day of the year for which income was to be reported. These terminations create overpayments for the amounts paid during that year. Under the proposed change the termination will be effective as of the end of the year for which income was to be reported. This change reflects the fact that under 38 U.S.C. 3012(b) if there had been a change in income or dependency status which would have required termination of the award, the termination would not have been effective until the end of the year in which the change occurred. A change is also proposed to provide that, where a termination has been effected for failure to return an income questionnaire, payments may be resumed from the date of last payment if the required evidence is submitted within 1 year from the date of termination. To effect these changes it is proposed to amend Part 3, Title 38, Code of Federal Regulations, as set forth below.

Interested persons are invited to submit written comments, suggestions, or objections regarding the proposal to the Administrator of Veterans' Affairs (232H), Veterans Administration, Central Office, 810 Vermont Avenue NW., Washington, D.C. 20420. All relevant material received before September 24, 1973, will be considered. All written comments received will be available for public inspection at the above address only between the hours of 8 a.m., and 4:30 p.m., Monday through Friday (except holidays), during the mentioned 30-day period and for 10 days thereafter. Any person visiting Central Office for the purpose of inspecting any such comments will be received by the Central Office Veterans Assistance Unit in room 132. Such visitors to any VA field station will be informed that the records are available for inspection only in Central Office and will be furnished the address of the above room number.

Notice is given that it is proposed to make these changes effective the date of final approval.

In § 3.661, paragraph (b) is amended to read as follows:

§ 3.661 Income and net worth questionnaires.

* * * * *

(b) *Failure to return questionnaire*—(1) *Discontinuance.*—Discontinuance of pension or dependency and indemnity compensation will be effective the last day of the year for which the actual income received or net worth was to be reported.

(2) *Resumption of benefits.*—Payment may be made, if otherwise in order, from the date of last payment if evidence of entitlement is received within 1 year from the date of termination of payments; otherwise benefits may not be paid for any period prior to date of receipt of the new claim.

Approved: August 17, 1973.

By direction of the Administrator.

[SEAL] FRED B. RHODES,
Deputy Administrator.

[FR Doc.73-17880 Filed 8-22-73;8:45 am]

INTERSTATE COMMERCE COMMISSION

[49 CFR Part 1241]

[No. 35345 (Sub-No. 1)]

RAILROAD QUARTERLY REPORT OF FREIGHT LOSS AND DAMAGE CLAIMS

AUGUST 17, 1973.

At a general session of the Interstate Commerce Commission held at its office in Washington, D.C., on the 1st day of August 1973.

In our report and order in Quarterly Report of Freight Loss and Damage Claims, 339 I.C.C. 678, 679-680, we stated:

Settlement of loss and damage claims between shippers and carriers is a problem as old as the first established for-hire transportation service. In recent years, this vexing problem has been further aggravated by ever increasing losses associated with theft, pilferage, and robbery. The theft problem has drawn the attention of Congress, and specifically the Select Committee on Small Business, United States Senate. The chairman of that committee called the Commission's attention to the demonstrable lack of hard statistical facts relative to the extent and scope of losses sustained by industry as a result of theft of goods moving in the Nation's various commercial channels.

The Commission has long recognized that claims from all causes, including theft, has resulted in increased concern by the users of public transportation service. The Commission has instituted various proceedings establishing rules and regulations for claims matters; however, there is no uniform reporting system which adequately shows the results obtained. This resulted in the institution of this proceeding.

With these factors in mind, this proceeding is being instituted on our own motion to consider the adoption of a requirement for the filing of quarterly reports of freight loss and damage claims by all class-I rail common carriers, excepting switching and terminal lines, effective with the first quarterly period ending March 31, 1974. Classification of rail carriers will be determined according to the provisions of the Commission's rules and regulations set forth at 49 CFR 1240.1.

The report under consideration would be in all essential respects similar to those prescribed for motor carriers in Quarterly Report of Freight Loss and Damage Claims, supra. They would call for a quarterly summary of (1) all freight claims received, paid, denied, or closed, and other information analyzing freight claims processed, and (2) an analysis of each theft-related claim paid in the amount of $100 or more after investigation and settlement between carriers, including claim identification, amounts involved, cause of loss, and loss location data. The quarterly reports would be filed in duplicate in the office of the Commission's Bureau of Accounts within 30 days after the close of the quarter and be prepared in accordance with the instructions and format of the attached proposed form (Form QL&D-R).

It is intended that the report will provide the Congress, the Commission, other government agencies, shippers, and the general public with information regarding the processing of freight loss and damage claims filed with the railroads, the emphasis being on commodities lost or presumed lost because of theft and theft-related activities. Benefits to the transportation and the shipping public should more than compensate for any burden imposed by the systematic reporting of data. To minimize any burden, the Commission will consider making arrangements for carriers to report the data on magnetic tape or card decks suitable for computer processing, as an alternate reporting procedure.

This proceeding is not expected to have any impact upon the quality of the environment. However, should any person desire to comment on the impact of this proceeding, we will consider environmental matters in accordance with Implementation, Natl. Environmental Policy Act, 1969, 340 I.C.C. 431.

Upon consideration of these matters, and for good cause:

It is ordered, That a rulemaking proceeding be, and it is hereby, instituted under the authority of sections 12 and 20 of the Interstate Commerce Act, and pursuant to section 553 of the Administrative Procedure Act (5 U.S.C. § 553), with a view of prescribing for application to all class-I rail common carriers, except switching and terminal railroads, Form QL&D-R, Quarterly Report of Freight Loss and Damage Claims-Railroads, which is set forth in the Appendix hereto with pertinent instructions, and for the purpose of taking such other further actions as the facts and circumstances may warrant.

It is further ordered, That all class-I common carriers by railroad, excluding switching and terminal carriers, operating in interstate or foreign commerce within the United States and subject to the Interstate Commerce Act be, and they are hereby, made respondents in this proceeding.

It is further ordered, That any person intending to participate in this proceeding shall so notify this Commission by filing with the Commission's Office of Proceedings, Room 5342, 12th Street and Constitution Avenue NW., Washington, D.C. 20423, on or before August 29, 1973, an original and one copy of a statement of his intention to participate; that a service list shall then be prepared and made available to those persons responding to this order, containing the names and addresses of the parties to this proceeding, upon whom service of all pleadings must be made; and that thereafter the nature of further proceedings will be designated.

And it is further ordered, That notice of this proceeding be given to the general public by depositing a copy of this order in the office of the Commission's Secretary and by delivering a copy to the Director, Office of the Federal Register.

This is not a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969.

By the Commission.

[SEAL] ROBERT L. OSWALD,
Secretary.

APPENDIX

QUARTERLY REPORT OF FREIGHT LOSS AND DAMAGE CLAIMS, RAILROADS—GENERAL INSTRUCTIONS

1. Under order of the Commission, all class I Line-Haul Railroads are required to file quarterly reports of freight loss and damage claims, Form QL&D-R. Railroads should complete and file Schedules A and B of Form QL&D-R. Reports must be filed in duplicate in the office of the Bureau of Accounts, Interstate Commerce Commission, Washington, D.C. 20423, within thirty days after the close of each quarter.

2. The order contemplates the inclusion of all claims incurred in connection with interstate and intrastate shipments. Reports should be prepared on a quarterly basis beginning with the first day of January, April, July and October.

3. Dollar amounts reported should be rounded to the nearest whole number. Omit cents.

4. The certification must be completed by an officer of the respondent.

5. The first of the three enclosed copies of the report contains the mailing label attached to the top of Schedule A, and is to be considered as the "original" copy of the two reports filed. To assure proper identification in the automatic data processing operation, the mailing label should not be altered in any way. Your company's name and address, as they appear on the mailing label, plus the computer processing identification code, which is the top line of the mailing address, must be copied in the same block on the duplicate copy. If the name and address on the mailing label are incorrect, the correct name and address should be inserted on the original and duplicate copies of Schedule A in the space provided to the left. The carrier's mailing address is the address where correspondence relating to accounting and reporting is to be directed, including P.O. Box number, if applicable.

INSTRUCTIONS FOR SCHEDULE A

1. Include in Schedule A all claims filed with respondent carrier by shippers, consignees, or other persons contracting for transportation.

2. Report the number of all claims on hand at the beginning of the quarter, and the number received or reopened during the quarter, on lines 1 and 2, Column A; report the total dollar amounts of the claims as specified by the claimant in Column B. The total number and amounts of claims on hand at the beginning of the quarter should agree with the totals on hand at the end of the quarter of the prior report. Line 3, Column B, is provided for reporting dollar increases applicable to claims filed for uncertain amounts, such as, "$100 more or less", or other increases in dollar amounts made by claimants to previously filed claims.

3. Report the number and dollar amounts of all claims paid to claimants during the quarter on lines 5 and 6. Line 5 should show claims paid in the full amount specified by the claimant; line 6 should show claims paid in an amount less than the amount specified by the claimant.

4. Report the number and dollar amounts of all claims denied in full or closed without payment during the quarter on lines 7 through 9, distributed according to the reasons specified. Excess dollar amounts of claims paid in part, i.e., the difference between amounts claimed as reported on line 4, and the amounts actually paid, should be shown on line 10, Column B.

5. The details called for by lines 13 through 23 should be completed, as applicable. Where the word *none* truly and completely states the fact, it should be given as the answer to any particular inquiry. Cancellations, arbitrary check marks, and the like, must not be used as answers to inquiries unless specifically authorized in writing by the Commission.

INSTRUCTIONS FOR SCHEDULE B

1. Schedule B should show individually each claim settled during the quarter where the amount paid to the claimant was $100, or more, because of shortage, theft and pilferage, or robbery. The reporting of settled claims is the obligation of the carrier making payment to claimants. Claims included in Schedule B are those where investigation of cause and responsibility is complete to the maximum extent feasible.

2. The following definitions should be used when classifying claims according to cause of loss for inclusion in Schedule B:

Shortage.—Failure to deliver all or part of shipment to consignee for unknown reasons, including error by carrier's employee in loading, waybilling, diverting or reconsigning, receipting for or delivery of freight, issuing bill of lading or requiring surrender thereof, and failure to make proper report of freight over, refused, reclaimed, etc.

Theft and Pilferage.—All loss or damage, without use of or threat of force, as a result of known stealing, or under circumstances indicating the probable cause was stealing, when it is known that cargo was in carrier's custody.

Robbery.—All loss or damage from stealing, including hijacking of TOFC or COFC, and grand larceny of piggyback trailers, containers, and trucks.

3. Column B should show the appropriate five-digit Standard Transportation Commodity Code number for the commodity shown on the claim document. Claims due to shortage for commodities shipped in bulk, such as, grain (code 0113), coal (code 11), etc., need not be reported in Schedule B.

4. Report the month and year the goods were shipped per waybill in Column C, using four-digit numerical code, i.e., January, 1973, would read 0173; November, 1974, would read 1174, etc. Report the dollar amount of the claim as filed by claimant in Column D, and the dollar amount paid to claimant in Column E (omit cents). Show the cause of loss in Column F, using codes as follows:

Shortage	Code 1
Theft and Pilferage	Code 2
Robbery	Code 3

5. Columns G and H are to be used to indicate the location where each loss occurred to the best of your belief by showing State or zone code numbers using standard codes shown in Table 1. Where the exact location is determinable, report a single location code number in Column G; otherwise, report the locations of the last good and the first bad freight seal records in Column H. Always report a pair of code numbers in Column H. The commercial zones should be shown whenever the loss occurred or seal record is known to be within the zones listed in Table 1. The zones are defined by the Commission in 49 CFR 1048. Otherwise show the appropriate State codes.

6. Claims involving shortage, theft and pilferage, or robbery from "piggyback" traffic should be identified by placing a 1 for TOFC, or a 2 for COFC, in Column I.

7. If necessary, attach extra pages following the format of the schedule. Lines and pages should be numbered consecutively.

Correction

In FR Doc. 73-15957 appearing on page 20852 in the issue of Friday, August 3, 1973, the following changes should be made:

1. On page 20854, the second line in paragraph 9, reading "other emergency transportation operat-" should be deleted.

2. On page 20854 in the third column, the date "1989" in the last line of the penultimate paragraph should read "1969".

3. In the table of contents on page 20856, in the entry for § 1310.31, the words "(Rule 30)" should read "(Rule 31)".

4. On page 20861, in the penultimate line of § 1310.5(a), "§ 1810.21" should read "§ 1310.21".

5. On page 20864, in § 1310.6(n)(1), the word "code" should be inserted after the words "and/or".

6. On page 20868, in § 1310.7(n)(4), in the fourth line of the first Note 1 the word "be" should read "the".

7. On page 20868, in § 1310.7(p)(3) the word "tariff" should read "traffic".

8. On page 20873, in the seventh line of § 1310.10(f)(1), insert the mark ↓ before the words "or(R)".

9. On page 20875, in § 1310.10(j)(8), the word "or" in the fifth line should read "of".

10. On page 20876, in § 1310.13(c), the word "of" in the 14th line should read "or".

11. On page 20893, in § 1310.28(h)(6), the word "staff" in the second line should read "tariff".

STANDARDS FOR GRADES OF CANNED APRICOTS AND CANNED SOLID-PACK APRICOTS

Second Notice of Proposed Rule Making

A notice of proposed rule making to revise the United States standards for grades of canned apricots (7 CFR 52.2641–52.2657) and a notice of proposed rule making to promulgate separate standards for canned solid-pack apricots was published in the FEDERAL REGISTER of April 26, 1972, 37 FR 8389 and 37 FR 8395, respectively. After consideration of all relevant matters pertaining to the proposals and in view of the changes which have been proposed, the U.S. Department of Agriculture desires further consideration by interested parties.

These grade standards are issued under authority of the Agricultural Marketing Act of 1946 (Sec. 205, 60 Stat. 1090, as amended; 7 U.S.C. 1624) which provides for the issuance of official U.S. grades to designate different levels of quality for the voluntary use by producers, buyers, and consumers. Official grading services are also provided for under this Act upon request of the applicant and upon payment of a fee to cover the cost of such services.

All persons who desire to submit written data, views, or arguments in connection with the proposals should file the same in duplicate not later than October 1, 1973, with the Hearing Clerk, U.S. Department of Agriculture, Room 112, Administration Building, Washington, D.C. 20250. All written submittals made pursuant to this notice will be available for public review at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

NOTE.—Compliance with the provisions of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act, or with applicable State laws and Regulations.

STATEMENT OF CONSIDERATION LEADING TO THE SECOND PROPOSALS

The Canners League of California, representing a large number of the canners of apricots, requested that the USDA amend the United States Standards for Grades of Canned Apricots to allow Canned Solid-Pack Apricots to be assigned score points commensurate with the actual quality level, for color, defects, and character, while maintaining the present grade restriction.

The current grade standards include the Canned Solid-Pack apricots with the regular pack but restrict the solid-pack to the Grade C score point range as well as a maximum grade classification of Grade C Solid-pack. This pack is used only for remanufacturing purposes.

A study performed by the Department during the processing season of 1971 indicated that quality levels higher than the current maximum Grade C classification were being packed.

On the basis of this study, the Department proposed grade standards for canned solid-pack apricots separate from the regular pack. In addition, two quality levels above Substandard were proposed, the highest to be designated as U.S. Grade B or U.S. Choice. The Department felt that with separate standards and by reflecting a higher quality above Grade C through a grade designation as well as score points, the marketing of canned solid-pack apricots would be better served.

Formal objections to this approach were filed by the California Canners League on the grounds that:

(1) The addition of a "Grade B" classification is not wanted by canners and is also reportedly objected to by buyers.

(2) The difference between solid-pack apricots and the regular pack is not sufficient to adopt separate standards.

The California Canners League again requested the solid-pack portion of the current standards be modified to reflect a higher quality level by increasing the score points allotted to the applicable quality factors but retaining the currently restricted grade designation. To comply with this request would require assigning score points for the applicable quality factors for solid-pack apricots in the Grade B and Grade A classification while there are no such classifications for this type of pack.

The Department contends that since a Grade B or Grade A classification does not or would not exist for solid-pack apricots, it would be misleading to use the same score point ranges above Grade C for the solid-pack as are used for the regular pack.

In an informal discussion with the California Canners League it was decided the following would be proposed:

(1) Separate grade standards would be promulgated for solid-pack apricots as an appendix to the grade standards for the regular pack;

(2) A higher quality level would be reflected for the solid-pack through score points only, using a separate scoring system from the regular pack;

(3) The current restriction to the Grade C classification would be retained;

(4) The requirements for the various quality factors for the Grade C classification would remain unchanged; and

(5) A standard sample unit size to determine compliance with quality requirements would be included.

The California Canners League stated they had no objections to the proposed revision of the grade standards for canned apricots (regular pack) except for the exclusion of the solid-pack.

In reviewing that proposal and the current grade standards, however, it was found that the style of "mixed pieces of irregular sizes and shapes" is permitted to be assigned score points in the Grade A classification for the applicable quality factors while there is no such classification for this style. It is restricted to a top quality level of U.S. Grade B. Therefore, the Department proposes to realign the score points for this style to reflect a quality higher than Grade B by score points only.

The factor of color is not scored for canned spiced apricots in the current grade standards. In the past the spices used caused a rather marked change in the color of the product. Packers now are using mostly spice oils which cause little if any change in the finished product. Therefore, the Department is proposing to score the factor of color for canned spiced apricots, taking into consideration any effect the added spices may contribute.

No other changes from the first proposal of April 26, 1972, are proposed.

No other comments were received regarding the aforementioned proposals.

The proposed revision is as follows:

PRODUCT DESCRIPTION, STYLES, AND GRADES

Sec.
52.2641 Product description.
52.2642 Styles.
52.2643 Grades.

LIQUID MEDIA, FILL OF CONTAINER, DRAINED WEIGHTS, & FILL WEIGHTS

52.2645 Fill of container.
52.2646 Recommended minimum drained weights.
52.2647 Recommended minimum fill weights.

SAMPLE UNIT SIZE

52.2648 Sample unit size.

FACTORS OF QUALITY

52.2649 Ascertaining the grade.
52.2650 Ascertaining the rating for the factors which are scored.
52.2651 Color.
52.2652 Uniformity of size and symmetry.
52.2653 Defects.
52.2654 Character.

ALLOWANCES FOR QUALITY FACTORS

52.2655 Allowances for quality factors.

LOT INSPECTION AND CERTIFICATION

52.2656 Ascertaining the grade of a lot.

SCORE SHEET

52.2657 Score sheet.

APPENDIX

APPENDIX—United States Standards for Grades of Canned Solid-Pack Apricots.

AUTHORITY: §§ 52.2641–52.2657 issued under Sec. 205, 60 Stat. 1090, as amended; 7 U.S.C. 1624.

PRODUCT DESCRIPTION, STYLES, AND GRADES

§ 52.2641 Product description.

(a) *Canned apricots.*—"Canned apricots" is the product represented as defined in the Standards of Identity for canned apricots (21 CFR 27.10) issued pursuant to the Federal Food, Drug, and Cosmetic Act, and prepared in one of the styles specified in § 52.2642; in one of the liquid media specified in § 52.2644; and is sealed in a container and so processed by heat as to prevent spoilage.

The food may be seasoned with one or more of the optional ingredients permitted in the aforementioned standards of identity.

§ 52.2642 Styles.

(a) "Halves" are pitted apricots cut approximately in half along the suture from stem to apex.

(b) "Slices" are pitted apricots cut into thin sectors or strips.

(c) "Whole" is unpitted apricots with stems removed.

(d) "Mixed pieces of irregular sizes and shapes" are cut apricot units that are predominantly irregular in size and shape which do not conform to a single style or which are a mixture of two or more of such styles.

(e) When the apricots are unpeeled the name of the style is preceded or followed by the word "unpeeled."

(f) When the apricots are peeled, the name of the style is preceded or followed by the word "peeled."

§ 52.2643 Grades.

(a) "U.S. Grade A" or "U.S. Fancy" is the quality of halves, slices, and whole canned apricots, that:

(1) Have similar varietal characteristics;

(2) Have normal flavor and odor;

(3) Have at least a reasonably good color that scores not less than 17 points;

(4) Are at least reasonably uniform in size and symmetry for the applicable styles except for limits of off-suture cuts in the style of halves;

(5) Are reasonably free from defects;

(6) Have at least a reasonably good character; and

(7) For those factors which are scored in accordance with the scoring system outlined in this subpart the total score is not less than 90 points.

(b) "U.S. Grade B" or "U.S. Choice" is the quality of canned apricots of any style that:

(1) Have similar varietal characteristics;

(2) Have a normal flavor and odor;

(3) Have at least a reasonably good color;

(4) Are at least fairly uniform in size and symmetry for the applicable styles except for the limits of off-suture cuts in the style of halves;

(5) Are at least reasonably free from defects;

(6) Have at least a reasonably good character; and

(7) For those factors which are scored in accordance with the scoring system outlined in this subpart the total score is not less than 80 points.

(c) "U.S. Grade C" or "U.S. Standard" is the quality of canned apricots of any style that:

(1) Have similar varietal characteristics;

(2) Have a normal flavor and odor;

(3) Have at least a fairly good color;

(4) Are at least fairly uniform in size and symmetry for the applicable style;

(5) Are at least fairly free from defects;

(6) Have at least a fairly good character; and

(7) For those factors which are scored in accordance with the scoring system outlined in this subpart the total score is not less than 70 points.

(d) "Substandard" is the quality of canned apricots that fail to meet the requirements of U.S. Grade C.

LIQUID MEDIA, FILL OF CONTAINER, DRAINED WEIGHTS AND FILL WEIGHTS

§ 52.2644 Liquid media and Brix measurements.

"Cut-out" requirements for liquid media in canned apricots are not incorporated in the grades of the finished product since sirup or any other liquid medium, as such, is not a factor of quality for the purposes of these grades. The designations of liquid packing media and the Brix measurements, where applicable, are as follows:

Designations	*Brix measurement*
"Extra heavy sirup" or "Extra heavy apricot juice sirup".	25° or more but not more than 40°.
"Heavy sirup" or "Heavy apricot juice sirup".	21° or more but less than 25°.
"Light sirup" or "Light apricot juice sirup".	16° or more but less than 21°.
"Slightly sweetened water" or "Slightly sweetened apricot juice".	Less than 16°.
"In water"	Not applicable.
"In apricot juice"	Not applicable.
"Artificially sweetened"	Not applicable.

§ 52.2645 Fill of container.

The standard of fill of container for canned apricots is the maximum quantity of the apricot units which can be sealed in the container and processed by heat to prevent spoilage, without crushing or breaking such ingredient. Canned apricots that do not meet this requirement are "Below Standard in Fill."

§ 52.2646 Recommended minimum drained weights.

(a) *General.*—(1) The minimum drained weight recommendations for the various styles in Table II are not incorporated in the grades of the finished product since drained weight, as such, is not a factor of quality for the purposes of these grades.

(2) The recommended minimum drained weights are based on equalization of the product 30 days or more after the product has been canned.

(b) *Definitions of symbols.*—(1) $\bar{X}_d$—the minimum average drained weight of all the sample units in the sample.

(2) LL—Lower limit for the drained weight of an individual sample unit.

(c) *Method for ascertaining drained weight.*—The drained weight of canned apricots is determined by emptying the contents of the container, turning the pit cavities down in halves upon a U.S. Standard No. 8 circular sieve of proper diameter containing 8 meshes to the inch (0.0937-inch ± 3 percent, square openings) so as to distribute the product evenly, inclining the sieve slightly to facilitate drainage, and allowing to drain for two minutes. The drained weight is the weight of the sieve and apricots less the weight of the dry sieve. A sieve 8 inches in diameter is used for the equivalent of No. 3 size cans (404 x 414) and smaller, and a sieve 12 inches in diameter is used for containers larger than the equivalent of the No. 3 size can.

(c) *Compliance with recommended minimum drained weights.*—A lot of canned apricots is considered as meeting the minimum drained weight recommendations if the following criteria are met:

(1) The average of the drained weights from all the sample units in the sample meets the recommended average drained weight (designated as $\bar{X}_d$ in Table II; and

(2) The number of sample units which fail to meet the recommended minimum drained weight for individuals (designated as LL) in Table II does not exceed the applicable acceptance number specified in Table I.

TABLE I.—SINGLE SAMPLING PLAN FOR DRAINED WEIGHTS

§ 52.2647 **Recommended minimum fill weights.**

(a) *General.*—The minimum fill weight recommendations for the various styles in Table III are not incorporated in the grades of the finished product since fill weight, as such, is not a factor of quality for the purposes of these grades.

(b) *Method for ascertaining fill weight.*—The fill weight of canned apricots is determined in accordance with the U.S. Department of Agriculture's U.S. Standards for Inspection by Variables and the U.S. Standards for Determination of Fill Weights.

(c) *Definitions of terms and symbols.*—"Subgroup means a group of sample units representing a portion of a sample. $\bar{X}_{min}$ means the minimum lot average fill weight. $LWL_{\bar{X}}$ means the lower warning limit for subgroup averages. $LRL_{\bar{X}}$ means the lower reject limit for subgroup averages. LWL means the lower warning limit for individual fill weight measurements. LRL means the lower reject limit for individual fill weight measurements. $\bar{R}'$ means a specified average range value. R_{max} means a specified maximum range for a subgroup.

(d) *Compliance with recommended fill weights.*—Compliance with the recommended fill weights for canned apricots shall be in accordance with the acceptance criteria specified in the U.S. Department of Agriculture's U.S. Standards for Inspection by Variables and U.S. Standards for Determination of Fill Weights.

SAMPLE UNIT SIZE

§ 52.2648 **Sample unit size.**

Compliance with requirements for the various quality factors is based on the following sample unit sizes:

(a) Halves—50 halves.

(b) Whole—25 whole apricots. In the case of the factors of color and defects only with respect to minor defects a whole apricot shall be considered halved along the suture and each half therefrom is a unit and the sample unit size thereby becomes 50 halves.

(c) Slices—50 slices.

(d) Mixed pieces of irregular sizes and shapes—30 ounces drained fruit of finished product or 33 ounces raw fruit for in-plant control.

FACTORS OF QUALITY

§ 52.2649 **Ascertaining the grade.**

(a) *General.*—In addition to considering other requirements outlined in the standards, the following quality factors are evaluated:

(1) *Factors not rated by score points.*—(i) Varietal characteristics.

(ii) Flavor and odor.

(2) *Factors rated by score points.*—The relative importance of each factor which is scored is expressed numerically on the scale of 100. The maximum number of points that may be given such factors are:

	Halves, slices, whole	Mixed pieces of irregular sizes and shapes
	Points	*Points*
(i) Color	20	20
(ii) Uniformity of size & symmetry	20	
(iii) Defects	30	40
(iv) Character	30	40
Total score	100	100

(b) *Definition of flavor and odor.*—"Normal flavor and odor" means that the canned apricots are free from objectionable flavors and objectionable odors of any kind.

§ 52.2650 **Ascertaining the rating for the factors which are scored.**

The essential variations within each factor which is scored are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor which is scored is inclusive (for example, "18 to 20 points" means 18, 19, or 20 points).

§ 52.2651 **Color.**

(a) *General.*—(1) The color of canned apricots refers to the characteristic color of the outer, uncut surfaces of the units; and the varying degrees of pale yellow areas, light greenish-yellow areas, and light green areas.

(2) In evaluating the factor of color for canned spiced apricots consideration is given to any effect the added spices may contribute to the color.

(b) *Definitions.*—(1) *Well colored.*—Well colored means that the units have a bright typical color characteristic of well-matured apricots. The units may have pale yellow areas not exceeding one-fourth of the outer surface area and are free from brown color due to oxidation, improper processing, or other causes.

(2) *Reasonably well colored.*—Reasonably well colored means that the units have a color typical of reasonably well matured apricots. The units may have pale yellow areas not exceeding one-half of the outer surface area or may have light greenish-yellow areas not exceeding one-fourth of the outer surface area and are free from brown color due to oxidation, improper processing, or other causes.

(3) *Fairly well colored.*—Fairly well colored means that the units have a typical color characteristic of fairly well matured apricots. The units may have pale yellow areas, may have light greenish-yellow areas not exceeding one-half of the outer surface area, or have light green areas not exceeding one-fourth of the outer surface areas. The units may have a slight brown color due to oxidation, improper processing, or other causes.

(4) *Poorly colored.*—Poorly colored means that the units have light greenish-yellow areas exceeding one-half of the outer surface area, or light green areas exceeding one-fourth of the outer surface area, and/or may have more than a slight brown color due to oxidation, improper processing, or other causes.

(c) (*A*) *classification.*—Halves, slices, and whole canned apricots that possess a good color may be given a score of 18 to 20 points. "Good color" means that the apricots are well colored; the sample unit as a mass is practically uniform in color, and the number of units that may be reasonably well colored does not exceed the number specified for the style in § 52.2655.

(d) (*B*) *classification.*—Halves, slices, and whole canned apricots that possess a reasonably good color may be given a score of 16 to 17 points. Canned apricots of these styles that score 16 points shall not be graded above U.S. Grade B, regardless of the total score for the product (this is a limiting rule). Canned apricots of mixed pieces or irregular sizes and shapes that have at least a reasonably good color may be given a score of 16 to 20 points. "Reasonably good color" means that the apricots are at least reasonably well colored; the sample unit as a mass is reasonably uniform in color; and the number of units that may be fairly well colored does not exceed the number specified for the style in § 52.2655.

(e) (*C*) *classification.*—Canned apricots of any style that possess a fairly good color may be given a score of 14 or 15 points. Canned apricots that fall into this classification shall not be graded above U.S. Grade C, regardless of the total score for the product (this is a limiting rule). "Fairly good color" means that the apricots are fairly well colored; the sample unit as a mass is fairly uniform in color, and the number of poorly colored units does not exceed the number specified for the style in § 52.2655.

(f) (*SStd*) *classification.*—Canned apricots that fail to meet the color requirements for Grade C may be given a score of 0 to 13 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.2652 **Uniformity of size and symmetry.**

(a) *General.*—The factor of uniformity of size and symmetry for the style of slices is not based on any detailed requirement and is not scored; the other three factors (color, defects, and character as applicable) are scored and the total is multiplied by 100 and divided by 80, dropping any fractions to determine the total score. Uniformity of size and symmetry for the styles of halves and whole pertains to the percent by which the weight of the largest full-sized unit exceeds the weight of the smallest full-sized unit, and the number of off-suture cuts and detached or partially detached pieces in the style of halves. A unit that possesses an off-suture cut and is scoreable as such and in addition possesses a partially detached piece is scoreable either as an off-suture cut or a partially detached piece but not both.

(b) *Definitions.*—(1) *Off-suture cut.*—"Off-suture cut" in the style of halves means a halved unit which has been cut at a distance from the suture greater than one-fourth inch at the widest measurement from the suture.

(2) *Detached piece.*—Detached piece is a piece in the style of halves which has the appearance of a slice resulting from an off-suture cut or improper cutting that is completely separated from the half from which cut.

(3) *Partially detached piece.*—A partially detached piece in the style of halves, is a piece which has the appearance of a slice resulting from an off-suture cut or improper cutting and is detached more than one-third the length of the half along the suture or approximately parallel with the suture.

A partially detached piece, together with the unit to which it is attached is considered as one unit.
